Vol. 9 No. 2

INTRODUCTION

This is the seventh in a series of in-depth surveys, compiled on January 1 of each year, on the operations of SOUTHERN CALIFORNIA RAPID TRANSIT DISTRICT, which provides local, suburban and interurban transportation in the Los Angeles metropolitan area. In this survey we will cover the equipment roster, coach assignments, a combined line list and service table, and the one-way running time of each route.

1 LINE LIST AND SERVICE TABLE

Regularly scheduled service provided by the District as of January 1, 1971, is summarized in the following service table. Service provided is broken down into three periods on Monday through Friday schedules, the morning rush (AM peak), midday (base period) and the afternoon rush (PM peak). Saturday and Sunday schedules are generally constant throughout the day; as a result, only one headway is listed. Also listed are the coach requirements, viz: the number of coaches needed in each time period to provide the headways that are recorded. In instances were a line operates out of more than one Division, the number of buses that each contributes to the line is indicated.

2 EQUIPMENT

Two hundred new air-conditioned Flxible coaches were ordered in 1970 and a number had been received by the end of the year. Officially, a few were ready for service at Division 4 for the 84 Line but as of December 31, none had actually entered service on that line. They did appear in service on several lines during January. Since more than half of the first 100 were on the property by December 31, they are included in this roster. This was the roster as of January 1, 1971:
