#### **PROJECT OVERVIEW**

The San Fernando Valley Metro Rapidway (SFVMR) consists of buses operating in exclusive lanes within an approximate thirteen (13) mile stretch on LACMTA right-of-way (ROW) and one (1) mile of mixed flow operation within public streets. Terminal stations are located near the North Hollywood Metro Red Line Subway Station and the planned Warner Center Transit Hub. The SFVMR will have roughly one stop per mile located at major cross streets. Low floor CNG-powered articulated vehicles will be given signal priority at grade and at cross streets, which will reduce end to end travel times between the thirteen (13) stations. With the exception of the Warner Center Transit Hub, all stations will provide platforms for east bound and west bound travel. Warner Center Transit Hub is currently being planned by the City of Los Angeles and will include bus stops for loading/unloading of passengers and layover space on Owensmouth Avenue. Canopies will be provided at all stations. Station equipment and amenities will include ticket vending machines, stand alone validators, benches, bike racks, map case(s), signage, public telephones, closed circuit television cameras and a public address system. Variable message signs will provide real time information on bus arrival times at the respective station. In addition to the existing 915 spaces at the North Hollywood Metro Red Line Subway Station and the 150 parking spaces at the Balboa Park and Ride, the SFVMR will provide approximately 3,240 new parking spaces for the park and ride station locations. Other related project scope includes modifications to an existing Metro bus division, vehicle procurement and implementation of the Universal Fare System (UFS).

The C0675 Contractor is continuing construction efforts with site clearing, demolition, temporary fencing installation within right-of-way and CCTV camera installation at intersections. SOJV construction efforts this month continued with demolition and excavation completed and foundation work started for the Bull Creek Bridge and demolition started for the Tujunga Wash Bridge. The installation of storm drain pipe began along the eastern most portion of the alignment as well as the start of installation of the storm drain pipe in the Laurel Canyon Intersection. Rough grading of busway is to commence next month as well as the start of shop drawings and fabrication of station canopies for first procurement package. The C0675 Contractor continues to submit design packages for City of Los Angeles and MTA review.

The C0675 Contractor's design is behind schedule. Project staff reviewed and rejected the proposed schedule mitigation plan submitted by the Contractor. A re-submittal of the schedule mitigation plan was received and is under review. The reason for the design delay is disputed between the C0675 Contractor and the MTA. MTA's position for the primary cause is recognition in the C0675 Current Schedule update of rejection of inadequate 100% submittals on busway and 85% submittals on Group 1 intersections combined with required redesign and resubmittal time.

Project staff is reviewing potential enhancements to current Contract No. C0675 base scope. These enhancements include:

- 1. Change from temporary landscaping irrigation to permanent landscaping irrigation designed to utilize recycled water, and
- 2. Upgrade to rubberized asphalt for portions of busway and some intersections in residential areas.

Staff issued change notices to the C0675 Contractor and the Contractor has submitted cost proposals, which significantly exceed the MTA rough order of magnitude estimates. The C0675 Contractor has also requested time extensions for the enhancement scope of work. Project staff is evaluating the cost and schedule impacts of the potential enhancements to the overall Project.

#### **PROJECT OVERVIEW**

The C0676 Contractor, constructing the new Los Angeles River Metro Rapidway Bridge, remains on schedule. During the November period, the C0676 Contractor completed the concrete guardrail and fence on top of it, anti graffiti coating of the bridge, and lighting. Contractor is forecast to complete the Contract Substantial Completion Milestone in early December 2003.

In association with the development of the SFVMR Project, the Los Angeles Department of Water and Power (LADWP) approached the MTA to incorporate the construction of a Recycled Water Pipeline into the construction program parallel to the Rapidway. On September 16, 2003, the Los Angeles Department of Water and Power (LADWP) Board of Commissioners approved a \$5.0 million budget under an existing Master Cooperative Agreement with MTA for partial funding for schedule-critical portions of the LADWP Recycled Water Pipeline. Subsequently, on September 25, 2003, the MTA Board approved a \$5.0 million initial budget for LADWP Recycled Water Pipeline (Project No. 800116) and authorized the issuance of Change Orders in the amount not to exceed \$2.5 million to the C0675 Contractor for initial funding of design and construction. The MTA Board adopted the project on the condition that LADWP reimburse MTA for all costs associated with design, construction and administration of the Recycled Water Pipeline Project and that the pipeline would not cause a delay to the August 2005 opening of the busway. MTA and LADWP are continuing to identify and implement schedule-critical work and develop a strategy for completion of the Recycled Water Pipeline. Work completed to date is installation of pipeline under the new Los Angeles River Metro Rapidway Bridge and completion of potholing in first 12 intersections.

Caltrans has completed the widening of Interstate 405 on a bridge that passes over the Segment 3 portion of the busway alignment. The completion date for this work is end of November 2003. Based on this completion date, MTA will be able to turn over the required site to the C0675 Contractor by February 1, 2004. However, as discussed in the Management Issues Section, MTA and Caltrans staff is working to resolve an interface issue prior to the required turn over date.

