Introduction

This *Annual Report on Funding Recommendations* is issued by the United States Secretary of Transportation to help inform the appropriations process for the upcoming fiscal year (FY) by providing information on projects that have been submitted to the Federal Transit Administration's (FTA) discretionary Capital Investment Grants Program.

The Capital Investment Grants Program

The Capital Investment Grants (CIG) Program outlined in 49 USC 5309, was most recently authorized in December 2015 by the Fixing America's Surface Transportation Act¹ (FAST).

Since 1964, Congress has provided Federal funds to supplement certain local transit projects. In FY 2019, Congress provided \$10.2 billion in formula funds distributed to state and local governments for local transit projects. The CIG Program supplements those expenditures with additional financial resources for transit capital projects that are locally planned, implemented, and operated. It provides discretionary funding for fixed guideway investments such as new and expanded heavy rail, commuter rail, light rail, streetcars, bus rapid transit, and ferries as well as corridor-based bus rapid transit investments that emulate the features of rail.

There are three categories of eligible projects under the CIG Program: New Starts, Small Starts, and Core Capacity. New Starts and Core Capacity projects are required by law to go through a three-phase process - Project Development, Engineering, and Construction. Small Starts projects are required by law to go through a two-phase process - Project Development and Construction. As defined in law, New Starts projects are those whose sponsors request \$100 million or more in Capital Investment Grants Program funds or have an anticipated total capital cost of \$300 million or more. Core Capacity projects are substantial investments in existing fixed-guideway corridors that are at capacity today or will be in five years, where the proposed project will increase capacity by not less than 10 percent. Small Starts projects are those whose sponsors request less than \$100 million in Capital Investment Grants Program funds and have an anticipated total capital cost of less than \$300 million.

The FTA awards Section 5309 CIG funding for a portion of the total project cost, including design and construction. Federal public transportation law limits New Starts projects to a maximum Section 5309 CIG Program share of 60 percent of the total project cost, while Core Capacity and Small Starts projects are limited to a maximum Section 5309 CIG Program share of 80 percent of the total project cost. Often, annual appropriations laws also include provisions relating to the maximum Section 5309 CIG share allowed for projects funded with that year's appropriations. For example, the FY 2019 Consolidated Appropriations Act limits the CIG Program share for New Starts projects to a maximum of 51 percent. Ordinarily, the CIG Program share is less than the maximums specified in law, and often by a considerable amount.

The law requires all CIG projects to be evaluated and rated on a set of statutorily defined project justification and local financial commitment criteria. Projects must receive and maintain a "Medium" or better overall rating to advance through the various phases and be eligible for CIG

_

¹ This Annual Report is required by Federal public transportation law, 49 USC 5309(o)(1).

funding. Ratings are point in time evaluations by FTA and may change as proposed projects proceed through planning and design when information concerning costs, benefits, financial plans, and impacts is refined. The law does not require FTA to evaluate and rate projects once a construction grant agreement is awarded.

Section 3005(b) of FAST established the Expedited Delivery Pilot Program, which allows FTA to select up to eight projects for participation in the pilot. Eligible projects include New Starts, Small Starts, and Core Capacity projects that are seeking no more than 25 percent in Federal funding, are supported in part through a public private partnership, and will be operated and maintained by an existing public transportation provider. Similar to the requirements for the CIG Program, Section 3005(b)(11) of FAST requires FTA to submit to Congress an annual report on the proposed amount of funding for this pilot program.

This Report provides general information about the CIG Program, including the guidelines that the United States Department of Transportation (DOT) uses to make funding recommendations. Table 1 identifies the FY 2020 funding amount recommended for individual CIG projects, with information on each project's cost and funding history. Tables 2A, 2B, and 2C provide the results of FTA's evaluation and rating of the CIG projects at this juncture.

Information Available on the FTA Web Site

More information on the CIG Program can be found on FTA's website at http://www.fta.dot.gov/12304.html. Also available on the website, in the section labeled "Current Projects," are profiles of each of the projects currently in the CIG Program pipeline.

General Funding Recommendation and Funding Commitment Guidelines for CIG Projects

- Any project recommended for CIG funding by FTA in the *Annual Report* must meet the project justification, local financial commitment, and process criteria established in Section 5309, and should be consistent with Executive Order 12893, *Principles for Federal Infrastructure Investments*, issued January 26, 1994.
- Funding recommendations are based on the results of the project evaluation process and resulting project justification, local financial commitment, and overall project ratings, as well as considerations such as project readiness and the availability of CIG funds.
- The decision whether to enter into a construction grant agreement is discretionary. Even if FTA decides to proceed with such an agreement, FTA does not sign a construction grant agreement committing CIG funding until after the project sponsor has demonstrated that its project is ready for such an agreement. This includes assurance that the project's development and design have progressed to the point where its scope, costs, benefits, and impacts are considered firm and final, the project sponsor has obtained all non-CIG funding commitments, and the project sponsor has completed all critical third-party agreements. Under the longstanding CIG Program framework, FTA establishes a maximum fixed CIG dollar amount upon entry into the Engineering phase for New Starts and Core Capacity projects, or at award of the construction grant agreement for Small Starts projects.

Thereafter, the project sponsor assumes the risk for any cost overruns or funding shortfalls that may occur on a project.

- The construction grant agreement, called either a Full Funding Grant Agreement (FFGA) for New Starts and Core Capacity projects or a Small Starts Grant Agreement (SSGA) for Small Starts projects, defines the project including its cost, scope, schedule, and level of service; commits to a maximum level of annual and total CIG financial assistance (subject to Congressional appropriation); establishes the terms and conditions of Federal financial participation; defines the period of time for completion of the project, and helps FTA oversee and the project sponsor manage the project in accordance with Federal law. Upon completion of the payment schedule outlined in an FFGA or SSGA, the CIG funding commitment has been fulfilled. Any additional costs are the responsibility of the project sponsor. The FTA works closely with project sponsors to identify and implement strategies for containing capital costs at the level indicated in the FFGA or SSGA at the time it was signed.
- When preparing funding recommendations for the upcoming fiscal year, FTA's priority is to honor the commitments made in existing construction grant agreements. The FTA recommends new projects not yet under construction grant agreements for funding only if proposed CIG Program funding levels are sufficient.
- Initial planning efforts conducted prior to entry into the first phase of the CIG process are not eligible for CIG funding, but funding may be provided for that work through grants under the Section 5303 Metropolitan Planning Program, the Section 5307 Urbanized Area Formula Program, or Title 23 "flexible funding."
- The FTA encourages project sponsors to provide an overmatch as a means of funding more projects and leveraging State, local and private financial resources including through the use of value capture. For large projects, the maximum Federal CIG Program share has been less than 38 percent in new FFGAs awarded since January 2017.

FTA emphasizes that the process of CIG project evaluation and rating is ongoing. As a proposed CIG project proceeds through planning and design, information concerning costs, benefits, financial plans, and impacts is refined and the project rating may be reassessed to reflect new information.

The FY 2020 Funding Allocations and Recommendations

The FTA is recommending a total appropriation of \$1.505 billion in Section 5309 Capital Investment Grants Program funds in FY 2020, with the proposed distribution as follows:

- \$995.29 million for 10 existing FFGAs, including eight New Starts and two Core Capacity projects;
- \$494.85 million in funding for other projects that may become ready for Section 5309 CIG or 3005(b) Expedited Delivery Pilot Program funding during FY2020; and
- \$15.05 million for management and oversight (1.0% of the FY 2020 funding level.)

The funding proposed for the existing FFGAs shown above includes the negotiated payment outlined in each FFGA or the amount needed to complete the CIG commitment if the project is in the last year of its payment schedule.

The requested funds can also support projects in the Expedited Project Delivery for Capital Investment Grants Pilot Program. The FTA is administering the CIG Program consistent with the law, evaluating each project on its individual merits, and consistent with the discretion afforded by Section 5309. The Department's diligence in administering the CIG Program helps to ensure that Federal funds go to projects that will use the assistance effectively.

Project Evaluation and Ratings

The CIG project evaluation and ratings included in this report are based on a process specified in statute. Federal public transportation law (49 USC 5309) establishes various criteria on which proposed projects must be evaluated and specifies a five-point rating scale: *High*, *Medium-High*, *Medium, Medium-Low*, and *Low*. To advance in the CIG process toward a construction grant agreement, a project must be rated *Medium* or better overall. The FTA awards CIG Program funding only once the project sponsor can assure FTA that the proposed project scope, cost estimate, and budget are firm and reliable, all non-CIG funding commitments are in place, and all critical third-party agreements are completed. If a project receives a construction grant agreement from FTA, it is no longer required to be evaluated and rated.

FTA does not require project sponsors to submit information annually for evaluation and rating for the *Annual Report*. Rather, FTA only requires sponsors to submit information for an updated evaluation and rating of the project for the *Annual Report* if: 1) the project sponsor wants the project to be considered as a candidate for funding; 2) significant issues have been raised in prior year evaluations that warrant a re-rating; or 3) there has been a significant change to the project since the last evaluation.

