EXECUTIVE SUMMARY

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed for the proposed Los Angeles County Metropolitan Transportation Authority's (Metro) C Line (Green) Extension to Torrance project (Project). The ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) E1527-13 and in accordance with the Metro Rail Design Criteria ([MRDC] Metro, 2019), Section 5.6.6 Hazardous Materials Investigation and Analysis.

A Proposed Project with two Options between Redondo Beach (Marine) Station and 190th street, the Trench Option and the Hawthorne Option, is being studied as part of the Draft Environmental Impact Report (EIR) in pursuant to California Environmental Quality Act (CEQA). The Proposed Project includes aerial/at-grade configuration and follows the existing Metro-owned Harbor Subdivision railroad right-of-way (Metro ROW). Trench Option includes trench/at-grade configuration along Metro ROW. Hawthorne Option includes aerial configuration along I-405 and Hawthorne Boulevard. This report discusses Hawthorne Option. The analysis for Proposed Project and Trench Option is discussed in a separate report (DYA, 2022).

The Project limits consist of an approximately 4.5-mile long north-south corridor from existing Redondo Beach Metro Green Line Station to the Torrance Transit Park and Ride Regional terminal referred to as the Torrance Transit Center (TC). The project area includes portions of the Cities of Lawndale, Redondo Beach, and Torrance. There are two stations planned for Hawthorne Option at South Bay Galleria Station and Torrance TC.

The ESA is intended to provide environmental input regarding the potential presence of hazardous substances (including petroleum products) in, on, or at the project alignment that have potential to impact project construction activities. Such sites would be considered recognized environmental conditions (RECs) based on the guidelines and procedures of ASTM E1527-13. Any exceptions to or deletions from this practice have been described in Section 1.1 and Section 10 of this report.

The Phase I ESA revealed evidence of RECs within and adjacent to the Hawthorne Option limits that should be addressed as part of a Phase II subsurface investigation (SI) or using specifications as summarized in Table ES-1.

Several parcels may be impacted to accommodate the proposed Hawthorne Option. Evaluation of individual parcels was not part of this report. Parcel-specific ESAs to evaluate the presence or absence of hazardous materials are recommended for parcels (or portions thereof) that will be acquired as part of the proposed Hawthorne Option, if the Hawthorne Option is selected as part of the preferred alternative.

Table ES-1-1. Summary of Recs Within and Adjacent to Hawthorne Option

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
1	Voi-Shan Aerospace, Inc. (former), 4001 Inglewood Avenue, Redondo Beach	TPH, VOC, SVOC and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern along the Project disturb groundwater along the Hawthorne Option alignment between Marine Avenue and Manhattan Beach Boulevard.
2	Mobil Oil Corp (former), 3705 Inglewood Avenue, Redondo Beach	TPH, VOC and metals	Groundwater	Section 4.2	The site would be acquired. A Phase II SI is recommended to determine the status of the past release at the site.
3	Electra Media, Inc., 4737 W 156th Street, Redondo Beach	TPH, VOC	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to evaluate the existing subsurface conditions onsite.
4	Merrell Paint Co., Inc., 15624 Inglewood Avenue, Lawndale	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower, and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between Inglewood Avenue and Manhattan Beach Boulevard. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
5	Thrifty #257 16515 Hawthorne Boulevard, Lawndale	TPH, VOC, SVOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soil and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between 165th street and 166th street.
6	Arco #5107 16518 Hawthorne Boulevard, Lawndale	TPH, VOC, SVOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soil groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between 165th street and 166th street.
7	United Oil Co., 16926 S Hawthorne Boulevard, Lawndale	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment adjacent to the subject property.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
8	Chevron Company Pipeline Right-of-Way (former), 18900 Hawthorne Boulevard, Torrance	TPH, VOCs, VOCs, and metals.	Soil	Section 4.2	The site would be acquired. A Phase II SI is recommended to determine the status of the past release at the site.
9	Union Carbide Corporation (UCC), 19500 Mariner Avenue, Torrance	TPH, VOCs, VOCs, Dripolene, and metals.	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for noted contaminants of potential concern along the Hawthorne Option alignment adjacent to the subject property.
10	North Posse Site 3041 Del Amo Boulevard, Torrance	TPH, VOC, SVOC, ACM, metals, and methane	Soil, Soil Vapor, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, soil vapor, and groundwater (if disturbed) along the Hawthorne Option alignment between Prairie Avenue and Del Amo Boulevard for contaminants of potential concern. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
11	Former Amp-Matrix Facility 355-455 Maple Avenue, Torrance	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern, if the proposed construction results in groundwater disturbance along the Hawthorne Option alignment near the Torrance TC.
12	Exxon Mobil Oil Torrance Refinery, 3700 West 190 street, Torrance	TPH, VOC, SVOC, and metals	soil and groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) along the Hawthorne Option alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
13	The DOW Chemical Company 305 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the proposed construction results in groundwater disturbance at the proposed Torrance TC
14	Torrance/ Dowell Schlumberger, Inc 301 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils up to the proposed depth of disturbance for the contaminants of potential concern along the northern portion of the proposed Torrance TC.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
15	PPG Industries, Inc. 465 Crenshaw Boulevard, Torrance	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) at the proposed surface parking lot for noted contaminants of potential concern. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
16	Vought Aircraft Industries, Inc., 640 Alaska Avenue, Torrance	TPH, VOC	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower for contaminants of potential concern along the Hawthorne Option alignment in the southern end, adjacent to the proposed Torrance TC.
--	Hawthorne Option alignment	Herbicides, Pesticides, Treated Wood Waste, TPH, Metals	Soil	Section 7.2	A Phase II SI is recommended to evaluate shallow soils for potential contaminants of concern along the Metro ROW.
--	Existing Bridges	Asbestos Containing Material (ACM), Lead-based Paint (LBP)	Existing Bridge Bearing Pads, Hinge and Joint Seal materials, Coatings, Graffiti	Sections 7.1 & 7.2	Prior to disturbance of the existing bridge structures, ACM and LBP surveys are recommended as part of a Phase II SI.
--	Proposed Acquisitions for Hawthorne Option construction	Hazardous Materials	Soil	Section 2.2	Parcel-specific Phase I ESAs are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the proposed Hawthorne Option.
--	Hawthorne Option	Oil and gas pipelines	Soil	Section 4.3.3	It is recommended that where construction activities will disturb soil adjacent to the oil and gas pipelines, the soils be screened for hydrocarbon contamination prior to construction.
--	Hawthorne Option	LBP, Chromium	Yellow Thermoplastic Striping	Section 7.2	Yellow Thermoplastic Striping materials should be handled in accordance with Caltrans Standard Specifications (Caltrans, 2018a) and the corresponding Standard Special Provisions (SSPs) (Caltrans, 2018b).

Note(s): 1. Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-4.

1. INTRODUCTION

1.1. REPORT PURPOSE

The ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) E1527-13 and in accordance with the Metro Rail Design Criteria (MRDC) (Metro, 2019), Section 5.6.6 Hazardous Materials Investigation and Analysis.

The intent of this ESA is to evaluate the presence or likely presence of hazardous substances (including petroleum products) in, on, or at a site that has potential to impact project construction activities. The U.S. Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) was used as a basis of general procedures followed in preparation of this ESA but was not explicitly applied. The AAI references the ASTM Designation E1527, "Standard Practice for Environmental Project Site Assessments: Phase I Environmental Property Assessment Process," for conducting the AAI. The purpose of a Phase I ESA, according to ASTM, is to identify recognized environmental conditions (REC), controlled RECs (CREC), and historical RECs (HREC) with regard to a commercial real estate transaction of a specific parcel of land. Definitions for REC, CREC, and HREC are summarized, as follows, for ease of reference:

RECs are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. A CREC is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls; ASTM, 2013). An HREC is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls) (ASTM, 2013).

In contrast to a Phase I ESA for a commercial real estate transaction, the purpose of this assessment was limited to the identification of potential impacts of hazardous substances during the construction of a transportation project. Because of the scale of transportation projects like the Proposed Project, it is often not possible or practical to conclusively determine the standard to which sites with documented past releases have been remediated. This limitation generally precludes distinguishing between REC, CREC, and HREC. Therefore, for the purpose of this assessment, only the REC classification was used for sites with known or suspected presence of hazardous materials that could impact the Proposed Project. Section 8 of this report summarizes any identified RECs that may be a potential environmental concern to the Proposed Project.

1.2. STUDY METHODOLOGY

The relevant findings of this study were obtained from a desktop review of readily available federal, state, and local references as well as other documents, with conclusions and recommendations based on these sources. No site reconnaissance was performed at the time of developing this report due to

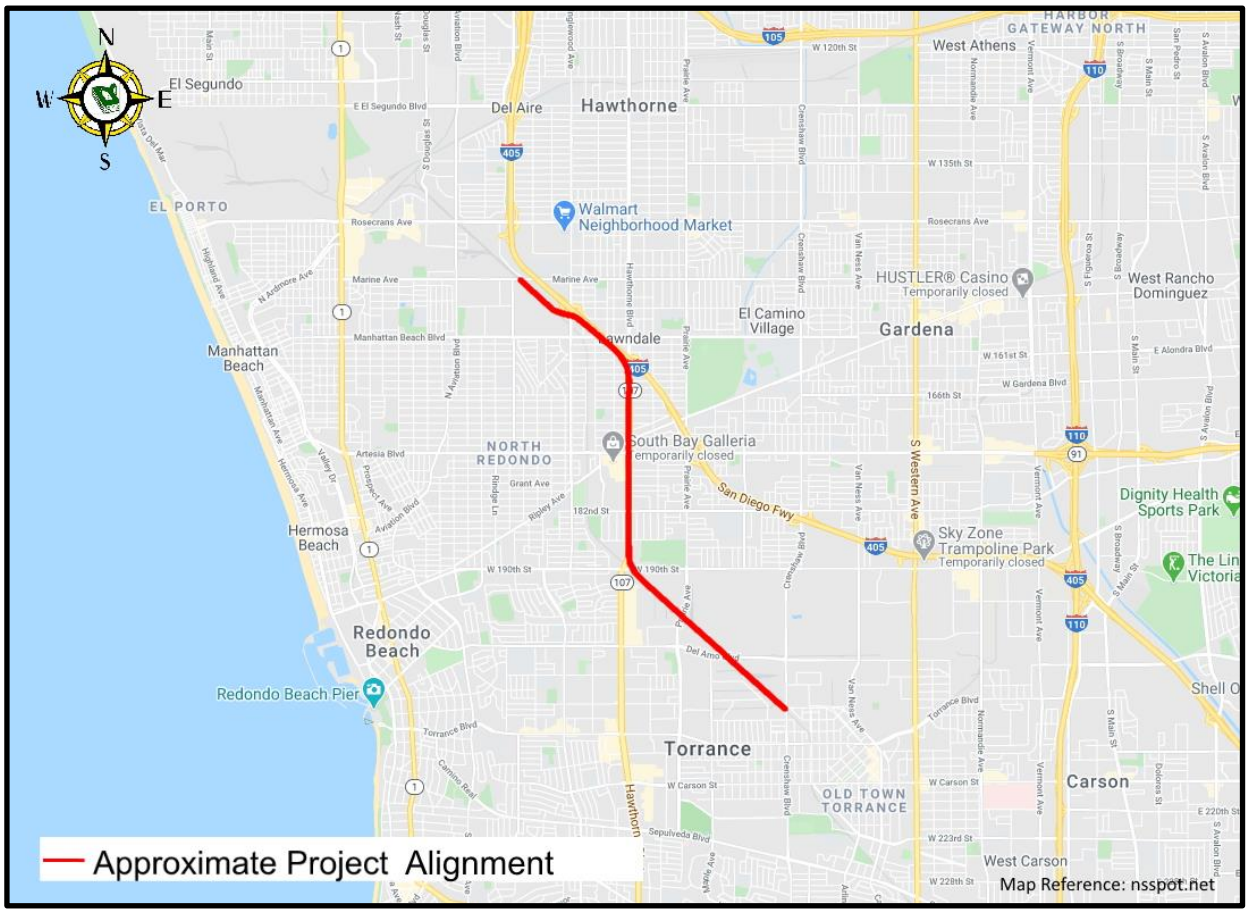
site access constraints. This study was not intended to represent an exhaustive examination of all the potential hazards that may have existed, but instead, was limited to identification of the significant potential impacts of hazardous substances during the construction of the Proposed Project.

In 2018, the Metro Board approved two alternatives recommended for further study in the Supplemental Alternatives Analysis Study. The Draft EIR evaluates the three alignments: Metro ROW Elevated/At-Grade alignment (approved for further study in 2018), Trench Option (included in Draft EIR based on community input), and Hawthorne Option (approved for further study in 2018). For the purposes of CEQA, Metro must define one of the three alignments as the Proposed Project. The Metro ROW Elevated/At-Grade Alignment is referred to as the Proposed Project in the Draft EIR and this document as it is alignment that has been studied and advanced over the years. This term does not convey any preference or recommendation. Metro staff will prepare a recommendation in Spring 2023 based on findings from the Draft EIR, public comments made during the comment period, technical analysis, stakeholder input, and other factors such as cost, ridership, and project objectives. This report discusses Hawthorne Option. The analysis for Proposed Project and Trench Option is discussed in a separate report, Appendix 3-9-A, Phase I ESA - ROW (DYA, 2022).

1.3. PROJECT LOCATION

The project limits consist of an approximately 4.5-mile long north-south corridor from existing Redondo Beach (Marine) Metro Green Line Station to the Torrance Transit Park and Ride Regional terminal referred to as the Torrance Transit Center (TC) located in the Los Angeles County as shown in Figure 1-1. The project area includes portions of the Cities of Lawndale, Redondo Beach, and Torrance.

Figure 1-1. Vicinity Map



Source: Google Maps, 2021

1.4. RESOURCE STUDY AREA

The Resource Study Area (RSA) for Hazards and Hazardous Materials varies from a quarter-mile to one-mile radius around the project footprint based on specific search distances within federal, state, and local environmental databases. The project footprint, also referred to as the Project ROW in this report, is defined as the area necessary to construct, operate, and maintain the Proposed Project.

1.5. HAWTHORNE OPTION DESCRIPTION

The Hawthorne Option is entirely elevated. The alignment would begin at the southern end of the existing Redondo Beach Marine station and would leave the Metro ROW to run south parallel to I-405 between Inglewood Avenue and Hawthorne Boulevard. The alignment would continue in an aerial configuration along the center of Hawthorne Boulevard between 162nd Street in Lawndale and 190th Street in Torrance. Just south of 190th Street, the aerial alignment rejoins the Metro ROW. The elevated South Bay Galleria Station would be located south of Artesia Boulevard adjacent to the South Bay Galleria. South of 190th Street, the alignment is the same as the Proposed Project, including the Torrance Transit Center Station. The Hawthorne Option alignment overview is shown on Figure 1-2.

1.5.1. Alignment

The Hawthorne Option would begin at the existing Redondo Beach (Marine) Station, where the existing tracks and station are aerial. The Hawthorne Boulevard elevated alignment is approximately 2.7 miles in length, and crosses multiple streets (shown in Figure 1-2). The alignment starts within the Metro ROW, then leaves Metro's ROW to run along Interstate 405 (I-405) and turns onto Hawthorne Boulevard near 162nd Street to travel in the center median of the street before rejoining the Metro ROW south of 190th Street. A station would be located in the median of Hawthorne Boulevard, south of Artesia Boulevard, adjacent to the South Bay Galleria. Near 186th Street, the alignment would turn southeast to rejoin the Metro ROW. South of 190th Street, the alignment is the same as the Proposed Project.