Other Projects providing equipment for the SFVMR Project remain on schedule. Project staff continues to meet with appropriate MTA staff to discuss status of other related projects (managed by other MTA departments) to identify any schedule risks that may result in impact to the Contract C0675 Contract Milestones or to the SFVMR Project Revenue Operation Date. These projects being monitored are Articulated Vehicle Procurement, Advanced Traffic Management System (ATMS), and Universal Fare System (UFS).

#### MANAGEMENT ISSUES

**Concern No. 1:** Citizens Organized for Smart Transit (COST) has filed a lawsuit contesting the validity of the Environmental Impact Report of the SFV MR.

**Status/Action** The trial was held on December 20, 2002 and the judge ruled in favor of the MTA. The COST group appealed the ruling and requested an injunction to stop the MTA from awarding any construction work. The judge denied the injunction request, however, the appeal of MTA will now progress through the normal court processes. The MTA sued to recover approximately \$32,000 in legal fees and won. The COST group appealed the fee decision. The judge has combined the two appeals and it is expected that oral arguments will be heard either the end of this year or in early 2004 and the written decision will be provided several months after the oral arguments.

**Concern No. 2:** Los Angeles Department of Water and Power (LADWP) Recycled Water Pipeline.

**Status/Action** The LADWP is proposing a Recycled Water Pipeline to be installed in MTA's right-of-way over the entire length of the project. LADWP has agreed to reimburse the MTA for all the costs associated with the Recycled Water Pipeline incurred to date. On September 16, 2003, the LADWP Board of Commissioners approved a \$5.0 million budget under an existing Master Cooperative Agreement with MTA for partial funding for schedule critical portions of the LADWP recycled water pipeline. On September 25, 2003, the MTA Board approved a \$5,000,000 initial budget and authorized the issuance of Change Orders in the amount not to exceed \$2,500,000 to Contract No. C0675 Design/Build for initial funding of design and construction of the LADWP Recycled Water Pipeline project. MTA and LADWP staff will continue to identify and implement schedule-critical work and develop strategy for completion of the Recycled Water Pipeline. Through month end, MTA has issued Change Orders totaling \$719,000 to Contract C0675 against the current \$2,500,000 Board authorization. (See Project Overview Section).

#### MANAGEMENT ISSUES

**Concern No. 3:** Real Estate Lease Terminations and New Acquisition Parcels

**Status/Action** MTA has provided nearly all parcels to the Contractor as required in the specifications. MTA and the C0675 Contractor are working together to work around several leased properties that have been allowed to retain a portion of the leased area without impacting the SFVMR Project on Parcels 1502, 1503, 2207 and 2601. An encroachment of a portion of a residential structure near the Interstate 405 Freeway Overhead into the Project right-of-way is being resolved with the filing of a lawsuit against the homeowner by outside counsel. MTA Real Estate and Construction Project Management Departments are working to have all rights in place in a timely manner with minimal impact to construction. (See Real Estate Section).

**Concern No. 4:** New Park-and-Ride Facility at Metro Rapidway's western terminus in Warner Center

**Status/Action** The western terminus at the Warner Center Transit Hub does not currently include parking for SFVMR Project patrons. MTA's Planning Department in coordination with Construction Project Management and Real Estate staff, selected three candidate sites for evaluation in an addendum to the Project EIR. Staff has recommended a preferred site and Real Estate staff have made a formal offer to purchase the property. MTA Environmental staff and consultants are preparing the addendum and expect completion by December 2003. Staff anticipates submitting a report to the MTA Board in January 2004 with recommendations to adopt the preferred site, certify the addendum and approve site acquisition.

#### **MANAGEMENT ISSUES**

**Concern No. 5:** Caltrans' alignment interference at Interstate 405 freeway bridge intersecting with busway construction (busway Segment 3 – stationing 404+00 to 416+00)

**Status/Action** Caltrans has completed the widening of Interstate 405 on a bridge that passes over the Segment 3 portion of the busway alignment. MTA is obligated by Contract with the C0675 Design/Build Contractor, to turn this area over to the Contractor by February 1, 2004. An interface issue has developed as a column constructed as a part of the widening project encroaches into the busway alignment. MTA is working with Caltrans to develop alternatives for resolving this issue prior to the required turnover date and to support the C0675 Contractor's design. MTA and Caltrans are finalizing a new alignment in this area to accommodate the column encroachment.

**Concern No. 6:** Investigation of Traffic Index (TI) for the busway pavement design

<u>Status/Action</u> MTA Engineering is investigating the TI value developed by the preliminary engineering consultant for the busway pavement design. The contractually specified TI value may be too low. This may require a thicker pavement section or MTA accepting a reduction in useful design life (less than 20 years).

