

Los Angeles County Metropolitan Transportation Authority

# FY09 ORGANIZATION CHARTS

For the year commencing July 1, 2008

**Metro**

## **Metro FY09 Organization Chart Book Introduction**

The Organization Chart Book's structure mirrors Metro's eleven Strategic Business Units (SBU). Each section provides an overview of the SBU, then details the departments in that SBU. If a department has more than one cost center, an organization chart follows for each cost center assigned to that department. Please note that departments and cost centers are not necessarily presented in numerical order.

Job titles listed are working titles.

Each individual page has one double lined box to indicate the lead executive for the organization displayed on that specific page.

A box with a gray background provides one of three different types of information:

- 1) The FTE represented by that box works in that cost center but is funded by a different cost center. The cost center funding the FTE is noted.
- 2) The box indicates the next higher reporting relationship. These boxes will appear above the lead executive for the department/cost center.
- 3) The box indicates a function as opposed to an FTE. A function box will not have an individual's name in it.

The FY09 Organization Chart Book represents a snapshot of the organization as of July 2008. Specific details will fluctuate throughout the fiscal year during the normal course of business.

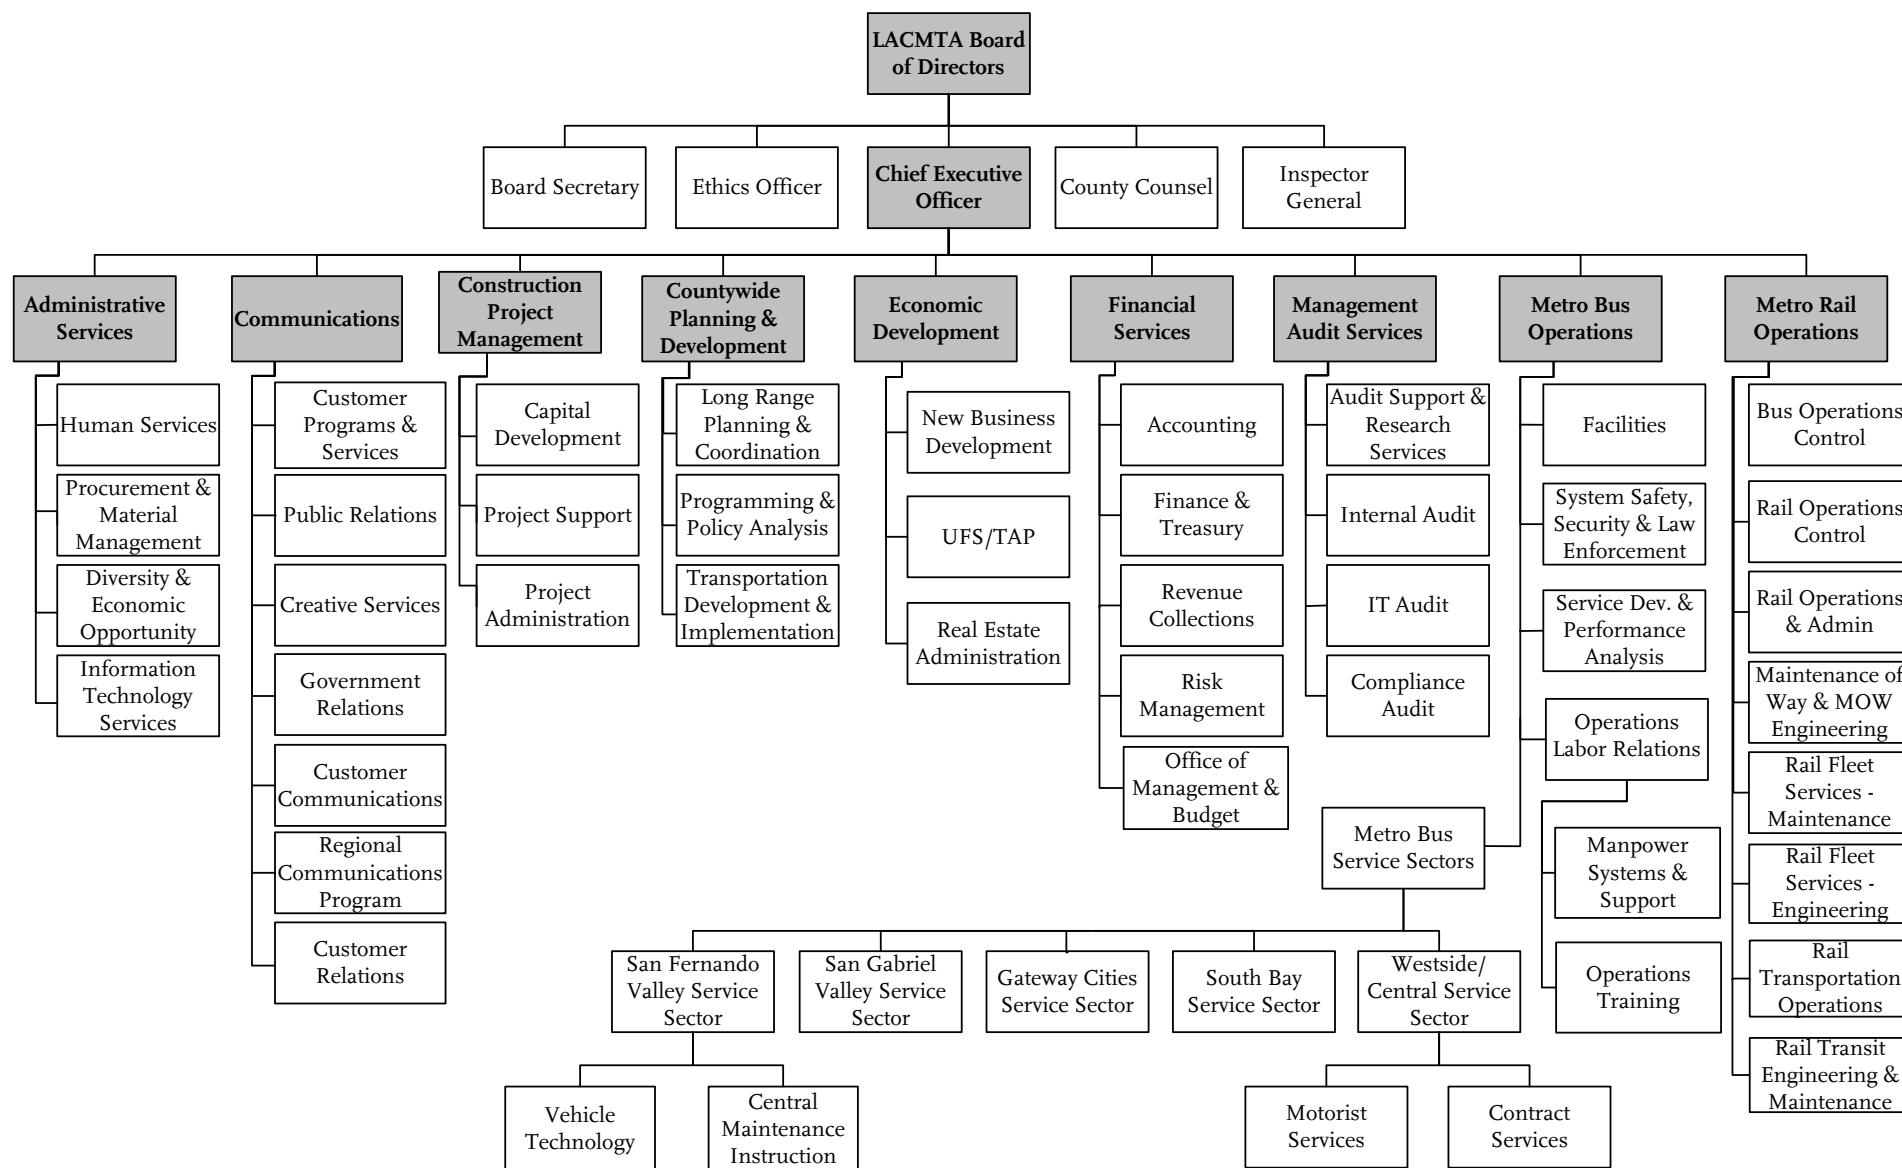

### **Search Instructions:**

SBUs and departments can be located via the agency overview chart on page 3. Each identifying box contains a hyperlink for the lead chart for that SBU or department.