1.5.2. Stations

The Hawthorne Option proposes a station south of Artesia Boulevard adjacent to the South Bay Galleria. The terminus station at the Torrance TC is the same as the Proposed Project. The stations would follow Metro's Systemwide Station Design Criteria, and share common elements such as canopy design, signage, communications equipment, fare collection equipment, shelters, and safety and security systems. All the stations are proposed as a center-platform configuration, allowing passengers to access trains from either direction from the same platform. The station platforms would be capable of accommodating three-car trains and would allow level-boarding and full accessibility to comply with the Americans with Disabilities Act (ADA).

Metro station design guidelines allow elements of variability to respond to the character of the surrounding community and promote a sense of place, safety, and walkability. Further details about each station and the areas they serve are provided in this section.

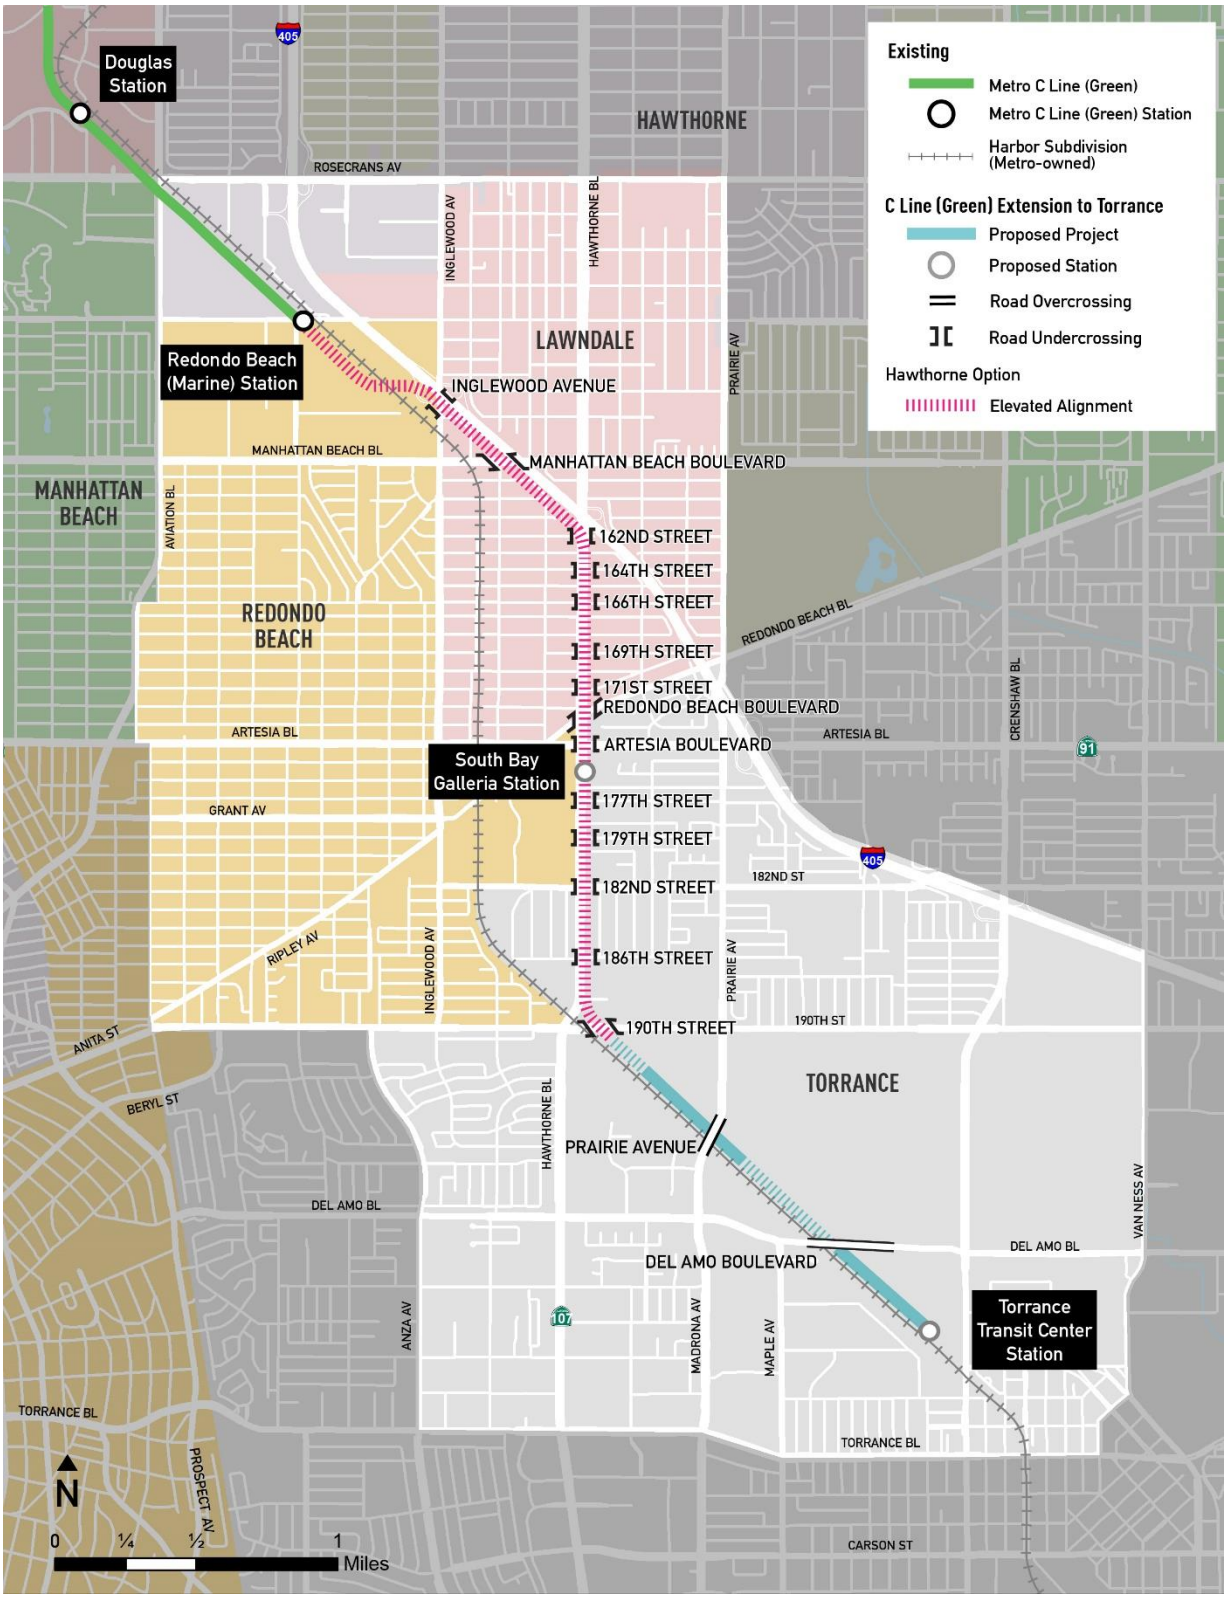
South Bay Galleria Station

This elevated station (shown on Figure 1-2) would be located in the median of Hawthorne Boulevard approximately halfway between Artesia Boulevard and 177th Street, featuring a center platform. This station would be located in Redondo Beach, along the border with Torrance.

Torrance TC Station

The Torrance TC Station is south of 190th Street and thus identical to the Proposed Project described in Appendix 3.9-A, Phase I ESA - ROW.

Figure 1-2. Hawthorne Option – Overview



Source: STV, 2020

Metro

1.5.3. Vehicles

Light rail transit vehicles would be designed for Automatic Train Operations and compatible with those currently used on existing Metro light rail lines. These vehicles are typically six-axle, double ended and articulated, and can be combined in trains up to three cars in length. The light rail would operate at speeds of up to 65 miles per hour and would carry approximately 200 seated passengers on a three-car train. The light rail vehicles would be configured with a driver's cab at either end so that the train could run in either direction without the need to turn around.

1.5.4. Supporting Facilities

Multiple additional elements are required to support light rail vehicle operations, including an overhead contact system (OCS), traction power substations (TPSS), and communications and signaling buildings.

- **OCS** – An OCS is a network of overhead wires that distributes electricity to light rail vehicles. The OCS poles would be approximately 25 feet tall, generally located between the two light rail tracks and spaced 90 to 170 feet apart. In some locations, the poles would be located on both sides of the tracks.
- **TPSS** – TPSS supply the electricity for light rail operations by receiving high voltage power from utility companies and converting the power to direct current for distribution to the light rail vehicles. The TPSS are enclosed structures that would be spaced approximately one mile apart along the alignment. Between four and six TPSS would be needed for each alternative, with access provided to each via maintenance roadways from the nearest public street.
- **Communications and Signaling Buildings** – Communications and signaling buildings house train control and communications equipment and would be located at each station as well as at each grade crossing. These facilities are typically constructed as enclosures either underneath the station platforms or as small standalone structures along the guideway.

1.6. SCOPE

The scope of this study is intended to identify hazardous materials/waste information including methane gas to help Metro in selection of preferred alternative. The study area is generally limited to the Hawthorne Option and consisted of the following:

- Conducting historical research related to the use, storage, disposal, or release of hazardous materials or petroleum hydrocarbons within the Hawthorne Option alignment based on property records, public records, and aerial photographs;
- Reviewing environmental databases and regulatory agency information available to the public for the Hawthorne Option alignment and adjoining properties;
- Performing a site reconnaissance (access not granted at the time of assessment); and
- Preparing this report with figures showing the REC sites.

Parcel-specific ESAs for parcels (or portions thereof) that will be acquired as part of the Hawthorne Option are not part of the scope of this ESA. This assessment did not include a lien and title search and meeting with regulatory agency staff and persons having knowledge and usage of proposed acquisition sites to characterize the past activities, which are typically tied to a specific parcel and therefore is recommended to be conducted, where necessary, during parcel-specific studies. The recommendations to gather additional data necessary to support the completion of the environmental clearance process is

summarized in Section 8. The study is conducted following general guidelines of ASTM E1527-13 and the data gaps identified during the study are noted in Section 9 of this report.

2. SITE DESCRIPTION

2.1. EXISTING STRUCTURES

Hawthorne Option would begin at the existing Redondo Beach Marine station and run south primarily along the median of the existing Hawthorne Boulevard up to 190th street and rejoin Metro ROW up to the Crenshaw Boulevard. The Hawthorne Option crosses the cities of Redondo Beach, Torrance, and Lawndale, which are served by freeway and arterial roadway systems. The project area (SR-107 or Hawthorne Boulevard) runs north-south through the project area in the Cities of Lawndale and Torrance. I-405 runs parallel to the east of the project alignment, SR-91 bisects the project area in an east-west direction along Artesia Boulevard. Major arterial roadways in the project area include the following:

East-West

- Manhattan Beach Boulevard
- Artesia Boulevard
- 190th Street
- Del Amo Boulevard
- Torrance Boulevard

North-South

- Inglewood Avenue
- Hawthorne Boulevard
- Prairie Avenue
- Crenshaw Boulevard

2.2. POTENTIAL RIGHT-OF-WAY ACQUISITIONS

Multiple parcel acquisitions are anticipated to accommodate the Hawthorne Option. The final list of parcel acquisitions was not available at the time of the assessment; and therefore, was not included in this report. Parcel-specific Phase I ESAs are not part of the scope of this ESA and are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the Hawthorne Option, if the Hawthorne Option were selected as part of the preferred alternative.

2.3. ADJACENT LAND USE

Based on a review of existing available aerial maps (Environmental Database Resource, Inc. [EDR], 2020b), the Hawthorne Option corridor is in a highly urbanized area with a mix of residential neighborhoods; educational facilities; recreational, commercial, industrial, community centers; transportation corridor; and other urban uses. See Table 2-1 for adjacent land use summary.

Table 2-1. Adjacent Land Use Summary

Extent	Adjacent Land Usage	
	East	West
Redondo Beach TC to Manhattan Beach Boulevard	Freeway running parallel to the Hawthorne Option alignment, educational facility, hotels, retail businesses, and residential units.	Primarily Industrial facilities including Northrop Grumman Aerospace systems, Commercial retail, and wholesale business.
Manhattan Beach Boulevard to 190th Street	I-405 Freeway, primarily commercial businesses with a mix of retail businesses, gas stations, restaurants, and residential units, and auto dealerships.	Primarily commercial businesses with a mix of residential facilities, retail businesses and shopping mall.
190th Street to Torrance TC	Heavy industrial area with large warehouses, storage units, oil refineries, and chemical plants. At the proposed Torrance TC, the land is currently undeveloped. Multiple above ground storage tanks are present in the southern portion for the project that are part of chemical plans and oil refineries.	Moderate to heavy industrial developments including auto shop, manufacturing plants, retail businesses, oil refineries. There appears to be an undeveloped vacant land between Prairie Avenue and Del Ammo Boulevard which appeared to be portion of former Dominguez reservoir.

2.4. GEOLOGY

The Hawthorne Option lies within the Los Angeles Coastal Plain on western portions of the Torrance Plain and eastern portions of the El Segundo Sand Hills near the northwestern boundary of the Peninsular Ranges Geomorphic Province of California. The Los Angeles Coastal Plain is within the Los Angeles Basin, a broad structural depression bounded by the Santa Monica Mountains and Puente Hills to the north, and the Santa Ana Mountains and San Joaquin Hills to the east.

The local geology under the Hawthorne Option consists of Quaternary deposits that are composed of the 1,400-foot-thick, lower Pleistocene-aged San Pedro Formation; the 1,000-foot-thick upper Pleistocene-aged Lakewood formation and older sand dunes; and approximately 300 feet of Holocene-aged alluvium capped by a 60-foot-thick veneer of aeolian deposits of the El Segundo sand dunes (California Department of Water Resources, 1961). The Quaternary deposits are underlain by Tertiary marine sedimentary rock.

The San Pedro Formation is primarily stiff clay and silt with interbeds of sand and gravel. The Lakewood Formation is dense to very dense sand, clayey sand, silty sand interbedded with very stiff to hard silty to sandy clay and clayey silt. The El Segundo sand dunes are primarily composed of medium dense to very dense, medium- to coarse-grained sand with some silt and silty sand (CGS, 1998a, b).

2.5. TOPOGRAPHY

The US Geological Service (USGS) 7.5-minute topographic maps for Redondo Beach, Venice, Inglewood, and Torrance quadrangles are provided in Appendix B. Along the northern extent of the Hawthorne Option from approximately Marine Avenue to approximately 1,000 feet south of Manhattan Beach Boulevard, the topography is relatively flat with an approximate maximum grade of 0.5%to the east. From approximately 1,000 feet south of Manhattan Beach Boulevard to the southern end of the project area near Crenshaw Boulevard, the topography near the alignment consisted of sand dune mounds that range from 200 to 2,000 feet across and 10 to 50 feet high. The ground surface elevation varied from approximately 60 feet to 125 feet above mean sea level (MSL).

2.6. HYDROLOGY

Groundwater data available from the County of Los Angeles Department of Public Works (LADPW) groundwater monitoring wells, California Department of Water Resources (DWR, 2004), Metropolitan Water District of Southern California (MWD, 2007), Water Replenishment District of Southern California (WRD, 2008), boring logs in the project vicinity (Caltrans, 1957, 1959, 1960a-d, 1961a-b, 1989, 1990, 1995, DYA, 2010), and the historical high groundwater level presented in the California Geological Survey (CGS, 1998a, b) seismic hazard zone report were reviewed.

The Proposed Project lies entirely over the West Coast Groundwater Basin, an 800- to 2,000-foot-thick aquifer composed of up to approximately 200 feet of alluvium, 300 feet of the Lakewood Formation, and 1,000 feet of the San Pedro Formation (MWD, 2007). The Charnock and Newport-Inglewood faults act as partial groundwater barriers on the eastern side of the basin, and the Pacific Ocean forms the western boundary. Groundwater within the basin is generally confined, with an unconfined Holocene and Pleistocene-aged semi perched aquifer near the surface with a maximum thickness of 60 feet (DWR, 2004; MWD, 2007). Groundwater contour maps show groundwater elevations of the confined aquifer under the Hawthorne Option Alignment extent to be approximately 5 to 10 feet below MSL, which corresponds to approximately 105 to 110 feet bgs (WRD, 2008). Generally, the groundwater flows from

west to east because of a sea water intrusion injection barrier near the coast and a pumping depression inland (MWD, 2007).