**Concern No. 7:** Upgrade Contract C0675 base scope to include rubberized asphalt for busway and City intersections.

Status/Action MTA staff is investigating the use of rubberized asphalt along the busway and at City intersections. Due to recent advances in rubberized asphalt technology MTA staff is investigating this alternative paving material for a multiple of reasons. Rubberized asphalt uses recycled rubber (vehicle tires) as part of the component of the asphalt helping the environment. In addition, rubberized asphalt characteristics tend to reduce vehicle noise and may help MTA meet noise requirements in the operational phase of this project. MTA staff is investigating the associated costs and benefits of using such technology on the SFVMR Project. MTA staff is investigating the costs and benefits and plan to have a recommended path forward by January 2004. The C0675 Contractor has submitted a cost proposal of \$1.1 million for Change Notice 12.01, to place rubberized asphalt in ten selected City intersections, which significantly exceeds the MTA prepared rough order of magnitude value and has included in the cost proposal a request for a 78calendar day time extension to Contract C0675 milestones. The C0675 Contractor has not provided backup to support a request for a time extension. MTA is continuing to investigate and negotiate with the C0675 Contractor on the use of rubberized asphalt.

#### **MANAGEMENT ISSUES**

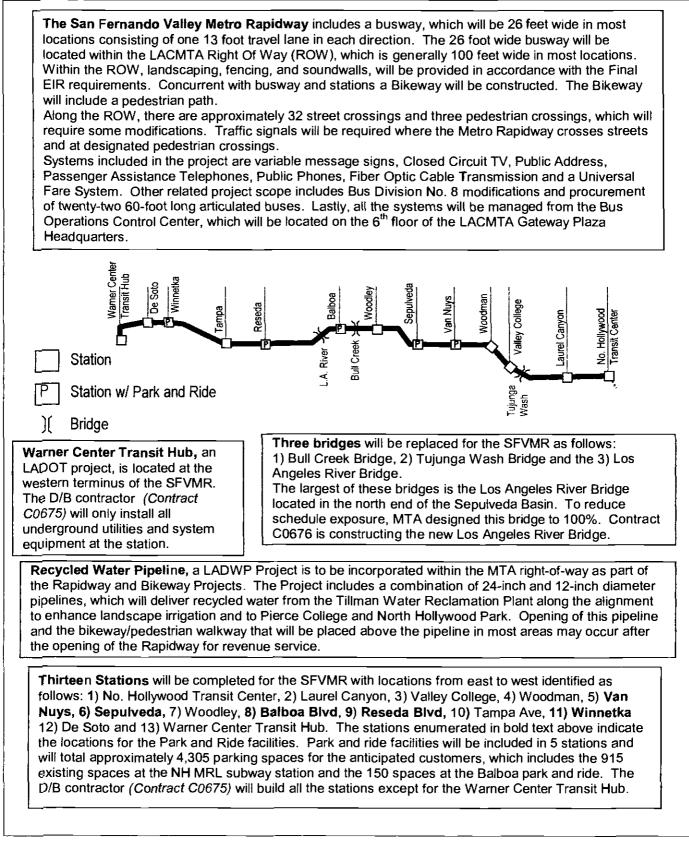

**Concern No. 8:** Upgrade Contract C0675 base scope for temporary landscaping irrigation to permanent landscaping irrigation designed to utilize recycled water.

**Status/Action** Due to community concerns, MTA staff is investigating converting the temporary landscaping irrigation to a permanent landscaping irrigation designed to utilize recycled water. This would allow MTA to provide permanent irrigation to the corridor sections of the project that are presently not planned to receive irrigation after the two year initial plant establishment period. MTA staff is investigating the costs and benefits and plan to have a recommended path forward by February 2004. The C0675 Contractor has submitted a cost proposal of \$8.1 million which significantly exceeds the MTA prepared rough order of magnitude value and has included in the cost proposal a request for a 133-calendar day time extension to Contract C0675 milestones. The C0675 Contractor has not provided backup to support a request for a time extension. MTA is continuing to investigate and negotiate with the C0675 Contractor. This additional work will probably require MTA Board approval once final scope and cost estimate is determined.

Concern No. 9: Contract Pavement Section for City Intersections.

**Status/Action** Presently the C0675 Contractor and the City are in disagreement as to which pavement sections are applicable to use for City portions of the pavement in intersections. The City has proposed a single pavement section of 10" of asphalt concrete over 4" aggregate base. The C0675 Contractor wants to analyze each intersection and have several pavement sections available. If this issue is not resolved by January 2004, this may impact the C0675 Contractor's construction schedule for completing work in the City intersections. MTA is working with both parties to resolve this issue.

