# **Budget Summary**

## **MTA Board of Directors**

**Yvonne Brathwaite Burke** 

Chair

Supervisor, Los Angeles County

**James Cragin** 

1st Vice Chair

Councilmember, City of Gardena

Richard Riordan

2<sup>nd</sup> Vice Chair

Mayor, City of Los Angeles

Michael D. Antonovich

Supervisor, Los Angeles County

Hal Bernson

Councilmember, City of Los Angeles

John Fasana

Councilmember, City of Duarte

Don Knabe

Supervisor, Los Angeles County

Jose D. Legaspi

Commercial Realtor

Gloria Molina

Supervisor, Los Angeles County

Jenny Oropeza

Councilmember, Long Beach

Frank C. Roberts

Mayor, City of Lancaster

Jaime de la Vega

Assistant Deputy Mayor, City of Los Angeles

Zev Yaroslavsky

Supervisor, Los Angeles County

Robert Sassaman

Ex-Officio Member (Acting) California Secretary of Business Transportation Housing

George Battey, Jr.

Ex-Officio Member, Construction Committee

**Bill Dahl** 

Ex-Officio Member, Construction Committee

#### **MTA Profile**

The Los Angeles County Metropolitan Transportation Authority (MTA) is unique among the nation's transportation agencies. It serves as transportation planner and coordinator, builder and operator for one of the country's largest, most populous counties. More than 9 million people – one-third of California's residents – live, work and play within its 1,433-square-mile service area.

Formed in 1993, the MTA provides the leadership and resources needed to develop a comprehensive transit system in which people can travel quickly, economically and safely in a pleasant environment. The familiar Metro "M" on buses, rail cars, Freeway Service Patrol tow trucks and other transportation services identifies the range of services the MTA provides to improve the region's mobility.

In addition to operating over 1,900 coaches in the Metro Bus fleet, the MTA operates two light-rail lines: the 22-mile Metro Rail Blue Line between Long Beach and Los Angeles and the 20-mile Metro Green Line between El Segundo and Norwalk. The MTA also operates the 17-mile Heavy Rail Metro Red Line subway system running through downtown Los Angeles from Union Station to North Hollywood. The western branch extends along Wilshire Boulevard. to Western Avenue.

The MTA employs more than 8,000 people in a broad range of technical specialties and services ranging from Metro Bus and Metro Rail operators and mechanics to construction engineers and safety inspectors, from transportation planning professionals to customer information agents. The MTA is composed of three service departments: Transit Operations, Engineering & Construction and Countywide Planning & Development. They are supported by the Media, Marketing, Customer Relations, Finance, Procurement, Human Resources, Risk Management, Office of Safety & Security, and Administration Departments.

The MTA is governed by a Board of Directors with thirteen voting members. Serving on the Board of Directors are the five Los Angeles County supervisors, the Mayor of Los Angeles and his three appointees, and four elected officials who represent the other eighty-seven cities that make up Los Angeles County. One non-voting member is appointed by the Governor of California.

MTA headquarters is located at Patsaouras Transit Plaza in the Gateway complex just east of historic Union Station. MTA also operates eleven bus divisions and three rail divisions, in addition to a number of smaller facilities scattered throughout its service area.

#### **MTA Team Mission**

Our team is responsible for the continuous improvement of an efficient and effective transportation system for Los Angeles County. Our team members provide expertise and leadership based on their distinct roles:

#### **Transit Operations**

• Operating transit system elements for which the MTA has delivery responsibility

#### Countywide Planning and Development

• Planning the overall transportation system

#### **Engineering and Construction**

• Managing the construction and engineering of transportation system components

#### Support Services

• Delivering timely support services to the MTA organization

#### **MTA Team Vision**

Our purpose is to be the recognized leader for realizing a world-class transportation system for Los Angles County. Our position as a premier transportation agency will be established by:

- A vigilant pursuit of cost-effective, high quality mission-critical service delivery
- An extraordinary record of excellence in planning, construction and engineering
- A proven competency for innovations in transportation development
- An exemplary work environment providing team members with needed services

#### **MTA Team Goals**

Our team is responsible for the continuous improvement of an efficient and effective transportation system for Los Angeles County. Our team members provide expertise and leadership based on their distinct roles:

#### Customer

Increase the availability of customer-responsive transportation options

#### Internal Processes

• Increase accountability for planned results

#### Innovation and Improvement

• Increase operational and organizational performance

#### Financial Management

• Increase effective and efficient utilization of resources

#### **Critical Success Indicators**

- Customer satisfaction
- Employee satisfaction
- Minimize non-formula fund subsidies
- Compliance attainment
- Results-based budgeting
- Passenger mile/seat ratio
- Comprehensive life-cycle costs to benefit ratios
- Process cycle times
- Bond rating
- Comparative purchase costs

The goals provide information on specific means and approaches to reach our vision. These goals also alert our stakeholders regarding what we are trying to accomplish and were developed using an approach called the Balanced Scorecard. The Balanced Scorecard encourages organizations to focus on a balanced set of organizational goals and to develop a series of performance measures (Critical Success Indicators) rather than simply relying on financial performance.

From the MTA-wide Mission, Vision and Goals, each MTA department developed a number of objectives, strategies and performance measures which are outlined on the Management Action Plans (MAPs). The MAPs will be reviewed quarterly to evaluate departmental attainment of stated objectives. The MAPs process will continue to assist in focusing departmental resources and attention on the MTA's stated Mission, Vision, and Goals.

## **Strategic Planning Process**

The Strategic Planning Process was undertaken to better understand the MTA's current operating environment and to establish a renewed Mission, Vision and Goals for the MTA, providing strategic direction. The FY01 Strategic Plan was developed with the input of more than 100 internal and external stakeholders, including representatives of all employee labor groups, the Board of Directors, the City of Los Angeles, MTA executive staff and with the guidance of the consulting firms of Booz-Allen, Pricewaterhousecoopers and Metropolitan Futures.

We anticipate that this strategic panning process will continue annually, although the MTA Mission, Vision, and Goals will remain fixed for the intermediate-term business planning horizon. It is our hope that the development of a Team Mission, Vision, and Goals, as well as focusing on internal and external customers will reorient the MTA to improved teamwork and service.

## FY00 Accomplishments and FY01 Budget Highlights

## **Transit Operations**

#### FY00 Accomplishments

#### Improved On-Time Performance

In July 1999, bus on-time pullout (OTP) performance (when buses leave the division on schedule), was at 99.19%. As a result of improvements in fleet reliability, increased supervisory presence at roll-out and increased management commitment, by March, 2000, OTP improved pullouts to 99.51%. During the month of March, only two cancellations occurred, as compared to 14 in July 1999. During the same period, outlates were reduced from 505 to 341.

Heavy Rail OTP improved from 99.7% during the first quarter of FY00 to 99.8% at the end of the third quarter. Light Rail OTP improved from 99.06% during the first quarter to 99.54% by the end of the third quarter.

#### **Reduced Customer Complaints**

Between July 1999 and January 2000, the rate of customer complaints per 100,000 boardings declined from 4.83 to 3.89. Total complaints decreased by 23.7% for the same period. The most notable improvements came in the areas of accessible service and operator discourtesy, declining by 31.4%, and schedule adherence showed a 30.0% improvement.

#### **Bus Procurements**

The Accelerated Bus Procurement Plan that was approved by the Board of Directors in October 1998 requires replacement of all over aged buses and expansion buses through the purchase of 2095 new buses. In FY00, the MTA will have received a total of 438 new Compressed Natural Gas (CNG) buses from New Flyer of America (New Flyer) and North American Bus, Inc. (NABI). During FY00 the Board of Directors approved the two procurements consist of 223 New Flyer vehicles and 215 NABI vehicles. By the end of FY00, the CNG bus fleet will have expanded to over 900 buses, which is the largest alternative fuel fleet in the United States.

#### Improved Fleet Reliability

The improvement in the reliability of the transit bus fleet was evidenced by consistent improvement in key performance indicators. The primary maintenance indicator, Mean Miles Between Mechanical Failures (MMBMF), increased by approximately 10 percent from 5,357 at the beginning of the fiscal year to nearly 6,000 during the latter part of the fiscal year. Another important indicator, Past Due Critical Preventive Maintenance Programs (PMP), also showed considerable improvement. The number of past due critical PMPs actions per bus was reduced from 0.94 to about 0.20 during the fiscal year.

#### Maintenance Training

Mechanic training continues to be a high priority in the Maintenance department. In FY00, the department hired three additional instructors to train mechanics on the state-of-the-art electronic and alternative fuel systems on new buses. The training was provided through general classroom instruction and through hands-on instruction at the operating divisions. Specialty training was also provided by bus manufacturers, Detroit Diesel, Cummins, Lift-U, and several other equipment providers.

In addition, Maintenance held two retreats for managers and analysts during FY00. The retreats were designed to raise awareness of Maintenance management issues and build stronger leadership skills.

#### Regional Rebuild Center

In FY00, the Regional Rebuild Center (RRC) implemented the RRC 2000 Quality Improvement Program. Within the confines of the program, management is striving to improve inter-departmental communication, promote team development at the shop level, improve labor and parts usage, and improve customer support. The program began showing results in FY00 with the completion of approximately 170 wheelchair lift conversions, installation of 208 bus window upgrades, completion of over 60 major accident repairs, and the painting of over 380 buses.

#### Completion of Diesel Conversion Project

Conversion of the methanol and ethanol bus fleet was initiated due to the high rate of failure of the alcohol-fueled engines in the 1989 and 1992 Transportation Manufacturing Corporation (TMC) buses. The conversion program began in June 1998 and was completed in March 2000. Valley Detroit Diesel converted a total of 324 alcohol-fueled buses to clean diesel. The project was completed on budget and ahead of schedule. All of the converted buses are now in active service and equipped with an upgraded Detroit Diesel 6V-92 engine that meets all applicable emissions standards.

#### Improving Fleet Cleanliness

In FY00, the Quality Assurance departments began a schedule of regular, quarterly bus cleanliness inspections at divisions. Under the program, divisions are rated on their ability to provide clean, graffiti-free coaches. They are rated in specific areas of concern and then assigned an overall cleanliness score. Through the first three quarters of FY00, overall division cleanliness improved from a low of 5.6 at the beginning of the fiscal year to 6.5.

#### Vandalism/Graffiti Abatement

The Vandalism Abatement Program (VAP) is an important part of MTA's Zero Tolerance plan to provide a safe and clean public transportation system to the communities we serve. VAP is the primary concern of the Division Advisory Committees (DAC) which consists of volunteer front-line employees, including bus operators and maintenance personnel at all eleven bus divisions. DAC will expand in FY01 to include rail.

DAC members receive training in marketing, public affairs and educational techniques to accomplish the ambitious mission of preventing graffiti vandalism in our communities and on our transportation system. The three main elements of the DAC mission are school outreach and education, community clean-ups, and parent education seminars. The program emphasizes community ownership of the transportation system, graffiti vandalism laws and bus/rail safety.

The MTA, through the committed efforts of DAC members in collaboration with the law enforcement transportation units of the Los Angeles Police Department (LAPD) and Los Angeles Sheriff Department (LASD), has developed a unique relationship with communities throughout Los Angeles County. This cooperative effort has resulted in a marked improvement in the communities and bus lines targeted so far. DAC members participated in fifteen community beautification projects for the City & County of Los Angeles. DAC sponsored four division/community open houses.

Continued success requires that existing members and participating communities maintain their efforts.

#### Reorganization of Transportation Function

In FY00, Transportation re-engineered the division operation by:

- Augmenting supervisory staff with retirees to perform line monitoring function
- Redefining Transit Operation Supervisor (TOS) duties
- Establishing the Line Instructor Mentor Program, training 120 mentors
- Recruiting and training Transportation Division Dispatchers (TDD)
- Increasing staffing and training for Metro Rail Operations

#### Improved Training

- Conducted Transit Operating and Trend System (TOTS) training to familiarize transportation managers with the capabilities of the new system
- Developed training curriculum for TOS's
- By the end of FY00, will have trained 846 new operators, 248 Class A mechanics and 101 service attendants
- Developed a bus-specific defensive driving class
- Established an independent learning center at Office of Central Instruction (OCI), designed to allow operators to perform required continuing and remedial education on their own time and at their own pace

#### Transit Operating & Trends Systems Migration

During FY00, the TOTS was upgraded to address Y2K issues and to include operator interfaces, advanced manpower planning and performance monitoring capabilities. The new system has brought together on a single platform, the time-keeping system, vehicle accident monitoring system and operator bidding system as well as others.

