## 2012 PUBLIC TRANSPORTATION FACT BOOK APPENDIX A: HISTORICAL TABLES

March 2012

AMERICAN PUBLIC TRANSPORTATION ASSOCIATION

American Public Transportation Association 1666 K Street, N.W. Suite 1100 Washington, DC 20006 (202) 496-4800

### **APTA's Vision Statement**

Be the leading force in advancing public transportation.

#### **APTA's Mission Statement**

To strengthen and improve public transportation, APTA serves and leads its diverse membership through advocacy, innovation, and information sharing.

#### **Policy on Diversity**

APTA recognizes the importance of diversity for conference topics and speakers and is committed to increasing the awareness of its membership on diversity issues. APTA welcomes ideas and suggestions on how to strengthen its efforts to meet these important diversity objectives.

Material from 2012 Public Transportation Fact Book, Appendix A: Historical Tables may be quoted or reproduced, with proper reference, without obtaining the permission of the American Public Transportation Association.

Suggested Identification: American Public Transportation Association: 2012 *Public Transportation Fact Book, Appendix A: Historical Tables*, Washington, DC, March, 2012.

#### About the Fact Book

The American Public Transportation Association is a nonprofit international association of over 1,500 public and private member organizations including transit systems; planning, design, construction and finance firms; product and service providers; academic institutions; transit associations; and state departments of transportation. APTA members serve the public interest by providing safe, efficient, and economical transit services and products. Over ninety percent of persons using public transportation in the United States and Canada are served by APTA members.

The **Public Transportation Fact Book** (formerly the **Transit Fact Book**) was first published in 1943. This is the 63rd edition of the Fact Book published by the American Public Transportation Association and its predecessor organizations.

Data in the **Public Transportation Fact Book** have been calculated following statistically rigorous procedures since the data were first accumulated. All **Fact Book** data from the beginning of its collection represent the entire transit industry for those modes for which data were collected and reported for the year of the data.

Beginning in 2008 the **Public Transportation Fact Book** has been published in three parts. This format allows greater detail in statistical content and at the same time allows data to be easier to find and access.

The **2012 Public Transportation Fact Book** presents statistics describing transit service in the entire United States in 2009.

The **2012 Public Transportation Fact Book, Appendix A: Historical Tables**, presents primary data items for the entire time period they have been reported in **Fact Books** and other statistical reports prepared by APTA and its predecessor organizations. Many data items are reported for every year beginning in the 1920s and ridership is reported from 1907.

The 2012 Public Transportation Fact Book, Appendix B: Transit Agency and Urbanized Area Operating Statistics presents six operating statistics for 2009 for each transit agency in size order, totaled for all service modes operated by the agency and in size order for each individual mode. Data are also summed and ranked for urbanized areas, both all modes totaled and for individual modes. These lists greatly expand similar data in previous Public Transportation Fact Books and allow a simple method to determine comparably sized transit agencies -- a difficult task when using existing data sources. Data for Appendix B are taken from the Federal Transit Administration's National Transit Database (NTD) and include only agencies reporting to the NTD.

APTA produces additional data reports that provide detailed information about individual transit agencies that is not available from other sources. These reports, or information for obtaining these reports, are on the APTA web site at www.apta.com.

The **Public Transportation Fare Database**, published annually, report details of individual transit agency fare structures, fare collection practices, and fare collection equipment.

The **Public Transportation Vehicle Database**, published annually, lists all vehicles owned by participating agencies in fleets, that is, groups of identical vehicles manufactured in the same year. Extensive information is included on their propulsion plants, dimensions, and equipment such as communications and passenger amenities.

The **Public Transportation Infrastructure Database**, published in alternating years, lists all fixedguideways and stations operated by participating transit agencies. The status of fixed-guideways not yet open is reported and the equipment in stations is detailed. The **Public Transportation Ridership Report** is published quarterly. Each edition presents ridership for each of three months plus quarterly and year-to-date amounts for all participating transit agencies. The reported data are used to estimate total ridership for individual modes and an aggregate total. This report presents a quick indicator of the state of the transit industry shortly after the close of the period being reported.

The **APTA Primer on Transit Funding** presents a detailed explanation of programs in federal laws authorizing funding for the transit industry. Detailed statistics report amounts of funds available and the text describes the uses to which those funds may be put and the methods by which they are distributed. A new **Primer** is prepared for each authorization of transit law and is updated annually to reflect annual appropriations of federal funds for transit.

A Profile of Public Transportation Passenger Demographics and Travel Characteristics Reported in On-Board Surveys is an extensive investigation of the demographic characteristics and travel behavior of transit passengers based on surveys conducted by transit agencies of their passengers while traveling on-board their vehicles.

Extensive data for individual transit agencies can be found at the Federal Transit Administration's National Transit Database web site at <u>http://www.ntdprogram.gov/ntdprogram/</u>.

#### Methodology

The procedure for estimating total data in the **2012 Public Transportation Fact Book**, and prior issues of the Fact Book, is to expand available data by standard statistical methods to estimate U.S. national totals. It includes only public transportation data and excludes taxicab, unregulated jitney, school, sightseeing, intercity, charter, military, and services not available to the general public or segments of the general public (e.g., governmental and corporate shuttles), and special application systems (e.g., amusement parks, airports, and the following types of ferry service: international, rural, rural interstate, island and urban park).