The historically highest groundwater levels along the Hawthorne Option range from approximately 30 feet to 50 feet bgs (CGS, 1998a and b). Based on data from review of environmental subsurface investigations described in Section 4.2, the depth to shallow groundwater generally ranges from approximately 20 to 30 feet bgs beneath the northern portion down to 60 to 80 feet bgs beneath the southern portion. The gradient direction of shallow groundwater varies locally.

3. HISTORICAL LAND USE

The objective of consulting historical sources is to develop a history of previous uses along Hawthorne Option and adjoining sites to assist in identifying the likelihood of past uses having led to RECs in connection with the subject property (ASTM, 2013). For this ESA, historical topographic maps, aerial photographs, historical city directories, and Sanborn reports were reviewed to help evaluate the historical land usage. The findings of a review of each of the historical sources are presented in Sections 3.1 through 3.4, and a historical land usage summary is presented in Section 3.4.

3.1. HISTORICAL TOPOGRAPHIC MAPS

The USGS Topographic Maps listed in Table 3-1 were used to assess the land use and topographic history of the project area and surrounding areas.

Table 3-1. Historical Topographic Maps

Quadrangle	Map Year	Scale
Redondo	1896	1:62,500
Torrance, Inglewood	1924	1:24,000
Inglewood	1930	1:24,000
Inglewood	1934	1:24,000
Torrance	1934	1:20,000
Torrance	1941	1:24,000
Redondo	1948	1:50,000
Inglewood, Venice	1950	1:24,000
Redondo Beach, Torrance, Inglewood	1951	1:24,000
Redondo Beach, Torrance, Inglewood	1952	1:24,000
Redondo Beach, Inglewood, Torrance, Venice	1963	1:24,000
Redondo Beach, Inglewood, Torrance, Venice	1964	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	1972	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	1981	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	2012	1:24,000

The mapped sections of the historical USGS topographic maps reviewed for this ESA were obtained from Environmental Data Resources, Inc. (EDR; 2020a). Copies of the representative historical topographic maps are provided in Appendix B. A summary of the land use and topographic history presented in the historical topographic maps for the Hawthorne Option alignment is presented below.

1896: Land adjacent to the Hawthorne Option alignment was largely undeveloped. The Redondo Railway crossed the Hawthorne Option approximately three-quarters of a mile south of the current alignment of Redondo Beach Boulevard. Hawthorne Boulevard had yet to be constructed. Topographic features of note consist of low hills to the southwest of the Hawthorne Option. The surface gradient generally descended towards the northwest.

1924: Sparse rural residential development along the Hawthorne Option alignment had increased compared to the topography maps from 1896, especially in the portion of the Hawthorne Option alignment that extends from the Inglewood Avenue to approximately one-half mile south of the Pacific Electric railway alignment. As depicted in 1924 topo map, Hawthorne Avenue had been constructed to the current alignment of 190th Street, including a newly constructed line of the Pacific Electric Railway. The old Redondo Railway had been renamed the Pacific Electric Railway. Two lines of the Pacific Electric Railway converge approximately a quarter-mile west of the Hawthorne Option at the intersection of the Proposed Project and 182nd Street. A small residential community, El Nido, had developed west of the Proposed Project between the current alignment of 182nd Street and 186th street. South of 190th Street, the land around the Hawthorne Option remained largely undeveloped, except for the Dominguez Reservoir, which is located approximately 0.25 miles southwest of the Hawthorne Option in the City of Torrance, and for the Pacific Electric Car Shops within the City of Torrance. Site topography remained largely unchanged from the 1896 map.

1930 - 1934: Residential land development along the Hawthorne Option alignment continued to increase significantly from Inglewood Avenue to 190th Street. Along the stretch of the Hawthorne Option alignment from Inglewood Avenue to 190th Street, land usage was largely residential and commercial. South of 190th Street, the Hawthorne Option alignment converged with the newly constructed ATSF railway tracks that run from the Proposed Project's northern terminus in Redondo beach to Inglewood Avenue, and to 190th Street to the southern terminus in Torrance. Additionally, approximately 17 above ground storage tanks belonging to the general petroleum tank farm were observed approximately 0.6 miles northeast of the Metro ROW near the southern terminus of the Hawthorne Option alignment in Torrance. Site topography remained largely unchanged from the 1924 map.

1941: Residential land development along the Hawthorne Option alignment generally continued to increase, especially residential development between Inglewood Blvd and 190th Street. Site topography remained largely unchanged from the 1930 to 1934 maps.

1948: Development adjacent to the Hawthorne Option alignment generally continued to increase, especially residential and commercial development. In general, both sides of the Hawthorne Option alignment are shaded for urban development from Manhattan Beach Boulevard to Redondo Beach Boulevard. Riverside Boulevard had now changed its name to Redondo Beach Boulevard. Development of oil wells was noted within half a mile northeast of the Hawthorne Option alignment at the northern terminus of the Hawthorne Option, as well as in between 190th Street and the southern terminus in the City of Torrance. Site topography remained largely unchanged from the 1941 maps.

1950 - 1952: Land development generally continued to increase along the Hawthorne Option alignment. Both sides of the Hawthorne Option alignment are shaded for urban development from Manhattan Beach Boulevard to Redondo Beach Boulevard. New oil wells, oil tanks, and oil sumps were noted as close as 0.3 miles to the northwest of the project alignment at the northern terminus of the Hawthorne Option. A significant increase in oil production facilities adjacent to the Metro ROW was noted northeast

of the Metro ROW between 190th Street and the Proposed Project's southern terminus in the city of Torrance. A new oil refinery facility was constructed adjacent to the Hawthorne Option alignment along an approximately 0.8-mile-long stretch of the existing ATSF rail lines. The newly constructed oil refinery facility included new refinery structures and oil tanks, some of which were located immediately adjacent to the Hawthorne Option. Additionally, the oil tank farm located constructed approximately 0.6 miles northeast of the Hawthorne Option near the southern terminus of the project alignment was noted to have double the number of tanks as first noted in the 1934 map. Site topography remained largely unchanged from the 1948 maps.

1963 - 1964: Land development increased significantly along the Hawthorne Option, including residential, commercial, industrial, and transportation infrastructure development. The project alignment was shown as Hawthorne Boulevard in 1963 topo map. The San Diego Freeway (i.e., Interstate 405) had been constructed since the 1950-1952 maps were prepared. New industrial development is depicted west-to-northwest of the northern terminus of the Hawthorne Option alignment. Lawndale high school had been constructed approximately 0.25 miles northwest of the Hawthorne Option alignment at the northern terminus, adjacent to the oil wells that had been constructed in that location in the 1950-1952 maps. The Hawthorne Option alignment is roughly adjacent to I-405 from the Hawthorne Option's northern terminus to Hawthorne Boulevard. The South Bay Shopping center had been constructed between Artesia Boulevard and Edison Street west of the Hawthorne Option. South of 190th Street, oil refinery infrastructure north-east of the Hawthorne Option had greatly increased, with numerous tanks and structures located adjacent to and within half-mile of the existing ATSF railway tracks. Industrial development was added west of the Hawthorne Option near the southern terminus. Site topography remained largely unchanged from the 1950-1952 maps except for the South Bay Shopping Center, which had been graded to a level grade.

1972: Land usage increased slightly along the Hawthorne Option compared to the 1963-1964 maps. Additional commercial and industrial development increased adjacent to the Hawthorne Option alignment from the Proposed Project's northern terminus to Inglewood Avenue. The previously noted oil wells adjacent to Lawndale High School had been removed prior to the development of the 1972 map. Development adjacent to the Hawthorne Option between Inglewood Avenue and 190th Street had largely ceased. South of 190th Street, few new structures had been added within the oil refinery northeast of the Hawthorne Option. However, new commercial and industrial buildings adjacent to the Hawthorne Option located southwest of the existing ATSF rail line had been constructed. Site topography remained largely unchanged from the 1963-1964 maps.

1981: Land usage along the Hawthorne Option slightly increased compared to the 1971 maps. New commercial structures had been constructed adjacent to the Hawthorne Option alignment between the Hawthorne Option's northern terminus and current day Inglewood Avenue. Prairie Avenue had been newly constructed south of 190th Street and now intersects with the Hawthorne Option alignment south of 190th Street. More new commercial buildings had been constructed southwest of the Metro ROW nearby the Proposed Project terminus within the City of Torrance. Site topography remained largely unchanged from the 1972 maps.

2012: Land usage increased slightly along the Project ROW compared to the 1981 maps. Display of structures was not available in the 2012 maps, therefore the extent to which new development had proceeded is difficult to assess. The alignment of the previously noted ATSF railway line had been removed prior to the production of the 2012 map. Site topography remained relatively unchanged from the 1981 map.

3.2. HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs obtained from EDR (2020b) were reviewed for the Hawthorne Option corridor land use history. The dates, scale, and source of the photos reviewed are shown in Table 3-2.

Table 3-2. Historical Aerial Photographs

Flight Year	Scale	Source
2016, 2012, 2009, 2005	1” = 875’, 1” = 1125’	USDA/NAIP
2002	1” = 875’, 1” = 1125’	USDA
1994	1” = 875’, 1” = 1125’	USGS/DOQQ
1985, 1989	1” = 875’, 1” = 1125’	USDA, USGS
1983	1” = 875’, 1” = 1125’	EDR Proprietary Brewster Pacific
1980	1” = 875’	USGS
1979	1” = 875’, 1” = 1125’	EDR Proprietary Brewster Pacific
1977	1” = 1125’	EDR Proprietary Brewster Pacific
1976	1” = 875’	Teledyne
1970	1” = 875’	EDR Proprietary Brewster Pacific
1963	1” = 875’, 1” = 1125’	USGS
1954, 1952	1” = 875’, 1” = 1125’	USDA
1947	1” = 875’, 1” = 1125’	FAIR
1938	1” = 875’, 1” = 1125’	USDA
1928	1” = 875’, 1” = 1125’	FAIR

Note(s):

USDA = U.S. Department of Agriculture
USGS = U.S. Geological Survey
DOQQ = Digital Orthophoto Quarter Quads
NAIP = National Agriculture Imagery Program

Copies of the historical aerial photographs reviewed for this ESA are provided in Appendix C, and a summary of the land use history presented in the historical aerial photographs of the Hawthorne Option is presented below.

1928: The proposed Hawthorne Option generally coincides with the alignment of the ATSF line between the Hawthorne Option’s northern terminus and the intersection of the Hawthorne Option with Inglewood Avenue. Land usage between the Hawthorne Option’s northern terminus and Inglewood Avenue was largely agricultural, with little evidence of land development. Land development adjacent to the Hawthorne Option between Inglewood Avenue and Hawthorne Avenue (now Hawthorne Boulevard) consisted of scattered residential development and agriculture. A portion of a railway line appears to exist between the northbound and southbound automobile traffic lanes in the middle of Hawthorne Boulevard until the intersection of Hawthorne Boulevard and the current alignment of Redondo Beach Boulevard. The Hawthorne Option from approximately 164th Street to 190th Street appears to be as the current day alignment of Hawthorne Boulevard. Land development along Hawthorne Boulevard between 164th Street and the Pacific Electric Railway line (i.e., the current alignment of Redondo Beach Boulevard) consisted of scattered residential and agricultural development. South of Redondo Beach Boulevard and 190th Street, land development was primarily agricultural. Aerial photography of the Metro ROW south of 190th Street was largely not available at the time the 1928 aerial photographs

were taken, though existing aerial photography shows largely agricultural land as the Hawthorne Option converges with the ATSF railway line south of 190th Street.

1938: Development from the Hawthorne Option's northern terminus to Inglewood Avenue remained largely unchanged, with much of the land use staying largely agricultural. Residential development along the Hawthorne Option between Inglewood Avenue and The Pacific Electric Railway (i.e., the current alignment of Redondo Beach Boulevard) appears to have increased, with less land use dedicated to agriculture. The railway tracks that ran down the middle of Hawthorne Boulevard in the 1928 set of aerial photographs appear to have been dismantled. South of the Pacific Electric Railway line (i.e., the current alignment of Redondo Beach Boulevard), land development was largely agricultural, with the exception of the small residential community of El Nido, located immediately west of the Hawthorne Option between the current alignment of 182nd and 186th Street. South of 190th Street, land use remained largely agricultural, with the exception of a series of oil tanks and a small oil refinery located as close as 528 feet north-east of the existing ATSF railway line. The Dominguez Reservoir located approximately quarter-mile southwest of the Hawthorne Option, had been constructed and appears to be unlined and open to the atmosphere.

1947: Land development between the Hawthorne Option's northern terminus and Inglewood Avenue remains largely unchanged from that of the 1938 photograph. Residential land usage adjacent to the Hawthorne Option between Inglewood Avenue and Redondo Beach Boulevard had greatly increased, with very little evidence of remaining agricultural land. Land development adjacent to the alignment south of Redondo Beach Boulevard remained largely agricultural; however, some scattered residential and commercial development outside of the El Nido community had been constructed. South of 190th Street, land use adjacent to the Hawthorne Option was largely agricultural and industrial. Development of oil refining and storage facilities northeast of the Hawthorne Option along the existing ATSF railway line had significantly expanded compared to the 1934 aerial photographs, with new facilities located adjacent to the railway tracks along a 0.8 mile stretch of the Hawthorne Option between Del Amo Boulevard and 190th Street. The Dominguez Reservoir appears to have been lined with concrete sometime after the 1938 photographs were taken. South of Del Amo Boulevard, land use appears to be largely agricultural until the Proposed Project's southern terminus in the City of Torrance.

1952: Land usage from the Hawthorne Option's northern terminus to Inglewood Avenue still appears to be primarily agricultural. Residential and commercial development adjacent to the Project ROW from Inglewood Avenue to Redondo Beach Boulevard had expanded significantly. Construction along the center of Hawthorne Boulevard appears to have divided the road into two northern and two southern travel lanes from Artesia Boulevard northwards, with empty land existing where the railroad tracks used to be in the 1928 set of aerial photographs. Construction of the Green School located one block east of the Project ROW between 168th and 170th Streets had been completed. South of Redondo Beach Boulevard, residential land development along the Project ROW to 190th Street appears to have noticeably increased, with four new residential sub developments appearing along Hawthorne Boulevard with scattered remaining agricultural development. South of 190th Street oil refinery and development infrastructure greatly increased compared to the 1947 set of aerial photographs.

1954: Aerial photography along the Hawthorne Option from the Hawthorne Option's northern terminus to Manhattan Beach Boulevard was unavailable for this set of aerial photographs. Residential development along the Hawthorne Option alignment from Manhattan Beach Boulevard to 190th Street continued to increase, with most of the new residential development occurring in the area of the Hawthorne Option alignment between Redondo Beach Boulevard and 190th Street. The oil refinery and

storage facilities south of 190th Street continued to expand, with a large increase in new facilities located along the far eastern edge of the oil refinery site along Crenshaw Boulevard. New industrial or commercial development was observed adjacent to the Hawthorne Option south of Del Amo Boulevard in the vicinity of the Proposed Project's southern terminus in the City of Torrance.