#### Bus Operator Recognition Program

A Bus Operator Recognition Program was begun in FY00 to provide quarterly and annual recognition to operators, managers, and divisions for achievements in safety, courtesy, service, and attendance. The program was designed with the expectation that positive reinforcement would help in changing the culture of transportation employees.

An annual "Best of the Best" event recognizes operators with excellent performance for five consecutive years. As part of the program, division performance measurements are posted in each division to raise

awareness and demonstrate how each division is performing, comparing performance against set goals as well as other divisions.

#### Metro Blue Line Safety Program

In an effort to reduce the number of grade crossing collisions involving Metro Blue Line trains and pedestrians and vehicles, MTA has revamped its public safety awareness program. Some of the elements include:

- Conducting community focus meetings to solicit feedback from neighborhoods
- Giving train safety presentations and hosting safety writing/drawing contests in schools
- Participating in community safety and health fairs
- Training volunteers to take safety messages into neighborhoods

#### Other initiatives include:

- Updating a train safety videotape
- Sending out train safety public service announcements to local media
- Installing train safety messages on billboards
- Providing weekly safety tours to school groups
- Creating safety movie trailers for showing in local theater chains

As the first light rail operator in the country to employ photo enforcement cameras at grade crossings, the MTA is adding six intersections to its photo enforcement program, bringing the total to twenty-three. The program targets those grade crossings experiencing the greatest number of violations by motorists and is backed by the threat of a hefty fine for violators.

#### North Hollywood Metro Red Line

MTA Metro Rail Operations successfully expanded the Metro Red Line to Universal City (North Hollywood). The success of the service expansion was the result of a close working relationship between Metro Rail Operations, Construction, Marketing and other support departments.

As a result of the Metro Red Line extension, boardings increased dramatically on the Metro Red Line itself, as well as the Light Rail lines that feed into the subway system. A comparison of May 1999 boardings to boardings in March 2000 shows an increase in total monthly Metro Red Line boardings of 40.6%. When compared for the same period, Metro Green Line boardings experienced an increase of 10.3% and Metro Blue Line boardings increased by 13.5%.

#### Contracted Bus Service

During FY00, Transit Operations enhanced the management of contracted bus services by hiring a manager and two field representatives. Working closely with the contracted providers, they have helped to raise contractor performance and ensure the delivery of quality transportation service.

Additionally, existing contracts with Laidlaw, First Transit Inc. (FTI) and Transportation Concepts Inc. (TCI) were modified to add performance incentives and disincentives, which assisted in achieving quality service.

#### Improved Management Reporting

Weekly and monthly management reports continued to be an important element in tracking performance. During FY00, the Transit Operations Support department produced weekly and monthly performance reports. Transit Operations has initiated the process for procuring software to improve the accuracy timeliness and availability of performance data.

#### Steps To Minimize Overcrowding

In the December 1999 shake-up (semi-annual operator reassignment), Transit Operations completed its planned addition of sixty-four peak buses per the Remediation Plan Schedule. The addition of those buses, combined with improvements in on-time pullout performance and a decrease in service interruptions have helped to reduce overcrowding.

#### FY01 Budget Highlights

#### Metro Rapid Bus

During FY01, the Metro Rapid Bus will operate on the Ventura Boulevard and Whittier/Wilshire Corridors on a seven-day, sixteen-hour per day operation. Rapid buses will have traffic signal priority and stop only at major intersections. When feasible, rapid buses will be assigned to priority bus lanes and be able to bypass traffic congestion. With stops a mile apart, they are expected to travel about 15 to 25 percent faster than local service. MTA planners expect the first Rapid bus line will be designated on Wilshire and Whittier Boulevards, where it can be coordinated with the bus signal priority projects.

Rapid Bus will offer patrons higher speed, higher quality service on state-of-the-art coaches with customer amenities, including platform level and sheltered boarding to coaches with technology designed to allow preferred passage of traffic signals and higher speed travel. Rapid Bus will be easily distinguishable by the red color and rapid bus decals.

#### Subway to North Hollywood to Open

The new state-of-the-art Metro Red Line stations will be fully operational at Hollywood-Highland, Universal City, and North Hollywood. The Segment 3 stations and 6.2 miles of additional tunnels will provide a greater range of travel for Los Angeles rail riders.

#### Over 7 Million Revenue Service Hours

Transit Operations manages all aspects of MTA Metro Bus and Metro Rail Operations and related activities by providing clean, safe, efficient and reliable transit services to more than 1.2 million patrons per day. In FY01, MTA and its contracted service providers will:

- Deliver 437.5 million unlinked passenger trips
- Deliver 7,271,125 bus revenue service hours (591,890 of which will be provided by contracted service and 610,599 by Rapid Bus)
- Deliver 242,709 light rail vehicle service hours
- Deliver 259,919 heavy rail vehicle service hours

#### FY01 Metro Bus and Metro Rail Goals and Objectives

The primary goals for Transit Operations in FY01 are:

- Reduce operating costs to achieve blended bus and rail cost per service hour targets by FY03
- Increase gross revenue per revenue service hour to align with bus and rail targets by FY03
- Achieve performance and quality targets in the areas of reliability, timeliness, cleanliness and safety by FY03

#### Improving MTA Bus Service Reliability

To meet load factor requirements and to improve bus service, the reliability of the bus fleet must first continue to increase. To accomplish this, Transit Operations has developed objectives for FY01 which include:

- Maintaining system-wide on-time pull-out performance of 99.5%
- Increasing miles between chargeable mechanical roadcalls to 6,000 or more
- Continuing to improve preventive maintenance
- Raising minimum division bus cleanliness, ratings to 6.0
- Improving employee morale by recognizing individual and division performance
- Monitoring and ensuring progress on the "Smart Bus" implementation including the universal fare system, radios, automatic voice annunciators, automatic passenger counters, cameras and security equipment
- Constraining overtime expenditures to stay within the FY01 budget
- Reducing workers' compensation claims
- Reducing the bus accident rate to 3.5 per 100,000 hub miles
- Achieving a customer complaint ratio of 4.0 or less per hundred thousand boardings
- Meeting ADA service goals with regard to lifts, straps and clamps and pass-ups
- Raising bus in-service on-time performance to 70% or higher
- Reduce lost revenue service hours to 1.0% or less

#### Strategies to accomplish the above objectives:

- Monitor and support division performance in relation to the performance measures shown above for each quarter
- Continue to identify problematic buses and repeat road calls at each division
- Take actions to resolve defects and improve performance
- Institute zero-tolerance programs for wheelchair pass-ups and schedule violations
- Restructure the scheduling and assignment of TOS's

#### FY01 New Bus Orders

MTA will receive approximately 501 new CNG buses in FY01. The buses will be purchased as part of three procurements:

- In October 1998, the Board of Directors exercised an option to purchase an additional 223 New Flyer low-floor CNG buses. The first of the 223 Option buses will begin arriving the early part of the second quarter of FY01 at the rate of approximately 40 to 50 buses per month.
- In January 2000, the Board of Directors exercised an option to purchase an additional 215 NABI low-floor CNG buses. The first of the 215 option buses will begin arriving in the third quarter of FY01 at a rate of approximately 40 to 50 buses per month.
- In December 1999, the MTA initiated a new procurement for 370 low-floor buses with options for up to 700 additional buses. The first of the 370 bus order may begin arriving in the fourth quarter of FY01. Delivery of this bus order is expected to be completed at the end of FY02.

#### Advanced Transportation Management System

The Advances Transportation Management System (ATMS) project will replace two antiquated bus radio control systems with one integrated state-of-the-art transit vehicle technology enhanced system to provide a reliable, contemporary communications service to controllers, bus operators, riders and management. The current system is crippled by outdated technology, the lack of availability of replacement parts and incomplete data. It is also labor-intensive. An independent assessment of the system determined that it would be cost-effective to replace the two current systems with a fully-integrated single system.

In December 1999, a system management contract was awarded.

- A business plan was finalized in March
- A conceptual design is under development
- A contract for system integration will be awarded at the August meeting of the Board of Directors

#### Regional Rebuild Center (RRC)

In FY01, the Regional Rebuild Center will complete the retrofit of the wheelchair lifts in the TMC 1200 series bus fleet. The RRC will also complete the installation of new clear windows sets on the MTA fleet with sacrificial window guards to reduce the damage from vandalism. The paint shop will paint approximately 426 buses with the new Metro Bus color scheme. The mechanical shops will rebuild 319 engines, 542 transmissions, and assemble 383 power plant assemblies. The body shop is prepared to complete 65 major bus accident repairs and repair 330 buses with minor body damage at the operating divisions.

#### Facility Improvements

With the continued procurement of CNG buses, supporting infrastructure must be installed to ensure that each operating division has the capability to fuel and maintain CNG buses. The MTA made considerable headway in support of this requirement in FY00 by installing CNG fueling stations at Divisions 5 and 7 under a public/private partnership In FY01, one additional CNG fueling station will

be installed at Division 1. In addition to the CNG fueling stations, the maintenance buildings and service islands at each location are being modified with gas detection systems and other modifications required for gaseous fuels. The MTA allocated \$1.7 million in funding for the public/private partnership in FY00 and will allocate another \$4.3 million in FY01 with the continued expansion of the CNG fueling infrastructure.

The MTA had fourteen bus washing systems at the operating divisions, with ten of the bus washers being fifteen years or older at the beginning of FY00. During FY00, the MTA replaced bus washers at Divisions 3, 5, 10, and 18 to improve the reliability of the equipment and improve the appearance of the bus fleet. A total of \$688,500 was allocated to replace the bus washers at these four divisions. In FY01, an additional \$215,000 is being allocated for replacement of the bus washer at Division 6, and \$400,000 is being allocated for replacement of bus washers at other key operating divisions.

#### Replacement of Non-Revenue Vehicles

The average age of the MTA non-revenue fleet was eight years in FY00, with an average mileage of over 96,000. During the FY00, over 800 non-revenue vehicles exceeded the FTA guidelines of five years or 100,000 miles for replacement. In FY00, the MTA will replace 162 light-duty vehicles, twenty-four medium-duty vehicles, fourteen forklifts, and various other specialty vehicles. The Non-Revenue Vehicle Replacement plan requires the replacement of about 260 vehicles per year from FY01 through FY05. In FY01, the MTA will replace 156 light-duty vehicles, twenty-four medium-duty vehicles, twenty-one forklifts, and sixty miscellaneous pieces of equipment.

#### Mechanic Training

In FY01, training will be primarily focused on improving mechanic skill levels in the troubleshooting and repair of electronic subsystems and alternative fuel engines and fuel systems using advanced computerized diagnostic equipment. Technical information centers will also be available at all divisions to provide mechanics with the latest technical information on all bus types.

#### Metro Rail Operations

Thirty Breda heavy rail cars and twenty-nine light rail Siemens cars will be tested and monitored to make sure the cars meet specifications. About 248 rail car subsystem overhauls will be accomplished in FY01.

#### **Division 22 Opening**

In FY00, Transit Operations will increase staffing at Division 22, which supports the Metro Green Line, in order to make it a fully operational Division. In FY00, Division 22 was a satellite to Metro Blue Line, Division 11. The need to make Division 22 fully operational was predicated on the acceptance of thirty additional Siemens P200 light rail cars, and the increase in Metro Green Line peak service from one-car consist to two-car consist.

#### Metro Blue Line Expands

The Metro Blue Line will begin construction on several stations to expand the platforms to accommodate larger trains as the MTA moves from a two-car to a three-car consist on the Light Rail system. This is done in an effort to relieve congestion during peak load periods.

## Countywide Planning & Development (CP&D)

#### FY00 Accomplishments

#### **Grants Management and Administration**

Applied for and secured over \$450 million in federal and state grants for MTA projects and programs. This includes \$55 million for the continued design and construction of North Hollywood Extension of the Metro Red Line, which opens in June 2000. This also includes over \$190 million to be used in purchasing some 570 buses under the MTA Accelerated Bus Purchase Program.

