Infrastructure Bond Update

It appears that ongoing discussions among State Legislative leaders may result in an infrastructure bond proposal that could be considered in the State Senate as early as tomorrow. Metro staff and our advocacy team in Sacramento have been working closely with Legislative leaders to monitor these discussions. At this point in the process, there is a possibility that a measure would be put forth which allocates broad categories of funding and defers decisions on specific formulas by which to allocate those funds. Metro staff is concerned that this would not provide sufficient protection to ensure that Los Angeles County receives its fair share of funding. The attached document is being distributed today to the Los Angeles County legislative delegation in the Senate and Assembly.