The Fact Book can be indirectly traced to the U.S. Bureau of Census *Report on Transportation in the United States at the Eleventh Census: 1890, Part II - Street Railway Transportation,* published in Washington, DC by the Government Printing Office in 1895. This volume listed data for individual street railways and aggregate data for the entire street railway industry. The Census was conducted again in 1902, 1907, and 1912, but a report with data for individual railways was not published during World War I. Following World War I, an APTA predecessor organization, the American Electric Railway Association (AERA), began publishing annual operating reports with data for individual member transit systems. The last APTA *Public Transportation Operating Report* was published in 1992. Data for individual transit agencies is now published by the Federal Transit Administration in the National Transit Database report series.

The *Census of Electrical Industries: 1917, Electric Railways*, published by the Government Printing Office in 1920, provided summary data only; no data for individual electric railways were included. Summary data were published by the Census every five years through 1937. The census of transit operations was not conducted in 1942. In response, an APTA predecessor, by then named the American Transit Association (ATA), published "The Transit Industry of the United States: Basic Data and Trends, 1942 Edition" in March 1943. The following year the summary of transit data, titled the *Transit Fact Book 1944,* was published and dated for the year in which it was published, which has been continued as the Fact Book dating policy since then.

Federal transit data summaries from 1890 through 1937 were simple totals of data for all transit agencies reporting to each Census. Because transit agencies were required by law to report their data, it can be assumed that the data represented nearly the entire transit industry for those vehicle modes for which data were collected. When the ATA began compiling the Fact Book, data were obtained by survey from ATA member organizations. There was not, of course, a legal requirement for ATA members or non-member transit agencies to report data. In order to estimate data for the entire U.S. transit industry, the

ATA expanded the sample data from their survey to represent the entire transit industry using statistical methods.

In 1984 APTA members began providing APTA with copies of their submissions to the Federal Transit Administration (FTA) National Transit Database (NTD) rather than completing special surveys. The NTD data then provided the basis for estimates of national data. Beginning in 1997, data in digitized formats, available directly from the FTA, were used rather than data taken from paper copies of report forms.

Amounts for the earliest years for data series beginning 1926 or earlier were first reported in the *1946 Transit Fact Book* and were estimated from Operating Reports for those years and interpolated using Census data.

The definitions of specific data change over time. Data are reported on these tables using the definition that was current when they were collected. For example, prior to the collection of NTD data what is now termed "unlinked passenger trips" was defined as "total trips" and included a count of all persons boarding transit vehicles and paying a fare, using a transfer, or allowed to ride for free for a specified reason. "Unlinked passenger trip" is defined as all persons boarding a transit vehicle and is determined from various counting procedures and statistical expansions required by the federal government. Although these definitions vary, the data can be expected to be nearly identical.

All data in this Fact Book calculated by APTA and its predecessors are statistical expansions of sample data designed to represent the total activity of all transit agencies for the modes of service included for a particular year. Base data were from APTA surveys prior to the NTD. Lists were maintained from all available sources for agencies that were not in the APTA or NTD sample. Data were expanded by mode in stratified categories of similar systems based on population and other characteristics. All procedures were adapted to minimize the maximum possible error, a standard statistical method.

The number of modes included has increased over time. The year each mode was first included in the Fact Book and in estimated national totals was:

1902: Light Rail

1907: Heavy Rail

1922: Bus

- 1928: Trolleybus
- 1980: Commuter Rail, Other (Other included aerial tramway, automated guideway transit, cable car, inclined plane, and monorail.)
- 1984: Paratransit
- 1995: Ferry Boat and Transit Vanpool, separately or included in "Other" on some tables.
- 2000: Regulated Publico added to "Other."

Data from 1902 through 1983 are for calendar years. NTD data, however, are collected for "Reporting Years." A Reporting Year is each transit agency's fiscal year that ends during a calendar year. Beginning in 1984 Fact Book data are for reporting years, not calendar years.

NTD data are for agencies in Urbanized Areas (UZA). UZAs are areas defined during the Decennial Census with at least 50,000 persons including a central city. Prior to 2007, data for systems outside of urbanized areas, rural systems, were not collected or published by the NTD and were estimated by APTA based on other data sources.

Data for Bus, Paratransit, and Other are not continuous from 2006 to 2007. Data for other modes and national aggregates are continuous from 2006 to 2007. Bus and paratransit in these tables refer to a mode of service, not to a specific vehicle type. Paratransit service, defined as roadway service directly from an origin to a destination determined by the rider and not following a fixed-route, is usually provided by vans but is also provided by small buses and in a limited number of cases by large buses. Bus service is a variety of roadway services that share the characteristic of being entirely or partially fixed routes. Bus service includes local service, express service, subscription service, diversionary route service, loop

service, and other types. Although bus service is normally provided by buses, it can be provided by smaller vehicles that may be considered large vans.

Beginning in 2007 the NTD collected and made available data for rural agencies. The Federal Transit Administration Rural Transit Assistance Program also sponsored a survey of rural transit agencies. These surveys allowed APTA to more accurately reassess the distribution of bus, paratransit service, and transit agency vanpool service in rural areas. In association with this, APTA also conducted a survey of other data sources to identify agencies not included in the main NTD report or the NTD rural data. The increase in data available over the Internet from state agencies which oversee transit entities also allows a more accurate estimate of data for agencies eligible for federal transit assistance which provide non-profit service to elderly persons and persons with disabilities and are, therefore, included in paratransit data.