Obtained approval from the Board of Directors and the City of Los Angeles City Council for Amendment No. 1 to the Financial Contribution Agreement of Segment 3 of the Metro Red Line Project. Through the Agreement, the City provided \$200 million contribution which opens in June 2000.

Closed out over \$700 million in federal grants from the Federal Transit Administration for Segment 2 of the Metro Red Line Project. The federal funds were used for design and construction activities on Segment 2, whose Vermont-Hollywood leg was completed and opened for service in June 2000.

#### **Triennial Performance Audit**

Tracked the implementation of the 1995-1997 Transportation Development Act (TDA) Triennial Performance Audit recommendations and countywide planning and countywide transit operators. Performed organizational and functional review of the planning department and subsidiary roles through implementation of recommendations from the 1995-1997 TDA Triennial Performance Audit for MTA.

#### **Freeway Service Patrol**

Awarded twenty-four tow truck routes to increase efficiency. Redefined three party roles and responsibilities (MTA/CHP/Caltrans). Updated the Freeway Service Patrol (FSP) Standard Operating Procedure. Installed radio base stations to tie in communication with northern San Fernando Valley and North County.

Completed Countywide Teletype (TTY) upgrade and refurbishment of call boxes.

#### **Metro Art**

Installed 9,974 hand-painted art tiles at North Hollywood station, columns of art tile and historic text in the Universal City station and kinetic light sculpture at Hollywood/Highland station.

#### Corridor Reevaluation of East Side, Mid-City-Westside and San Fernando Valley

Completed reevaluation of the East Side, Mid-City-Westside and San Fernando Valley Corridors and major investment study for each of these three corridors. Upon review of the information contained in the three studies, the MTA selected one or more alternative in each corridor to proceed to the next planning phase which is preparation of the draft Environmental Impact Statement (EIS) and Environmental Impact Report (EIR). The Environmental Clearance phase will be funded with an \$8

million TEA-21 grant for Mid-City/Westside and East Side and with other funds for the San Fernando Valley.

#### **Joint Development**

The TrizecHahn development, a 1.2 million square foot entertainment/hotel/retail complex above the MTA's Metro Red Line subway station at Hollywood-Highland Boulevards, broke ground and started construction. TrizecHahn Centers began monthly rent payments to the MTA pursuant to the long-term ground lease agreement negotiated and executed the previous year. These rent payments will increase when the project opens and each year thereafter due to inflation adjustments and periodic reappraisals of the MTA property. The TrizecHahn development is scheduled to open in the Fall of 2001.

#### Santa Monica Transit Parkway

Completed and certified the final Environmental Impact Report (EIR) for the Santa Monica Transit Parkway project. The Board of Directors certified the document and authorized staff to work with the City of Los Angeles to assume the lead for the project. Staff drafted the necessary agreements to transition the project and over the course of the year, worked with the City to assure that funding previously secured for the project remained obligated.

#### **Harbor and El Monte Transitways**

In cooperation with the City of Los Angeles and California Department of Transportation (Caltrans) developed a satisfactory Transportation Systems Management (TSM) alternative to connect the Harbor and El Monte Transitways. Also worked through Federal Highway Administration to allow City of Los Angeles staff time to be used as a soft match for the project and was also successful in reducing the cost of the TSM alternative through value engineering.

#### Alameda Corridor

Alameda Corridor programmed state TSM fund in cooperation with Alameda Corridor Transportation Authority (ACTA) staff; Amended both the North End and Alameda Corridor MTA funding agreements to reflect the change in funding sources as well as refined the scopes of work to incorporate changes since the agreements were originally executed.

#### Soundwall Policies

Developed Soundwall Implementation policies that were adopted by the Board in February 2000.

#### High Occupancy Vehicle (HOV) Lanes:

Opened Route 14 HOV lanes between Sand Canyon and Escondido (10.7 miles, cost \$32.8 million) Started construction:

Route 605 San Gabriel River Freeway HOV lanes between Orange County Line and South Street (3.8 miles, budgeted \$15.8 million)

Route 405 San Diego Freeway HOV southbound Lanes between Route 101 and Waterford) (6.9 miles, budgeted \$22 million)

Route 14 Antelope Valley Freeway HOV lanes between Escondido and Pearblossom (11.2 miles, budgeted \$41.6 million)

#### State Transportation Improvement Program (STIP)

Pursuant to the Board of Directors, MTA adopted a policy for "Programming Cost Changes for STIP Highway Projects"; \$9 million in cost increases and scope/schedule changes were administratively processed and/or approved by the Board of Directors for projects totaling more than \$511 million.

#### **Metro Rapid Bus**

Metro Rapid Bus implementation initiated Phase 1 of the Metro Rapid Bus transit service on the Whittier-Wilshire Corridor and Ventura Boulevard Corridor. Utilizing 100 specially designated NABI buses equipped with bus signal transponders and APC, this service provided expedited bus service through these major corridors.

#### South Coast Air Quality Management District's Grant

In September 1999, MTA received two landmark clean air grants totaling \$8.4 million to help purchase new CNG buses. The Mobile Source Air Pollution Reduction Review Committee (MSRC), a regional clean air funding group, provided \$6.4 million. The South Coast Air Quality Management District (SCAQMD) approved more than \$2 million. Together, these grants helped purchase 350 CNG buses that were put into service by the end of FY00.

#### Rideshare 2000

MTA's voluntary rideshare program, which provides incentives to commuters to use travel modes other than driving alone, has made significant progress toward increasing program participation. As of April 5, 2000, the program has enrolled 4,137 employment sites, 2,494 Rideshare 2000 participants and 1,620 Club Metro participants. This represents a 250% increase in Rideshare 2000 participation and a 450% increase in Club Metro participating since July 1, 1999.

#### The Southeast Bus Restructuring Study

The Southeast Bus Restructuring Study is the last in a series of seven bus restructuring studies conducted throughout Los Angeles County over the past six years. The final work of the study has been going through an extensive process of review, refinement and consensus building. The benefit of this process has been the successful sponsorship of some transit service proposals. Several major findings of the study were cited including the need to improve service to selected corridors and destinations, improve bus connections and make information more integrated and available. The final phase of this study will be an evaluation of the Subregional Governance Alternatives and local control options.

#### **Bus/Rail Interface Plan**

A bus/rail interface plan was developed to support the opening of Segment 3, Metro Red Line Extension to North Hollywood on June 24, 2000. A public hearing was held on November 13, 1999, on the proposed plan. The final plan, based on public input, was approved by the Board of Directors on March 23, 2000, and implemented on June 25, 2000.

#### **Five-Year Service Projection**

A detailed Five-Year Service Projection has been developed to assist the MTA with multi-year financial planning. The plan projects the number of buses, operator assignments, service hours, and miles needed

through FY 2005. This plan is used by the Office of Management and Budget (OMB) for development of the Transit Operations budget, and is also included in the Short Range Transit Plan (SRTP).

#### **Long Range Transportation Plan**

During FY00, MTA resumed the revision of the Long Range Transportation Plan. Activities included engaging the public, cities, sub-regions, Partner public agencies and stakeholders in the preliminary planning process through a series of outreach meetings.

#### FY1999 Call-for-Projects

MTA administered the 1999 Call-for-Projects process and Memorandum of Understanding (MOU) development as part of the County Transportation Improvement Program (CTIP). As part of this process, staff programmed and assigned funds in the order of \$535 million. A process improvement program was developed regarding the management, tracking and auditing of regional funds. A project manager training program was initiated to assure accountability, conformity and project close-out audit resolution.

#### FY01 Budget Highlights

#### Long Range Transportation Plan

One of MTA's most significant activities during FY01 will be the completion of the Year 2000 Long Range Transportation Plan. This plan will establish MTA's vision for the continued development of the Los Angeles County transportation system over the next twenty-five years. The plan will evaluate the performance of a variety of transportation strategies, and develop recommendations for policies, programs, and projects that are most effective in meeting current and future transportation needs.

#### 2000 Abbreviated Call For Projects

In response to Governor Davis's Transportation 2000 initiative, MTA will recommended a slate of local projects for MTA Board approval and inclusion into the State Transportation Improvement Program (STIP). MTA will work with project on project development and implementation.

#### 2001 Call for Projects

MTA will conduct the 2001 Call for Projects process during FY01. Through this process, local jurisdictions, transit operators, and other agencies will be invited to nominate projects to compete for funding in various modal categories. Projects approved through the Call for Projects process will be included in the 2002 State Transportation Improvement Program (STIP).

#### Strategic Capital Planning

MTA continue to reconciling Capital & Operating Budget information with funding information in Long Range Transportation Plan; Review and analyze funding impacts of Governor Davis' Transportation Initiatives amounting to over \$1.billion for Los Angeles County.

#### **Regional and Local Funds Programming**

MTA continue funds programming required by TEA-21 & SB 45, including developing and maintaining databases for \$14 billion Regional Transportation Improvement Program (RTIP)/County Transportation Improvement Program (CTIP); Monitor, track, report and control Subsidies to Others portion of the FY01 MTA Capital and Operating Budget as well as oversee Transit Formula Allocation Program for the Municipal Operators.

#### **Grants Management & Administration**

Monitor, track reports and control over \$3 billion in federal, state and local grant funding (from FY01 and previous years) for MTA projects and programs.

# Complete Phase II of the Corridor Studies for Mid-City, East Side and San Fernando Valley

The MTA will continue the environmental assessment of the alternatives selected in each of the three corridors; Mid-City, East Side and San Fernando Valley. The MTA will prepare draft Environmental Impact Statements and Environmental Impact Reports (EIS/EIR) in compliance with state and federal law and conduct extensive community outreach. Upon completion of the draft EIS/EIR's, the MTA will choose a Locally Preferred Alternative in each corridor and start the final EIS/EIR and Preliminary Engineering.

#### **Metro Rapid Bus**

Following the successful implementation of the first Metro Rapid Bus demonstration in FY00, staff will continue to analyze Phase II corridor projects and seek additional funding for program expansion.

#### Service Planning/Market Research Program (SPMRP)

MTA will implement regional on-board surveys on bus and rail patrons in FY01. In conjunction with the Year 2000 census, these surveys will provide the largest customers/marketing information ever available to MTA. The surveys will involve extensive focus group sessions to gear the surveys to market currents, and follow-up telephone surveys to collect market and travel behavioral data in details. Line specific or corridor specific surveys and studies geared to measuring public responses to service initiatives will supplement the region-wide survey effort.

#### **Transportation Demand Management (TDM)**

The Team will manage 133 TDM projects totaling approximately \$6 million for FY01. MTA will continue to identify and fund innovative projects that serve to reduce or eliminate trips through a better utilization of available resources.

#### **Soundwall Projects**

MTA will: a) oversee the delivery of the 42 soundwall projects on the May 1989 soundwall retrofit list that is funded by the \$170 million CTC allocation, and b) manage/supervise and coordinate the completion of NBSSR's, engineering design and construction of Phase I Post 1989 HOV retrofit soundwalls.

#### **Route 30 Freeway Gap Closure**

Final engineering design plans, specifications and estimates (PS&E) will be completed and several construction projects will be advertised and awarded during FY01. MTA will monitor these projects to ensure conformance with scope, schedule and costs.

#### **High Occupancy Vehicle Lanes**

Two HOV lane construction projects should be completed/open to traffic in FY01: (a) Route 405 San Diego Freeway between Rte 101 and Waterford, and b) Route 605 San Gabriel River Freeway between Orange County Line and South Street.

Construction projects to start: Projects to begin construction are: (a) Route 10 San Bernardino Freeway HOV lanes between Baldwin Ave. and Route 605 (3.2 miles, budgeted \$55 million), (b) Route 14 Antelope Valley Freeway HOV lanes between Route 5 and San Fernando Road (2.3 miles, budgeted \$19.3 million), and (c) Route 10 San Bernardino Freeway between Route 57 and SBCL (5.9 miles, budgeted \$96 billion).

<u>Design Projects:</u> (a) Route 405 San Diego Freeway HOV lines between Rte 90 and Rte 10 (3.6 miles, cost estimate \$143 million), and (b) Route 60 Pomona Freeway HOV lanes between Rte 605 and Brea Canyon Road (11.3 miles, cost estimate \$85 million).

#### **Joint Development**

The MTA will conclude negotiations for a retail commercial development at the Chatsworth Metrolink Station and execute development agreements. The MTA will also conduct solicitations for interested developers at other Metro Red Line Stations including North Hollywood, Universal City, Wilshire/Western, Wilshire/Vermont, Hollywood/Vine, Westlake/MacArthur Park and others as appropriate to negotiate joint developments where possible.

