## **FTA Approves Release Of Expo FEIS**

Today, Tuesday October 4, 2005, the FTA approved release of the Exposition LRT Final EIS/EIR. This approval caps a 16-month effort between the two agencies to complete the environmental analysis of the project. The findings can now be circulated to decision-makers and the public during a 45-day public review period that will commence on October 14th. Board certification and review of the document will be scheduled for the November/December Board cycle.
