## ORGANIZATION

The APTA Public Transportation Infrastructure Database is a biannual statistical report of major infrastructure data on public transportation systems across the U.S. and Canada. The data is entirely reported by 143 participating APTA transit members in this year's report. Data in this report are as of September 1, 2016, but include additional data that became known prior to publication date. In addition to U.S. transit agencies, data are listed for a few larger Canadian transit agencies at the end of each table or table section.

Only those transit agencies that responded this year are included. Agencies that did not respond to the current year's survey are not included. The totals listed are the sum of reporting agencies only, and NOT the national totals.

Data are for infrastructure USED by the agency, since some transit agencies do not actually own some of their facilities.

There are 3 sections to this report:

1. **Stations and Stops:** Includes transit agencies operating or contracting for bus, trolleybus, ferry, and rail transit service.
2. **Rail Lines:** Includes transit agencies that operate or contract for rail transit service.

In this section, the type-of-line mileage (elevated, surface, and underground) and the number-of-tracks mileage (single, double, triple, quadruple, quintuple, and sextuple) totals are identical--these totals are main line route (not track) mileage normally used for passenger service.

The actual track mileage for those lines is included in the "Mainline passenger track" category, which is the sum of single-track mileage plus 2 times double-track plus 3 times triple-track plus 4 times quadruple track plus 5 times quintuple-track plus 6 times sextuple-track mileage. Track for yards, sidings, storage, and infrequent special-event service are included in the "Yard and other track" category.

3. **Rail Line Segments Status:** Includes both transit agencies that operate or contract for rail transit service and those that are planning future rail lines.

Data include lines in operation as of September 1, 2016, plus those under construction, in design, in planning, and proposed. Only officially-adopted government and private sector projects and those qualified for ballot referendum via citizen initiatives are included. Proposals by citizens and interest groups with no official approval are NOT included. Lines and segments are listed by primary transit agency user, potential user, or agency in charge of the project, regardless of who owns, proposes, plans, designs, or constructs the line or segment.

## Double-Counting of Data

### Station, Stop, and Parking Facility Data

Transit agencies in some cities have more than one rail mode, which share some stations and parking facilities. Since there is no feasible way to allocate such shared-facility data by mode, data were collected for 3 categories--all rail modes combined, bus and trolleybus modes combined, and ferryboat mode--to minimize the double-counting problem. Any facility used by a rail mode is counted in the rail category whether or not bus service is available; any facility used by ferryboat mode is counted in the ferry category whether or not bus service is available. Thus, the bus/trolleybus category includes facilities used ONLY by buses and/or trolleybuses. This eliminates double-counting for an individual agency. However, most of the 30 largest urbanized areas are served by anywhere from 2 to over 20 transit agencies. This results in double-counting when they share the same stations, bus stops, and parking facilities.

## Rail Line Data

Because different rail modes of the same transit agency almost never share the same track (the only known case is in Cleveland), there is almost no double-counting within the same agency. However, there is some double-counting in a few cases (in Connecticut, Illinois, and Pennsylvania) where two different transit agencies share the same tracks.

## Rail Line Segments Status Data

Double-counting occurs when one or more lines share the same track segment. If there are no shared-track segments, the mileage reported for open segments equals the sum of the elevated, surface, and underground mileage reported in the Rail Lines data section.

# Data Items Included

## Stations and Stops

**Stations, number of**--For bus and trolleybus, includes transit centers, stations on transit malls, and stations on busways. The following categories reflect the number of stations so equipped--not the number of pieces of equipment:

**ADA accessible**--in compliance with the Americans with Disabilities Act (for Canadian systems, this essentially means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (fare vending machines, telephones, etc.), and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and Braille alternatives).

**Attended**--person on duty to answer questions and monitor and/or maintain equipment

**Public address system**--equipment used to make announcements to passengers

**Vehicle Arrival Time Displays**--has displays that show when (at what time or in how many minutes) a vehicle will next arrive at the station.