#### **PROJECT SCOPE**

#### KEY MILESTONE SCHEDULE SIX-MONTH LOOK AHEAD

1	Milestone						
	Date	Nov-03	Dec-03	Jan-04	Feb-04	Mar-04	Apr-04
C0675: Begin work along Busways (613+00-669+79) Storm Drain, Rough Grade & Base	11/6/03A						
C0675: Begin work along Busways (669+79-735+08) Storm Drain, Rough Grade & Base	11/17/03A						
(Forecast) C0675: Complete Busway Segment 1: East 100% Design - Issue for Construction	12/1/03*

## SUMMARY SCHEDULE

San Fernando Valley Metro Rapidway Monthly Project Status Report

9

#### SCHEDULE NARRATIVE

The C0675 Contractor submitted a Current Schedule update this period that reflects a 53calendar day delay to the C0675 Contract Substantial Completion Milestone. According to the Contractor, the delay is attributed to the rejection of the Intersection Group 1 - 85% design submittal by the City of Los Angeles and the rejection of Busway Segment 1 100% design submittal by the MTA. MTA staff does not concur with the Contractor's assessment and has countered that it is the quality of the design being submitted that is causing rejection of submittals and delays to critical design submittal completion dates. In addition, the C0675 Contractor has also noted other delays to Contract milestones, ranging as high as 60calendar day delay (Milestone 3, System and Equipment Installed and Tested). MTA's assessment is that there are mitigation opportunities that can be implemented by the C0675 Contractor to mitigate these delays.

The C0675 Contractor submitted a mitigation plan which addressed some but not all the delays. The mitigation plan was rejected directing the Contractor re-submit. The Contractor re-submitted the mitigation plan and it is under review by MTA staff. Potential mitigation measures include: design acceleration of the remaining Intersection Groups 3 through 5, improved quality control on future submittals and acceleration of construction at critical intersections.

The C0675 Contractor is continuing construction efforts with site clearing, demolition, temporary fencing installation within right-of-way and CCTV camera installation at intersections. SOJV construction efforts this month continued with demolition and excavation completed and foundation work started for the Bull Creek Bridge and demolition started for the Tujunga Wash Bridge. The installation of storm drain pipe began along the eastern most portion of the alignment as well as the start of installation of the storm drain pipe in the Laurel Canyon Intersection. Rough grading of busway is to commence next month as well as the start of shop drawings and fabrication of station canopies for first procurement package. The C0675 Contractor continues to submit design packages for City of Los Angeles and MTA review.

Submittals planned for the December 2003 period are: Intersection Groups 1 and 2 - 100% Design, Intersection Groups 4 and 5 - 60% Design, Bikeway Segment 1 - 100% Design, Systems – 85% Design and Busway Segment 1A - Issue for Construction. The following design packages are under review by MTA and/or the City of Los Angeles: Intersection Group 2 - 85%, Intersection Group 3 – 60%, Station Canopies - 100%, Bike Path Segment 2 - 60%, and Landscape and Irrigation - 100%.

#### SCHEDULE NARRATIVE

The C0676 Contractor, constructing the new Los Angeles River Metro Rapidway Bridge, remains on schedule. During the November period, the C0676 Contractor completed the concrete guardrail and fence on top of it, the anti graffiti coating of bridge and lighting. Contractor is forecast to complete the Contract Substantial Completion Milestone in early December 2003.

MTA is maintaining the forecast for SFVMR Project Revenue Operations as August 2005. To maintain this date, MTA is maintaining the modified work activity logic in the Project Schedule to show integration testing and pre revenue operations activities overlapping with the C0675 Contractor final work activities that lead to Substantial Completion Milestone No. 4 (forecast for August 2005). In addition, the C0675 Contractor's 20 work-day duration was reduced to 19 work days for the Contractor's contingency activity "prepare for Milestone No. 4. Although the C0675 Contractor is behind schedule, the Contractor has not reduced construction schedule contingency incorporated in the Contractor's Current Schedule nor has the Contractor exhausted potential construction mitigation opportunities available.

TOTAL	329.5	329.5	329.5	0.0	189.9	58.3				

#### **PROJECT COST STATUS**

Expenditures are cumulative through October 2003.

#### PROJECT COST ANALYSIS

The Original Budget of the San Fernando Valley Metro Rapidway Project, which includes an allowance of \$16.5 million for a proposed park-and-ride facility at the Western Terminus of the Rapidway, was adopted in February 2003 for a value of \$329.5 million.

#### Current Forecast

The net Project forecast remained the same at \$329.5 million for the November period. The forecast increased by \$0.2 million as a result of a potential change to the Universal Fare System contract to incorporate the data transmission system. The forecast increase was offset by a corresponding decrease to the Los Angeles River Bridge Contract C0676 due to re-assessment of the contingency allowance. **Commitments** 

The commitments increased \$0.7 million primarily due to the following: \$0.1 million for the execution of Contract C0676 change notice to apply anti-graffiti coating to exposed portions of the Los Angeles River Bridge and \$0.6 million for Agency related costs. The \$189.9 million in commitments to date represents 57% of the Original Budget.

#### Expenditures

Expenditures are cumulative through period ending October 2003. The expenditures increased \$3.5 million this period primarily due to the following: \$2.0 million for Design/Build Contract C0675, \$0.6 million for Los Angeles River Bridge Construction Contract C0676, \$0.1 million for EIR/S Phase Consultant Services of the proposed park-and-ride facility, and \$0.8 million for Professional Consultant Services and Agency related costs. The \$58.3 million in expenditures to date represents 18% of the Original Budget.