#### **Bus Signal Priority Pilot Project**

During FY01, MTA in conjunction with the county-wide advisory committee will complete the technology evaluation and selection of a bus signal priority technology for implementation on Crenshaw Boulevard, the demonstration corridor. Hardware and software will be procured and installed. Staff will continue their coordination efforts with the Metro Rapid Bus demonstration pilot, LADOT's Transit Signal Priority Project, MTA's Advance Transit Management System (ATMS) and Automatic Passenger Counter (APC).

#### **Harbor Freeway Transitway Extension**

During FY01, MTA will negotiate and execute the necessary agreements for the City of Los Angeles to implement the TSM alternative approved by the Board in FY00 as part of the PSR document. MTA will continue to coordinate with the City of Los Angeles and Caltrans on this element of the project as well as on a succeeding phase, the Alameda By-pass Feasibility study.

#### Alameda By-pass Feasibility Study

As part of a succeeding phase of the Harbor Transitway Extension Project, staff will advertise and award the contract for the Alameda By-pass Feasibility Study. This study will evaluate the feasibility of

improving various streets in and around Downtown Los Angeles to accommodate HOVs and Goods Movement traffic. It is anticipated that the consultant contract will be awarded late in the 3<sup>rd</sup> quarter of FY01 with initiation of consultant work commencing in the 4<sup>th</sup> quarter.

#### **Freeway Service Patrol**

Implement communications system upgrade and data gathering capacity improvements. Award 13 beats from procurement initiated in FY00.

#### SAFE

MTA Initiate construction of ADA compliance work for Los Angeles County Call Boxes. MTA will continue efforts towards privatization and other cost savings measures for Call Box Management.

#### **Metro Art**

Continue installations of Metro Blue, Green, and Red Line Art projects. Initiate Hollywood Hills tunnel art project for Segment 3, initiate public art components for Metro Rapid Bus and other regionally significant projects.

## **Engineering and Construction**

#### FY00 Accomplishments

#### Metro Red Line (MRL) Segment 3

The North Hollywood Extension energized the 3<sup>rd</sup> rail on schedule and began revenue operations June 2000-six months ahead of schedule. During FY00, the following was completed: the installation of the traction power station, installation and activation of the automatic train control system and restoration of Hollywood Boulevard. Additionally, the following contracts were awarded: North Hollywood station site restoration contract and the USC site restoration contract.

#### Metro Red Line (MRL) Segment 2

A permanent Certificate of Occupancy was received during the year and remaining construction of the Kaiser Portal at the Vermont-Sunset station was completed. Staff initiated project contract close-outs, claim settlements and litigation.

#### Metro Green Line (MGL) Maintenance of Way Facility

During the year, staff completed the bid documents, received and evaluated bid proposals, and awarded the design and build contract. The contractor completed design and started construction. Staff continued to support the work on the automatic train control and radio system contracts.

#### Los Angeles Rail Cars

To date, twenty-two vehicles have been received. Several cars have undergone extensive testing to prove design conformance and prepare for MTA acceptance.

#### Capital Improvement Plan (CIP) Rail:

- Metro Blue Line Platform Extensions: During FY00, the design & build contract was awarded and design completed for Groups 1, 2, and 3 stations; started construction for Group 1 stations. The project consists of design and construction of station platforms to accommodate three-car consists for nineteen Metro Blue Line stations. Work at each station includes platform extensions, lighting and PA systems, signal modifications emergency and handicap access, pedestrian walkways, landscaping and utility relocations.
- Metro Red Line Segments 1 & 2B Sprinkler Systems: Installation and upgrade of the sprinkler systems in the public areas of the Metro Red Line Segment 1 and 2B stations were completed and brought into safety compliance. Contract close-out and project was completed on schedule and within budget.
- Tunnel Grouting: Contract awarded and grouting work started. The project involves
  injecting contact and backfill grout to fill voids and seal leaks and cracks at designated
  locations where water leakage is indicated in Metro Red Line Segments 1 and 2A
  concrete tunnel liners and cross passages.

Radio Retrofit: The contractor completed final design of the system and started the
installation of the radio retrofit for Metro Red Line Segment 2 with new radio
communication system equipment, antenna cables and systems interface pursuant to
LAPD and LAFD requirements.

#### Capital Improvement Plan (CIP) Bus:

- Metro Blue Line Power Switches: Started design work to modify seven manual street switches to remote automatic switches. This includes new switch mechanisms, TWC loops, signaling, track safety circuits and SCADA interface circuits.
- Elevator Fail Strobe Lights-Harbor Freeway Stations: Completed design of the strobe lights and associated circuitry at Harbor Freeway Stations to indicate the operational status of the elevators. The new circuitry will trigger the strobe light to warn arriving buses not to deboard wheelchair passengers at that particular station.
- Upgrade Control System for Division 11 & Division 20 Car Hoists: Completed
  construction by replacing obsolete Mitsubishi Programmable Logic Controller (PLC)
  with a new system. The PLC lateral logic was reprogrammed to keep all the control
  features the same as existing system. Project included training on the maintenance
  requirements and procedures.
- Redesign Metro Green Line Emergency Trip Stations: Completed all emergency trip stations on Metro Green Line to eliminate frequent and long interruptions of revenue service.
- Roll-Up Doors Emergency Stop: Completed design and installation of remote operation of emergency roll-up doors which resulted in saving manpower required to open and close Metro Red Line Segment 1 stations.
- Various Projects: Additional work performed by Engineering and Construction includes the following: started construction for the RRC leak detection system; completed installation of the CNG fueling station at Divisions 5 and 7; replaced the Division 1 underground tank; completed the ADA upgrade to four transit centers and seven customer service centers; added one CNG compressor to Divisions 10 and 18; completed installation of RRC plasma cutting table; completed installation of 10 ton crane at Division 20; accepted approximately 100 Engineering Service Requests (ESRs) relative to facilities, operations and safety improvements and compliance; and received the first payment from the firm marketing the Contract Control System (CCS) software designed by staff.

#### FY01 Budget Highlights

#### Metro Red Line Segment 3, North Hollywood

The North Hollywood Extension of the Metro Red Line began revenue operations June, 2000. The FY01 project activity includes receiving the Certificate of Occupancy, completing US 101 Freeway Over-crossing and Universal City Station site restoration; and completing Lankershim Bridge widening and Lankershim Boulevard restoration.

#### **Metro Green Line**

The FY01 budget includes funding for the completion of the Automatic Train Control System; costs relating to testing and startup of the vehicles; testing of the train control wayside equipment with carbon equipment; Caltrans outstanding claims and the continuing construction of the Maintenance of Way facility.

#### Los Angeles Rail Car

The FY01 budget includes costs for the deliverance and acceptance of remaining rail cars payments for fabrication and testing milestones, in addition to consultant services and administrative support.

#### Metro Red Line Segment 2

The FY01 budget includes costs for completion of all remaining contract close-outs, claim settlements and litigation. Segment 2 includes two rail corridors: The Wilshire/Western Corridor, which began revenue operations July 1996, and the Vermont-Hollywood Corridor, which began revenue operations June 1999.

#### Capital Improvement Plan (CIP) Rail

Minor rail capital improvements include on-going minor rail projects such as the Los Angeles-Long Beach Blue Line punch list and claims, the Metro Blue Line corrosion control studies and construction, the Imperial Highway punch list, the Pasadena Blue Line Engineering Management Consultant (EMC) claims mitigation, and the Deferred Metro Red Line Projects environmental mitigation.

The FY01 budget includes the costs for Engineering and Construction technical support to Procurement for the General Engineering Consultant solicitation, the Lessons Learned Program support, EMC contract close-outs, design and construction of the Metro Blue Line Platform extensions to include three car consist, radio retrofit, environmental mitigation, and tunnel grouting.

#### Capital Improvement Plan (CIP) Bus

The FY01 budget includes costs for Engineering and Construction support to maintain and upgrade operations facilities projects such as re-roofing, lighting, fuel tank replacement, leak detection, pavement replacement, CNG compressors, and ADA compliance.

### **Support Services and Other Units**

#### FY00 Accomplishments

#### Administration

All mission-critical computer systems were successfully made Y2K compliant, so that the MTA did not experience any adverse impacts due to the year 2000 date change.

Marketing launched the "It's Getting Better on the Bus" campaign to communicate transit improvements to our customers.

#### **Management Audit Services Department**

Management Audit Services Department (MASD) and Accounting completed the initial Proposition A & C sales tax revenue audits (since inception through June 30, 1998) and submitted to the Citizen's Oversight Advisory Committee as mandated by the MTA Reform and Accountability Act of 1998.

#### **Finance**

Accounting successfully converted to Payroll 2000 and implemented ongoing system enhancements to improve the payroll process.

Treasury completed replacement of \$350 million letters of credit supporting the tax-exempt commercial paper program.

Treasury initiated lease for up to seventy-two Breda rail vehicles, providing an up-front cash benefit estimated at more than \$12 million.

Revenue Administration introduced a new, combined ID card for seniors and/or handicapped patrons, which consolidated five previous forms of ID cards and passes. This gives passengers the ability to carry one card with both their picture and monthly pass stamp, and assists MTA drivers by reducing the number of valid forms of fare media they have to recognize each month.

Revenue Administration expanded rail ticket vending machine (TVM) service at eight new stations in support of the Metro Red Line extension to Hollywood and North Hollywood.

Office of Management and Budget (OMB) initiated tools to improve analysis, expense monitoring and reporting; including development of Activity Based Costing (ABC). Implementing ABC in transportation service delivery is a new innovation in the public sector and promises to be an important tool in managing cost and improving overall agency financial performance. OMB also developed a five-year revenue and expense plan for short-term financial forecasting and oversaw the five-year service plan development for revenue service hours and miles, operator assignment and the number of buses to support forecasting.

#### **Risk Management**

Risk Management implemented the Transitional Duty Program, which saved \$2 million in temporary disability payments in the Workers' Compensation program.

#### **Procurement**

Procurement developed a "buy-back" provision to avoid costs associated with obsolescence because of changes or product improvements, an innovative approach was considered to include the obsolete material as a condition of award. By utilizing the "buy-back' provision method the MTA recovered \$70,000 or approximately 94% of the original purchase value of conventional brake lining.

Procurement streamlines operations and reduced administrative costs by implementing the "Purchase Card Program" in early FY00 for small dollar purchases. The "Purchase Card Program" provides an alternative, simplified method of filling both anticipated and unanticipated, repetitive needs for non-inventory supplies, parts, and other items.

#### **Human Resources**

The Pension and Benefits unit of Human Resources negotiated reduced cost for employee benefit packages through the use of a specialist consultant. The use of a consultant provides MTA with the cost benefits associated with "volume" buying power.

The Career Development unit of Human Resources recruited five business partners for internship and mentor programs: the Los Angeles Archdiocese, the Watts Labor Community Action Committee, Nickerson One-Stop, Chinatown Service Center and Catholic Big Brothers. These job partners are providing valuable funding in FY00 and will continue in FY01.

Human Resources Development and Training institutionalized the Transportation Leadership Academy (TLA) for MTA supervisors and managers. TLA promotes skill-building in management and leadership, team building, and management change. This program is fully designed, developed, and delivered by internal staff.

#### **Government Relations**

Government Relations assisted in securing Federal Appropriation funding of \$64.8 million for North Hollywood and other MTA transportation programs and funding for 1989 retrofit sound-wall list.

#### Media

Public Relations/Media Relations developed an intranet daily electronic newsletter for MTA employees.

#### Safety and Security

Safety completed successful trial installation, testing and acceptance by California Public Utilities Commission (CPUC) of four-quad rail crossing gate technology on the Metro Blue Line. This system should deter motorists from driving around crossing guards and are an additional safety measure to reduce the number of accidents.

No lost time injuries were reported on Segments 2B and 3 during the first six months of FY00 compared to seventeen lost time injuries in the first six months of FY99.

LAPD uncovered major bus transfer theft and counterfeit rings during FY00 with tips received, in part, from the Divisional "Cops-n-Ops" meetings with bus operators resulting in potential savings to the MTA.

Hosted the Federal Law Enforcement Training Centers program in transit security and anti-terrorism.