**Information/Ad displays** - displays that show information/ads but do not show when vehicles will arrive at the station

**Security Cameras**

**WiFi**--station has WiFi wireless internet service (not cell phone network service)

**Concessions**--officially authorized

**Restrooms**--officially designated for passenger use

**Day care facilities**--with official relationship to transit system

**All-Day Auto Parking**--station has all-day auto parking for customers (park-and-ride)

**Bike Racks**--station has bike racks for public bike parking use

**Secure Bike Facility/Locker**--station has a secured bike facility or bike lockers

**Bikeshare Station**--bike sharing scheme station nearby

**Elevators, Escalators, Faregates/turnstiles, and Fare vending machines**--includes those available for passenger use at stations and associated facilities such as parking garages. Fare vending machines also includes machines located at sales outlets not located at stations.

**Automobile parking spaces (all-day)**

**Automobile parking spaces (part-day)**--short-term, kiss-and-ride

**Bicycle at racks**—number of parking spaces for bicycles at racks

**Bicycle in secure facility/locker**—number of parking spaces for bicycles in secure facilities and locker spaces

**Motorcycle/moped**

**Stops, non-station, number of**--total number of non-station stops.

**Shelters**--with passenger shelters.

**Benches**--with passenger benches.

**Lights**--with agency-provided lighting.

**Vehicle Arrival Time Displays**--with displays that show when (at what time or in how many minutes) a vehicle will next arrive at the stop.

**Auto Parking Lot**--stop has all-day auto parking for customers (park-and-ride)

## **Rail Lines**

**Connecting modes**--at any of the mode's stations. Includes connections for modes such as buses and trolleybuses that have a stop within one block of a station entrance.

A--airline

B--bus

C--commuter rail

F--ferryboat

H--heavy rail

IB--intercity bus (Greyhound, Trailways)

IR--intercity rail (AMTRAK, VIA)

L--light rail

OR--other rail mode such as automated guideway, cable car, inclined plane, monorail, or aerial tramway

T--trolleybus (electric bus operating from overhead wires)

**Lines, number of**--each branch of a multi-branch "line" is a separate line

**Year first line opened**--for passenger service

**Line mileage**--passenger-service route miles to nearest 0.1 mile, counted in one direction only. Mileage is allocated in two ways:

### ***End-to-end mileage by type***

**Elevated**--on structures

**Surface**--includes open cuts and on fill material

**Underground**

### ***End-to-end mileage by trackage***

**Single-track**

**Double-track**

**Triple-track**

**Quadruple-track**

**Quintuple-track**

**Sextuple-track**

**Track Mileage**--to nearest 0.1 mile

**Mainline passenger track**--passenger service is NORMALLY operated. Does NOT include sidings or end-of-line storage tracks, infrequent special-event trackage, adjacent freight tracks that may be used in an emergency, and temporary widenings such as a third track within a station on a double-track line. Mileage is the sum of single-track mileage plus 2 times double-track plus 3 times triple-track plus 4 times quadruple-track plus 5 times quintuple-track plus 6 times sextuple-track mileage.

**Yard and other track**--track not included in "mainline passenger track."

**Grade crossings, number of** (where passenger service is operated)

**Gate protected**

**No gates**

### **Other characteristics**

**Longest passenger platform**--to nearest foot

**Maximum scheduled speed**--in miles per hour

**Average scheduled speed**--in miles per hour

**Shortest scheduled headway**--in minutes and seconds, e.g., 2:30

## **Future Fixed-Guideway Projects**

### **Mode**

RB - Bus Rapid Transit  
HR - Heavy Rail  
CR - Commuter Rail  
LR - Light Rail  
OR - Any Other Rail Mode  
SR - Streetcar  
YR - Hybrid Rail  
? - Mode to be Determined