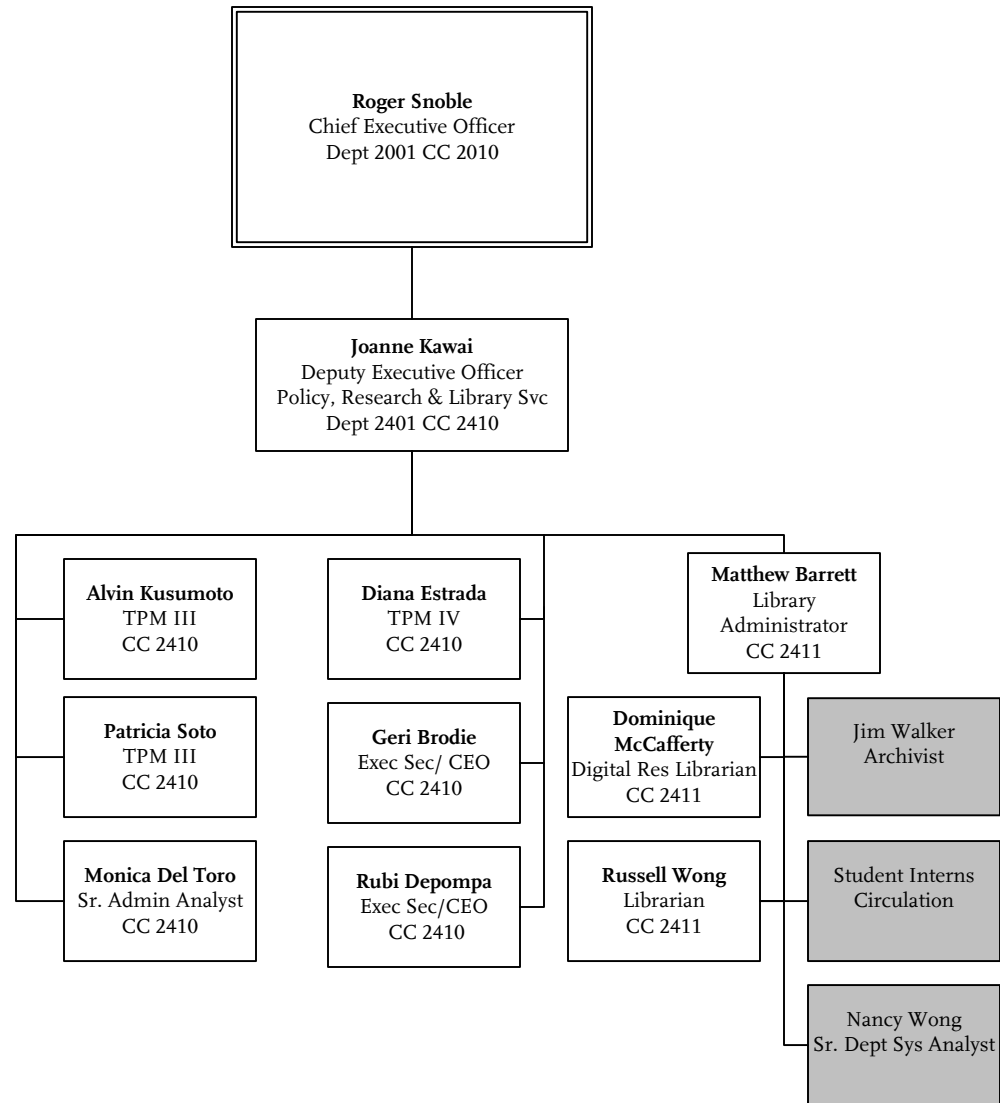

Specific names and numbers can be found by using one of these three methods:

- 1) Use the "Find" function on the tool bar at the top of the page. The Find function will locate the next forward occurrence of that item.
- 2) Press "Ctrl+F" (Find function) and then enter the information desired.
- 3) Press Shift+Ctrl+F (Search function) and then enter information desired. In some versions of Adobe Acrobat, it may be necessary to enable the "Arrange Windows" icon at the top of the Search dialogue box for a side-by-side view of the Search dialogue box and the document text. The Search function will display all occurrences of the requested item when the side-by-side view is employed.