#### FY01 Budget Highlights

#### **Finance**

The Financial Information System (FIS) will be upgraded to Oracle government accounting system version IIi. Version IIi has enhanced workflow payment and cash forecasting capabilities and physical inventory monitoring.

#### **Risk Management**

Workers' Compensation premium continues to increase by \$10 million due to higher exposure and growth in payroll.

#### Administration

Provide professional real estate acquisition and relocation services to the City of Los Angeles for the Santa Monica Transit Way project which will combine 2.4 miles of North and South Santa Monica Boulevards into a transit parkway that will feature a center roadway with three vehicular travel lanes and a bicycle lane in each direction, a landscaped center median, frontage roads on both the north and south sides for parking and access to local streets and plus bus priority treatment at signalized intersections.

Division Networking Construction Project, which will significantly enhance network access and management reporting in Metro Bus and Metro Rail Operations, will begin the construction phase.

Commence design and implementation of the Maintenance and Materiel Management System that will improve operations and enhance efficiency.

### **MTA Budget Process**

#### **Budget Overview**

The annual budget, as adopted by the Board of Directors, is the legal authority to obligate and spend funds. It includes all operating, capital and debt service requirements of the MTA for the fiscal year. MTA's fiscal year is from July 1<sup>st</sup> to June 30<sup>th</sup>. The annual budget is comprised of an Operating, Capital and Regional Programs budget.

The Operating Budget provides a summary of the planned revenues and expenditures for the fiscal year for MTA services and programs including the following:

- All revenue and expense assumptions and projections
- Revenue Service hours and miles of bus and rail service

The Operating Budget includes Metro Bus and Rail Operations, Freeway Service Patrol (FSP), planning activities and projects, property management activities, debt service, agency administration, and contingencies. The Operating Budget consists of the Enterprise, General, Special Revenue, and Debt Funds.

The Capital Budget includes all activities associated with bus acquisition, bus and rail capital improvements, rail construction activities, and other capital projects. The Board of Directors authorizes new capital project, total project cost and schedule. The approval of the project budget authorizes the total expenditures over the multi-year duration of the capital project. The annual budget authorizes the anticipated expenditures of the total project budget as well as the scope of work to be completed in the fiscal year.

The Regional Programs Budget includes funds that MTA provides directly through grants of local funds or indirectly through allocating Federal and State grants to local agencies and transit operators throughout Los Angeles County. Funds are allocated to other government agencies in accordance with legislative requirements, Board of Directors policy or through a competitive awards process known as the Call-for-Projects (CFP). The Board of Directors approves the projects recommended for funding through the annual budget and the competitive process.

Programs funded in the Regional Programs Budget include capital and operating allocations to municipal bus operators, direct disbursements to Los Angeles County cities for transportation programs and services for the disabled provided by Access Services, Inc. (ASI).

MTA's financial records reflect only those funds which are actually received and directly disbursed by the MTA, mainly Proposition A and C revenues.

#### **Budget Workflow**

Budgeting for the fiscal year can be divided into three phases: (1) budget formulation and preparation (2) budget presentation and reviews; and (3) budget implementation. The FY01 budget process was characterized by the following events:

- Initial planning of the budget began in January. Preparation of the budget began in mid-February, departments developed their budget requests which were submitted to the Office of Management and Budget (OMB) in March
- Project and department level reviews of budget requests were scheduled in April
- The summary of the proposed budget was released to the Board of Directors and public on May 3, 2000
- MTA staff briefed the Board of Directors on May 8, 2000
- A public hearing was held May 18, 2000, in conjunction with the Finance and Budget Committee meeting
- The Budget was adopted on May 25, 2000 at the regularly scheduled Board of Directors meeting. Motions introduced during the adoption process are also included in the Appendix
- The FY01 budget will be implemented on July 1, 2000

### **Budget Basis**

The MTA is a single, integral entity for budgeting and accounting purposes. However, it is reported as a collection of separate accounting entities known as funds. The Governmental Accounting Standards Board (GASB) defines a fund as a fiscal and accounting entity with a self-balancing set of accounts which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations.

Annual budgets are adopted for each of the fund groups used by the MTA, including the Enterprise, General, Special Revenue, Capital Projects, and Debt Service Funds. All funds except the Enterprise and Special Revenue funds are accounted for using the modified accrual basis of accounting, meaning that revenue is recognized when it is both measurable and available. The Enterprise Fund uses the accrual basis of accounting in which revenue is recognized when it is earned or received. Department budgets are controlled at the line item or account level.

MTA uses Special Revenue Funds to account for those funds that are restricted by purpose and use. The Special Revenue funds reflect MTA responsibility to administer special transportation programs as well as its duty to allocate transportation funds to local and regional agencies throughout Los Angeles County. Special revenue funds are shown in the budget summaries on a cash-flow basis.

The Service Authority for Freeway Emergencies (SAFE) administers Los Angeles County's participation in the statewide Call Box program, which coordinates emergency services to motorists on freeways. SAFE is an independent financial entity component unit, which is administered by MTA staff. SAFE funding is derived from the \$1 fee collected on vehicle registrations. SAFE program expenditures are reflected in the Operating and Capital Budgets.

In addition, MTA is responsible for acting as a trustee for certain funds which are held by the MTA as an agent for individuals, private organizations or other funds. MTA uses Fiduciary Funds to accounts for these assets and include pension trust funds and restricted agency funds. Benefit Assessment District (BAD) funds are an example of trustee funds which MTA collects and serves as the trustee for debt payment. The outstanding debt is an obligation of the Benefit Assessment District; MTA administers the program through the collection of fees from property owners and payments to bondholders.

During the fiscal year, changes in law, economic conditions and emergencies can have an impact on budget authority. Spending authority may have to be increased or decreased throughout the fiscal year as these unanticipated situations arise. The Chief Executive Officer is given authority by the Board of Directors to transfer funds between projects, departments, and accounts within the same fund based on changes in need. Any transfers between projects, accounts and departments in different funds are subject to approval by the Board of Directors.

### **Major Budget Assumptions**

#### **Service Level Assumptions**

The FY01 budget assumes the following new services:

- The Metro Red Line Segment 3 rail service to North Hollywood from the beginning of FY01
- Full year operation of Rapid Bus on Ventura Boulevard & Wilshire-Whittier Corridors
- Metro Green Line rail service will operate a two car consist at peak and Division 22 (Metro Green Line) will be fully operational
- 7,271,125 bus revenue service hours 3% increase from FY00
- 242,709 Metro Blue Line/Metro Green Line vehicle service hours 20% increase from FY00
- 259,919 Metro Red Line vehicle service hours 10% increase from FY00
- Delivery and operation of 502 new CNG buses
- Delivery of thirty BREDA and twenty-nine Siemens rail cars

Mode		Vehicle Revenue Hours (000)
Bus	MTA Operated (BASE)	6,069
	MTA Operated (R.B.)	610
	Contracted Service	592
***************************************	Subtotal Bus	7,271
Rail	Blue Line	158
	Red Line	260
	Green Line	85
	Subtotal Rail	503
Total		7,774

## **Capital Improvement Plan Assumptions**

- Begin Universal Fare System (UFS) implementation for seamless inter-modal/inter-agency transit level
- Upgrade and increase capacity of CNG facilities
- Upgrade and expand capacity at Metro Red Line yard
- Replace approximately 200 non-revenue vehicles
- Construction of Metro Blue Line station platform extension for three-car configuration

## **Other Budget Assumptions**

- Includes an increase in funding for Mid-City-Westside and Eastside Corridors environmental studies and preliminary engineering
- Includes funding for the sound-wall implementation program including noise study and or design contracts
- Sales tax revenue grows at 3% over FY00 projected level
- \$50 million in Section 3 New Starts for Metro Red Line North Hollywood
- Bus cost per revenue service hour of \$98.75
- All wages increased by Consumer Price Index (CPI)

Fu	nd Type	Revenues	Assumptions	Application/Uses
	les Tax Revenues		•	-
1.	Proposition A	\$557.2 million in revenues include \$55 million in carryover funds and \$502.3 million in new sales tax.	FY01 sales tax forecast was calculated by adjusting up FY00 by \$3.6 million for aerospace withdrawal and increasing it by 3% over the FY00 projected receipts.	All areas of budget-operations, debt service, general fund, planning projects, and subsidies.
2.	Proposition C	\$694.2 million revenues include \$191.7 million in carryover funds and \$502.5 million in new tax revenues.	Sales tax forecast was calculated by increasing 3% over the FY00 projected receipts.	All areas of budget-operations, debt service, general fund, planning projects, and subsidies.
3.	Transportation Development Act (TDA)	\$376.4 million in revenues include \$123 million in carryover funds and \$253.7 million in new tax revenues.	Sales tax forecast was calculated based on 0.2525% of combined new FY01 Prop A & C estimated sales tax revenues.	MTA bus and rail operations, local match to COP and capital projects, subsidies to municipa bus operators.
4.	State Transit Assistance (STA)	\$34.5 million in revenues include \$8.3 million carryover funds and \$26.1 million in new revenues.	Preliminary revenue projection based on Caltrans Fund Estimate dated 08/99.	MTA bus and rail operations, subsidies to municipal bus operators.
Inte	ergovernmental Revenues			
_	cal Revenues			
1.	Access System Inc.	\$41.6 million in new revenues.	Based on Board approved funding plan.	ADA Compliance program.
2.	City of Los Angeles	\$6.2 million in new revenues.	Projection based on updated agreement between LA City and MTA for rail construction projects.	Metro Red Line-North Hollywood construction expenses.
3.	Southern California Air Quality Management District (SCAQMD)	\$3 million in new revenues.	Clean fuel funds for bus purchases as identified in the Accelerated Bus Procurement Funding Plan dated 10/06/98 and estimated grant funds as projected by Countywide Planning staff.	Bus acquisition, fuel cell powe system purchase, and SB836 project.
4.	Los Angeles County	\$600K in new revenues.	Based on estimate by Countywide Planning staff of anticipated grant funds. Funds are on reimbursement basis.	Welfare to work program and tree planting project.
5.	CSDA/CTFC Sub- lease agreement	\$2.4 million in new revenues.	Consistent with FY01 MTA's Treasury Dept. Debt Plan.	Financing reimbursements for COP sub-lease debt service.
6.	Local Other	\$2.4 million in new revenues. This includes \$1.2 million Welfare to Work, \$857K 1998 SB 836 Rideshare Program, \$292K Route 710 Corridor MIS, \$70K Project Intermodal Multi Jurisdictional Integrated Network Environment (IMAJINE), and \$6.8K Getty Museum Intern Subsidy.	Based on estimate by Countywide Planning staff of anticipated grant funds. A portion includes funds allocated from L.A. County Private Industry Council and Department of Public Social Services.	Welfare to Work Program, SB836 Rideshare Program, Route 710 Corridor MIS, Project IMAJINE, and Getty Museum Intern Subsidy.
Sta	te Revenues			V
1.	Rail Bonds - Prop 116	\$2 million in new revenues.	Based on current construction expenditure plans.	Metro Green Line project
2.	Regional Improvement Funds	\$60.3 million in new revenues.	Based on 1998 STIP Augmentation.	Accelerated bus procurement

