## FOR IMMEDIATE RELEASE

### **\$254 MILLION IN FUNDING ALLOCATED TO UPGRADE HIGHWAY, RAIL AND ACTIVE TRANSPORTATION PROJECTS**

LOS ANGELES – The California Transportation Commission (CTC) allocated totaling over \$254 million for 41 transportation projects that will enhance the safety and mobility of Californians throughout the state, which includes \$3.4 million for locally-administered Active Transportation Program projects that encourage biking and walking.

“Investing in our infrastructure benefits Californians for generations to come and these projects will improve mobility for all users of the transportation system, whether they choose to travel by car, take transit or ride a bicycle,” said Caltrans Director Malcolm Dougherty.

The allocations included \$116.2 million from Proposition 1B, the 2006 voter-approved transportation bond. This included \$108 million to purchase diesel-electric locomotives and bi-level passenger railcars to improve intercity rail service by providing new capacity and replacing aging Amtrak-owned locomotives. Portions of that allocation will also be utilized for installing video and audio communications to ensure compliance with the Americans with Disability Act. Since its passage, more than \$18 billion in Proposition 1B funds have been put to work statewide for transportation purposes.

The remaining \$134.9 million in allocations came from assorted transportation accounts funded by state and federal dollars.

Some of the notable projects that received allocations include:

- \$8.2 million to the Southern California Regional Rail Authority to extend the existing Vincent Siding and to construct a 600-foot platform with an at-grade crossing at the Vincent Grade/Acton Station.
- \$6.5 million to reconstruct the roadway embankment and shoulder and to repair the drainage system on State Route 1 in Malibu one mile north of Topanga Canyon Boulevard.

## NEWS RELEASE

- \$814,000 to the City of Los Angeles for a project that will create neighborhood-friendly pedestrian and bicycle linkages between Sheridan and Breed elementary schools and will implement a road diet with bike lanes on a two-mile segment of Soto Street between Wabash Avenue and 8th Street.

The CTC also approved \$64.7 million in supplemental funds for the Route 101-Willits Bypass project in Mendocino County. The funds are necessary to address time delays needed to complete the project due to unexpected costs incurred by work stoppages caused by protesters, increased environmental permitting requirements and an increase to the pace of environmental mitigation.

Legislation requires development and implementation of a pilot program in California to study Road Usage Charge alternatives to the current gas tax, per [SB 1077](#). As such, the CTC also approved 15 members to the Road Usage Charge Technical Advisory Committee whose recommendations will be used to inform the development of the pilot program.

Please see the attached file for more information about all projects that received allocations.