The inclusion of transit agencies in specific UZA population groups for data estimate purposes was also verified. Many transit agencies provide service to several UZAs, many of which were new in the 2000 census or dramatically changed size in the 2000 Census. When UZAs are delineated during each Decennial Census the population categories within which they are included for statistical expansion purposes may change and the growth of the area may include the service areas of agencies that had been rural agencies in the previous Census. UZAs are also combined into larger areas or split into multiple areas during each Census. The UZA data are usually not available until two to four years after the Census. For these reasons APTA does not include historical data stratified by population size groups.

Improved counting methods have resulted from increased use of automatic passenger counters and from the use of new fare media such as magnetic and smart cards, the transactions of which can be recorded and summarized. This increased automatic counting is particularly important in determining transfer behavior among service modes within agencies allowing more accurate assignment of data by mode.

It is APTA policy to continually seek to improve the quality of data reported in the Fact Book. Data are sought from all available sources and statistical procedures are used to verify that the data presented in the Fact Book are the most accurate possible data.

### TABLE OF CONTENTS

#### PASSENGER DATA:

| Table 1: Unlinked Passenger Trips by Mode (Millions of Trips) [1902-2010]   | 1  |
|---|----|
| Table 2: Unlinked Passenger Trips by Mode (Percent of Trips) [1977-2010]  | 3  |

VEHICLE DATA INCLUDES SAMPLE IN APTA PUBLIC TRANSPORTATION VEHICLE DATABASE ONLY

(a) Sample data only; from annual *APTA Public Transportation Vehicle Database*, not projected to national total.
(b) Data are average values for all vehicles with cost provided over two-year periods. Amounts are averages for vehicle with the specific characteristics in each heading, not for all vehicles in that mode. Some cost data are contract amounts and may not be final. Data include amounts paid to manufacturer only. Data should be considered indicative only, specifications of vehicles in sample, including fuel type, vary between years.
(c) Does not include articulated, double-deck, intercity, suburban, or trolley-replica buses of any length.

#### VEHICLE DATA INCLUDES SAMPLE IN APTA PUBLIC TRANSPORTATION VEHICLE DATABASE ONLY

(a) Sample data only; from annual *APTA Public Transportation Vehicle Database*, not projected to national total. See Glossary following Tables for complete definitions.

Federal Transit Administration "Minimum Useful Life" determines the age at which a vehicle may be replaced with federal financial assistance. The requirements are presented in *FTA C 9300.1B Capital Investment Program Guidance and Application Instructions* at http://www.fta.dot.gov/documents/Final\_C\_9300\_1\_Bpub.pdf (b) For large, heavy-duty transit buses. Smaller buses have shorter useful-life requirements.

## VEHICLE DATA INCLUDES SAMPLE IN APTA PUBLIC TRANSPORTATION VEHICLE DATABASE ONLY

(a) Sample data only; from annual *APTA Public Transportation Vehicle Database*, not projected to national total.(b) Percentage of self-propelled cars only.

See Glossary following Tables for complete definitions. Excludes commuter rail locomotives. Total includes both self-propelled and locomotive-hauled commuter rail cars; percent self-propelled in second column from left.

| Virginia Beach | Virginia             | Hampton Roads Transit  | 2011                  |

(a) Dates prior to 1970 may refer to predecessor agencies but may not be the earliest date rail service operated in area. Some areas with current systems had earlier systems that ceased operation several years before the current system opened.

(b) Unconnected rail operations in separate cities or areas are counted individually even if operated by the same overall agency. Systems with suspended service on February 15, 2012 not included in total number of systems.

(a) Prior to 1974 government financial assistance was not separately identified from other revenues in accounting systems.

(b) Includes commuter rail, ferry boat, rural bus, other, and demand response beginning in 1984. See Glossary following Tables for complete definitions.

(c) Sources of Directly Generated and Agency Operating Funds are reported on Table 50 for agencies reporting to the National Transit Database for urbanized areas only. Those amounts are only part of the total for the entire transit industry shown herein.

(d) Sources of Local Assistance Operating Funds are reported on Table 51 for agencies reporting to the National Transit Database for urbanized areas only. Those amounts are only part of the total for the entire transit industry shown herein.

(e) Sources of State Assistance Operating Funds are reported on Table 52 for agencies reporting to the National Transit Database for urbanized areas only. Those amounts are only part of the total for the entire transit industry shown herein.

(f) Sources of Federal Assistance Operating Funds are reported on Table 53 for agencies reporting to the National Transit Database for urbanized areas only. Those amounts are only part of the total for the entire transit industry shown herein.

#### CANADIAN DATA EPORTING AGENCIES ONLY

(a) Regular Service Passenger Trips are similar to linked trips and are not the same measurement as "unlinked passenger trips" reported for United States transit agencies in the 2012 Public Transportation Fact Book.
(b) Boarding passengers is a similar measure to "unlinked passenger trips" reported for United States transit agencies in the 2009 Public Transportation Fact Book.

# GLOSSARY

Definitions are grouped by topic in the following categories:

- General Definitions
- Employee and Labor Definitions
- Energy Use and Vehicle Power Definitions
- Financial Capital Expense Definitions
- Financial Operating Expense Definitions
- Financial Passenger Fare Structure Definitions
- Financial Revenue Definitions
- Infrastructure Rights-of-Way and Maintenance Facility Definitions
- Infrastructure Passenger Station Definitions
- Mode of Service Definitions
- Operating Data Service Supplied Definitions
- Passenger Data Service Consumed Definitions
- Service Availability and Commute Mode Definitions
- Vehicle Characteristics Definitions
- Vehicle Equipment Definitions

# **GENERAL DEFINITIONS:**

**Public Transportation** (also called **transit**, **public transit**, or **mass transit**) is transportation by a conveyance that provides regular and continuing general or special transportation to the public, but not including school buses, charter or sightseeing service.