гu	nd Type	Revenues	Assumptions	Application/Uses
3.	State Transit Capital Improvement (TCI)	\$20K in new revenues.	Based on estimate by Countywide Planning staff of anticipated grant funds. Funds are on reimbursement basis.	Westlake-MacArthur Park intercept facility project
4.	SB45 Administration	\$3.1 million in new revenues.	Estimated by Capital Planning staff, consistent with SB45 funding plan.	Administration and oversight of planning projects
5.	Budget Change Proposal (BCP)	\$3.9 million in new revenues.	Based on State Highway Operations Dept estimate of anticipated grant funds from Caltrans for Freeway Service Patrol project.	Freeway Service Patrol Program (FSP)
6.	State Other	\$5.3 million in new revenues. This includes \$4.7 million STIP funds, \$292K Route Corridor MIS, \$70K Pico/Slauson Metro Blue Line Station, \$70K Project IMAJINE, and \$185K Transportation Equity Act (TEA).	Based on estimate by Countywide Planning staff of anticipated grant funds. Funds are on reimbursement basis.	SCAG Core & Employer Rideshare Program, Route 710 Corridor MIS, Transit Museum, Project IMAJINE, and Pico/Slauson Metro Blue Line Station.
Fee	deral Revenues			
1.	Section 5309 [3] New Starts	\$49.1 million in available revenues includes \$39.2 million of capital new starts & \$9.8 million of deferred local share, and \$154K for Grant Management.	Assumed to average \$65 million annually through FY 2013. Funds reimbursed to MTA as they are incurred.	Metro Red Line Segment 3- North Hollywood project and Grant Management.
2.	Section 5309 [3] Fixed Guideways Modernization	\$34.2 million in available revenues.	Assumed guaranteed level of TEA 21 and projected added eligible miles that become seven years old during the plan period. Funds reimbursed to MTA as they are incurred.	Rail asset maintenance capital projects.
3.	Section 5307 [9] Capital	\$43.5 million in available revenues.	Assumed at the guaranteed level of TEA 21 as determined by the federal formula and SCAG implementing formulas. Section 5307 funds reimbursed to MTA as they are incurred.	COP debt service, Bus and rail capital and Preventive Maintenance
4.	Section 5313	\$500K in new revenues.	Based on Countywide Planning staff of anticipated grant funds.	State planning and research program
5.	Congestion Mitigation and Air Quality (CMAQ)	\$150.7 million in new revenues.	Based on State Implementation Plan that has been approved pursuant to the Clean Air Act.	Bus acquisition and Facility improvements
6.	Petroleum Violation Escrow Account (PVEA)	\$190K in available revenues.	Based on estimate by Countywide Planning staff of anticipated grant funds. Funds are on reimbursement basis.	Smart corridor evaluation project
7.	Clean Fuel Program	\$5.7 million in new revenues	Grant appropriated by Congress Per TEA 21 legislation.	Clean fuel bus procurement

E	nd Type	Revenues	Assumptions	Application/Uses
8.	Federal Other	\$15.1 million in available revenues. This includes \$6.3 million Phase 1 & 2 Supplemental Draft Environmental Impact Statement (SDEIS) & San Fernando Valley Environmental Impact Statement (SFEIS), \$3.8 million Mid-Cities/Westside Corridor Studies, \$1 million Welfare to Work, \$1.4 million Catellus Pedestrian Improvement Project, \$624K LA Ventura Advanced Traveler Information System (ATIS), \$560K Project IMAJINE, \$500K Figueroa Corridor Pedestrian Improvement, \$400K Glendale Blvd. Terminus, \$300K Project Management, \$200K Eastside Ext., \$50K Metro Rapid Bus, and \$16K Alameda Bypass.	Based on estimate by Countywide Planning staff of anticipated grant funds.	Phase 1 & 2 SDEIS & SFEIS. Mid-Cities/Westside Corridor Studies, Welfare to Work, Catellus Pedestrian Improvement Project, LA Ventura ATIS, Project IMAJINE, Figueroa Corridor Pedestrian Improvement, Glendale Blvd. Terminus, Project Management, Eastside Ext, Rapid Bus, and Alameda Bypass.
Inv	estment Income Revenue	s		
1.	Prop A Interest	\$15.7 million in revenues including \$11.4 million in carryover funds and \$4.2 million in new revenues.	New revenue estimate is based on average portfolio investment amount with an annual yield rate of 4.90%	MTA bus operations and Municipal Bus operators
2.	Prop C Interest	\$34 million in revenues including \$21.6 million in carryover funds and \$12.4 million in new revenues.	New revenue estimate is based on average portfolio investment amount with an annual yield rate of 4.90%	MTA bus operations and Municipal Bus operators
3.	TDA Interest	\$7.2 million in revenues including \$3.2 million in carryover funds and \$4 million in new revenues.	New revenue estimate is based on an annual average of \$100 million with a yield of 4%	MTA bus operations and Municipal Bus operators
4.	STA Interest	\$695K in revenues including \$295K in carryover funds and \$400K in new revenues.	New revenue estimate is based on an annual average of \$10 million with a yield of 4%	MTA bus operations and Municipal Bus operators
5.	General Fund-Interest Revenue	\$849K in new revenues.	New revenue estimates are based on average portfolio investment amount at annual yield rate of 4.90%	General administrative expenditures
	se And Rental	0112 '11'	D. J. MTA	l p
1.	Lease and Rental	\$11.3 million in new revenues.	Based on MTA's property management department estimate and actual lease agreements.	Property management Metro Bus & Rail Operations Joint development
	ense And Fines	621.4 '11'	D1	C-III
1.	Service Authority for Freeway Emergencies (SAFE)	\$21.4 million in revenues including \$14.1 million in carryover balance and \$7.3 million in new revenues.	Based on number of registered vehicles in LA. County at \$1 per car and actual FY99 revenues.	Call box program
2.	HOV Lanes Fines	\$250K in new revenues.	Based on State Highway Operations Dept estimate of anticipated funds.	Freeway Service Patrol program (FSP)

R	evenue Det	tail - FY01 Budg	jet	
	nd Type	Revenues	Assumptions	Application/Uses
Ge	neral Fund Revenues			
1.	Parking Fees	\$770K in new revenues.	Projected revenues are based on analysis of actual monthly receipts from Catellus Corporation, and are estimated at an average of \$64K a month.	General administrative expenditures
2.	SCRRA Administrative Support	\$101K in new revenues.	Based on current contract agreements between SCRRA and MTA's ITS department including \$41K in FTE support and \$26K in Oracle FIS license fees.	General administrative expenditures
3.	Copying Fees & Bid Document Sales	\$4K in new revenues.	Amount is consistent with FY99 level.	General administrative expenditures
4.	Employee Activities	\$712K in new revenues.	Based on projected revenues by Human Resources department including \$418K for Employee Center ticket, logo merchandise and See's candy sales.	Employee activities related projects
5.	HR Development Training	\$409K in new revenues.	Based on projected revenues by Human Resources department including \$229K for Signal Systems Training Program.	Human Resources development training provided to local transit agencies.
6.	Miscellaneous	\$689K in new revenues.	Projection is based on analysis of miscellaneous cash receipts.	General administrative expenditures
7.	PBL (Admin Costs Reimbursement)	\$527K in new revenues.	Based on estimate from MTA's Property Management department on projected reimbursements from Pasadena Authority.	Property Management program related to Pasadena Blue Line.
8.	General Funds Estimated Carryover Balance	\$56 million in carryover funds.	Based on analysis of accounting records. Balance includes unspent FY99 budgeted expenditures.	Board Contingency Programs, Office of County Counsel, Legal Services, Countywide Planning & Development Projects, and Office of Inspector General
Oth	er Revenues	•	•	
1.	Federal Aid Urban Cash (FAU Cash)	\$11.4 million in revenues includes \$11.1 million in carryover and \$300K in new revenues.	Estimate of investment income is based on anticipated average cash balance of \$6.0 million with an annual yield rate of 4.90%	Countywide Planning and Development projects.
2.	Ridesharing	\$1.1 million in carryover funds.	Based on analysis of MTA financial records.	Bus operations
3.	Benefit Assessment District (BAD)	\$8.9 million in new revenues.	Financing reimbursements to equal annual debt service expenditures. The assessments are collected from commercial property owners within half a mile of certain Metro Red Line Stations.	Financing reimbursements for Benefit Assessment debt (BAD) service

Fu	nd Type	Revenues	Assumptions	Application/Uses
	erating Revenues			
1.	Fare Box Revenues- Passenger fares	\$236.5 million in new revenues.	Assumes increased boardings due to additional bus service, additional rail boardings due to the extension of the Metro Red Line to North Hollywood, and increased Metro Green Line service. (fare reimbursement - \$1 million)	Bus and rail operations
2.	Hollywood Shuttle	\$404K in new revenues.	Based on prior year actual and estimated contract value between MTA and LA County and LA Philharmonic.	Bus operations
3.	Metrolink Interagency Agreement	\$2.3 million in new revenues.	Revenues are based on annual estimate of 2.8 million passengers transferring from Metrolink to Red Line and MTA's buses at \$.80 each. Growth rate consistent with last year's level assumption.	Bus and rail operations
4.	Auxiliary Transportation- Advertising	\$14.7 million in new revenues.	Based on contract with Transportation Display Incorporated. FY01 revenue from bus advertising includes \$1.0 million for wrapped advertising. No revenue for rail advertising is projected for FY01.	Bus operations
	n-Operating Revenues		Y	<b>Y</b>
1.	Federal Preventative Maintenance Grant	\$77.5 million in new revenues.	Assumed at the guaranteed level of TEA 21 as determined by the federal formula and SCAG implementing formulas. Section 5307 funds reimbursed to MTA as they are incurred.	Bus and Rail Preventative Maintenance
2.	Federal Fixed Guideways Modernization Grant	\$4.8 million in new revenues.	Assumed guaranteed level of TEA 21 and projected added eligible miles that become seven years old during the plan period. Funds reimbursed to MTA as they are incurred.	Rail asset maintenance capital projects.
3.	Federal CMAQ Rapid Bus Grant	\$18 million in new revenues.	Based on State Implementation Plan that has been approved pursuant to the Clean Air Act.	Rapid Bus Pilot Program operations
4.	Interest Revenues	\$3.3 million in new revenues.	Based on pooled account average balance of \$67 million earning an annual yield rate of 4.9%	Bus operations
5.	Bus Parts/Scrap Sales	\$448K in new revenues.	Based on MTA's Procurement Department estimate of revenues from the sale of salvaged bus parts and non-revenue vehicles.	Bus operations
6.	Filming Fees	\$450K in new revenues.	Based on MTA's Customer Relations Department projection estimated at FY00 budgeted level and filming activity trends in Southern California.	Bus operations

Revenue Detail - FY01 Budget									
Fund Type	Revenues	Assumptions	Application/Uses						
7. County Buydown of Fare Media	\$450K in new revenue.	FY01 amount based on Customer Service Department revised cash flow assumption.	Bus operations						
8. Fare Violations/Fines	\$400K in new revenues.	Revenue is based on MTA's Transit Security Department projected number of citations that will be issued in FY01.	Bus and rail operations						
9. Sales of Surplus Property	\$2.1 million in new revenues.	Revenue is based on sales of surplus real estate property.	Bus operations						
10. Miscellaneous	\$549K in new revenues.	Based on analysis of FY99 and FY00 cash receipts. Excludes sales of surplus property which is stated separately.	Bus and rail operations						
Other Financing Sources									
Proceeds from Financing	\$220.2 million in funds include \$46.2 million in carryover funds and \$174 million in new bonds issue.	Based on Call For Projects (CFP), capital expenditures requirements and MTA Treasury Department debt plan.	Bus and rail capital asset maintenance and light rail projects						
2. Proceeds from Refunding Bonds	\$365 million in refunding bonds.	Based on MTA Treasury Department debt plan.	Tax-exempt commercial paper refunding

# **Financials**

## **Enterprise Fund**

#### **Fund Narrative**

The Enterprise Fund is used to account for Metro Bus and Rail Operations, which are financed and operated in a manner similar to that formula in the private sectors. The transit services included within the Enterprise Fund are Metro Bus, Rapid Bus, light-rail and heavy-rail service and other regional programs. Other regional programs support all transit providers in Los Angeles County, including the Patsaouras Transit Plaza, transitways and the 1-800-COMMUTE telephone information service.

#### Revenue

The Enterprise Fund operating revenues recover approximately 30% of the cost to provide transit services. Over 90% of the operating revenues are derived from passenger fares with the remainder coming from route subsidies, interagency agreements and advertising. The other 70% of costs to provide services are funded through a combination of non-operating revenues and transfers. The main source of non-operating revenue is federal grants, while the main sources of transfers are from Proposition A and C, Transportation Development Act (TDA), and State Transit Assistance Fund (STA) tax revenues. The amount of tax revenue required to balance the Enterprise Fund varies from year to year and is dependent upon the amount of federal grant funds available.

### **Expenses**

Within the Enterprise Fund, approximately 70% of expenses are for labor and fringe benefits. The majority of the labor costs include employees represented by United Transportation Union (UTU), Amalgamated Transit Union (ATU), Transportation Communications Union (TCU), and American Federation of State County and Municipal Employees (AFSCME). Fuel and materials represents another 16% of expenses with the remainder of the expenses being comprised of services, purchased transportation and General and Administrative expenses.

