LA PUENTE RESIDENT PREPARING MTA GREEN LINE OPERATORS FOR SERVICE

-- Green Line Operations Supervisor Jess Guajardo, a La Puente resident, has spent recent months putting the first Green Line operators through the paces of learning the nuances of MTA's newest rail line. The first Green Line operators have come from disparate backgrounds to form a cohesive team that relies on each other to ensure Green Line service will be reliable starting on opening day. "We must be team players, because the schedule demands that we depend on each other. Trains must be six minutes apart," says Guajardo. The 20-mile east-west route, to open this summer, will serve the southern portion of Los Angeles County from the city of Norwalk to LAX.