1963: Active construction of the San Diego Freeway (currently I-405) was observed adjacent to the Hawthorne Option between the Proposed Project's northern terminus and Hawthorne Boulevard. Active land development and construction was observed south of the Hawthorne Option from the Proposed Project's northern terminus to Inglewood Avenue. Residential and commercial development adjacent to the Hawthorne Option between Inglewood Avenue and Redondo Beach Boulevard has continued to expand and appears to be largely completed similar to existing conditions at the time these aerial photographs was taken. The South Bay Shopping Center, a mall located immediately adjacent to the Hawthorne Option along Hawthorne Boulevard south of Artesia Boulevard, had finished construction and consisted of a large retail structure and extensive parking. Land development along the Hawthorne Option south of Redondo Beach Boulevard continued to consist of primarily residential and commercial construction, with little agricultural land development remaining. Land development adjacent to the Hawthorne Option south of 190th Street continued to expand, primarily with new Industrial and Commercial development located southwest of the existing ATSF line in the City of Torrance. No further development of the oil refineries and storage facilities northeast of the Project ROW was noted; however, new industrial and commercial development was located adjacent to the Proposed Project south of Del Amo Boulevard to the terminus in the City of Torrance.

1970: New industrial and commercial development adjacent to the Hawthorne Option increased southwest of the project alignment between the Hawthorne Option's northern terminus and Inglewood Avenue had been completed since the 1963 photographs were taken. Construction of Interstate 405 had been completed since the 1963 photographs were taken. Residential and commercial development adjacent to the Hawthorne Option between Inglewood Avenue and Redondo Beach Boulevard appears to have largely ceased, except for scattered isolated new structures. No aerial photography adjacent to the alignment was available south of Redondo Beach Boulevard.

1976: No aerial photography was available along the project alignment north of 190th Street for this year. South of 190th Street, industrial and commercial development adjacent to the Project ROW increased significantly. The park and baseball diamond located approximately quarter-mile south of the intersection of the Hawthorne Option and 190th Street had been replaced with new industrial and distribution facilities. Construction of Prairie Avenue from 190th Street southward had been completed, with the intersection of Prairie Avenue overcrossing the Metro ROW along the ATSF line. Some of the oil refinery and storage facilities northwest of the Project ROW between 190th Street and Del Amo Boulevard had been dismantled when compared to the 1963 photos; however, most of the tanks adjacent to the Metro ROW remained. Development of commercial facilities immediately south of the Proposed Project between Prairie Avenue and the southern terminus had significantly increased between 1963 and 1976.

1977: No aerial photography was available along the Hawthorne Option alignment between I-405 and Prairie Avenue. Land usage between I-405 and 190th Street did not change significantly when compared to the 1970 photographs, with the exception of isolated new buildings.

1979: New industrial and commercial development adjacent to the Hawthorne Option between the Hawthorne Option's northern terminus and Inglewood Avenue had been constructed. A miniature golf

course had been constructed adjacent to the terminus between the Hawthorne Option and I-405, replacing a former industrial lot. Land usage along the Hawthorne Option between I-405 and 190th Street remained largely unchanged from the 1970 and 1977 aerial photographs. No aerial photography was available south of 190th Street.

1980: Land usage remained largely unchanged along the Proposed Project between 190th Street and the southern terminus in the City of Torrance. No aerial photography was available along the Project ROW between the Proposed Project's northern terminus and 190th Street.

1983: Land usage along the Hawthorne Option remained largely unchanged. New industrial and commercial development south of the Hawthorne Option between the northern terminus and Inglewood Avenue had been constructed. Little new development was observed along the Hawthorne Option between Inglewood Avenue and Prairie Avenue. Aerial photography along the alignment was not available south of Prairie Avenue.

1985: New residential construction was observed to have appeared along the land that had been previously cleared between 170th Street and Artesia Boulevard in the 1970 photographs.

1989: Land usage along the Hawthorne Option remained largely unchanged. The Redondo Torrance Mini Storage had been constructed along the Hawthorne Option at the intersection of the Hawthorne Option and Inglewood Avenue. The South Bay Shopping Center appears to have undergone expansion when compared to the previous sets of photographs. Development of industrial and commercial facilities south of 190th Street appears to have expanded, including an expansion of the oil refineries and storage facilities adjacent to the Hawthorne Option between Prairie Avenue and Del Amo Boulevard. One feature to note is that the Dominguez Reservoir seems to have been either buried or filled in, as new industrial facilities appear to have replaced the site of the Dominguez Reservoir. Industrial and commercial facilities adjacent to the Hawthorne Option are located immediately southwest of the Metro ROW between 190th Street and Prairie Avenue, and additionally between Del Amo Boulevard and the Proposed Project's southern terminus in the City of Torrance.

1994: Land usage along the Hawthorne Option remained largely unchanged between the 1989 aerial photographs and the 1994 aerial photographs. New construction of industrial developments adjacent to the Proposed Project between 190th Street and Prairie Avenue had been completed southwest of the existing rail line.

2002: Land usage along the Hawthorne Option remained largely unchanged compared to the 1994 aerial photography set. Little new development appeared along the Hawthorne Option, with the exception of new isolated individual buildings.

2005: Land usage along the Hawthorne Option remained largely unchanged compared to the 2002 aerial photography set. Little new development appeared along the Hawthorne Option, with the exception of new isolated individual buildings.

2009: Land usage along the Hawthorne Option remained largely unchanged compared to the 2005 aerial photography set. Little new development appeared along the Hawthorne Option, with the exception of new isolated individual buildings.

2012: Land usage along the Hawthorne Option remained largely unchanged compared to the 2009 aerial photography set. Little new development appeared along the Hawthorne Option, with the exception of

new isolated individual buildings. The South Bay Shopping Center appears to have expanded slightly compared to the 2009 aerial photography set.

2016: Land usage along the Hawthorne Option remained largely unchanged compared to the 2012 aerial photography set. Little new development appeared along the Hawthorne Option, with the exception of new isolated individual buildings.

3.3. HISTORICAL SANBORN MAPS

A search of historical Sanborn library fire insurance maps covering the project alignment was conducted by EDR (2020c) to evaluate the overall historical project land use. Sanborn maps were not identified for the project alignment. The copies of historical certified Sanborn Map reports provided by EDR are presented in Appendix D.

3.4. HISTORICAL CITY DIRECTORIES

City directory reports are used as a screening tool to identify potential environmental concerns within the Hawthorne Option from past land-use activities. The EDR-City Directory Abstract (EDR, 2020d) was researched for the project alignment. The complete results of the city directory search are presented in Appendix E. Detailed discussion of city directory review was not considered practical or pertinent to the objectives of this assessment and is therefore not provided in this report. Historical environmental concerns were considered adequately researched from other sources for this report.

3.5. HISTORICAL LAND USE SUMMARY

The Hawthorne Boulevard portion of the Hawthorne Option alignment appears to have been a roadway right-of-way since at least 1930s with the area adjacent to the Hawthorne Option alignment being largely undeveloped at that time. From the 1920s, the area northwest of the Hawthorne Option Alignment in El Segundo was developed into oil facilities by Standard Oil Company along with oil well activities in the general area. The Pacific Electric railroad activities were observed on the southern terminus of the Proposed Project, adjacent to proposed Torrance Transit Center. In the late 1920s, the current ExxonMobil refinery started to develop, along with oil well activity in the general area. In 1930s, oil facilities near the southern end of the Hawthorne Option increased. In 1940s and 1950s, the area northeast of the current day Redondo Beach Station was used by Oil companies. In the 1960s, I-405 was constructed and the area east and west of the northern portion of the Hawthorne Option was developed into commercial and industrial areas. The South Bay Shopping Center was also developed in the 1960s. In 1970s the area between 190th Street and Crenshaw Boulevard was developed into heavy industrial area. Otherwise, both sides of the central portion of the Hawthorne Option alignment between Manhattan Beach Boulevard and 190th Street was developed for current residential use with gradually increasing density from the 1920s through the 1970s.

Potential sources of hazardous materials that could impact the Hawthorne Option identified during a review of historical topographic maps, historical aerial photographs, and historical Sanborn maps were generally limited to the following:

> Potential hazardous substances associated with the properties within and adjoining the railroad ROW;

> Potential presence of hydrocarbon contamination at location that were or have been used as oil refining or distribution facilities in the vicinity of the Hawthorne Option.

> Potential asbestos-containing materials (ACM) and lead-based paint (LBP) in structures within the project ROW built prior to 1989; and

> Potential presence of aerially deposited lead (ADL) within unpaved soils adjacent to Hawthorne Option.

Conclusions and recommendations regarding the hazardous substances are presented in Section 8.

4. RECORDS REVIEW

4.1. ENVIRONMENTAL DATABASE REVIEW

The purpose of the environmental database review is to obtain and review public records to identify RECs that might impact proposed Hawthorne Option activities. The records were reviewed to obtain environment-related information and the history of activities at the Hawthorne Option corridor or adjoining properties that could impact the Hawthorne Option. The database information for facilities listed by regulatory agencies as potential environmental concerns was obtained through EDR in April 2020 and is presented in Appendix F. Due to the length of the Hawthorne Option corridor, the study area was geographically divided into three continuous segments to order EDR records search to facilitate the assessment, evaluation, and organization of the large volume of data generated for the Hawthorne Option corridor. However, for this report, the data is presented in its entirety for the approximately 4.5-mile Proposed Project corridor using the Hawthorne Option alignment in the north.

A general search radius of one mile beyond the Hawthorne Option footprint was specified for EDR's use in identifying nearby sites registered under hazardous materials/wastes databases that could potentially impact the Hawthorne Option. EDR-generated sites were reviewed within the standard search distance for each environmental database specified by ASTM D1527-13 that pertains to the objective of this assessment, which was to evaluate the potential impacts of hazardous substances that might be encountered in the soil and/or groundwater during the construction of the project improvements. The ASTM search distance for each environmental database is presented in Table 4-1. The sites identified as RECs based on a review of the available records are summarized in Section 4.2.

The information obtained for the review is gathered in a corridor format with environmental database records collected along the alignment with a general search radius of one mile beyond the project alignment. Due to the length of the project corridor, the study area was geographically divided into three linear segments to facilitate the assessment, evaluation, and organization of the large volume of data generated for the project corridor. However, for this report the data is presented in its entirety for the approximately 4.5-mile project corridor.

4.2. RECOGNIZED ENVIRONMENTAL CONDITIONS

Upon review of environmental database records, sites that are potential RECs were identified based on a preliminary, first pass, review. Such sites were evaluated in depth to determine the extent of past release(s) at a site, remedial actions completed/ongoing, the status of the site condition and potential to impact the Proposed Project and Hawthorne Option (See Appendix J for details). This review process is used to determine RECs that are discussed in Table 4-2 and the approximate locations of the REC sites are shown on Figure 4-1 through Figure 4-4.

Table 4-2. Summary of RECs

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
1	Voi-Shan Aerospace, Inc. (former)	4001 Inglewood Avenue, Redondo Beach	875 feet, north	ENVIROSTOR, HIST CORTESE, RCRA-LQG, CPS-SLIC, CERS HAZ WASTE, SWEEPS UST, HIST UST, CA FID UST, LUST	This site is a former Voi-Shan Aerospace Fastener manufacturing facility, constructed in 1970 and occupied until 1991. The 8-acre site was redeveloped as commercial property in 1993. Depth to shallow ground water is approximately 25 to 30 feet bgs and estimated to be flowing northwest, which is generally parallel to the Proposed Project. (Waterstone, 2018.) Deep groundwater zone is encountered at 175 to 200 feet bgs and estimated to be flowing easterly, in opposite direction to the shallow zone. (Waterstone, 2019.) Site assessment began in 1986 when a leaking underground solvent storage tank was removed. Previous assessments identified that the groundwater beneath the site was contaminated with VOCs including 1,1,1 trichloroethane (TCA), trichloroethene (TCE), 1,2-dichloroethane (DCE) and perchloroethylene (PCE). Site cleanup was initiated in 1992. Remediation actions including soil vapor extraction and groundwater pump-and-treat was conducted from 1992 to 1996 and again from 2001 to 2008. 6,000 cubic feet of contaminated soil was removed from the site in 1993 (Envirosolve, 2008). Completion of the excavation of contaminated soil was verified by analyzing approximately 300 soil samples for TPH, VOC, and metals. Groundwater contamination plume was shown to be generally following the shallow groundwater direction. (Waterstone, 2018). Currently, groundwater monitoring and further evaluation is underway to verify if groundwater contamination is naturally attenuating or will require additional active remediation. VOC concentrations in the groundwater has increased from 2020 and have remained high during past two groundwater monitoring events (RWQCB, 2022a). Onsite and offsite groundwater monitoring is ongoing to observe contamination levels (Waterstone, 2022). Therefore, the site is considered a REC if the construction of the Hawthorne Option extracts groundwater along between Marine Avenue and Manhattan Beach Boulevard.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
2	Mobil Oil Corp (former)	3705 Inglewood Avenue, Redondo Beach	On site	LOS ANGELES CO. HMS, HWTS, HAZNET, CHMIRS, HIST UST, LUST, HIST CORTESE, SWEEPS UST, CA FID UST	The site is a former Mobile service station and currently occupied by Chevron gas station. In 2003, three USTS and associated piping were removed. Groundwater at the site ranged from approximately 20 to 26 feet bgs and estimated to flow west-northwest (Kleinfelder, 2009) which is towards and parallel to the Metro ROW. There were past releases at site that contaminated soil and groundwater beneath the site. The existing total petroleum hydrocarbon contamination was delineated to approximately 20 feet south of the building and vertically extend to 15 feet bgs. Quarterly groundwater monitoring began in October 1990 and continued through April 2009. The contaminant concentrations found in groundwater beneath the site showed to decrease over the time. RWQCB stated that the residual hydrocarbon concentrations in the soil beneath the site should not cause direct contact concerns as all soil sample results are below their respective USEPA screening levels. RWQCB issued case closure as there is no threat to groundwater and stated monitoring wells and vapor extraction wells from within the site can be abandoned (RWQCB, 2009). The onsite wells were properly abandoned in 2010. Based on the residual contamination and the site being acquired for the Hawthorne option, a site-specific investigation including but not limited to Phase II SI is recommended prior to acquisition and project construction.
3	Electra Media Inc.,	4737 W 156th Street, Redondo Beach	Adjacent, south	ERNS	The site was listed on ERNS for an incident of release of motor oil and chemicals. There were no records available online indicating the amount of spill or clean up actions conducted. The site has been developed since at 1970s and is currently occupied by a building with paved surface for parking. A portion of the site would be acquired for the Proposed Project. Therefore, the site is considered a REC to the Hawthorne Option alignment.

4	Merrell Paint Co., Inc.	15624 Inglewood Avenue, Lawndale	100 feet, southwest	CPS-SLIC, HWTS, HAZNET, CERS, HIST UST, LUST, HIST CORTESE, SWEEPS UST, CA FID UST	The site is currently occupied by Eyedeal interiors and being used as a warehouse/ storage of flooring materials. The site was used a paint storage facility from at least 1970s till late 1990s. Site investigation conducted in 1989 indicated the presence of hydrocarbon contamination in soil likely released into the subsurface from a 4000-gallon UST that was used to store paint thinner (GCI, 1989). No records were available to determine the quantity of release. UST has been removed from the site in 1988. Subsequent investigations have identified TPH in groundwater samples and about 3 feet thick light non-aqueous phase liquid in onsite monitoring well MW-1. In October 1989, three groundwater monitoring wells were installed in effort to remove any free product and to monitor the contamination levels. Initial testing indicated dissolved concentrations of TPH as gasoline, PCE, TCE were detected at a maximum concentration of 8,470 ug/L, 46300 ug/L, and 41,200 ug/L, respectively. AEI report indicated that no chlorinated solvents have historically been identified as having been used or stored at the site and that the contamination is likely from an offsite source (AEI, 2020). The most recent groundwater samples collected at approximately 25 feet below ground surface (bgs) from onsite monitoring wells in April 2021 (AEI, 2021) yielded a maximum concentration of TPH, PCE and TCE of 140 ug/L, 130 ug/L and 140 ug/L. Sampling from upgradient offsite groundwater monitoring wells indicated concertation of TPH, PCE and TCE of 27ug/L, 100 ug/L, and 120 ug/L. The concentrations of PCE and TCE slightly exceed the drinking water maximum contaminant level of 5ug/L; however, there has been a substantial decrease in the contamination concentrations over the decades. RWQCB (2022b) indicated that historical remediation at the site and apparent attenuation over the past three decades has resulted in the cleanup or abatement of the waste and there are no contaminants remaining in soil that pose a threat to the groundwater. Residual contamination in soil and soil vapor is well below the standards to cause significant threat to the public or the environment. Cleanup to background levels is not technologically and economically feasible due to site conditions and remedial technologies. Therefore, RWQCB issued no further requirements for onsite soil contamination and a covenant and environmental restrictions limiting the site use to commercial applications. Groundwater contamination beneath the site will still be continued to be addressed under Regional Board oversight (RWQCB, 2022b). Based on the discussion and the shallow groundwater contamination, it is likely that the groundwater extracted during the project construction activities adjoining the subject site may have minor concentrations of residual contamination which needs to be properly

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
					disposed. Therefore, the site is considered a REC if the Proposed Project extracts groundwater along the Hawthorne Option alignment between Inglewood Avenue and Manhattan Beach Boulevard.
5	Thrifty #257	16515 Hawthorne Boulevard, Lawndale	Adjacent, west	LUST, CERS HAZ WASTE, CERS TANKS, CORTESE, HIST CORTESE, CERS, LUST, HIST CORTESE	The site was a former Thrifty service station facility, which was turned over to Atlantic Richfield in 1997 and then to Tesoro corporation in 2012. Three 10,000-gallon USTs were reportedly removed from the site in 1994 and three new USTs were installed. Assessments at the site indicated soil contamination from an unauthorized release at the site. Sampling performed post issuance of site closure in 1996 by RWQCB identified contamination concentrations in subsurface (SAIC, 2012). Groundwater was encountered at a depth of approximately 40 feet bgs (SAIC, 2012). Several investigations have been conducted at the site from 1986 through 2009 including onsite and offsite groundwater monitoring (Environmental Services, 2016). The site is currently open for remediation (Geo Tracker, 2020). Based on the site proximity, ongoing remediation, the site is considered a REC to the Hawthorne Option alignment.
6	Arco #5107	16518 Hawthorne Boulevard, Lawndale	Adjacent East	LUST, CERS HAZ WASTE, CERS TANKS, CORTESE, HIST CORTESE, CERS, LUST, HIST CORTESE	The site is an active gasoline service station operated by Arco. Records indicate that the release at the site contaminated soil and groundwater. Groundwater at the site was approximately 35 feet bgs with a varied flow towards west to northwest. Several phases of assessments and cleanup have been conducted at the site since 1989 including free product removal, groundwater pump and treat, vapor extraction. The site is still open for groundwater remediation (Geo Tracker, 2020). Based on the site proximity, ongoing remediation, the site is considered a REC if the construction of the Hawthorne Option alignment disturbs groundwater along between 165th and 166 street.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
7	United Oil Co.,	16926 S Hawthorne Boulevard, Lawndale	Adjacent east	UST, LUST, EDR HIST AUTO	The site has been a gasoline retail facility since 1990s. In 1996, site was developed to remove six single-walled 12,000-gallon UST system and replaced with four double-walled tanks at approximately same location where previous tanks existed. During site development activities, contaminated soil was observed underneath the tanks. Further assessment determined that the release contaminated onsite and offsite soil and groundwater. At the time of tanks replacement, approximately 190 cubic yards of soil was removed from onsite and limited liquid petroleum hydrocarbons were recovered. Groundwater was encountered at approximately 45 feet bgs and estimated to be flowing northeast. Additional air sparge and soil vapor extraction wells were installed as a part of remediation effort (SGI, 2006). The wells removed approximately 1,630 pounds of vapor phase hydrocarbons. Groundwater monitoring has been conducted at the site since 1999. However, RWQCB noted that plume have remained stable, contained, and anticipated to decrease over time. The records indicate that the free product and impacted soil were removed from the site. Site closure was issued based on the fact that the residual soil and groundwater contamination are unlikely to cause significant human health and environment risks via major pathways, such as direct contact, drinking water ingestion, and vapor intrusion (RWQCB, 2014). However, due to the fact that the residual contamination is in place and site has been under use as an active gas station, the site is considered a REC to the Proposed Project activities along the subject site.
8	Chevron Company Pipeline Right-of-Way (former)	18900 Hawthorne Boulevard, Torrance	On site	CPS-SLIC, CERS, CERS HAZWASTE	The site is currently occupied and used as a car dealer facility. The previous uses at the site resulted in the release of petroleum hydrocarbons to the subsurface contaminating onsite soils. Perched groundwater at the site was estimated to between approximately 55 and 60 feet bgs and is underlain by Bellflower Aquiclude of approximately 100 feet thick. The property south of the site was cut by about 10 feet during construction of 190 street. Groundwater beneath the perched zone was not impacted (Chevron, 1996). Majority of the impacted soil has been removed and the site have been capped; therefore, RWQCB determined that no further assessment or remediation is needed at the time (RWQCB, 1996). Based on the onsite residual contamination and the site being acquired for the Hawthorne option, a site-specific investigation including but not limited to Phase II SI is recommended prior to acquisition and project construction.

9	Union Carbide Corporation (UCC)	19500 Mariner Avenue, Torrance	Adjacent south	ENVIROSTOR, UST, VCP, CERS HAZ WASTE, SWEEPS UST, HIST CORTESE, DRYCLEANERS, HIST UST, CHMIRS, HWTS	The former, approximately 100 acres, UCC facility was built in 1956 for polyethylene manufacturing. The site also included an ethylene glycol blending, canning, and distribution operation; and a chemical and plastics receiving and distribution operation. The glycol production was demolished in 1969. Forty acres were sold for the Old Towne mall and K-Mart complex. The remaining facility operated until 1982, when the manufacturing operations were discontinued and much of the facility was decommissioned, sold, and redeveloped. In 2008, the terminal operations were shut down except for storage of raw materials supplied to the UCC latex production facility. In the past, facility was used for onsite disposal, and/or discharge to county sewer lines. Past activities at the site resulted in soils and groundwater contamination. The surface water and sediment in the bottom of the stormwater retention basin onsite was considered a media of concern. The potential chemicals of concern include the components of dripolene, VOCs, SVOCs, TPH and metals. Numerous investigations and remedial actions have been conducted since 1970s (Montogomery Watson, 2000). The facility is zoned for industrial use and was surrounded by industrial and commercial properties including Mobil oil refinery, paint manufacturers/ distributors, coolants, compressed air facilities. The site northeastern border is adjoining the Hawthorne Option. Perched groundwater at the site was encountered at approximately 55 feet bgs and the deeper aquifer at 90 feet bgs. The current, approximately 37 acres, facility operating as UCC Torrance Distribution Facility is a terminal and distribution center (URS, 2010). Ethylene glycol is now brought in by rail or truck and distribution continues. The facility consists of old and new bulk terminals, a distilled spirits plants, a concrete lined stormwater detention basin, and the heil separator. Facility also includes bulk storage, transfer, and blending of chemicals. The site has 56 ASTs, 8 USTs that are currently used to store chemical products onsite. One AST located near the eastern boundary of the facility is used to store wastewater collected from the heil separator. DTSC (2022a, b) letter indicates that portion of the subject site (Areas 1 and 2 as designated in remedial action plan), adjoining the Project ROW were impacted with DNAPL and benzene in perched groundwater and are currently under institution controls and ongoing remediation. Given the site's long-term use and storage of hazardous material and hazardous waste, chemical releases to subsurface, proximity to the site, ongoing remediation monitoring, the subject site is considered a REC to the Hawthorne Option alignment. Project activities involving disturbance to soil and groundwater adjoining the subject site are to be evaluated for chemicals of concern prior to construction.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
10	North Posse Site	3041 Del Amo Boulevard, Torrance	Adjacent, west	CPS-SLIC, CERS	The site consists of approximately 31 acres of predominantly undeveloped land with horse stables located on approximately 1.2 acres in the southeastern portion of the property. Historically the site was an out-parcel ancillary to the Torrance Oil refinery located at the 3700 W 190 street. The property was used as a borrow pit for construction of berms at the refinery site. Oil pipelines were observed on and adjacent to the property. (SCS, 2022). No oil production/ processing activities were conducted on the site; however, site was used for disposal of refinery wastes between the 1940s and 1960s in the northwest portion of the site. Several investigations at the site confirmed that disposal area has been contaminated with TPH, SVOCs, VOCs, ACM, and metals above regulatory screening levels. It is also indicated that the soil vapor has elevated concentrations of methane and VOCs, possibly from the groundwater contamination from potential offsite source located northeasterly to the site (SCS, 2018). Groundwater at the site was approximately 70 feet bgs and flows generally in a southwesterly direction. The site had oil pipelines on and adjacent to the property which were part of the refinery. The site has numerous groundwater monitoring wells associated with the refinery are present on the property primarily around the perimeter (SCS, 2018). In 2022, a workplan was prepared by SCS Engineers for additional assessment at the site (SCS, 2022). The facility is part of the oil refinery clean up and abatement program under the remedial action plan under the California Land Reuse and Revitalization Act. Based on the proximity to the site, historic use, existing conditions, and ongoing assessment, the site is considered a REC to the Hawthorne Option alignment. (See Map ID No. 11 for Mobil Refinery)

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
11	Former Amp-Matrix Facility	355-455 Maple Avenue, Torrance	600 feet, south	LUST, UST, HIST UST, SWEEPS UST, CA FID UST, SLIC	The site was formerly owned by Matrix Science Corporation and operated a manufacturing facility to produce electronic connectors between 1968 and 1988 on six contiguous parcels. The site was acquired by AMP, Inc., in 1998 and continued similar operations until the facility was bought by current user Tyco International which was later changed to Tyco Electronics Corporation. Portion of the property was subsequently sold to Lyons Kang maple LLC in 2007. Past site use had resulted in subsurface contamination at the site. Groundwater at the site was estimated to be at approximately 105 feet bgs and flowing south-southeast. Several phases of subsurface investigation and remedial actions related to VOCs have been conducted at the site including contaminated soil removal, soil vapor extraction and onsite and offsite groundwater monitoring. The offsite groundwater monitoring wells as part of interim remedial action plan are still ongoing under the oversight of RWQCB (Clark, 2020). Therefore, the site is considered a REC if the construction of the Hawthorne Option alignment involves groundwater disturbance between Del Amo Boulevard and the Torrance TC.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
12	Exxon Mobil Oil Torrance Refinery	3700 West 190 street, Torrance	Adjacent, east	ENVIROSTOR, VCP, CPS-SLIC, HIST UST, SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-LQG, CERS HAZ WASTE, CERS TANKS, US FIN ASSUR, 2020 COR ACTION, TRIS, ICIS, FTTS, US AIRS	This site occupies approximately 700 acres on the east of the existing railroad tracks bounded by 190th Street on the north, Van Ness Avenue on the east, Del Amo Boulevard on the south, and Prairie Avenue on the west. In addition, the refinery owned an approximate 29-acre triangular piece of land on the west of the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard, also referred to as North Posse Site (Refer Map ID#10). The site has been used as an oil refinery since at least the 1950s. Exxon Mobil owned the site until it was transferred to Torrance Refining Company in 2016. Past activities at the site resulted in hydrocarbon contamination to the soil and groundwater beneath the site. Groundwater was encountered at approximately 70 feet bgs, and perched groundwater was reportedly present at approximately 25 and 80 feet bgs with variable flow influenced by the lower-permeability perching layers (AECOM, 2020). The contamination appeared to have migrated off site to the southeast and southwest, from beneath the project footprint, based on a study by others. (AECOM, Assessment and remediation actions have been conducted including removal of soil, groundwater pump-and-treat, and soil vapor extraction. In addition, several groundwater monitoring wells were installed to monitor the contamination levels. (AECOM, 2020.) The site is still open for remediation monitoring of groundwater. (GeoTracker, 2022.) Therefore, the site is considered a REC for the construction of Hawthorne Option alignment that disturbs ground surface along the project alignment between Prairie Avenue and Del Amo Boulevard.
13	Torrance/ Dowell Schlumberger, Inc.	305 Crenshaw Boulevard, Torrance	Adjacent, south	SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-LQG, ENVIROSTOR, LUST, CERS HAZ WASTE, DRYCLEANERS, HIST CORTESE	The name on the EnviroStor indicates Hydro chem Industrial Services, Inc. It is noted in the summary that the facility has never been regulated as a TSDF facility and so was closed administratively. However, the site status indicated as inactive and needs evaluation as of 2018 (DTSC, 2020). Due to insufficient data, it is unclear whether the site has been subject to any release of hazardous materials in the past. However, the site location shown on Geo Tracker corresponds to the former DOW Chemical Company located at 301 Crenshaw Boulevard. Based on the review of historical aerial photographs, it appears that the location of these two sites is shown as one facility. Therefore, the findings corresponding to the 301 Crenshaw site applies to this location.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
14	The DOW Chemical Company	301 Crenshaw Boulevard, Torrance	Adjacent, north	ENVIROSTOR, HIST UST, ICE, HWP, SEMS-ARCHIVE, CORRACTS	The former DOW chemical facility originally comprised of approximately 52 acres bounded by Del Amo Boulevard to the north, Santa Fe railroad to the south and west, and Crenshaw Boulevard to the east. The site was listed multiple times in the DTSC records. DOW began manufacturing polystyrenes, epoxy resins, and Styrofoam since 1953. In 2008, DOW chemical started a joint venture with CP Chem and operated polystyrene plant. When the facility was open, hazardous wastes were generated, stored, and managed on site. All operations at the facility were closed, however, around 2015. The improper use of hazardous material resulted in the contamination of subsurface soils and groundwater. Several assessment and corrective actions were conducted at the site since at least 2002. Perched groundwater is reportedly about 35 feet bgs and has been impacted by petroleum hydrocarbons (AECOM, 2020). Americas Styrenics currently operate the site to manufacture polystyrene plastics. There were no online records showing the corrective actions reports. However, the DTSC site history summary on EnviroStor online page indicates that the final RCRA facility investigation report was approved in June of 2019, and the owner or operator has consented to conducting corrective action measures at the site. The site is currently being monitored for active groundwater contamination. Therefore, the site is considered a REC to the Proposed Project activities involving groundwater disturbance adjacent to Torrance TC site.

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
15	PPG Industries, Inc.	465 Crenshaw Boulevard, Torrance	Adjacent, north	ENVIROSTOR, LUST, VCP, HIST UST, DEED, DRYCLEANERS, CERS, CORRACTS, RCRA-TSDF, RAATS UST	This site is located at the Torrance TC, adjacent to the Proposed Project alignment. Portion of this site will be used for proposed surface parking lot. Between 1950 and 2000, aqueous and solvent-based paint coatings and resins were manufactured at the site. In 2000, the manufacturing facility was demolished. Groundwater at the site is approximately 85 feet bgs and flows east (RWQCB, 2008). In 1999, a 2,000-gallon UST was removed from the site. During the UST removal, TPH and VOC contamination were discovered in the soil. Subsequent assessment determined that the groundwater was also contaminated. Extensive subsurface investigations and remediation actions, including soil removal, soil vapor extraction, and groundwater pump and treat were conducted in the late 1990s. Additional investigations conducted in 2007 and 2008 indicated residual contamination in the groundwater. In 2009, soil remediation activities were conducted, and a subsequent human health risk assessment (HHRA) was conducted to assess potential human health risks to on-site workers and possible vapor intrusion risk due to residual contaminants. The HHRA determined that the residual contaminants were not considered a risk to on-site workers or occupants; however, the risk levels exceeded residential standards. As a result, DTSC requested a land use covenant restricting the land use near the site to commercial/industrial use. DTSC issued a remedial action completion in 2010 indicating the remedial efforts were completed (Ardent, 2015). In 2015, the City of Torrance adopted a mitigated negative declaration and approved the construction and operation of the Torrance TC (City of Torrance, 2015). The subject site is not a REC; however, it is recommended that the project activities involving subsurface disturbance should follow the site-specific soil management plan (Ardent, 2015).