**Project Name** - a name/short description of the project

**Miles** - the potential one-way length of the project

## **Data Systems**

**Refresh Rate** – how often (in seconds) real-time vehicle locations are updated

**How do you provide real-time information to customers?**

**Phone System** - riders can call an AUTOMATED system that will tell them when vehicles will arrive at a stop

**Text Message (SMS) System** - riders can send a text message (SMS) to an automated system

**Web Site** - there is a web site riders can go to for real-time information

**Smartphone App** - transit agency-developed smartphone app that uses real-time information

**APIs** - programming tools that provide a way for online apps and tools to use real-time data.

**App Highlight Page** - a page that lists apps using the agency's data (sometimes called an "App Gallery")

**TABLE 1: PARTICIPATING TRANSIT AGENCIES**

State	City	Agency Name
<b>UNITED STATES</b>		
<b>BUS</b>

## Table 2: Summary Table: Number of Attended and ADA Accessible Stations by Mode

**Attended Station:** A station with a non-police staff person on duty at least part of the day to do things such as answer questions, monitor and/or maintain equipment, make announcements, and sell fare media.

**ADA Accessible Station:** A station in compliance with the Americans with Disabilities Act. This basically means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (platform lifts, fare vending machines, telephones, etc.), and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and braille alternatives).

**Canadian systems are not subject to a particular national accessibility standard such as the ADA and as such use their own standards for accessibility.**

Mode	Country	Stations	Number of Attended Stations	Attended Stations % of Total	Number of ADA Accessible Stations	ADA Accessible Stations % of Total
BUS	UNITED STATES	638	163	25.5%	618	96.9%
FERRY	UNITED STATES	57	34	59.6%	54	94.7%
RAIL	UNITED STATES	1,323	193	14.6%	993	75.1%
BUS	CANADA	177	25	14.1%	44	24.9%
FERRY	CANADA	5	5	100.0%	5	100.0%
RAIL	CANADA	267	196	73.4%	131	49.1%

## Table 3: Summary Table: Number of Stations with Informational Systems by Mode

**Station with Public Address System:** A station with equipment used to make announcements to passengers--either from a station attendant or from a central control facility.

**Station with Vehicle Arrival Time Displays:** A station with electronic displays that show when (at what time or in how many minutes) a vehicle will next arrive at the station.

**Station with Information/Ad Displays:** A station with electronic video displays that show information/advertisements but do not show when vehicles will arrive at the station.

**Station with Security Cameras:** A station with cameras to monitor the station, bus transfer area, and/or parking facility to provide information to station and security personnel.

Mode	Country	Stations	Stations with Public Address System	Public Address System % of Total	Stations with Vehicle Arrival Time Displays	Vehicle Arrival Time Displays % of Total	Stations with Information/Ad Displays	Information/Ad Displays % of Total	Stations with Security Cameras	Security Cameras % of Total

## Table 4: Summary Table: Stations with Concessions, Restrooms, and Day Care Facilities by Mode

*Station with WiFi: A station with WiFi wireless internet service (not cell phone network service).*

*Station with Concessions: A station with OFFICIALLY AUTHORIZED concessions such as a newstand or newspaper boxes, food stand or food vending machines, convenience store, dry cleaner, ATM machine, or musician performing with a permit. Does NOT include such services in nearby locations such as those on the ground floor of an adjacent office building that are off the station property and not officially authorized.*

*Station with Restrooms: A station with restrooms officially designated for passenger use. Does not include stations with private restrooms available only to transit staff.*

*Station with Day Care Facilities: A station with a day care facility with OFFICIAL RELATIONSHIP to the transit system. Does NOT include such services in nearby locations such as those in an adjacent office building that are off the station property and not officially authorized.*

Mode	Country	Stations	Stations with WiFi	WiFi % of Total	Stations with Concessions	Concessions% of Total	Stations with Restrooms	Restrooms % of Total	Stations with Day Care Facilities	Day Care % of Total

RAIL	CANADA	267	82	30.7%	175	65.5%	76	28.5%	0	0.0%

## Table 5: Summary Table: Escalators, Elevators, Fare Gates, and Fare Vending Machines by Mode

**Escalator:** A moving stairway that moves up and down at an angle to transfer passengers from one level of a station or parking facility to another. Does not include non-passenger escalators used only for freight or by transit staff.