Contingency	0.8	0.2	0.2	0.0	0.0	0.0					
TOTAL	8.1	8.1	8.1	0.0	5.5	0.5					

#### **PROJECT COST STATUS**

Expenditures are cumulative though October 2003.

## PROJECT COST ANALYSIS

The Original Budget of the San Fernando Valley Bikeway Project was adopted in February 2003 for a value of \$8.1 million.

The same C0675 Design/Build Contractor as the Metro Rapidway will construct the Bikeway Project. Construction activities for the Bikeway are expected to occur concurrent with the construction effort of the Metro Rapidway. The Bikeway Project is segregated from the base scope of the Metro Rapidway project due to differences in funding sources.

#### Current Forecast

Cost Forecast remained the same this period.

#### Commitments

There was no change to commitments this period. The \$5.5 million in commitments to date represents 68% of the Original Budget.

#### Expenditures

Expenditures are cumulative through period ending October 2003. The expenditures increased \$0.1 million due to Design/Build Contract C0675 and Agency related costs. The \$0.5 million in expenditures to date represents 5% of the Original Budget.

(1) Expenditures are cumulative though October 2003.

(2) Current Estimate based on September 2003 MTA Board action. Initial \$5.0 million authorized to further develop scope of work and life of project costs.

(3) Current Forecast does not include all costs required to build Pipeline. MTA and LADWP are still working out details of scope.

## **PROJECT COST ANALYSIS**

On September 16, 2003, the Los Angeles Department of Water and Power (LADWP) Board of Commissioners approved a \$5.0 million budget under an existing Master Cooperative Agreement with MTA for partial funding for schedule-critical portions of the LADWP Recycled Water Pipeline. Subsequently, on September 25, 2003, the MTA Board approved a \$5.0 million initial budget for Project No. 800116 authorized the issuance of Change Orders in the amount not to exceed \$2.5 million to the C0675 Contractor for initial funding of design and construction of the LADWP Recycled Water Pipeline. The MTA Board adopted the project on the condition that LADWP reimburse MTA for all costs associated with design, construction and administration of the Recycled Water Pipeline Project and that the pipeline would not cause a delay to the August 2005 opening of the busway. The MTA is proceeding with authorized scope and has billed and received initial reimbursement from LADWP for the Pipeline scope of work.

#### **Current Forecast**

Cost Forecast remained the same this period.

The Current Forecast included estimates for some but not all work associated with the Recycled Water Pipeline. MTA and LADWP are still working on the complete scope of work to be completed by the C0675 Design/Build Contractor and/or by others. The forecast will continue to be modified until the complete scope is defined and LADWP and MTA Boards adopt a life of project budget in first quarter of calendar year 2004. **Commitments** 

The commitments increased \$0.4 million due to the following: \$0.3 million to reflect approved change notices associated with potholing and design of Recycled Water Pipeline for Design/Build Contract C0675 and \$0.1 million for Agency related cost. The \$1.2 million in commitments to date represents 23% of the Current Estimate.

#### Expenditures

Expenditures are cumulative through period ending October 2003. The expenditures increased \$0.6 million due to the Los Angeles River Bridge Construction Contract C0676 and Agency related costs. In addition, an initial reimbursement of \$0.2 million for staff time and consultant services was received from LADWP. The \$0.4 million in expenditures to date represents 8% of the Current Estimate.

#### **FINANCIAL/GRANT STATUS**

#### Project 800112 - San Fernando Valley Metro Rapidway

## **STATUS OF FUNDS ANTICIPATED**

**STATE TCRP:** Cumulative to date, \$47 million of State TCRP funds are available for draw down. The California Transportation Commission (CTC) allocated \$12.3 million in January 2001 and \$34.7 million in June 2002. At the June 25, 2003 CTC Meeting, the CTC approved the transfer of TCRP funds remaining in preliminary engineering to be used for final design efforts. At the October 2003 CTC Meeting, the CTC approved MTA's request for an AB 1335 (Letter of No Prejudice) for \$98 million of TCRP funds should they become available.

**STATE STIP:** Due to the suspension of the TCRP program, MTA processed a STIP amendment to secure \$98 million of STIP substitute funding to replace TCRP funds previously committed to the project. On April 3, 2003, the CTC approved the MTA's request for the STIP amendment.

NOTE: Expenditures are cumulative through October 2003.

The San Fernando Valley Bike Path funding agreement between the City of Los Angeles

and the MTA stipulates a total funding amount of \$10,880,150.

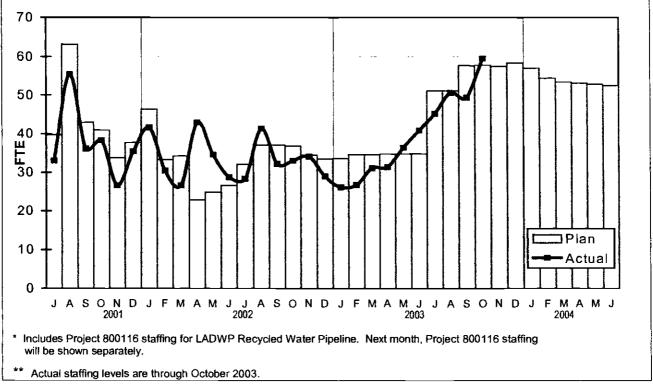

## **STATUS OF FUNDS ANTICIPATED**

**FEDERAL FUNDS:** The transfer of Federal Funds from the Federal Highway Administration to the FTA has been completed. On May 29, 2003, MTA submitted grant application #CA-90-X970-03 to the FTA for a total amount of \$7,058,600. The FTA grant was executed on August 27, 2003 and is now available for drawdown.