Map ID[1]	Site Name	Site Address	Distance to Hawthorne Option (in feet)	Database Listing(s)	Discussion
16	Vought Aircraft Industries, Inc.	640 Alaska Avenue, Torrance	Adjacent, south	ENVIROSTOR	This site, which is located south of the Torrance TC, currently operates as a Triumph manufacturing facility. The facility was formerly owned and operated by Northrop Grumman Corporation (NGC) from 1968 until 2000 when it was purchased by Vought Aircraft Industries, Inc. The facility was used by NGC to manufacture aluminum skins for Boeing 737 aircrafts. The facility was a large quantity generator of hazardous waste and maintained a RCRA-permitted storage facility until it was closed under DTSC regulations in 1992. As a part of corrective action program, DTSC has identified 10 solid waste management units (SMU) and 6 areas of concern (AOC) to evaluate for any potential concern. DTSC assessed that all of SMUs and AOCs were adequately characterized, and no further investigation was deemed necessary except for two areas (AOC 3 & AOC 5) where elevated concentrations of VOCs and TPH were identified in soil (DTSC, 2005). Several investigations have been completed at the facility to assess subsurface contamination beneath the site. It is also indicated that the known offsite sources northwest of the site may be a contributing source of deep soil vapor at the site. Records indicate that the SVE and monitoring is still in progress (Arcadis, 2019). Based on the above findings, it is possible the VOCs may be present in shallow soil vapor and can escape when the ground is disturbed. Therefore, the site is a considered a REC if the Proposed Project activities disturb soil along the subject site.

Note(s): Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-4.

Figure 4-1. Sites of Concern (RECs)

Figure 4-2. Sites of Concern (RECs)

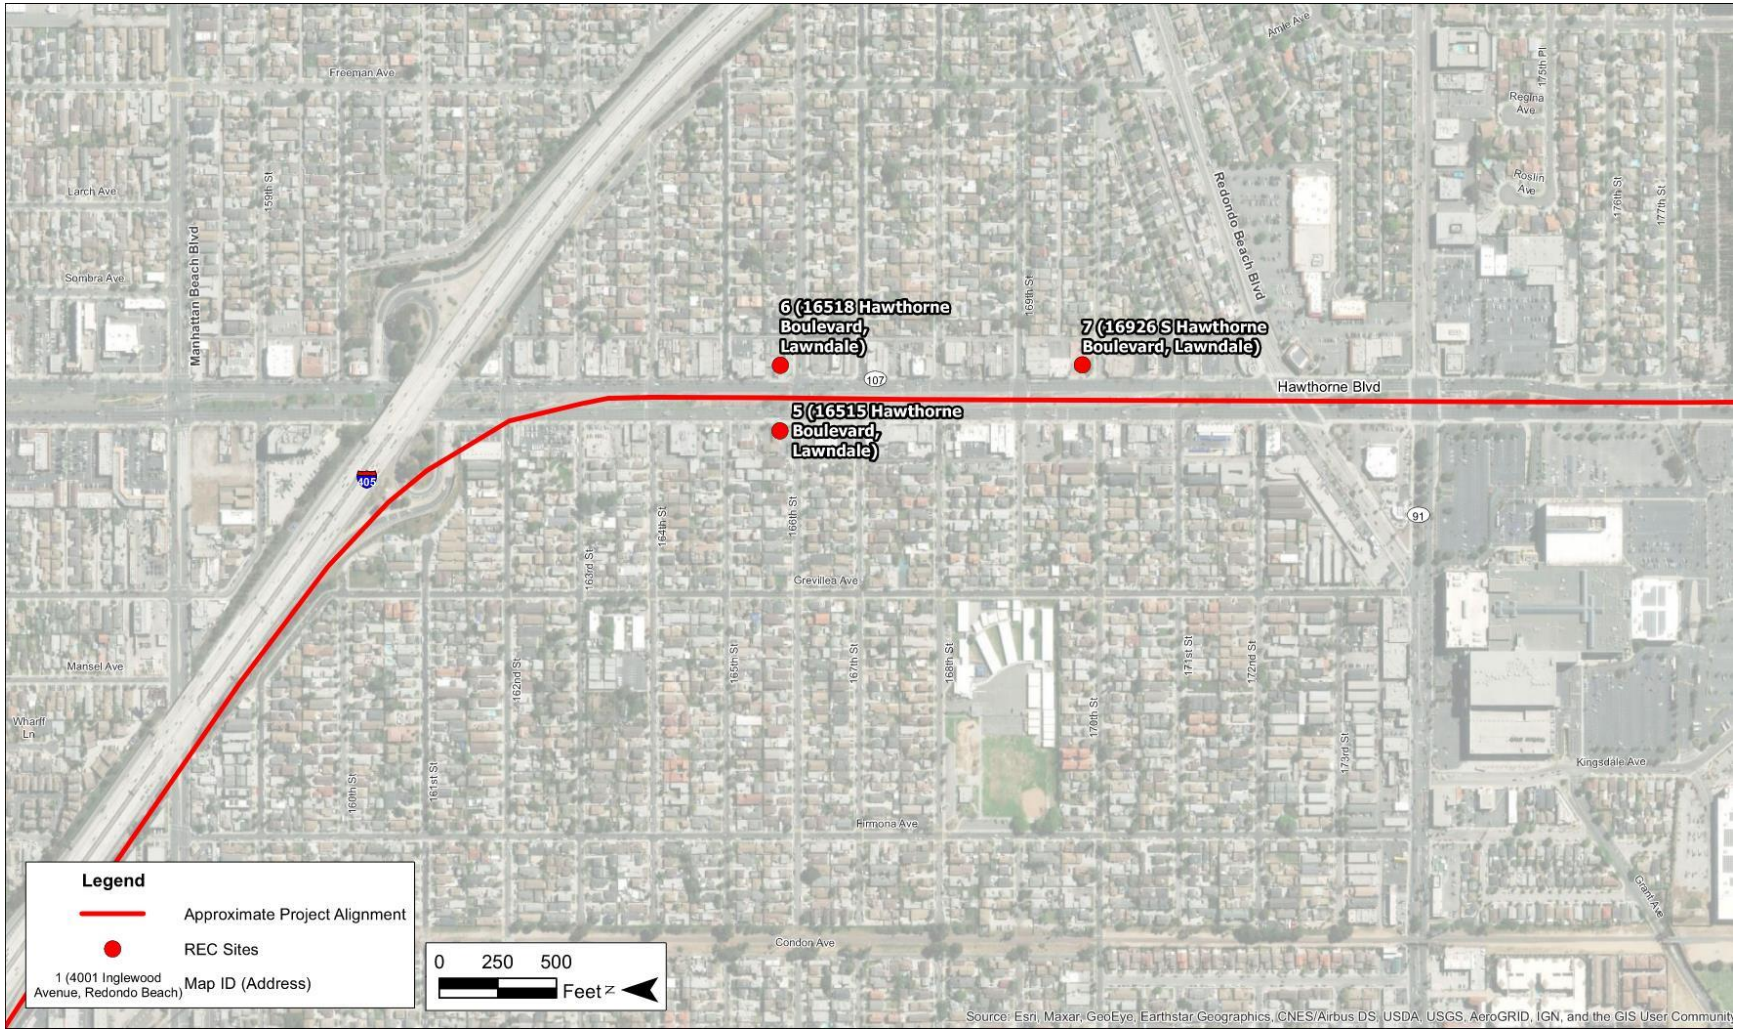

Figure 4-3. Sites of Concerns (RECs)

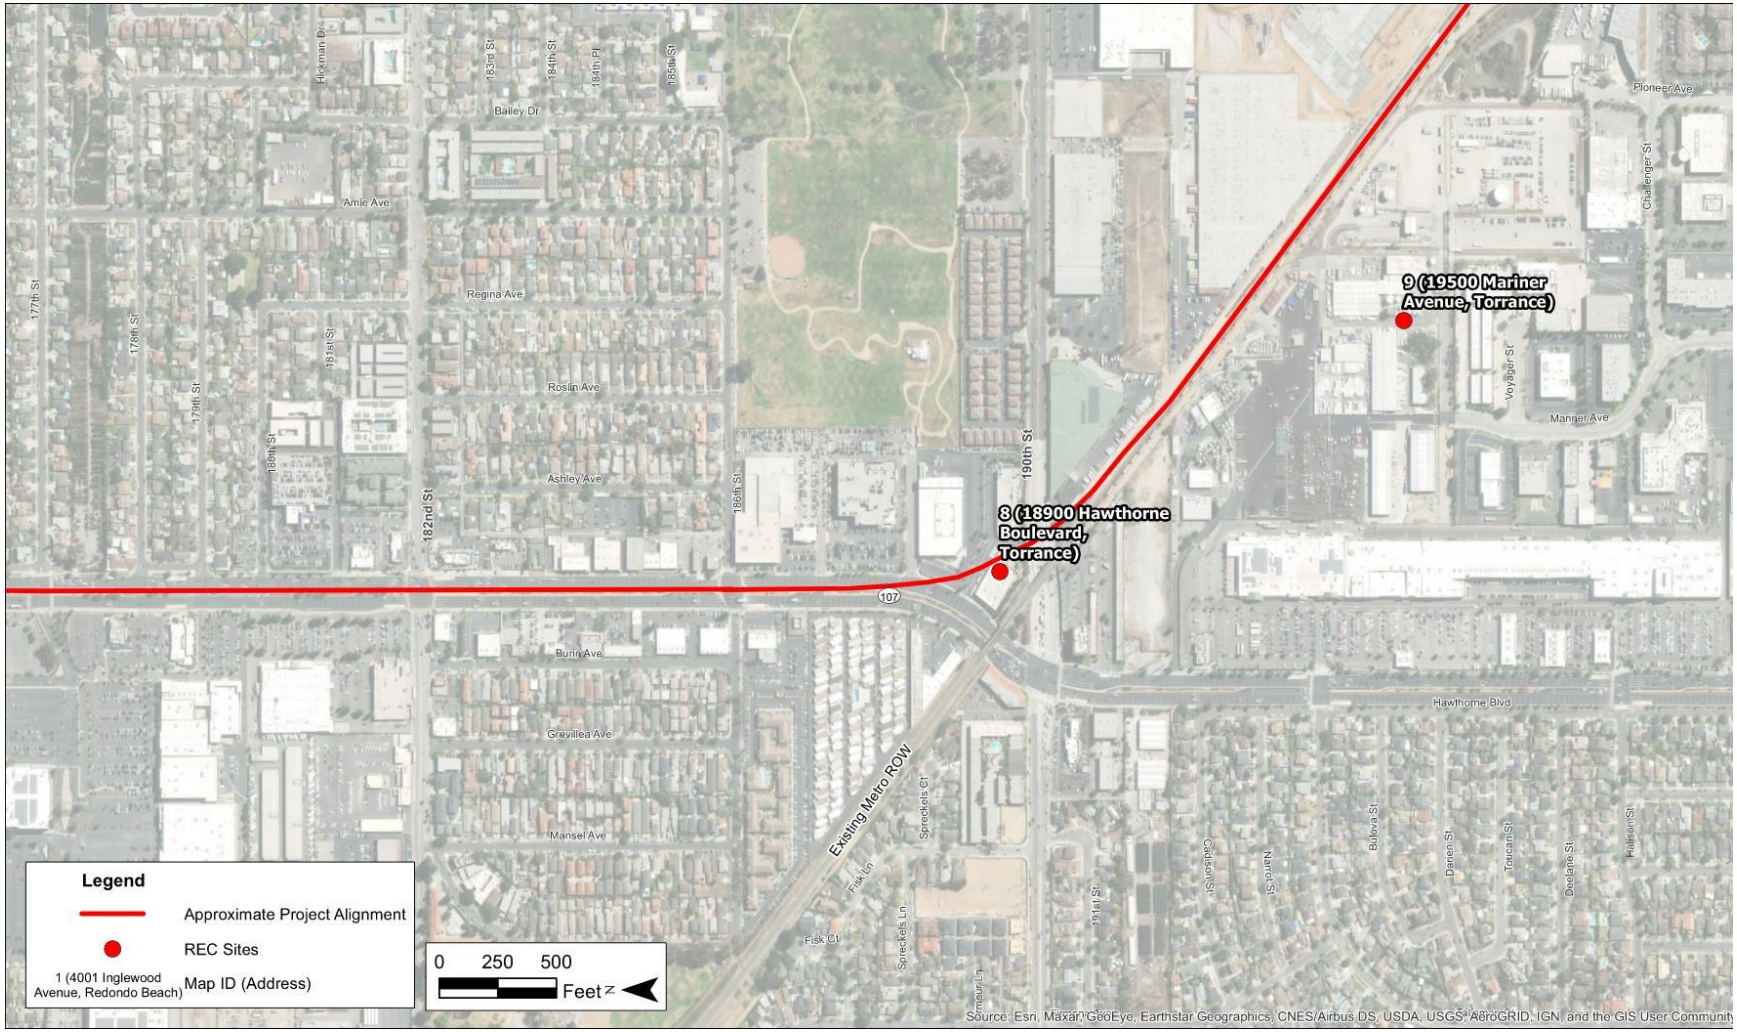

Figure 4-4. Sites of Concerns (RECs)