**Elevator:** A compartment that usually moves up and down vertically to transfer passengers from one level of a station or parking facility to another. Elevators may move horizontally, such as from a station platform to an adjacent parking garage, but such movement is normally done by non-elevator means such as a pedestrian bridge or a moving sidewalk. Does not include non-passenger elevators used only for freight or by transit staff.

**Faregate/turnstile:** A pedestrian gate or barrier through which passengers must pass to enter and/or exit a station or parking facility. Fares are almost always collected or recorded upon entry, but much less often on exit.

**Fare vending machine:** A machine normally located at a station, an associated parking facility, or on a transit mall that sells transit fare payment media. Some machines may be located off transit property at locations such as shopping malls, governmental centers, and convenience stores for the convenience of passengers.

Mode	Country	Stations	Number of Elevators	Number of Escalators	Number of Fare Gates	Number of Fare Vending Machines

## Table 6: Summary Table: Parking Facilities by Mode

*Station with All-Day Automobile Parking: A station with parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.*

*Station with Secure Bike Facility: A station with bicycle parking spaces for transit passengers that are secured, such as bike lockers or a bike room with secured access.*

*Station with Bike Racks: A station with bicycle parking spaces at regular racks intended for transit passengers.*

*Station with Bike Share Station: A station with nearby bicycle sharing system station.*

Mode	Country	Stations	Stations with All-Day Auto Parking	All-Day Auto Parking % of Total	Stations with Secure Bike Facility	Secure Bike Facility % of Total	Stations with Bike Racks	Bike Racks % of Total	Stations with Bike Share Station	Bike Share Station % of Total

## Table 7: Summary Table: Parking Spaces by Mode

**Automobile all-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.

**Automobile part-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for less than a normal work day--such as 9:00 am to 3:00 pm mid-day parking or 30-minute kiss-and-ride parking.

**Secure bicycle parking space:** A space in a locker or other secured facility (such as a bike room) intended for transit passenger bicycles. The total is the sum of the capacity of all bicycle lockers (one bicycle per locker is assumed unless capacity was reported as two bicycles).

**Bicycle rack parking space:** A small space in parking facilities or on nearby streets or sidewalks reserved or intended for transit passenger bicycles. The total is the sum of the number of slots in bicycle racks (not the number of racks).

**Motorcycle/moped parking space:** A small space about 3 feet wide and 6 feet long in parking facilities or on nearby streets reserved or intended for transit passenger motorcycles, mopeds, and motor scooters.

Mode	Country	Stations	Number of All-Day Auto Spaces	Number of Part-Day Auto Spaces	Number of Secure Bicycle Spaces	Number of Bicycle Rack Spaces	Number of Motorcycle Spaces

## Table 8: Summary Table: Non-Station Stops by Mode

*Stop with shelter: A stop that has a passenger shelter.*

*Stop with bench: A stop that has a passenger bench.*

*Stop with lighting: A stop that has lighting provided for passengers.*

*Stop with Vehicle Arrival Time Displays: A stop that has a display that shows when (at what time or in how many minutes) a vehicle will next arrive at the stop.*

*Stop with Auto Parking Lot: A stop with all-day auto parking for transit customers (park-and-ride).*

Mode	Country	Stops	% of Stops with Shelters	% of Stops with Benches	% of Stops with Lighting	% of Stops with Vehicle Arrival Time Displays	% of Stops with Auto Parking Lot