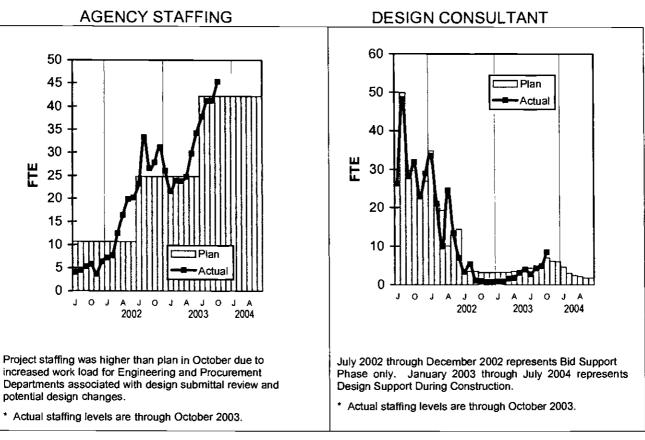

**CITY OF LA:** The funding agreement for the local match between MTA and the City of Los Angeles was reviewed by the MTA and sent back to the City of Los Angeles for execution. The funding agreement was executed on April 24, 2003.

ł

## **STAFFING STATUS \***

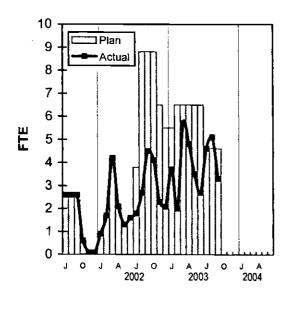

#### TOTAL STAFFING STATUS

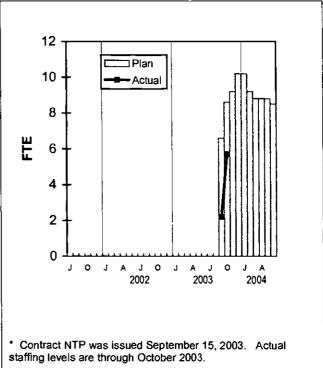

#### **STAFFING STATUS**

No additional actuals are planned after September 30, 2003 as this contract has been suspended.

#### CONSTRUCTION MANAGEMENT SUPPORT SERVICES CONSULTANT

#### **REAL ESTATE STATUS**

- The number of leases to be terminated for the project is 101 with 97 available to the C0675 Design/Build Contractor. The following four parcels were scheduled to be available to the C0675 Contractor on July 1, 2003 and have been permitted (pending a further design review) to remain either partially or completely as noted below without impacting the Project.
  - Parcel 1502 Allegheny Properties (required for construction of Sepulveda Park-and-Ride). The lease on a portion of this parcel is being extended on a month-to-month basis pending design review at the tenant's request to retain a portion of the lease area.
  - 2. <u>Parcel 1503 Chesapeake Properties (required for construction of Sepulveda Park-and-Ride)</u>. A small portion of the lease on the western edge of this parcel is being extended on a month-to-month basis pending review at the tenant's request to retain a portion of the lease area.
  - 3. <u>Parcel 2207 Mohler (required for construction of busway)</u>. A design review of this parcel indicates that it can continue to be leased to the current tenant without any impact to the project. This tenant has executed a new license.
  - 4. <u>Parcel 2601 LA Soccer Club (required for construction of busway)</u>. The lease on a portion of this parcel is being extended on a month-to-month basis pending review at the tenant's request to retain a portion of the lease area. A design review of this parcel indicates that a small portion (10' x 150') of this lease can be continued to be licensed to this tenant without any impact to the Project and a new non-exclusive license has been executed by this tenant.
- Under New Acquisitions, nine parcels were originally required and certified as full takes. However, one parcel was decertified as not required for the Project. Status of the eight parcels: two parcels have been acquired from the U.S. Government; three have been acquired from private owners and orders of possession effective July 1, 2003 were obtained for two parcels. An agreement has been reached for Parcel 301 Pierce College (required for construction of Winnetka Park-and-Ride) to acquire the property by July 2004 for the C0675 Contractor's use.

• There is still an illegal seven-foot house encroachment near the Interstate 405 Freeway (See Management Issue Section No. 3). Legal action (forceable detainer) has been filed and a court date is scheduled for mid-January 2004. In the interim, negotiations have commenced with the homeowner and his attorney. An initial offer by MTA for financial assistance to the homeowner to expedite resolution is being prepared for presentation to his attorney in December 2003.