**Transit agency** (also called **transit system**) is an entity (public or private) responsible for administering and managing transit activities and services. Transit agencies can directly operate transit service or contract out for all or part of the total transit service provided. When financial and oversight responsibility is with a public entity, it is a **public transit agency**. When more than one mode of service is operated, it is a **multimodal transit agency**.

# **EMPLOYEE AND LABOR DEFINITIONS:**

**Capital Employee** is a transit agency employee whose labor hour cost is reimbursed under a capital grant or is otherwise capitalized. Generally, only large transit agencies have such employees. Employees of contractors and suppliers of products are not included.

**Employee** is a person who works for a transit agency including employees of providers of purchased transportation service.

**Employee Compensation** is the sum of the amount of pay employees receive in salaries and wages plus the cost to the transit agency on fringe benefits to employees and employment related tax payments. Only compensation for employees of the transit agency is included, compensation for employees of purchased transportation service providers is reported in purchased transportation expense.

**Fringe Benefits** are payments to employees for time not actually worked and the cost of other employee benefits to the transit agency. Payment for time not actually worked includes payments to the employee for vacations, sick leave, holidays, and other paid leave. Other benefits include transit agencies payments to other organizations for retirement plans, social security, workmen's compensation, health insurance, other insurance, and other payments to other organizations for benefits to employees. Only

fringe benefit payments for employees of the transit agency are included, fringe benefit payments for employees of purchased transportation service are reported in purchased transportation expense

**General Administration Employee** is an operating employee who is an executive, professional, supervisory, or secretarial transit system person engaged in general management and administration activities: preliminary transit system development, customer services, promotion, market research, injuries and damages, safety, personnel administration, general legal services, general insurance, data processing, finance and accounting, purchasing and stores, general engineering, real estate management, office management and services, general management, and planning.

**Non-Vehicle Maintenance Employee** is an operating employee who is an executive, professional, supervisory, or secretarial transit system person engaged in non-vehicle maintenance, a person providing maintenance support to such persons for inspecting, cleaning, repairing and replacing all components of: vehicle movement control systems; fare collection and counting equipment; roadway and track; structures, tunnels, and subways; passenger stations; communication system; and garage, shop, operating station, general administration buildings, grounds and equipment. In addition, it includes support for the operation and maintenance of electric power facilities.

**Number of Employees** is the number of actual persons directly working for a transit agency, regardless of whether the person is full-time or part-time. Persons employed by agencies contracting to the transit system are not counted.

**Operating Employee** is an employee engaged in the operation of the transit system. Operating employees are classified into four categories describing the type work they do: general administration, non-vehicle maintenance, vehicle maintenance, and vehicle operations.

**Salaries and Wages** are payments to employees for time actually worked. Only salaries and wages for employees of the transit agency are included, salaries and wages for employees of purchased transportation service providers are reported in purchased transportation expense.

**Total Compensation** is the sum of Salaries and Wages and Fringe Benefits. Only compensation for employees of the transit agency is included, compensation for employees of purchased transportation service providers is reported in purchased transportation expense.

**Vehicle Maintenance Employee** is an operating employee who is an executive, professional, secretarial, or supervisory transit system person engaged in vehicle maintenance, a person performing inspection and maintenance, vehicle maintenance of vehicles, performing servicing functions for revenue and service vehicles, and repairing damage to vehicles resulting from vandalism or accidents.

**Vehicle Operations Employee** is an operating employee who is an executive, professional, or supervisory transit system person engaged in vehicle operations, a person providing support in vehicle operations activities, a person engaged in ticketing and fare collection activities, or a person engaged in system security activities.

# ENERGY USE AND VEHICLE POWER DEFINITIONS:

Alternate Power is fuel or electricity generated from fuel that is substantially not petroleum.

**Electric Power Consumption** is the amount of electricity used to propel transit vehicles, also called **propulsion power**. Does not include electricity used for lighting, heating, or any use other than propulsion power.

**Fossil Fuel** is any fuel derived from petroleum or other organic sources including diesel fuel, compressed natural gas, gasoline, liquefied natural gas, liquid petroleum gas or propane, and kerosene.

Page 129

**Generated by Transit System** [electric power] is propulsion power generated in facilities owned by the transit agency of a company of which the transit system is a subsidiary. These data were last reported in 1957. Prior to that time electric railways had been owned by power generation companies.

**Purchased** [electric power] power is propulsion power purchased from commercial power generation companies that are not affiliated with the electric railway. These data were last reported in 1957. Prior to that time electric railways had been owned by power generation companies.

# FINANCIAL - CAPITAL EXPENSE DEFINITIONS:

**Capital Expenses** are expenses related to the purchase of equipment. Equipment means an article of non-expendable tangible personal property having a useful life of more than one year and an acquisition cost which equals the lesser of: the capitalization level established by the government unit for financial statement purposes or \$5,000. Capital expenses do not include all expenses which are eligible uses for federal capital funding assistance; some of those expenses are included with operating expenses in the National Transit Database accounting system used herein.

**Facilities** capital expenses include administration, central/overhaul maintenance facilities, light maintenance and storage facilities, and equipment of any of these items.

**Other** capital expense includes furniture, equipment that is not an integral part of buildings and structures, shelters, signs, and passenger amenities (e.g., benches) not in passenger stations.

