MEDIA ADVISORY/COMMUNITY CALENDAR

MEETINGS TO BE HELD IN SANTA CLARITA, ANTELOPE VALLEY

MTA TO HOST COMMUNITY MEETINGS TO EXPLORE TRANSPORTATION SOLUTIONS FOR NORTH L.A. COUNTY

WHAT: MTA will host two community meetings in Santa Clarita and in Palmdale as part of its North Los Angeles County Study, which is aimed at developing feasible and cost-effective solutions to alleviate traffic congestion in the region. The study is focusing on transportation issues directly impacting residents, and will specifically look at options from the junction of the I-5 and Route 14 north to the Kern County line. The public is encouraged to attend the meetings to speak with MTA and study staff, and to learn how to become involved in future planning activities.

The study will consider alternatives including construction of additional freeway lanes, special lanes for trucks and carpools, bus rapid transit, high speed rail transit, widening/realignment of SR-138, and possible links through the San Gabriel Mountains between the Antelope Valley and I-210.