Projects can be expected to continue to change as they progress through the CIG process. Hence, the ratings included in this *Annual Report* should not be construed as statements about the ultimate success or failure of those projects. Rather, the ratings provide assessments of the projects' strengths and weaknesses at the point in time when they were rated.

Tables 2A, 2B, and 2C present the ratings for all projects currently in the Project Development or Engineering phase of the CIG Program. Table 2A is the Summary of FY 2020 Project Ratings; Table 2B is the Detailed Summary of FY 2020 Local Financial Commitment Ratings; and Table 2C is the Detailed Summary of FY 2020 Project Justification Ratings.

Between publication of the FY 2019 *Annual Report* in February 2018 and mid-February 2019, FTA awarded ten construction grant agreements. In addition, FTA approved one project into the New Starts Engineering phase and eight projects entered the Small Starts Project Development phase. These include the following:

New Starts Projects That Received Construction Grant Agreements

- CA Santa Ana and Garden Grove Streetcar
- WA Lynnwood Link Extension

Small Starts Projects That Received Construction Grant Agreements

- CA San Raphael SMART Larkspur Extension
- FL Jacksonville BRT East Corridor
- IN Indianapolis Red Line
- MI Grand Rapids Laker Line BRT
- MO Kansas City Prospect Max BRT
- NM Albuquerque Rapid Transit
- WA Everett Swift II BRT
- WA Tacoma Link Extension

New Starts Project Entered into Engineering

• CA Los Angeles Westside Section 3

Small Starts Projects Entered into Project Development

- FL Miami-Dade County South Corridor Rapid Transit
- FL Tampa Streetcar Extension
- IN Indianapolis Blue Line Rapid Transit
- LA New Orleans St. Claude and Elysian Fields Streetcar Extensions
- OR Portland Southwest Corridor LRT
- UT Ogden/Weber State University Bus Rapid Transit
- WA Tacoma Pacific Avenue/SR7 Corridor BRT
- WA Vancouver Mill Plain BRT

In the project evaluations in the tables below, there are four projects that earned an overall project rating below Medium, making them currently ineligible for CIG funding.

Table 2A -- Capital Investment Grant Program Summary of FY 2020 Project Ratings

[^] This project entered Project Development (PD) under the MAP-21 and FAST process. PD is the phase when a project sponsor completes the environmental review process, selects a locally preferred alternative, gets it adopted into the fiscally constrained long range plan, and develops the information necessary for the project to be evaluated and rated by FTA. Thus, the project cost, including financing charges, may not yet be known.
---- This project has not been rated because it entered PD under the MAP-21 and FAST procedures, which do not require a rating to be assigned upon entry into PD.

⁺⁺⁺ Questions remain on the capital and operating costs submitted by the project sponsor. Therefore, FTA was unable to develop ratings for the project.

[^] This project entered Project Development (PD) under the MAP-21 and FAST process. PD is the phase when a project sponsor completes the environmental review process, selects a locally preferred alternative, gets it adopted into the fiscally constrained long range plan, and develops the information necessary for the project to be evaluated and rated by FTA. Thus, the project cost, including financing charges, may not yet be known.

--- This project has not been rated because it entered PD under the MAP-21 and FAST procedures, which do not require a rating to be assigned upon entry into PD.

Table 2B -- Detailed Summary of FY 2020 Local Financial Commitment Ratings

CORE CAPACITY PROJECTS		Local Financial C	ommitment Factors		Local Financial
Phase State, City, Project	Current Financial Condition Rating	Commitment of Funds Rating	Reasonableness of the Financial Plan Rating	CIG Share of Capital Costs	Commitment Summary Rating
Core Capacity Engineering NY New York City, Canarsie Line Power and Station Improvements TX Dallas, DART Red and Blue Line Platform Extensions	Medium	High	Medium-Low	26.8%	Medium-High
	N/A	N/A	N/A	47.2%	High
Core Capacity Project Development CA San Francisco, Transbay Corridor Core Capacity Program NJ Hudson County, Portal North Bridge	High	High	Medium-Low	45.1%	High
	Medium-Low	Medium	Medium-Low	49.4%	Medium-Low

If the summary local financial commitment rating is rated at least Medium and the CIG Program share is less than 50 percent of the project's capital cost, then the summary local financial commitment rating is raised one level.

"N/A" signifies that this subfactor does not apply because the project qualified for the financial rating "warrant" outlined in FTA's Final Interim Policy Guidance.

NEW STARTS PROJECTS		Local Financial C	ommitment Factors		Local Financial