**Rolling Stock** capital expense is expense for the revenue vehicles used in providing transit service for passengers. The term revenue vehicles includes the body and chassis and all fixtures and appliances inside or attached to the body or chassis, except fare collection equipment and revenue vehicle movement control equipment (radios). For rubber tired vehicles, it includes the cost of one set of tires and tubes to make the vehicle operational, if the tires and tubes are owned by the transit agency.

# FINANCIAL - OPERATING EXPENSE DEFINITIONS:

**Operating Expenses** are the expenses associated with the operation of the transit agency, and classified by function or activity and the goods and services purchased. It is the sum of either the functions or the object classes listed below.

An **Operating Expense Function** is an activity performed or cost center of a transit agency. The four basic functions are:

**General Administration** includes all activities associated with the general administration of the transit agency, including transit service development, injuries and damages, safety, personnel administration, legal services, insurance, data processing, finance and accounting, purchasing and stores, engineering, real estate management, office management and services, customer services, promotion, market research and planning.

**Non-Vehicle Maintenance** includes all activities associated with facility maintenance, including: maintenance of vehicle movement control systems; fare collection and counting equipment; structures, tunnels and subways; roadway and track; passenger stations, operating station buildings, grounds and equipment; communication systems; general administration buildings, grounds and equipment; and electric power facilities.

**Vehicle Maintenance** includes all activities associated with revenue and non-revenue (service) vehicle maintenance, including administration, inspection and maintenance, and servicing (cleaning, fueling, etc.) vehicles.

**Vehicle Operations** includes all activities associated with the subcategories of the vehicle operations function: transportation administration and support; revenue vehicle operation; ticketing and fare collection; and system security.

An **Operating Expense Object Class** is a grouping of expenses on the basis of goods and services purchased. Nine Object Classes are reported as follows:

**Casualty and Liability Costs** are the cost elements covering protection of the transit agency from loss through insurance programs, compensation of others for their losses due to acts for which the transit agency is liable, and recognition of the cost of a miscellaneous category of corporate losses.

Employee Compensation is the sum of "Salaries and Wages" and "Fringe Benefits."

**Fringe Benefits** are the payments or accruals to others (insurance companies, governments, etc.) on behalf of an employee and payments and accruals direct to an employee arising from something other than a piece of work.

**Materials and Supplies** are the tangible products obtained from outside suppliers or manufactured internally. These materials and supplies include tires, fuel and lubricants. Freight, purchase discounts, cash discounts, sales and excise taxes (except on fuel and lubricants) are included in the cost of the material or supply.

Other Operating Expenses is the sum of taxes, miscellaneous expenses, and expense transfers:

**Purchased Transportation** is transportation service provided to a public transit agency or governmental unit from a public or private transportation provider based on a written contract. Purchased transportation does not include franchising, licensing operation, management services, cooperative agreements or private conventional bus service.

**Salaries and Wages** are the pay and allowances due employees in exchange for the labor services they render in behalf of the transit agency. The allowances include payments direct to the employee arising from the performance of a piece of work. Also called "Labor."

**Services** include the labor and other work provided by outside organizations for fees and related expenses. Services include management service fees, advertising fees, professional and technical services, temporary help, contract maintenance services, custodial services and security services.

**Utilities** include the payments made to various utilities for utilization of their resources (e.g., electric, gas, water, telephone, etc.). Utilities include propulsion power purchased from an outside utility company and used for propelling electrically driven vehicles, and other utilities such as electrical power for purposes other than for electrically driven vehicles, water and sewer, gas, garbage collection, and telephone.

Total Operating Expense is the sum of all the object classes or functions.

# FINANCIAL - PASSENGER FARE STRUCTURE DEFINITIONS:

Adult Base Cash Fare is the minimum cash fare paid by an adult for one transit ride; excludes transfer charges, zone or distance charges, express service charges, peak period surcharges, and reduced fares.

**Magnetic Fare Cards** are a single piece of paper, cardboard, or some other material with a magnetic strip good for a limited number of trips, unlimited rides during a fixed time period, or a monetary value that is altered by machine removal of some or all of the stored value as each trip is taken.

**Passenger Fares** are revenue earned from carrying passengers in regularly scheduled and paratransit service. Passenger fares include: the base fare; zone premiums; express service premiums; extra cost transfers; and quantity purchase discounts applicable to the passenger's ride.

**Passenger Fares Received per Unlinked Passenger Trip** is "Passenger Fares" divided by "Unlinked Passenger Trips."

Peak Period Surcharge is an extra fee required during peak periods (rush hours).

**Smart Fare Cards** are a single piece of paper, cardboard, plastic, or some other material with a small computer chip good for one or more trips that is usually not surrendered but altered by machine removal of some or all of the stored value as each trip is taken.

**Transfer Surcharge** is an extra fee charged for a transfer to use when boarding another transit vehicle to continue a trip.

Zone or Distance Surcharge is an extra fee charged for crossing a predetermined boundary.

# FINANCIAL - REVENUE DEFINITIONS:

**Directly Generated Funds** are any funds generated by or donated directly to the transit agency, including passenger fare revenues, advertising revenues, concessions, donations, bond proceeds, parking revenues, toll revenues from other sectors of agency operations such as bridges and roads, and taxes imposed by the transit agency as enabled by a state or local government. Some Directly Generated Funds are funds earned by the transit agency such as fare revenues, concessions, and advertising, while other Directly Generated Funds are Financial Assistance such as taxes imposed by the transit agency. Directly Generated Funds are listed in two categories in Operating Funding Sources:

(1) Agency Funds, Other are Directly Generated Funds that do not come from taxes.

