**I-405 Sepulveda Pass Improvements Project**

Media Relations has issued a news release announcing extended duration, 55-hour northbound I-405 freeway lane reductions between Montana Avenue and Getty Center off-ramp that begin Friday night, March 1, 2013. The I-405 Sepulveda Pass Improvements Project will reduce the northbound I-405 from five lanes to two to pave the future High-Occupancy Vehicle lane (HOV) and realign the I-405 in this area. Motorists are advised to anticipate potential delays when traveling through the 2.4-mile lane reduction area and take alternate northbound routes if necessary. For full details, please view the news release [here](#).