#### **ENVIRONMENTAL STATUS**

- Completed baseline stormwater audit to determine best management practices implementation.
- Continuing oversight and air monitoring of torch cutting at locations in Tujunga and Bull Creek bridges due to possible exposure to lead based paint.

#### **COMMUNITY RELATIONS STATUS**

- Held public meetings and gathered community input on landscaping in Van Nuys and Woodland Hills.
- Held neighborhood meeting with Victory Park Neighborhood Association to address community specific concerns.
- Mitigated impacts of tree removal in Woodland Hills, Tarzana and Reseda by responding to property damage claims.

## **QUALITY ASSURANCE STATUS**

- Reviewed and approved SOJV Inspection Procedures and Checklists.
- Reviewed and approved WGI revised Design Procedures.
- Reviewed and approved two Contractor Independent Test Laboratory submittals, RMA Test Laboratory (additional scope of work) and MTGL Test Laboratory.
- Performed audit of SOJV Audit Program.
- Participated as an observer during the SOJV audit of Richard Chong and Associates (Station Canopy and Station Sub-consultant).
- Reviewed and commented on the following Design Packages: 100% Bridge Design Package, 100% Busway 1A Design Package, 85% Intersection Design Package, Canopy Station Design Package.

## SAFETY STATUS

- Participated in weekly progress meetings with Construction Management to discuss safety related issues and construction schedule for Contract C0675 Design/Build and Contract C0676 Los Angeles River Bridge.
- Reviewed and accepted contractor safety submittals.
- Monitored construction activities daily to ensure contractor compliance.
- Participated in weekly Contractor Tool Box Safety Meetings.
- Contractors reported zero lost-time incidents for the month of November 2003.

## **CHRONOLOGY OF EVENTS**

_		
	May 15, 2001	The MTA released the draft environmental study of a proposed 14-mile Bus Rapid Transit (BRT).
	July 26, 2001	The MTA Board of Directors adopted the 14-mile Bus Rapidway system, also called a "busway," as the locally preferred alternative for the San Fernando Valley Metro Rapidway Corridor.
	February 14, 2002	The MTA issued the final environmental report for the 14-mile Bus Rapid Transit.
	February 28, 2002	The MTA Board voted to certify the final environmental report for the Bus Rapid Transit system and approved a solicitation for a Design/Build delivery system for the Project. The action paved the way for the project's final design phase.
1	June 28, 2002	The MTA completed the Preliminary Engineering and Design Development efforts. The Design/Build Invitation for Bid package for Contract No. C0675 was assembled and advertised.
	July 12, 2002	The MTA issued Addendum No. 1 for Contract No. C0675.
	July 19-22, 2002	The MTA conducted job walks for potential bidders providing the opportunity to view current project conditions.
	July 25, 2002	The MTA issued Addendum No. 2 for Contract No. C0675.
	August 23, 2002	The MTA completed final design of the Los Angeles River Bridge. The final design was completed to mitigate possible construction and schedule risks associated with a limited dry season construction restriction within the river channel.
	August 28, 2002	San Fernando Valley Metro Rapidway Project held its first Community Transit meeting. The meeting, held in a relatively informal style, included planners, schedule makers, and schedule checkers from the sector office. The meeting's format included plenty of time for attendees to speak to the planners and schedulers about specific issues with specific lines or stops.
	August 29, 2002	The MTA issued Addendum No. 3 for Contract No. C0675. This included the option for constructing the Los Angeles River Bridge.
	August 29, 2002	Contract No. EN069, CH2M Hill Constructors, Inc., started demolition of the Los Angeles River Bridge.
	September 9, 2002	Two bidders submitted technical bids, first step of the two-step bid process for Contract C0675.
	September 11, 2002	The MTA advertised Contract No. C0676 Los Angeles River Bridge.
	September 19, 2002	Substantial completion of the Los Angeles River Bridge demolition.
	October 31, 2002	The MTA issued Notice of Technical Acceptance to two Contract No. C0675 bidders, Shimmick-Obayashi, a Joint Venture and Granite-Brutoco, a Joint Venture.