## TABLE 9: NUMBER OF STATIONS

*Station: A passenger boarding/deboarding facility with a platform, a plaza flanked by several bus bays, or a dock. Some stations have elevators, escalators, faregates or turnstiles, a building with a waiting room, ticket office or machines, restrooms, or concessions. Others only have an open-air area with a canopy and/or with a wind shelter. All underground, elevated, rail (except for some cable car and light rail locations), ferryboat, transportation or transit center, and busway locations are stations. Those park-and-ride facilities and transit malls having such infrastructure are also stations; those that don't are stops.*

**TABLE 10: NUMBER OF ADA ACCESSIBLE AND ATTENDED STATIONS**

**Attended Station: A station with a non-police staff person on duty at least part of the day to do things such as answer questions, monitor and/or maintain equipment, make announcements, and sell fare media.**

**ADA Accessible Station: A station in compliance with the Americans with Disabilities Act. This basically means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (platform lifts, fare vending machines, telephones, etc.),and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and braille alternatives).**

**- Systems with less than 100% of stations being ADA accessible are not necessarily out of compliance.**

**- Canadian systems are not subject to a particular national accessibility standard such as the ADA and as such use their own standards for accessibility.**

**TABLE 11: NUMBER OF STATIONS WITH PUBLIC ADDRESS SYSTEMS, ARRIVAL TIME DISPLAYS, AND INFORMATION/AD DISPLAYS**

*Station with Public Address System: A station with equipment used to make announcements to passengers--either from a station attendant or from a central control facility.*

*Station with Vehicle Arrival Time Displays: A station with electronic displays that show when (at what time or in how many minutes) a vehicle will next arrive at the station.*

*Station with Information/Ad Displays: A station with electronic video displays that show information/advertisements but do not show when vehicles will arrive at the station.*

*Station with Security Cameras: A station with cameras to monitor the station, bus transfer area, and/or parking facility to provide information to station and security personnel.*

**TABLE 13: NUMBER OF STATIONS WITH CONCESSIONS, RESTROOMS, OR DAYCARE**

**Station with Concessions:** A station with OFFICIALLY AUTHORIZED concessions such as a newstand or newspaper boxes, food stand or food vending machines, convenience store, dry cleaner, ATM machine, or musician performing with a permit. Does NOT include such services in nearby locations such as those on the ground floor of an adjacent office building that are off the station property and not officially authorized.

**Station with Restrooms:** A station with restrooms officially designated for passenger use. Does not include stations with private restrooms available only to transit staff.

**Station with Day Care Facilities:** A station with a day care facility with OFFICIAL RELATIONSHIP to the transit system. Does NOT include such services in nearby locations such as those in an adjacent office building that are off the station property and not officially authorized.

**TABLE 14: NUMBER OF ESCALATORS, ELEVATORS, FAREGATES, AND FARE VENDING MACHINES IN STATIONS AND PARKING FACILITIES**

**Escalator:** A moving stairway that moves up and down at an angle to transfer passengers from one level of a station or parking facility to another. Does not include non-passenger escalators used only for freight or by transit staff.

**Elevator:** A compartment that usually moves up and down vertically to transfer passengers from one level of a station or parking facility to another. Elevators may move horizontally, such as from a station platform to an adjacent parking garage, but such movement is normally done by non-elevator means such as a pedestrian bridge or a moving sidewalk. Does not include non-passenger elevators used only for freight or by transit staff.

**Faregate/turnstile:** A pedestrian gate or barrier through which passengers must pass to enter and/or exit a station or parking facility. Fares are almost always collected or recorded upon entry, but much less often on exit.

**Fare vending machine:** A machine normally located at a station, an associated parking facility, or on a transit mall that sells transit fare payment media. Some machines may be located off transit property at locations such as shopping malls, governmental centers, and convenience stores for the convenience of passengers.

**TABLE 15: PARK AND RIDE STATIONS AND STOPS**

**Station with All-Day Automobile Parking:** A station with parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.

**Station with Secure Bike Facility:** A station with bicycle parking spaces for transit passengers that are secured, such as bike lockers or a bike room with secured access.