(2) Government Funds, Directly Generated are Directly Generated Funds that come from taxes.

**Federal Assistance** is financial assistance from funds that are from the federal government at their original source that are used to assist in paying the operating or capital costs of providing transit service.

**Local Assistance** is financial assistance from local governments (below the state level) to help cover the operating and capital costs of providing transit service. Some local funds are collected in local or regional areas by the state government acting as the collection agency but are considered local assistance because the decision to collect funds is made locally.

**Passenger Fare Revenue** is revenue earned from carrying passengers in regularly scheduled and paratransit service. Passenger fares include: the base fare; zone premiums; express service premiums; extra cost transfers; and quantity purchase discounts applicable to the passenger's ride. Passenger Fare Revenue is listed only for operating revenue sources.

**State Assistance** is financial assistance obtained from a state government(s) to assist with paying the operating and capital costs of providing transit services.

**Total Government Funds** is the sum of Federal assistance, state assistance, local assistance, and that portion of directly generated funds that accrue from tax collections, toll transfers from other sectors of operations, and bond proceeds.

# **INFRASTRUCTURE - PASSENGER STATION DEFINITIONS:**

**ADA Accessible Stations** are public transportation passenger facilities in compliance with the Americans with Disabilities Act, which essentially means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities such as vending machines and telephones are accessible, and that the vision and hearing-impaired are accommodated with audio and visible signals or announcements and Braille alternatives.

**All-day Auto Parking Space** are spaces in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that are available for a full normal work day, - normally 10 hours or more.

Automated Vehicle Status Displays are electronic video display equipment that automatically provides information on the status of vehicles on routes serving that station.

**Bicycle Spaces** are small spaces in parking facilities or on nearby streets or sidewalks reserved or intended for transit passenger bicycles. The total is the sum of the number of slots in bicycle racks (not the number of racks) and the capacity of all bicycle lockers (one bicycle per locker is assumed unless capacity was reported as two bicycles).

**Concessions** are officially authorized sales units such as newsstands or newspaper boxes, food stands or food vending machines, convenience stores, dry cleaners, ATM machines, or musicians performing with a permit. Concessions do not include such services in nearby locations such as those on the ground floor of an adjacent office building that are off the station property and not officially authorized.

**Informational Video Displays** are electronic video display equipment that provides information other than vehicle status, such as advertising, news, or public service messages. It may also provide vehicle status information.

**Motorcycle Spaces** are small spaces about 3 feet wide and 6 feet long in parking facilities or on nearby streets reserved or intended for transit passenger motorcycles, mopeds, and motor scooters.

**Part-day Auto Parking Spaces** are spaces in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that are available for less than a normal work day, such as 9:00 am to 3:00 pm mid-day parking or 30-minute kiss-and-ride parking.

**Passenger Stations** are passenger boarding/alighting facilities with a platform, but do not include on street or curb stops. For bus and trolleybus, includes transit centers, stations on transit malls, and stations on busways.

**Public Address Systems** are equipment used to make announcements to passengers--either from a station attendant or from a central control facility.

**Restrooms** are restroom facilities officially designated for passenger use. Restrooms do not include stations with private restrooms available only to transit staff.

**Security Cameras** are cameras which monitor the station, bus transfer area, and/or parking facility to provide information to station and security personnel.

# **INFRASTRUCTURE – RIGHTS-OF-WAY AND MAINTENANCE FACILITY DEFINITIONS:**

**Directional Route Miles** is the mileage of the route public transit vehicles traverse in revenue service measured in each direction. One mile of track(s) or Lanes with service in two directions would be two

directional route miles regardless of the number of tracks or lanes of roadway. Yard and service tracks or roadways are not counted.

**Directional Route Miles of Lane, Controlled Right-of-Way** is directional route miles on lanes restricted for at least a portion of the day for use by transit vehicles and other high occupancy vehicles.

**Directional Route Miles of Lane, Exclusive Right-of-Way** is directional route miles on lanes reserved at all times for transit use and/or other high occupancy vehicles.

**Directional Route Miles of Lanes, Mixed Traffic** is directional route miles of lanes used for transit operations that are mixed with pedestrian and vehicle traffic.

**General Purpose Maintenance Facilities** are facilities used for inspecting, servicing and performing light maintenance work upon revenue vehicles such as brake adjustments, engine degreasing, tire work, minor body repairs, and painting.

**Heavy Maintenance Facilities** are facilities used for performing heavy maintenance work on revenue vehicles such as unit rebuilds, engine overhauls, significant body repairs, and other major repairs.

Lane Miles, Controlled Right-of-Way is miles of lanes restricted for at least a portion of the day for use by transit vehicles and other high occupancy vehicles.

Lane Miles, Exclusive Right-of-Way is miles of lanes reserved at all times for transit use and/or other high occupancy vehicles.

**Maintenance Facilities** are buildings maintenance activities are conducted including garages; shops such as body shops, paint shops, and machine shops; and operations centers.

**Miles of Lane** is a measure of the amount of roadway traversed by fixed-route bus transit systems where each lane is counted separately regardless of the number of lanes on a roadway. The term is also used for the waterway distance traversed by ferry boats.

**Miles of Track** is a measure of the amount of track operated by rail transit systems where each track is counted separately regardless of the number of tracks on a right-of-way.