## **CHRONOLOGY OF EVENTS**

November 2002	Addendums No. 4, 5, and 6 were issued for Contract No. C0675 to clarify issues identified during the technical evaluation phase.
December 2, 2002	Received price bids from the two contractors for Contract No. C0675 Design/Build.
December 5, 2002	MTA received a single bid for Contract No. C0676 Los Angeles River Bridge.
December 5, 2002	MTA opened two price bids for Contract No. C0675 Design/Build for design and construction.
December 17, 2002	Notice of Intent to Award Contract No. C0675 sent to both contractors.
December 17, 2002	The California Transportation Commission (CTC) issued letter deferring "Traffic Congestion Relief Program" (TCRP) funds until its meeting on February 27, 2003. This resulted in the suspension of Contract No. C0675 contract award pending further notification of funding status from the CTC.
December 20, 2002	A trial was held to hear the lawsuit brought by the Citizens Organized for Smart Transit (COST) opposed to the Project. The judge ruled in favor of MTA.
December 23, 2002	Los Angeles Department of Water and Power (LADWP) agrees to reimburse MTA for actual costs incurred to review and update Los Angeles River Bridge design to incorporate a future reclaimed waterline.
December 27, 2002	A Notice to Award was issued to Brutoco Engineering and Construction Corporation for Contract No. C0676 Los Angeles River Bridge.
January 17, 2003	MTA held groundbreaking ceremony for Contract No. C0676.
January 17, 2003	CTC held workshop to discuss funding issues.
January 17, 2003 January 28, 2003	CTC held workshop to discuss funding issues. Notice to Proceed was issued to Brutoco Engineering and Construction Corporation for construction of the new Los Angeles River Bridge. The decision to award a separate contract instead of exercising option in Contract No. C0675 Design/Build allowed critical work to commence during the first dry construction period starting April 15, 2003.
•	Notice to Proceed was issued to Brutoco Engineering and Construction Corporation for construction of the new Los Angeles River Bridge. The decision to award a separate contract instead of exercising option in Contract No. C0675 Design/Build allowed critical work to commence during the first dry construction
January 28, 2003	Notice to Proceed was issued to Brutoco Engineering and Construction Corporation for construction of the new Los Angeles River Bridge. The decision to award a separate contract instead of exercising option in Contract No. C0675 Design/Build allowed critical work to commence during the first dry construction period starting April 15, 2003.

## **CHRONOLOGY OF EVENTS**

April 24, 2003	MTA Board adopted San Fernando Valley Metro Rapidway Project as the official name of the Project.
May 2, 2003	Notice to Proceed (NTP) was issued to Shimmick Construction Co., Inc./Obayashi Corporation, a Joint Venture for Contract No. C0675.
May 20, 2003	The LADWP Board of Commissioners certified the Mitigated Negative Declarations for the West Valley Water Recycling Project (known as the Recycled Water Pipeline Project).
July 9, 2003	MTA and Contractor staff complete move into an Integrated Project Management Office for Contract No. C0675.
September 15, 2003	NTP was issued to Carter & Burgess for Contract MC067 Construction Management Services.
September 16, 2003	The LADWP Board of Commissioners approved a \$5.0 million budget under an existing Master Cooperative Agreement with MTA for partial funding for schedule- critical portions of the LADWP Recycled Water Pipeline Project.
September 25, 2003	The MTA Board approved a \$5,000,000 initial budget and authorized the issuance of change orders in the amount not to exceed \$2,500,000 to the C0675 Contractor for initial funding of design and construction of the LADWP Recycled Water Pipeline.
October 15, 2003	C0676 Contractor completed on time all in-channel work required to meet contract milestone date planned for October 15, 2003.
November 6, 2003	C0675 Contractor began first excavation and installation of drainage pipe at the east end of the Rapidway on Chandler Boulevard between Laurel Canyon and Coldwater Canyon.
November 17, 2003/ November 20, 2003	Held two of four planned community meetings in the San Fernando Valley to collect feedback on proposed landscape plans for the Rapidway.
November 21, 2003	First temporary lane closure at Laurel Canyon Intersection for installation of drainage pipe across intersection.

#### APPENDIX

#### COST AND BUDGET TERMINOLOGY

COMMITMENTS: The total of actual contract awards, executed change orders or amendments, approved work orders of Master Cooperative Agreements, offers accepted for purchase of real estate, and other MTA actions which have been spent or result in the obligation of specific expenditures at a future time.

CONSTRUCTION: Costs associated with Guideways, Yards and Shops, Systems/Equipment, Stations and Buses.

CONTINGENCY: A fund established at the beginning of a project to provide for anticipated but unknown additional costs that may arise during the course of the project.

CURRENT BUDGET: The Original Budget plus all budget amendments approved by formal MTA action. Also referred to as Approved Budget.

EXPENDITURES: The total dollar amount of funds expended by MTA for contractor or consultant invoices, third party invoices, staff salaries, real estate and other expenses that is reported in MTA's Financial Information System (FIS).

INCURRED COST: The total value of work performed to date of services received, and acquired materials or properties.

ORIGINAL BUDGET: The Original Project Budget as established by Metropolitan Transportation Authority (MTA) Board of Directors at the time it authorizes Construction Project Management Division to commence full design and construction of the project (Project Adoption).

PARK-AND-RIDE FACILITY: Proposed park-and-ride facility at the western Rapidway terminus.

PROFESSIONAL SERVICES: Costs associated with General Engineering, Project Management Assistance, Construction Management Support services, Legal Counsel, Agency (MTA Staff) costs, and other Specialty Consultants.

RIGHT-OF-WAY: Includes purchase cost of parcels, easements, right-of-entry permits, escrow fees, and tenant relocation.

SPECIAL CONDITIONS: Costs associated with Utilities Relocation, Environmental Mitigation and Compliance, Master Cooperative Agreements, Insurance Programs, Safety Program, Artwork, Systems Integration Testing and Pre-Revenue Operations.