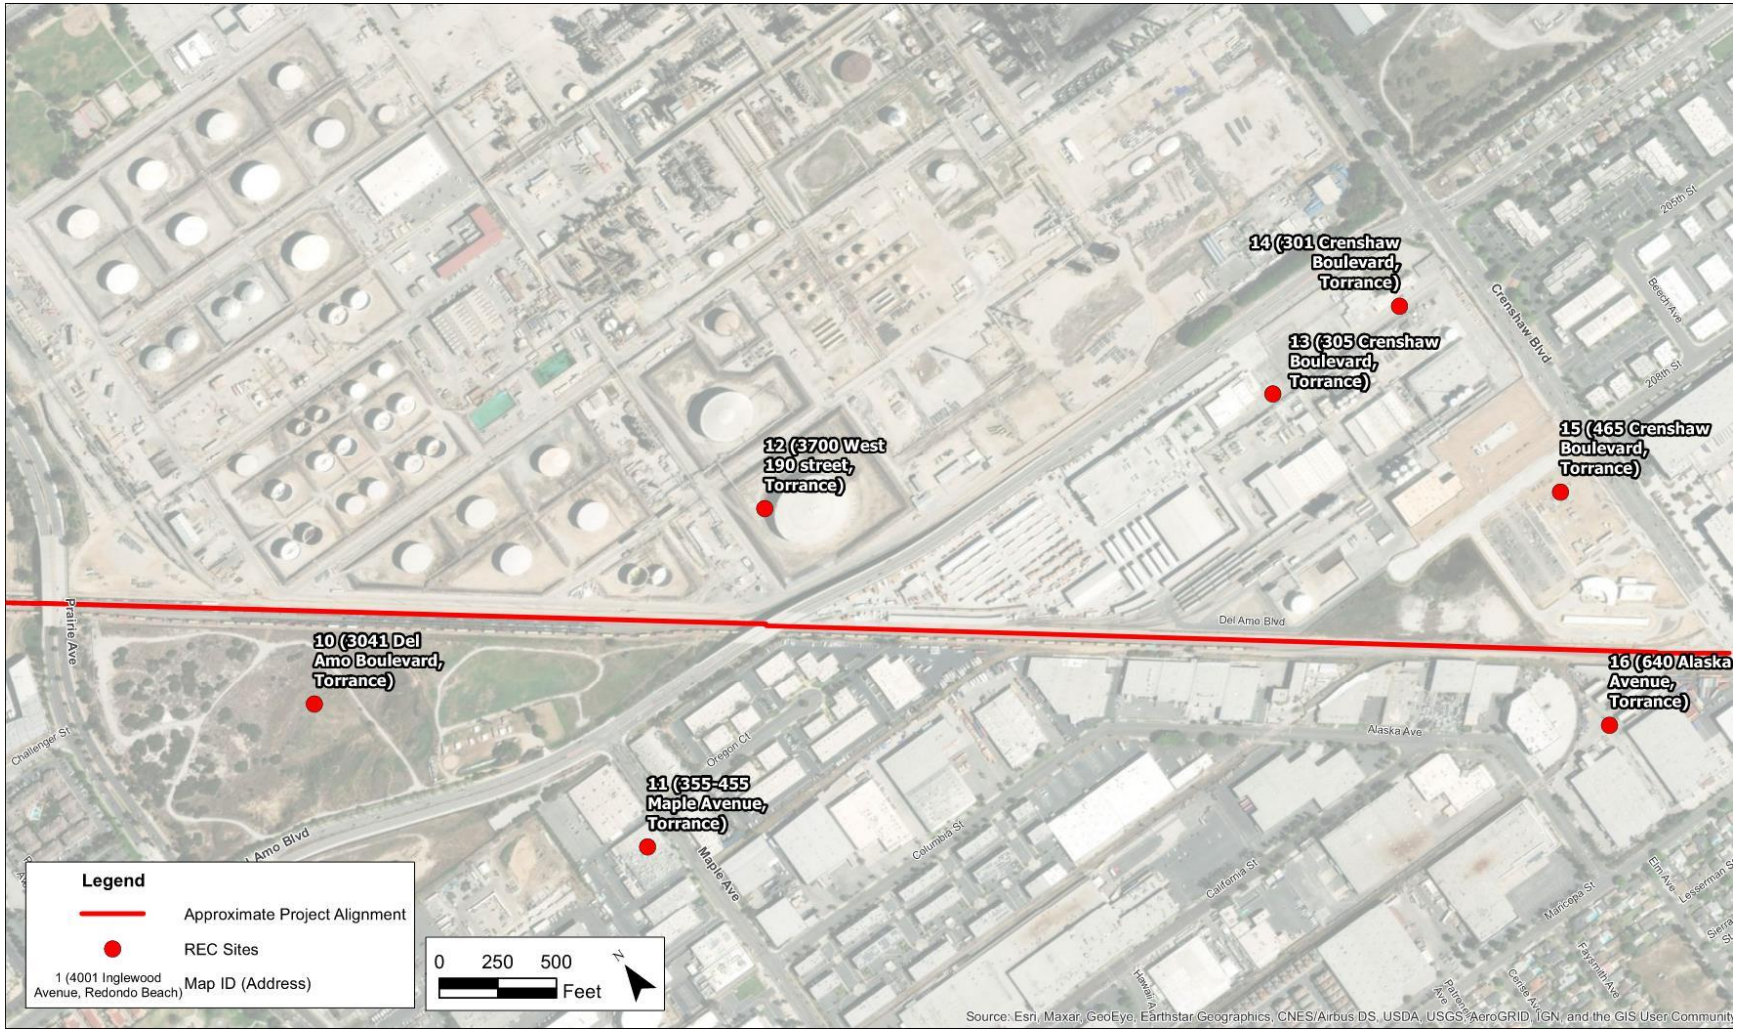

Environmental database records not discussed in Table 4-2 were judged not to be RECs based on one or more of the following considerations:

> The locations and depths where soil and/or groundwater would be disturbed during construction of the Hawthorne Option;

> The historical and/or recent groundwater gradient direction at the environmental-database-listed site with respect to the Hawthorne Option;

> The quantity of hazardous materials released at the environmental-database-listed site and the affected media (e.g., soil, groundwater);

> The lateral and vertical extent of the medium impacted by hazardous materials at the environmental-database-listed site;

> The degree to which previous releases at the environmental-database-listed sites have been remediated, if at all;

> The history of documented releases and/or environmental violations for the environmental-database-listed site;

> The relative distance and the existing structures between the environmental-database-listed site and the Hawthorne Option;

> The typical distance of concern for each environmental database;

> The likelihood that hazardous materials released at the environmental-database-listed site would migrate to the areas of the Hawthorne Option where soil and/or groundwater will be disturbed during construction of the proposed improvements (Mace et al., 1997; Buonicore, 2011); and

> Whether the ground surface at the environmental-database-listed site was upgradient, downgradient, or cross gradient from the Hawthorne Option.

In some cases, location information supplied by the database provider was insufficient to allow map-coded facility locations. These facilities are listed under the unmappable section within the EDR report. A review of the unmappable orphan facilities indicated that these facilities were either not potential sources of concern to the Hawthorne or not within the search distance for the Hawthorne.

4.3. PUBLIC AGENCY REVIEW

The EDR Radius Map™ Report was reviewed with GeoCheck® (2020e) and some local and state agency online databases to identify any current or previous records of hazardous substance use, storage, and/or unauthorized releases that may have impacted the Proposed Project and adjoining properties. At the time of this assessment, no local or state agencies were contacted to review archived records. This report recommends that local and/or state agency archived records be reviewed as part of parcel-specific Phase I ESAs performed for properties that will be acquired for the Proposed Project.

4.3.1. California Regional Water Quality Control Board

The online GeoTracker data and report resource was reviewed for regulated environmental cases provided by SWRCB and RWQCB on the internet at http://geotracker.waterboards.ca.gov/. Based on this review, records of active environmental cases listed on the GeoTracker website in the project vicinity corresponded to sites that were identified in EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

4.3.2. California Department of Toxic Substances Control

The online EnviroStor investigation data and report resource was reviewed for cleanup and hazardous waste permitted facilities provided by the California Department of Toxic Substances Control (DTSC). Based on this review, records of active environmental cases listed on the EnviroStor website in the project vicinity corresponded to sites that were identified in the EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

4.3.3. California Department of Conservation, Division of Oil, Gas, and Geothermal Resources

According to the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Map 121 and Map 126 of District One oil fields, the Hawthorne Option is located near or within the Torrance, El Segundo, Lawndale, west portion Wilmington oil fields in Los Angeles County. The maps show numerous plugged and abandoned oil wells and a few oil field water wells scattered adjacent to the Proposed Project. However, there are no known active or abandoned oil/gas wells along or within 1000-feet of the Hawthorne Option. There are numerous oil wells scattered in the vicinity of the project footprint, many of which have since been removed, and are presented on the DOGGR maps. Following table summarizes the wells identified within quarter-mile of the Proposed Project and Hawthorne Option.

Well Type	Location
Active oil and gas	1500 feet southwest of the Metro ROW and Del Amo intersection
	1900 feet southwest of the Metro ROW and Del Amo intersection
Plugged dry holes	200 feet east of Hawthorne Boulevard, 500 feet south of W 182 Street
Idle oil and gas	1280 feet west of W.163 Street and Hawthorne Boulevard

Common problems associated with oil field properties include methane and hydrogen sulfide soil gas, oil seepage, contaminated soils, leaking wells, and wells not plugged and abandoned to current standards. Although no active oil wells are located within the disturbance limits for the Proposed Project and Hawthorne Option, there are a few abandoned oil wells and abandoned test borings (dry holes) along the project alignment within the disturbance limits, and undocumented well casings may be in this area. Individual oil wells do not, in general, appear on the regulatory database listings unless associated soil or groundwater contamination have been brought to the attention of a regulatory agency. Hydrocarbon contamination associated with oil fields can be non-point source, originating from bulk storage facilities, pipelines, sumps, and other operational features.

The pipelines may either cross the alignment or run parallel to them and be within the disturbance limits. Based on the review of previous reports, it is reported that a 20-inch ExxonMobil pipeline runs along the Metro ROW 30 feet east of the existing tracks in the area between the intersection of Manhattan Beach and Inglewood Avenue and the proposed Redondo Beach TC. In the same area, a 16-inch shell oil pipeline reportedly runs to the west of the existing tracks. Methane gas, a hydrocarbon typically associated with petroleum production, natural seepage, or landfills, is another potential concern.

Methane gas, a hydrocarbon typically associated with petroleum production, natural seepage, or landfills, is another potential concern. In areas within or adjacent to oil and gas extraction areas, there is

a possibility of subsidence (downward falling of earth's surface) forming void spaces in subsurface which, unless refilled with fluids by repressurization techniques, may collapse causing settling in shallower earth layers between earth's surface and pumped geologic units at depth. Generally, these earth materials may become conduits for methane (or other) gas seeping upward from these petroleum-rich formations. Methane gas may accumulate in layers or pockets within the construction zone which when encountered may lead to fire or to explosion.

As the Hawthorne Option alignment is within one mile of state-designated oil fields, there is a potential for encountering methane gas during construction of deep foundations. In addition, the subsurface pipelines lines could potentially leak and require environmental cleanup. It is possible that abandoned or existing oil wells and underground piping exposed during construction of the project may require mitigation. According to DOGGR, a Construction Site Review Plan should be submitted to the DOGGR Construction Review Engineer prior to construction. The DOGGR Engineer will evaluate the status and location of wells that may be encountered by Hawthorne Option construction. Appropriate mitigation measures will be recommended by DOGGR. A copy of the DOGGR Construction Site Review Plan guidelines is available online at the DOGGR website.

4.3.4. California Environmental Protection Agency Regulated Site Portal

The California Environmental Protection Agency (CalEPA) Regulated Site Portal online database was reviewed. Based on this review, records of sites with environmental cases listed on the CalEPA website in the immediate project vicinity corresponded to sites that were identified in the EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

5. SITE RECONNAISSANCE

A site reconnaissance of the Hawthorne Option alignment and adjacent areas was not performed as the access to the site was not granted at the time of the assessment.

6. INTERVIEWS AND USER-PROVIDED INFORMATION

The objective of performing the interviews summarized herein was to obtain information indicating RECs in connection with the property.

6.1. QUESTIONNAIRES

A sample questionnaire is provided in Appendix H. Environmental questionnaires are usually submitted to the owners of the Hawthorne Option alignment and adjacent rights-of-way that might be impacted by the proposed improvements. Responses to the environmental questionnaires assist with identifying sources of environmental impacts to the Hawthorne Option that might not have been available at the time of this report. Questionnaires were provided to Metro to gather known environmental releases-related information along or within the Hawthorne Option alignment. Because of the early stages of the project, questionnaires were not asked to be filled out by the adjacent owners.

6.2. ON-SITE INTERVIEWS

Because the Hawthorne Option alignment is an existing roadway and railroad corridor, on-site interviews with adjacent owners could not be performed. Interviews with owners/leaseholders of adjacent properties were not part of the assessment.

6.3. OTHER INTERVIEWS WITH CURRENT OWNERS

Interviews with the owners of neighboring/nearby properties were not performed as part of this ESA.

6.4. USER-PROVIDED INFORMATION

6.4.1. Environmental Lien/Activity and Use Limitations

Searches for environmental liens or activity and use limitations (AULs) for the Proposed Project were not performed for this report.

6.4.2. Previous Reports

At the time of this report, findings of the environmental-related project documents provided by Metro were reviewed. Such documents included previous project studies, Phase I and Phase II ESA reports for 465 Crenshaw Boulevard property in Torrance, and 1521 Kingsdale Avenue in Redondo Beach. In addition, the findings of previous environmental assessment reports prepared in earlier phases of project development were reviewed. The findings of reports for 465 Crenshaw Boulevard property are discussed in Section 4.2.

The findings of a Phase II ESA prepared by EEC Environmental (EEC, 2017) for the Redondo Beach TC located at 1521 Kingsdale Avenue, Redondo Beach was reviewed. The Phase II ESA evaluated soil and soil gas vapor at the property. The review of findings determined that TPH and VOC concentrations in shallow soils were below RWQCB screening levels for commercial and industrial regional screening levels. The soil vapor samples analyzed were below their respective commercial land use. The shallow soils in the northern planter area were identified to be contaminated with ADL and is recommended to be remediated for ADL affected soil. It is recommended that the area identified by EEC as ADL impacted soil should be properly handled by the contractor prior to disturbance.

This ESA is not intended to be a definitive investigation of potential contamination at potentially impacted parcels; rather, the conclusions and recommendations presented herein are based on this review of environmental database sources discussed in Section 3 and Section 4.

7. NON-ASTM SCOPE CONSIDERATIONS

7.1. PRELIMINARY ASBESTOS EVALUATION

ACM could potentially be present in the existing bearing pads of the bridge structures along and crossing the Proposed Project. If the final construction alternative involves disturbing existing bridge bearing pads or Metro ROW, then the structures, bridge bearing pads, and near-surface soils should be evaluated for suspect ACM.

In addition, the existing structures built prior to 1989 located within areas of proposed acquisitions should be evaluated for suspect ACM prior to disturbance.

7.2. LEAD-BASED PAINT

LBP could potentially be present on the existing bridge structures crossing the Proposed Project. If the final construction alternative involves disturbing existing painted bridge surfaces (including but not limited to Graffiti), then the bridge should be evaluated for suspect LBP.

Lead and other metals, such as chromium, may be present within yellow thermoplastic paint striping on the pavement. These surfacing materials should be handled in accordance with Caltrans Standard Specifications (2018b) during construction by the contractors.

7.3. HEAVY METALS INCLUDING AERIALLY DEPOSITED LEAD

Heavy metals (particularly, arsenic, lead, and chromium, but including other metals such as cobalt, nickel, etc.) have been found to be associated with historical railroad operations in many cases. Releases can result from spills of transported materials or from railroad equipment wear. Accumulations of heavy metals are typically concentrated in the shallowest surface layers of soil or roadbed.

Hawthorne Boulevard has been in use as a roadway for decades including the time when leaded gasoline was in use (from the early 1920s until it began to be phased out in 1973). Combustion of leaded gasoline results in particulate emissions containing lead atoms, which tends to settle out of the air quite rapidly, potentially resulting in the development of elevated levels of lead in surface soils along roadways. Caltrans has documented the presence of aerially deposited lead along many freeways in California. In some cases, the lead impacted soil may qualify as hazardous waste if excavated for disposal. If left in place, it may pose a human health hazard through the exposure routes of dermal exposure or inhalation (for example, of dust).

7.4. TREATED WOOD WASTE

The Hawthorne Option alignment may contain treated wood waste (TWW) from existing and historical railroad usage. Upon removal, wood railroad ties, power poles, or guard rail posts (including previously salvaged) should be managed or disposed of by the licensed contractor as hazardous waste or handled by any applicable variances set forth by the DTSC.

7.5. WEED CONTROL

Railroad operations have historically been known to use various substances for weed control along existing or historical railroad corridors. Surface soils within the Metro ROW may contain hazardous materials from the use of weed control, including herbicides and pesticides.

8. CONCLUSIONS AND RECOMMENDATIONS

This hazardous materials Phase I ESA was performed in conformance with the scope and limitations of ASTM Practice E1527-13 and in accordance with the MRDC (Metro, 2019), Section 5.6.6 Hazardous Materials Investigation and Analysis for the proposed Los Angeles County Metropolitan Transportation Authority (Metro) C Line (Green) Extension to Torrance Project. Exceptions to or deletions from this practice are described in Section 11 of this report. This assessment revealed no evidence of RECs in connection with the subject property with the exception of those listed in Table 8-1.

As discussed in Section 2.2, it is recommended that the parcels (or portions thereof) that might be acquired as a part of the Proposed Project should be evaluated for potential presence of hazardous materials contamination prior to acquiring. Conclusions and recommendations regarding RECs within and adjacent to the existing alignment that were identified in Section 3 through Section 7 of this report are summarized in Table 8-1.