# MODE OF SERVICE DEFINITIONS:

**Mode** is a system for carrying transit passengers described by specific right-of-way, technology, and operational features.

**Bus** is a mode of transit service (also called **motor bus**) characterized by roadway vehicles powered by diesel, gasoline, battery or alternative fuel engines contained within the vehicle. Vehicles operate on streets and roadways in fixed-route or other regular service. Types of bus service include **local service**, where vehicles may stop every block or two along a route several miles long. When limited to a small geographic area or to short-distance trips, local service is often called **circulator**, **feeder**, **neighborhood**, **trolley**, or **shuttle service**. Other types of bus service are **express service**, **limited-stop service**, and **bus rapid transit (BRT)**. Data for all of these types of bus service are included in the bus mode on these historical data tables. Disaggregated data are not available for any of the bus service categories.

**Commuter Rail** is a mode of transit service (also called **metropolitan rail**, **regional rail**, or **suburban rail**) characterized by an electric or diesel propelled railway for urban passenger train service consisting of local short distance travel operating between a central city and adjacent suburbs. Service must be operated on a regular basis by or under contract with a transit operator for the purpose of transporting passengers within urbanized areas, or between urbanized areas and outlying areas. Such rail service,

using either locomotive hauled or self propelled railroad passenger cars, is generally characterized by multi-trip tickets, specific station to station fares, railroad employment practices and usually only one or two stations in the central business district. Intercity rail service is excluded, except for that portion of such service that is operated by or under contract with a public transit agency for predominantly commuter services. Most service is provided on routes of current or former freight railroads.

**Demand Response** is a mode of transit service (also called **paratransit** or **dial-a-ride**) characterized by the use of comprised of passenger automobiles, vans or small buses operating in response to calls from passengers or their agents to the transit operator, who then dispatches a vehicle to pick up the passengers and transport them to their destinations. The vehicles do not operate over a fixed route or on a fixed schedule except, perhaps, on a temporary basis to satisfy a special need; and typically, the vehicle may be dispatched to pick up several passengers at different pick-up points before taking them to their respective destinations and may even be interrupted en route to these destinations to pick up other passengers. The following types of operations fall under the above definitions provided they are not on a scheduled fixed route basis: many origins-many destinations, many origins-one destination, one origin-many destinations, and one origin-one destination.

**Heavy Rail** is a mode of transit service (also called **metro**, **subway**, **rapid transit**, or **rapid rail**) operating on an electric railway with the capacity for a heavy volume of traffic. It is characterized by high speed and rapid acceleration passenger rail cars operating singly or in multi-car trains on fixed rails; separate rights-of-way from which all other vehicular and foot traffic are excluded; sophisticated signaling, and high platform loading.

**Light Rail** is a mode of transit service (also called **streetcar**, **tramway**, or **trolley**) operating lightweight passenger rail cars singly (or in short, usually two-car or three-car, trains) on fixed rails in right-of-way that is not separated from other traffic for part or much of the way. Light rail vehicles are typically driven electrically with power being drawn from an overhead electric line via a trolley or a pantograph; driven by an operator on board the vehicle; and may have either high platform loading or low level boarding using steps.

**Trolley Bus** is a mode of transit service (also called **trolley coach**) using vehicles propelled by a motor drawing current from overhead wires via a connecting pole called a trolley pole from a central power source not on board the vehicle.

**Vanpool:** Ridesharing by prearrangement using vans or small buses providing round trip transportation between the participant's homes or prearranged boarding points and a common and regular destination. Data included in this report are the sum of vanpool data reported in the National Transit Database and do not include any data for vanpools not listed in the National Transit Database. Vanpool service reported in the NTD must be operated by a public entity, or a public entity must own, purchase, or lease the vehicle(s). Vanpool included in the NTD must also be in compliance with mass transit rules including Americans with Disabilities Act (ADA) provisions, be open to the public and that availability must be made known, and use vehicles with a minimum capacity of 7 persons.

Other modes of transit service not listed separately on modal tables include ferry boat, aerial tramway, automated guideway transit (also called personal rapid transit, group rapid transit, or people mover), cable car, inclined plane, and monorail. Not all of these modes of service are included in Other on each table; note clarifications in footnotes for modes that are included.

# **OPERATING DATA - SERVICE SUPPLIED DEFINITIONS:**

**Average Vehicle Speed** is the average speed in miles per hour for vehicle while in revenue service; calculated by dividing vehicle revenue miles by vehicle revenue hours.

**Revenue Service** is the operation of a transit vehicle during the period which passengers can board and ride on the vehicle. Revenue service includes the carriage of passengers who do not pay a cash fare for

a specific trip as well as those who do pay a cash fare; the meaning of the phrase does not relate specifically to the collection of revenue.

**Revenue Vehicle** is a transit vehicle which carries passengers.

**Vehicle Revenue Hours** are the hours traveled when the vehicle is in revenue service (i.e., the time when a vehicle is available to the general public and there is an expectation of carrying passengers). Vehicles operated in fare-free service are considered in revenue service. Revenue service excludes school bus service and charter service. For conventionally scheduled services, vehicle revenue hours include running time and layover/recovery time.

Vehicle Revenue Miles are the miles traveled when the vehicle is in revenue service (i.e., the time when a vehicle is available to the general public and there is an expectation of carrying passengers). Vehicles operated in fare-free service are considered in revenue service. Revenue service excludes school bus service and charter service. For conventionally scheduled services, vehicle revenue miles are comprised of running miles available to passengers only, "deadhead" miles are not included.

