

PATSAOURAS TRANSIT PLAZA CLOSURE

IN EFFECT: 9:00 P.M. Friday, April 11th through 4:00 A.M., Monday, April 14th

Patsaouras Plaza Waterproofing and Landscape Renovation

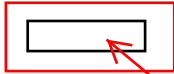

The Patsaouras Transit Plaza will be closed this weekend to allow the contractor to perform Landscaping project work on the western half of the inner loop of the plaza.

The following 2-pages are excellent scale drawings of protected areas in inner loop of the plaza after the work is completed and through mid-May.

1. Planter vaults on the western half of the inner loop will be excavated, and the holes protected with 4' high plywood boxes to keep our passengers safe.
2. Smaller single-tree vaults will be surrounded with 8'x8' boxes (shown in red).
3. Larger double-tree vaults will be surrounded with 16'x8' boxes (also shown in red).
4. Page 1: Blue numbers indicate width of space between boxes. The smallest is 126.5' (10.5 feet) and is near bus bay #3.
5. Page 2: Orange numbers indicate the width of pedestrian paths of travel at the narrowest point between the boxes and another fixed object.

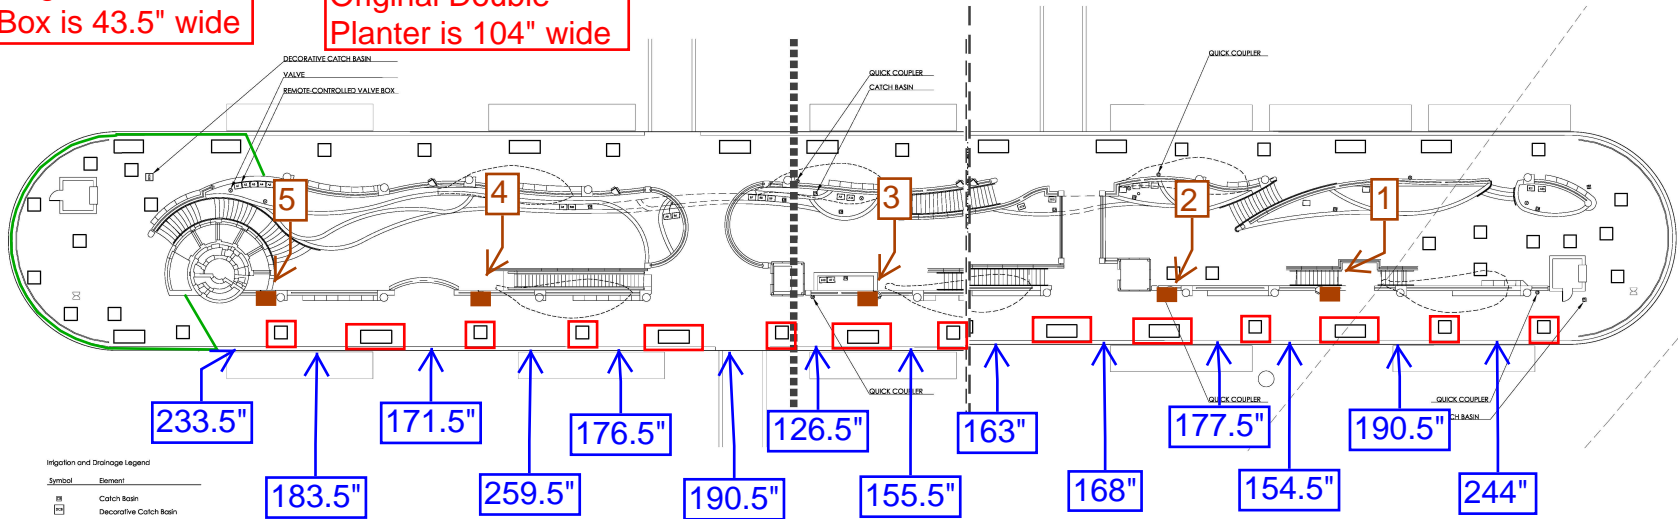

8' Wide

16' wide

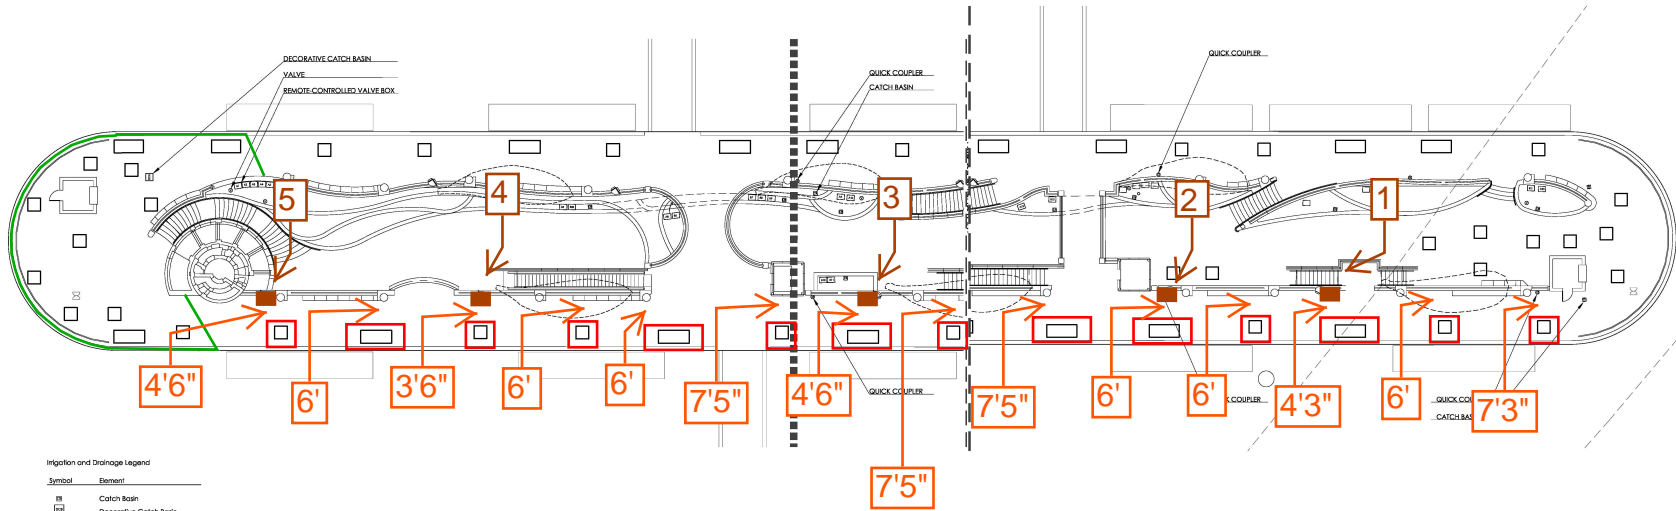

Original Planter Box is 43.5" wide

Original Double Planter is 104" wide