MTA Transit Security works to maintain a safe and secure transit system. Transit Security develops and manages system crime prevention and facility security programs. Their priorities are to protect passengers, employees, revenue and property. In FY01, for combined Metro bus and rail modes, the costs for transit-related security are \$59.3 million or \$7.62 per revenue service hour.

MTA contracts with local law enforcement organizations for enhanced security presence on the transit system. Since November, 1997, MTA has contracted directly with Los Angeles Police Department (LAPD) and the Los Angeles County Sheriff's Department (LASD) to provide transit policing service. These policing contracts contribute the majority of transit security cost per hour in bus and rail modes. Contract budget amounts for the with LAPD and LASD are negotiated on an annual basis. Service charges to the MTA are based on full cost recovery (includes overhead cost allocation).

LAPD provides security for MTA Metro buses and the Metro Red Line subway at a cost of \$32.3 million, an increase of 13.6% over FY00 budget. LAPD's staffing profile for FY01 includes 233 sworn officers and thirty-four civilian personnel assigned to administration. This includes an increase of one civilian position over FY00 staffing levels.

LASD provides security for MTA Metro buses and light rail modes, Metro Green and Blue Lines, at a cost of \$21.3 million an increase of 7% over FY00. For FY01, their staffing profile includes 164 sworn

officers and thirty-four civilian personnel assigned to administration. This includes an increase of one civilian position over FY00 staffing levels.

LASD provides security for MTA Metro buses and light rail modes, Metro Green and Blue Lines, at a cost of \$21.3 million an increase of 7% over FY00. For FY01, their staffing profile includes 164 sworn officers and thirty civilian administrators. Staffing has increased by one civilian position above FY00 levels.

Other elements of transit security costs charged to the Enterprise Fund include dispatch and facility security. MTA Security has increased its staff by eleven transit security officers, with total department staffing going from 93 to 104 in FY01 to fully staff the security dispatch center on a twenty-hour, seven day-a-week basis and for enhanced security at the Regional Rebuild Center (RRC). Gateway security was also increased to improve security checks during peak work periods. Another component reflected in bus and rail cost per hour is contract security. There are approximately 162 contract officers that provide security at Park-and-Ride lots and at MTA Metro bus and rail operating divisions and support facilities.

### **Budget & Service Level Assumptions**

Mode		Vehicle	Vehicle	Unlinked
		Revenue Hours	Revenue Miles	Passenger Trips
Bus	MTA Operated	6,679,235	82,008,346	367,357,925
	Contracted Svc	591,890	8,450,409	15,981,030
	Subtotal Bus	7,271,125	90,458,755	383,338,955
Rail	Blue Line	157,614	3,397,974	17,022,420
	Red Line	259,919	5,929,300	24,952,224
	Green Line	85,095	2,663,675	12,168,585
	Subtotal Rail	502,628	11,990,949	54,143,229
Totals		7,773,753	102,449,704	437,482,184

The following revenue and expenses were used to develop the FY01 Operating Budget:

- Metro bus and rail fare box revenue is estimated at \$236 million
- The FY01 budget assumes the base cash fare will not increase
- The FY01 budget assumes that the additional night service for Staples Center runs for the entire year
- The FY01 budget assumes the following fuel prices: diesel-80.83 cents/gallon, gasoline-\$1.11/gallon, and CNG-35.29 cents/therm

#### **Internal Service Fund**

#### **Fund Narrative**

The Internal Service Fund is used to account for goods and services provided to projects and funds on a cost reimbursement basis. This fund provides the other departments with centralized services financial, administrative and facility support services. The Fund is comprised of general agency overhead, functional unit overhead projects for Operations, Planning and Construction as well as discrete projects for Public Transportation Services Corporation (PTSC) and Public Risk Management Agency (PRMA) costs.

Finance is responsible for development and management of budget, fiscal reporting, accounting activities, payroll, investments and debt service management.

Administration functions included in the Internal Service Fund are information services, computer services including network and telecommunications, maintenance of Gateway facilities, mailroom, printing, photocopier and graphics.

The overhead charges for the functional overhead units are comprised of charges specifically attributable to support and management of that unit including executive management staff and administration.

#### Revenue

Charges for financial and administrative service functions are allocated to the MTA's services and projects. As part of the allocation, the service and project funds reimburse the MTA's overhead projects in the Internal Service Fund.

#### **Expenses**

Internal Service Fund expenses are primarily for salaries and fringes for financial and administrative functions. The significant FY01 expenses in professional and contractual services are facilities maintenance for Gateway, consulting services for strategic planning and special studies, and services to support hiring and employment activities and services to support internal skill enhancement/training activities.

## **Special Revenue Fund**

#### **Fund Narrative**

Special Revenue fund is used to account for the proceeds of specific revenue sources (other than expendable trust or for major Capital Projects) that are legally restricted to expenditure for specified purposes. The Special Revenue fund reflects MTA's responsibility to administer special transportation programs as well as its duty to allocate transportation funds to local and regional agencies throughout Los Angeles County.

#### Revenue

The primary sources of the Special Revenue fund are from Proposition A sales tax, Proposition C sales tax, Transportation Development Act (TDA) sales tax, State Transit Assistance (STA) sales tax, Service Authority for Freeway Emergencies (SAFE) and others.

#### **Expenses**

Laws and ordinances that created these funds designate the uses of MTA Special Revenue funds. Local projects and programs include funding through the Propositions A and C Local Return programs. This funding category also includes funds allocated through the TDA Article 3 and 8 programs for transit purposes and the Call-for-Projects (CFP).

Municipal operator programs include funding to the sixteen transit service providers throughout Los Angeles County. These funds are allocated through the Formula Allocation Procedure (FAP) based on service parameters. The ADA/Accessibility funding program includes funding for Access Service Inc. (ASI) and paratransit operators granted funding in the Proposition A Incentive program, which was established in the Proposition A implementation guidelines as 5% of the discretionary 40% of total Proposition A revenues. Incentive program expenditures are for services to help the elderly and disabled with community-based transportation services. Commuter Rail and Inter-city Rail programs fund the Southern California Regional Rail Authority's (SCRRA) Metrolink service for Los Angeles County and provides \$25,000 for Inter-city Rail support.

The CFP is a biennial process that allocates funds to regionally significant projects implemented by local jurisdictions, transit agencies and other public agencies. The CFP is a biennial process, occurring every other year. In July 1999, the Board of Directors approved \$568.6 million for the CFP.

Other local projects include subsidies awarded by the Board of Directors outside of the CFP process to the Immediate Needs program, Support for Homeless Re-Entry (SHORE) and General Relief.

## **Regional Programs**

### **Budget Assumptions**

The MTA provides funding directly to projects through grants of local funds or indirectly through allocating Federal or State grants. Local funds consist mainly of Proposition A and C funds which are directly disbursed by the MTA to agencies based on an approved spending plan. Federal and State grant funds are programmed or allocated by the MTA and disbursed directly by the granting agency or disbursed by MTA to the grantee, or recipient. The recipient agency is responsible for administering and managing the Federal or State grant.

This section summarizes the funds that the MTA programs to other local agencies. The FY01 budget for local funding commitments to the Call-for-Projects reflect current year cash-flow rather than programmed amounts, and include estimated expenditure of prior year commitments. Funding for all other local programs, including Municipal Operator programs, ASI, Proposition A Incentive, Local Return, Metrolink, and State and Federal funding programs reflect the FY01 programmed amounts.

# **Regional Programs Descriptions**

### **Municipal Operator Programs**

Municipal Operator Programs provide funds to the sixteen transit service providers in Los Angeles County. Operating funds are allocated based on formulas prescribed by State law and by the Board of Directors using performance metrics such as vehicle service miles, passenger revenues and fares. All eligible operators receive a proportionate share of applicable local, and state funds that are used as operating subsidies. These funds include STA, TDA and Proposition A Discretionary revenue. In addition, operators receive Proposition C 40% funds under 2 programs approved by the Board of Directors: Foothill Mitigation Program and the Fair Share Allocation. Proposition C Discretionary funds are allocated to the sixteen transit providers and the MTA to mitigate any adverse affect on total formula funding of Foothill Transit becoming an included operator.

The Bus Service Improvement Plan (BSIP), approved by the Board of Directors in 1996, provides supplemental funding to all Los Angeles County operators on a formula basis for the expansion of bus service. The FY01 budget provides the BSIP with \$10.4 million. Municipal operators will receive \$2.5 million and the balance will be allocated to MTA Metro Bus Operations.

The Transit Service Expansion (TSE) program provides funding to support specific services provided by the seven operators within Los Angeles County: Culver City; Foothill; Gardena; Long Beach; Los Angeles; Torrance; and Antelope Valley. The FY01 budget provides \$5.4 million.

The Base Bus Restructuring program provides funding for additional outside service in addition to base service provided by the following operators: Commerce, Foothill, Montebello, and Torrance. The FY01 budget provides \$2.8 million.

Proposition A and C Interest are allocated to the transit operators, if these funds are allocated to MTA to meet its bus operating service expenses.

## **ADA/Accessibility Funding Programs**

The MTA continues to lead the County to be fully compliant with the Federal Americans with Disabilities Act (ADA) by providing transit services to the disabled public. MTA contracts with the non-profit Access Services, Inc. (ASI) to provide regional transit services for the disabled public. ASI provides Los Angeles County's complementary paratransit system designed for people with disabilities who cannot ride the fixed route bus and rail system. In 1990, the Federal government mandated this specialized transportation service. The service is required to be complementary to the fixed route system, meaning the service must run at similar times as the fixed route system and must serve all areas within 3/4 mile on either side of a fixed route.

ASI is also the Consolidated Transportation Services Agency (CTSA) for Los Angeles County. As the CTSA, ASI fulfills a mandate from the State of California that each county have an agency working to improve transportation accessibility and to improve coordination among social service transportation and other public transportation service providers. The FY01 budget includes funding of \$43.5 million. ASI will be funded with RSTP and Proposition C 40% discretionary funds consistent with the FY01 Funding Plan.

ASI will be funded with RSTP and Proposition C 40% discretionary funds consistent with the FY01 Funding Plan.

### Paratransit Programs

The intent of the Proposition A Discretionary Incentive Program is to encourage coordination of paratransit systems and institute and effective service. The FY01 budget includes \$9 million in Proposition A Discretionary Incentive funds of which \$4.6 million is programmed for specific paratransit programs throughout Los Angeles County. Paratransit is a component of the public transportation network that typically uses smaller vehicles in a demand response mode. The service usually targets seniors and persons with disabilities, although many paratransit services are also available to the general public. Many of the eighty-nine cities in Los Angeles County operate their own paratransit systems, usually within the boundaries of one jurisdiction. A few of the jurisdictions provide service to neighboring cities or unincorporated portions of the County and some of these services are eligible for Proposition A Discretionary Incentive funds.

## **Local Projects and Programs**

### Proposition A and C Local Return

The Proposition A and C ordinances require that each of the eighty-nine cities of Los Angeles County receive a direct share, based on population, of the total Propositions A and C sales tax revenues to support transit needs and other transportation projects, known as "local return." Cities receive 25% of Proposition A receipts and 20% of Proposition C receipts. Funds are for paratransit and fixed route service, street and road maintenance and other transit related improvements. In FY01, cities will receive over \$218 million under the Local Return program.

### Transportation Improvement Project Call-for-Projects

The Transportation Improvement Project (TIP) Call-for-Projects is the MTA's biennial process for allocating funds to local agencies for transportation improvements of regional significance. After the MTA establishes funding estimates for each project category, local agencies are invited to submit project applications that compete for funding allocations. MTA staff evaluates the project applications and ranks the submittals in each category according to a scoring system adopted by the Board of Directors. Upon the Board of Directors' adoption of the multi-year funding program, the MTA secures written agreements with the successful project sponsors and allocates funding to the sponsors as agreed in the cash flow plan.

Eligible participants in the TIP Call-for-Projects include the cities in the County of Los Angeles, municipal operators, joint powers authorities, public agencies and, in some cases, private non-profit organizations. Multiple TIP Call-for-Projects cycles at the MTA have resulted in significant programming to non-MTA project sponsors for FY01.