Table 8-1. Conclusions and Recommendations

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
1	Voi-Shan Aerospace, Inc. (former), 4001 Inglewood Avenue, Redondo Beach	TPH, VOC, SVOC and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern along the Hawthorne Option alignment between Marine Avenue and Manhattan Beach Boulevard.
2	Mobil Oil Corp (former), 3705 Inglewood Avenue, Redondo Beach	TPH, VOC and metals	Groundwater	Section 4.2	The site would be acquired. A Phase II SI is recommended to determine the status of the past release at the site.
3	Electra Media, Inc., 4737 W 156th Street, Redondo Beach	TPH, VOC	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to evaluate the existing subsurface conditions onsite.
4	Merrell Paint Co., Inc., 15624 Inglewood Avenue, Lawndale	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower, and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between Inglewood Avenue and Manhattan Beach Boulevard. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
5	Thrifty #257 16515 Hawthorne Boulevard, Lawndale	TPH, VOC, SVOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soil and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between 165th street and 166th street.
6	Arco #5107 16518 Hawthorne Boulevard, Lawndale	TPH, VOC, SVOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soil groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment between 165th street and 166th street.
7	United Oil Co., 16926 S Hawthorne Boulevard, Lawndale	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for contaminants of potential concern along the Hawthorne Option alignment adjacent to the subject property.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
8	Chevron Company Pipeline Right-of-Way (former), 18900 Hawthorne Boulevard, Torrance	TPH, VOCs, VOCs, and metals.	Soil	Section 4.2	The site would be acquired. A Phase II SI is recommended to determine the status of the past release at the site.
9	Union Carbide Corporation (UCC), 19500 Mariner Avenue, Torrance	TPH, VOC, SVOC, Dripolene, and metals.	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for noted contaminants of potential concern along the Hawthorne Option alignment adjacent to the subject property.
10	North Posse Site, 3041 Del Amo Boulevard, Torrance	TPH, VOC, SVOC, ACM, metals, and methane	Soil, Soil Vapor, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, soil vapor, and groundwater (if disturbed) along the Hawthorne Option alignment between Prairie Avenue and Del Amo Boulevard for contaminants of potential concern. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
11	Former Amp-Matrix Facility, 355-455 Maple Avenue, Torrance	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern, if the proposed construction results in groundwater disturbance along the alignment near the Torrance TC.
12	Exxon Mobil Oil Torrance Refinery, 3700 West 190 street, Torrance	TPH, VOC, SVOC, and metals	soil and groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) along the Hawthorne Option alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
13	The DOW Chemical Company 305 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils up to the proposed depth of disturbance for the contaminants of potential concern along the northern portion of the proposed Torrance TC.
14	Torrance/ Dowell Schlumberger, Inc 301 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils up to the proposed depth of disturbance for the contaminants of potential concern along the northern portion of the proposed Torrance TC.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
15	PPG Industries, Inc. 465 Crenshaw Boulevard, Torrance	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) at the proposed surface parking lot for noted contaminants of potential concern. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
16	Vought Aircraft Industries, Inc., 640 Alaska Avenue, Torrance	TPH, VOC	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower for contaminants of potential concern along the alignment in the southern end, adjacent to the proposed Torrance TC.
--	Hawthorne Option	Herbicides, Pesticides, Treated Wood Waste, TPH, Metals	Soil	Section 7.2	A Phase II SI is recommended to evaluate shallow soils for potential contaminants of concern along the Metro ROW.
--	Existing Bridges	Asbestos Containing Material (ACM), Lead- based Paint (LBP)	Existing Bridge Bearing Pads, Hinge and Joint Seal materials, Coatings, Graffiti	Sections 7.1 & 7.2	Prior to disturbance of the existing bridge structures, ACM and LBP surveys are recommended as part of a Phase II SI.
--	Proposed Acquisitions for Hawthorne Option construction	Hazardous Materials	Soil	Section 2.2	Parcel-specific Phase I ESAs are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the Proposed Project.
--	Hawthorne Option	Oil and gas pipelines	Soil	Section 4.3.3	It is recommended that where construction activities will disturb soil adjacent to the oil and gas pipelines, the soils be screened for hydrocarbon contamination prior to construction.
--	Hawthorne Option	LBP, Chromium	Yellow Thermoplastic Striping	Section 7.2	Yellow Thermoplastic Striping materials should be handled in accordance with Caltrans Standard Specifications (Caltrans, 2018a) and the corresponding Standard Special Provisions (SSPs) (Caltrans, 2018b).

Note(s): Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-4.

9. DATA GAPS

A data gap is the inability of the environmental professional to obtain information required by ASTM E1527-13. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit) and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). The following data gaps were identified:

> Some of the intervals between documented sources exceeded 5 years.

> Meeting with regulatory agency staff and persons having knowledge and usage of REC sites to characterize the past activities.

> Interviews with owners of the Proposed Project and owners/leaseholders of properties adjacent to the Hawthorne Option alignment were not performed.

> Site reconnaissance was not performed during the time of this assessment as the access was not granted.

In consideration of the available information obtained during the preparation of this report in conjunction with professional experience and judgment, no evidence exists to suggest that these data gaps might alter the conclusions of this assessment. In addition, the purpose of this ESA is to provide a planning document in general compliance with ASTM and MRDC guidelines.

10. DEVIATIONS

No deviations from ASTM E1527-13 were noted during this Phase I ESA except for those noted previously in Sections 1.1 and 9 of this report.

11. LIMITATIONS

This report is an instrument of service of Diaz•Yourman and Associates (DYA) and includes limited research, a review of specified and reasonable ascertainable listings to identify RECs.

This report was prepared in general compliance with the ASTM guidelines for evaluating environmental impacts due to hazardous waste during construction. ASTM E1527-13 was used as a basis of general procedures followed in preparation of this ESA but was not explicitly applied. The purpose of this assessment is limited to identification of the potential impacts of hazardous substances during construction of a transportation alignment.

RECs are defined under ASTM standards as: “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property.” These standards and this report do not address other environmental conditions such as geologic or geotechnical hazards. This ESA was performed in accordance with generally accepted practices of the profession undertaken in similar studies at the same time and in the same geographical area; DYA

observed a degree of care and skill generally exercised by those of the profession under similar circumstances and conditions.

ESAs have a limited lifespan and findings and recommendations within an ESA are valid for one year from the date the initial ESA is completed. Therefore, due to the additional design refinements that may occur in the future for the Hawthorne Option or require change in the project footprint, an updated ESA may be required to identify impacts related to site conditions before design activities commence. This Phase I ESA has been completed to evaluate and summarize environmental concerns at the site and is not intended as part of an effort to sell or acquire the property or portions thereof.

The study and this report have been prepared on behalf of, and for the exclusive use of, STV Inc., and the project owners solely for their use and reliance in the environmental assessment of the project site. STV Inc. and the project owners are the only parties to whom DYA has explained the risks involved and that have been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from STV Inc.'s and the project owners' points of view. Accordingly, reliance on this report by any other party may involve assumptions whose extent and nature lead to a distorted meaning and impact of the findings and opinions related herein. DYA's findings and opinions related in this report may not be relied upon by any party except STV Inc., and the project owners. With the consent of DYA, STV Inc., and the project owners, DYA may be available to contract with other parties to develop findings and opinions related specifically to such other parties' unique risk management concerns related to the project site. The DYA personnel associated with conducting this ESA have no specialized or actual knowledge regarding the project corridor.

12. QUALIFICATIONS OF PREPARER

This assessment was performed by Mr. Chaitanya Kukutla under the supervision of Mr. Gary Halbert, PG, CEG and Mr. Somadevan Niranjanan, PE, GE. The resumes of the preparers are presented in Appendix I.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations Section 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Diaz-Yourman & Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Diaz-Yourman & Associates were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Diaz-Yourman & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

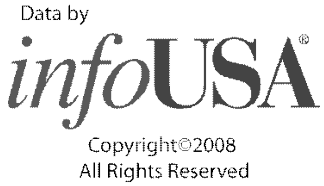
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

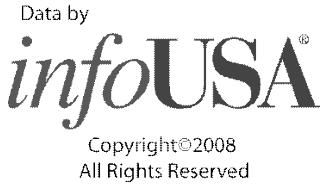
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Site ID: 0903326
EPA Id: CAD000627398

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
NORTHROP CORPORATION EPA ID:: CAD000627398	***14525 OCEANGATE***	***NW 1/4 - 1/2 (0.369 mi.)***	***AT281***	***892***

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

NORTHROP CORPORATION EPA ID:: CAD000627398	***14525 OCEANGATE***	***NW 1/4 - 1/2 (0.369 mi.)***	***AT281***	***892***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 23 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 ERNS site within approximately 0.001 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 16 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 14 CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 16 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 26 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 70 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Database: DRYCLEAN SOUTH COAST, Date of Government Version: 01/31/2020				

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 28 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

FINDS:
Registry ID: 110002738903
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002738903

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002725409

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that

1X MOBIL OIL CORP STA#11FC6 (Continued) **S112838205**

none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	Yes
Treater, storer or disposer of HW:	No
Underground injection activity:	No

TESORO USA 63257 (Continued) **1024833363**

On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Violation Date: 08-22-2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 08/24/2016. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. Enter environmental contact person’s email address and upload Hazardous Materials inventory,site map , and consolidated contingency plan with facility information page. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 519162
Site Name: CREST AUTO BODY
Violation Date: 08-22-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/19/2016. OBSERVATION: 1-55 G DM waste coolant container unlabeled. This container was labeled on-site (corrected on-site). All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002935584

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110009552732

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:
Registry ID: 110002758739
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002758739

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 80312
Site Name: VELLIOS MACHINE SHOP INC
Violation Date: 12-19-2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 12/20/2016. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 80312
Site Name: VELLIOS MACHINE SHOP INC
Violation Date: 12-19-2016
Citation: HSC 6.5 25250.19(c) - California Health and Safety Code, Chapter 6.5, Section(s) 25250.19(c)
Violation Description: Failure to record in an operating log and retain for three years the following information for each shipment of recycled or exempted oil: 1) The name and address of the used oil recycling facility or generator claiming the oil meets the requirements of HSC 6.5 25250.1. 2) The name and address of the facility receiving the shipment. 3) The quantity of oil delivered. 4) The date of shipment or delivery. 5) A cross-reference to the records and documentation required under HSC 6.5 25250.1.
Violation Notes: Returned to compliance on 12/20/2016. OBSERVATION: The Owner/Operator failed to retain paperwork documenting disposal of used oil for 2016. CORRECTIVE ACTION: The Owner/Operator shall maintain copies documenting disposal of used oil for aminimum of 3 years.
Violation Division: Los Angeles County Fire Department

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002761360

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CARBRO CORPORATION (Continued) **S123502989**

Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 07/23/2014. OBSERVATION: Copies of hazardous waste disposal records for 3 years were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by [date, 30 days from now].
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	16404
Site Name:	CARBRO CORPORATION
Violation Date:	06-28-2016
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 08/09/2016. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. The most recent submittal dated 2/22/16 was incomplete and missing the Emergency Response/Contingency Plan, which was last submitted on 3/17/15. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	16404
Site Name:	CARBRO CORPORATION
Violation Date:	06-28-2016
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 08/15/2016. OBSERVATION: Observed one 55 gallon drum of carbide/tungsten sludge waste with the cover off. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110012226812

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:

Name:	HEADQUARTER
Address:	2501 SANTA FE AVE
City,State,Zip:	REDONDO BEACH, CA 90278
Site ID:	438193
CERS ID:	10453450
CERS Description:	Hazardous Waste Onsite Treatment

Violations:

Site ID:	438193
Site Name:	Headquarter
Violation Date:	02-13-2014
Citation:	HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description:	Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes:	Must submit to C.E.R.S.
Violation Division:	Redondo Beach Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	438193
Site Name:	Headquarter
Violation Date:	08-19-2019
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CERS search indicated last submittal in 2014 not accepted. Since then no submittals. Observed 14 - 15 G LPG cylinders stored at rear of the warehouse. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U220

NORTHROP GRUMMAN S&MSC (Continued) **1007199535**

. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 4

Waste code: D008
Waste name: LEAD
Amount (Lbs): 5

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 4

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110012225760

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Address: 4457 MANHATTAN BEACH BLVD
City,State,Zip: LAWNDALE, CA 90260
Site ID: 11640
CERS ID: 10272832
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 11640
Site Name: BELLAGIO CAR WASH
Violation Date: 01-22-2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

LAWNDALE CAR WASH (Continued) **S101587260**

Violation Notes:	Returned to compliance on 02/16/2016. OBSERVATION: The Owner/Operator failed to properly train personnel who handle hazardous waste. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. The owner or operator shall maintain the following documents and records at the facility: 1) the job title for each position at the facility related to hazardous waste management, and [Truncated]

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s)

LAWNDALE CAR WASH (Continued) **S101587260**

to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Violation Notes: Returned to compliance on 02/04/2016. OBSERVATION: Owner/Operator does not have a tank assessment for the used oil tank. The owner or operator of a hazardous waste tank shall obtain a written assessment reviewed and certified by an independent, qualified, professional engineer, registered in California attesting that the system has sufficient structural integrity, is acceptable for the transferring, storing, and treating of hazardous waste, and that the tanks and containment system are suitably designed. CORRECTIVE ACTION: Immediately have an assessment prepared for the used oil tank. Submit a schedule showing when this will be accomplished to the CUPA within 30 days.

Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 02/04/2016. OBSERVATION: Observed secondary containment of above-ground storage tank 3/4 full of liquid. Generator failed to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.CORRECTIVE ACTION: Owner/Operator shall immediately maintain the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment. The Owner/Operator shall develop procedures to operate the facility in such a manner to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human [Truncated]

Violation Division: Los Angeles County Fire Department

LAWNDALE CAR WASH (Continued) **S101587260**

Violation Program: HW
Violation Source: CERS

Site ID: 11640
Site Name: BELLAGIO CAR WASH
Violation Date: 01-22-2016
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Description: Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).
Violation Notes: Returned to compliance on 02/01/2016. OBSERVATION: Facility failed to conduct daily inspections of the hazardous waste tank system(s). The owner/operator shall inspect, and document, where present, at least once each operating day: 1) Overfill/spill control equipment; 2) Aboveground portions of the tank system to detect corrosion or releases of water; 3) Data gathered from monitoring and leak-detection equipment; 4) Outside areas of the tank system including secondary containment to detect erosion or signs of releases of hazardous waste; 5) For uncovered tanks, the level of waste in the tank; 6) Cathodic protection if present. CORRECTIVE ACTION: Immediately begin daily inspections of the hazardous waste tank system(s), and document the items inspected. Submit a copy of the inspection log for the next 30 days to the CUPA by February 21, 2016.
Violation Division: Los Angeles County Fire Department
Violation Program: HW

Site ID: 11640
Site Name: BELLAGIO CAR WASH
Violation Date: 01-22-2016
Citation: 19 CCR 6.95 25508(a)(1) - California Code of Regulations, Title 19, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 03/22/2016. OBSERVATION: The Business Activities page submitted electronically in the California Environmental Reporting System (CERS) incorrectly indicates that the facility consolidates hazardous waste from remote locations. CORRECTIVE ACTION: Update and re-submit the Business Activities page and submit electronically in the California Environmental Reporting System (CERS).

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: 99 CENTS ONLY STORES #310
Address: 2701 MANHATTAN BEACH BLVD
City,State,Zip: REDONDO BEACH, CA 90278
Site ID: 1791
CERS ID: 10444603
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 1791
Site Name: 99 Cents Only Stores #310
Violation Date: 04-11-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

99 CENTS ONLY STORES (Continued) **S113800728**

Violation Notes: Returned to compliance on 04/11/2016. OBSERVATION: CB container containing waste soap products had label with incorrect accumulation start date. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. Corrected on Site: Proper accumulation start date provided at time of inspection.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 1791
Site Name: 99 Cents Only Stores #310
Violation Date: 10-27-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/27/2017. OBSERVATION: The following hazardous waste bins were missing contents of container (check boxes not marked): Universal Waste Oxidizers Aerosols/Flammables CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Corrected on site. Contents marked on label.

Registry ID: 110002631830
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002631830

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U080
. Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U220

NORTHROP GRUMMAN S&MSC (Continued) **1012175541**

. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 3387

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 292

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 1070

Waste code: D008