**Station with Bike Racks:** A station with bicycle parking spaces at regular racks intended for transit passengers.

**TABLE 17: NUMBER OF PARKING SPACES**

**Automobile all-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.

**Automobile part-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for less than a normal work day--such as 9:00 am to 3:00 pm mid-day parking or 30-minute kiss-and-ride parking.

**Secure bicycle space:** A space intended for transit passenger bicycles, either in a locker or bicycle room with secured access. The total is the capacity of bicycle lockers plus the number of slots for bicycles in secured rooms.

**Bicycle rack space:** A small space in parking facilities or on nearby streets or sidewalks reserved or intended for transit passenger bicycles. The total is the number of slots in bicycle racks (not the number of racks).

**Motorcycle/moped parking space:** A small space about 3 feet wide and 6 feet long in parking facilities or on nearby streets reserved or intended for transit passenger motorcycles, mopeds, and motor scooters.

**TABLE 18: TOTAL NON-STATION STOPS WITH SHELTERS, BENCHES, LIGHTING AND ARRIVAL TIME DISPLAYS**

*Stop with shelter: A stop that has a passenger shelter.*

*Stop with bench: A stop that has a passenger bench.*

*Stop with lighting: A stop that has lighting provided for passengers.*

*Stop with vehicle arrival time display: A stop that has a display that shows when (at what time or in how many minutes) a vehicle will next arrive at the stop.*

*See Table 15 for the number of stops with parking lots.*

## Table 19: Summary Table: Line Mileage by Number of Tracks by Mode

**Single-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on one track, counting mileage in one direction only, to the nearest 0.1 mile.

**Double-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on two parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Triple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on three parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Quadruple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on four parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Quintuple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on five parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Sextuple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on six parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**TABLE 21: FIXED GUIDEWAY LINES - GENERAL INFORMATION**

*Connecting mode: A public transportation mode that connects to a transit rail line at any of the mode's stations. Because of one-way street patterns, buses and trolleybuses that have a stop within one block of a station entrance are considered a connection. Airlines are only listed as a connection when the rail line directly serves the airport terminal and does not require passengers to transfer to shuttle buses. Modes are identified by the following codes: A--airline, B--bus, C--commuter rail, F--ferryboat, H--heavy rail, IB--intercity bus (e.g., Greyhound, Trailways), IR--intercity rail (e.g., AMTRAK, VIA), L--light rail, T--trolleybus (electric bus operating from overhead wires), OR--other rail mode (automated guideway, cable car, inclined plane, monorail, or aerial tramway).*

*Line: A route on which transit passenger service is operated. Each branch of a multi-branch "line" is counted as a separate line.*

*Year first line opened: The year the first line was opened for passenger service.*

**TABLE 26: FIXED GUIDEWAY - OTHER CHARACTERISTICS - PLATFORM LENGTH, SPEED, HEADWAY**

*Longest passenger platform: The length of the longest passenger platform, to the nearest foot, at a station.*

*Maximum scheduled speed: The maximum speed of a vehicle in scheduled service on any line, in miles per hour.*

*Shortest scheduled headway: The shortest period of time scheduled between vehicles, in minutes and seconds (e.g., 2:30).*

**TABLE 29: AUTOMATIC VEHICLE LOCATION SYSTEMS**

*Automatic Vehicle Location (AVL) systems track vehicles using GPS or track circuitry. Originally useful to transit agencies for internal purposes, many agencies are now using this technology to provide information to customers about when vehicles will arrive at their stop.*

## TABLE 32: APIs AVAILABLE

**API: Application Programming Interface: data formats used by transit agencies to provide public access to data by transit app developers**

**App Highlight Page: A page on the agency website that lists applications transit customers can use to access the agency's real-time information.**

Note: Includes only agencies with real-time arrival systems for customers.