**Vehicle Total Hours** are the hours a vehicle travels from the time it pulls out from its garage to go into revenue service to the time it pulls in from revenue service, including "deadhead" miles without passengers to the starting points of routes or returning to the garage. It is often called platform time. For conventional scheduled services, it includes both revenue time and deadhead time.

Vehicle Total Miles are all the miles a vehicle travels from the time it pulls out from its garage to go into revenue service to the time it pulls in from revenue service, including "deadhead" miles without passengers to the starting points of routes or returning to the garage. It is often called platform miles. For conventional scheduled services, it includes both revenue miles and deadhead miles.

# **PASSENGER DATA - SERVICE CONSUMED DEFINITIONS:**

**Average Passenger Load** is the average number of passengers aboard a vehicle for its entire time in revenue service including late night and off-peak hour service as well as peak rush hour service; calculated by dividing passenger miles by vehicle revenue miles.

**Average Trip Length** is the average distance ridden for an unlinked passenger trip; calculated by dividing passenger miles by unlinked passenger trips.

**Boardings per Mile** is the average number of persons who board a vehicle while the vehicle is in revenue service; calculated by dividing unlinked passenger trips by vehicle revenue miles.

**Passenger Miles** is the cumulative sum of the distances ridden by all passengers.

**Unlinked Passenger Trips** is the number of times passengers board public transportation vehicles. Passengers are counted each time they board vehicles no matter how many vehicles they use to travel from their origin to their destination and regardless of whether they pay a fare, use a pass or transfer, ride for free, or pay in some other way. Also called **boardings**.

# SERVICE AVAILABILITY AND COMMUTE MODE DEFINITIONS

**Commuters** are persons travelling to work.

**Household** is a U.S. Census term for the group of all people who occupy a particular housing unit as their usual residence, or who live there at the time of the Census interview and have no usual residence elsewhere. The usual residence is the place where the person lives and sleeps most of the time.

**Means of Transportation to Work** is the usual travel mode in the previous week for a commuter answering the Census survey. Only a single mode can be reported even if the respondent uses multiple modes. The respondent is directed to select the mode used for the longest distance. No selection instruction is provided for respondents who use different modes on different days.

**Railroad** is a U.S. Census transit mode name that is the same as "Commuter Rail" as used by APTA and the FTA.

**Streetcar or Trolley Car** is a U.S. Census Transit mode name that is the same mode as "Light Rail" as used by APTA and the FTA.

**Subway or Elevated** is a U.S. Census transit mode name that is the same mode as "Heavy Rail" as used by APTA and the FTA.

# **VEHICLE CHARACTERISTICS DEFINITIONS:**

**Accessible Vehicles** are transit passenger vehicles that are accessible to, are usable by, and provide allocated space and/or priority seating for individuals who use wheelchairs.

Alternate Fuel Powered Vehicles are vehicles powered by fuel that is substantially not petroleum.

Average Vehicle Age is the number of years old all revenue vehicles are divided by the number of vehicles. The years of age are counted as one-half year for the year in which a vehicle was built plus one year for each calendar year since then.

**Federal Transit Administration Minimum Useful Life** is the age a revenue vehicle must be before an agency can receive federal financial assistance to replace that vehicle. The useful life varies by type of vehicle and may be shorter than stated for vehicles with excess use measured by miles travelled.

**Revenue Vehicle** (also called a passenger **vehicle**) is a vehicle in the transit fleet that is available to operate in revenue service carrying passengers, including spares and vehicles temporarily out of service for routine maintenance and minor repairs. Revenue vehicles do not include service vehicles such as tow trucks, repair vehicles, or automobiles used to transport employees.

**Revenue Vehicles Available for Maximum Service** are vehicles that a transit agency has available to operate revenue service regardless of the legal relationship thorough which they are owned, leased, or otherwise controlled by the transit agency. Also called **vehicles owned and leased**.

**Revenue Vehicles Used in Maximum Service** is the largest number of vehicles an agency uses to provide service at any time during a typical day. Also called **peak period vehicles**.

# **VEHICLE EQUIPMENT DEFINITIONS:**

Automated Stop Announcement is an automated system that announces upcoming stops.

Automatic Passenger Counter equipment counts passenger boardings/alightings but is not part of the farebox.

Automatic Vehicle Location or GPS equipment allows a vehicle to be electronically located or tracked by local sensors or satellites.

**Exterior Bicycle Rack** equipped vehicles can carry bicycles of racks outside of the vehicle such as on the front of a bus or the open deck of a ferry boat.

**Passenger-Operator Intercom** equipped vehicles have an intercom system that allows passengers and the vehicle's or train's operator to communicate with each other.

**Public Address System** equipped transit vehicles an one-way audio announcement system that allows the vehicle operator to communicate with passengers.

**Restroom** is a restroom on board the transit vehicle and available for passenger use.

**Security or CCTV Type Camera** equipped vehicles have cameras installed inside the vehicle for security purposes.

**Self-propelled** vehicles have motors or engines on the vehicle that supply propulsion for the vehicle. Fuel may be carried on board the vehicle such as diesel fueled buses or supplied from a central source such as overhead wire power for light rail vehicles.

**Traffic Light Preemption** equipped vehicles are able to, either automatically by sensors or as a result of operator action, adjust traffic lights to provide priority or a green light.

**Two-Way Radio** equipped transit vehicles have a two-way radio system that allows the vehicle operator and the operating base or control center to communicate with each other.