### **Call for Projects Fund By Project Categories**

(Amounts in thousands)

	FY00 Budget	FY01
Project Descriptions	Adopted	Proposed
Freeway Projects (HOV, TSM and Gap Closures)	\$79,613	\$46,370
Regional Surface Transportation Improvements	24,223	19,270
Transit Capital and Enhancements	7,468	16,689
Local Traffic Systems Management	90,207	52,828
Regional Bikeways and Pedestrian Improvements	10,143	3,826
Transportation Demand Management	6,533	10,260
Totals	\$218,187	\$149,243

## <u>Transportation Development Act Bikeways/Transit/Streets & Highways</u> <u>Program</u>

Transportation Development Act (TDA) Article 3 funds are allocated to all cities and the unincorporated areas of the County by population basis. In FY01, \$5 million in TDA Article 3 funds and \$13 million in TDA Article 8 funds will be allocated. Article 8 funds are used for streets and highway projects.

# **Capital Fund**

### **Fund Narrative**

The Capital Fund includes the Rail Construction Program and the Capital Improvement Program (CIP). The Rail Construction Program incorporates the construction and acquisition of the light rail and heavy rail projects. The CIP is a comprehensive, Agency-wide five year (FY01-FY05) plan that adds and replaces capital assets that support the MTA Metro Bus and Rail Operations infrastructure. The CIP excludes the rail construction program.

The Capital Fund provides detailed justifications, cost estimates and implementation plans for capital projects, prioritizes projects and allocates funding, provides a balanced plan for capital improvement investments, improves internal control for project implementation.

### Revenue

The revenues for the Capital Fund are federal section 5307, 5308, 5309, CMAQ, State Transit Assistance, Regional Improvement Fund, TDA Article 4, SCAQMD/AB2766, Proposition A 35% Bonds, Prop C 25% Highway Bonds, Proposition C 25% Bonds, General Revenue Bonds, and Proposition C 40% Discretionary.

## **Expenses**

The Capital Fund expenses are primarily for direct expenditures and general/administrative costs associated with the light and heavy rail program, bus acquisitions, rail and bus facilities and other capital programs included in the CIP. The CIP was updated in September 1999 as each MTA sponsoring organization, reviewed and revised the FY00 CIP. Cost estimates and implementation plans were revised for all projects. The projects were justified, prioritized, and submitted to a CIP review committee. The committee, consisting of representatives from each sponsoring organization, established an Agency-wide priority ranking of all projects. The final list of prioritized projects and funding allocation for each project was reviewed by the Office of the CEO and was submitted as part of the FY01 budget.

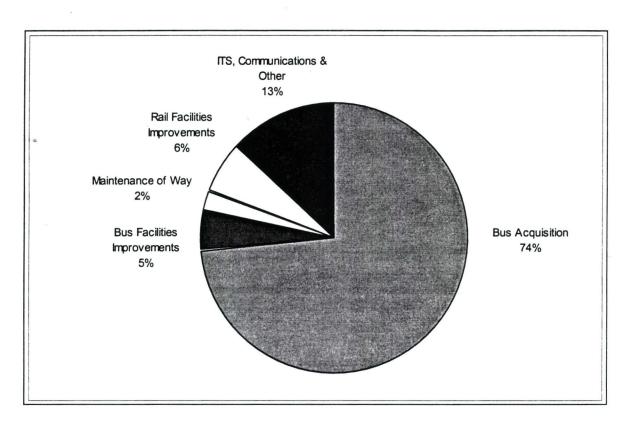

The first year of the FY01-05 CIP is incorporated into the FY01 budget. The Board of Directors authorization and approval is required to implement the capital projects outlined for FY01. The projects that require multiple years funding commitments are authorized to be implemented; however, funding is appropriated annually. Amendments to the CIP may be requested as needed as part of quarterly updates to the Board of Directors.

The total cost projection for the projects included in the FY01-FY05 CIP is \$974.9 million. The expenditures anticipated for the FY00 CIP year are forecasted to be \$49 million less than the value which was approved last fiscal year. This is due to changes in project scope and implementation delays. The budget for the FY01 CIP is \$327.4 million, which is \$35 million greater than that projected in the FY00 CIP. This is due to an acceleration of bus deliveries, increased CNG fueling facility requirements, as well as the carry forward of projects planned but not completed in FY00.

2-22 • Capital Fund Financials

## **Capital Improvement Plan by Program Element**

The Capital Improvement Plan (CIP) projects included in the FY01-05 Plan fall into five major program elements. The chart below presents a summary of CIP projects by program element. As shown, over 74 % of the adopted CIP funding is related to supporting bus acquisition.

### **Bus Acquisition:**

Bus Acquisition \$240,410,535

Bus acquisition projects include the manufacture of new buses in accordance with the Accelerated Bus Procurement Plan (ABPP) approved by the Board of Directors in October 22, 1998. The Accelerated Bus Procurement Plan project includes payments to bus manufacturers, procurement of spare parts, onsite inspection, bus make-ready. The upgrade and retrofit of buses with reliability and connectivity improvements (i.e. global positioning and automatic passenger counting) is also included. Implementation of this acquisition plan will establish a twelve year bus replacement schedule and bring the average fleet age to six years by 2008.

Financials Capital Fund • 2-23

Fiscal Year	ABPP	Other Deliveries
1998	237	0
1999	221	0
2000	418	0
2001	602*	26
2002	333	0
2003	200	0
2004	84	0
2005	. 0	200
Total FY01-05	2095	226

<sup>\*</sup> Includes 100 Clean Diesel buses leased for Contracted Services

In addition to the buses in the ABPP scheduled for delivery between FY01 and FY04, 226 additional buses will be ordered which are in excess of the ABPP. Also, included in bus acquisitions are the Universal Fare Collection System project and the Transit Radio System project approved by the Board of Directors on December 3, 1998.

#### **Bus Facilities Improvements:**

Bus Facilities Maintenance	\$16,117,222	_
bus racinities Maintenance	[\$10,117,222	

Bus facilities maintenance projects includes construction work at various bus divisions to install CNG fueling capacity to meet the influx of new CNG bus purchases; replacement, refurbishment, and expansion of building, vacuum systems, upgrades and shop floor resurfacing.

### Maintenance of Way:

Maintenance of Way	\$7,546,092

These projects encompass expansion of Divisions 11 and 22, and maintenance of buildings and equipment at MTA-operated rail facilities and stations. Specific projects include mandated upgrade of stations and operating facilities to comply with ADA, station and tunnel water mitigation, installation of gas analyzers, maintenance and refurbishment of facility equipment and systems (e.g. Sewage Ejector and Water Treatment Systems), and replacement of SCADA equipment.

2-24 • Capital Fund Financials

#### **Rail Facilities Improvements:**

		_
Rail Facilities Maintenance	\$20,653,888	

This element covers work related to preservation and upgrade of track, electric power systems, and signaling systems. Projects include mandated projects, such as grade crossing improvements (photo enforcement, retrofit of lighting, gates, and signage), transformer replacement, and improvement of bridge and tunnel inspection services. All adopted projects are vital to preserving the safety and reliability of Metro Blue, Green, and Red Line systems.

#### ITS, Communications & Other Capital Projects:

ITS,	Comn	nunicati	ons &	Othe	r \$42,691,752	
------	------	----------	-------	------	----------------	--

Information Technology and Systems projects support development of communications and information systems and replace obsolete computer equipment. Specific efforts include upgrade of Human Resources and Payroll Systems, the Financial Information System (FIS), the Customer Information System and PC applications. Other projects involve the division network construction and replacement of the Transit Operating and Trends System (TOTS), Maintenance and Material Management System (MMS), and obsolete PC workstations.

Other projects include continued maintenance of the Gateway Headquarters Building and projects that will complete tenant improvement projects and equipment procurement and installation. Non-revenue equipment includes replacements of the units used for operator relief/on-street supervision, procurement of various service trucks, and small purchases of equipment required for maintenance of the revenue fleet, non-revenue vehicle fleet and facilities. The following section presents all the CIP projects for FY01-FY05.

2-28 • Capital Fund Financials

### CIP Funding Capacity

The MTA's capacity to support the requested CIP projects depends on the availability of governmental grants, local matching funds, and financing alternatives. The five year CIP program cost of \$975 million is funded with Federal, State and Local funds already programmed by the Board of Directors. The CIP funding projection is consistent with the Financial Remediation Plan approved by the Board of Directors on December 3, 1998 as part of the Regional Transit Alternatives Analysis (RTAA). See Appendix 6 for funds available.

### **Rail Construction**

The following is the status of the projects included in the Rail Construction Program for FY01:

### Heavy Rail

- Metro Red Line Segment 1: The FY01 budget of \$976,000 includes costs associated with closing out punch list items with the City of Los Angeles, obtaining delivery of original train equipment, spare parts and other contract close-out items.
- Metro Red Line Segment 2: Metro Red Line Segment 2 includes two rail corridors: Wilshire Corridor and the Vermont-Hollywood Corridor. The Wilshire Corridor began revenue operations in July, 1996. The Vermont-Hollywood Corridor began revenue operations in June, 1999. The FY01 budget of \$58.6 million associated with contract close-outs, claim settlements, and litigation.
- Metro Red Line Segment 3 North Hollywood: The North Hollywood Extension will begin
  revenue operations in June 2000. The FY01 budget of \$119.9 million includes the widening
  completion of Lankershim Boulevard, completion of the US101 Freeway overcrossing, and
  Universal City Station site restoration. It also includes cost associated with contract close-outs,
  claim settlements, and litigation.
- Deferred Metro Red Line Segment 3 Eastside Extension: All design and construction activities for this project were suspended January 13, 1998 except the ongoing procurement of rail vehicles. The FY01 budget of \$6.6 million includes costs for the procurement and management of the rail passenger car contract (fourteen cars), property maintenance and a revolving fund to mitigate housing losses in the project area.
- System-wide Agency Costs: The FY01 budget includes costs of \$5.2 million for project management assistance on federally and locally funded projects, document and data review, policy and procedures review, procurement standards and contract administration review and monitoring; staff support to provide management with functional support, such as budget and schedule analysis and preparation, FIS interface, change control process, claim litigation support, and technical support and oversight are all included. The FY01 budget also includes costs for technical support to Procurement for General Engineering Consultant (GEC) solicitation, and Lessons Learned Program support, Engineering Management Consultant (EMC) contract close-outs, and Computer Aided Design and Drafting (CADD) and Graphic Information System implementation.

Financials Capital Fund • 2-29

### Light Rail

- Pasadena Blue Line: All construction activities by the MTA were suspended on January 13, 1998. The FY01 budget of \$9.2 million includes construction close-out costs including contract C6435 -13 Concrete/Steel Bridge Retrofit, and allowances for claims and settlements of disputes.
- Los Angeles/Long Beach Blue Line: The FY01 budget of \$1.2 million includes costs for resolution of legal claims with public and private agencies regarding underground utilities.
- Metro Green Line: The FY01 budget of \$13.9 million includes funding for the completion of the Maintenance-of-Way facility and associated system improvements; testing of the train control wayside equipment with carbon equipment; and outstanding Caltrans claims.
- Rail Car: The FY01 budget of \$43.6 million includes costs for the deliverance and acceptance of
  cars, payments for fabrication and testing milestones, consultant services, and administrative
  support.

### **General Fund**

### **Fund Narrative**

The General Fund is used to account for resources traditionally associated with government which are not required legally to be accounted for in another fund. The General Fund provides key management control and oversight functions, legal services, planning and development programs, and MTA communications with constituents and customers.

The Board of Directors acts as governing body and directs the use of resources for attainment of MTA goals. The Board of Directors provides overall policy, executive and financial direction to the MTA. Also included in the General Fund are administrative support functions of the Board of Directors and Board Research Services.

The General Fund includes management oversight functions. The Office of Inspector General is responsible for providing Agency oversight and conducting special analyses and investigations of MTA functions. Internal Audit is responsible for independently examining the MTA's operations and activities. Control Self-Assessment conducts analyses of the MTA's administrative functions. The Ethics Department conducts oversight of the MTA's code of ethics and policies. These reviews provide the Board of Directors and the Executive Leadership Team (ELT) with information to effectively direct the MTA.

Legal and litigation services are obtained from the County of Los Angeles. Office of County Counsel functions as the MTA's general counsel and serves as legal advisor to both the Board of Directors and staff.

The General Fund includes external affairs activities including Government Relations, Public Affairs, Media Relations, Marketing, and Customer Relations. Collectively, these departments are responsible for developing and maintaining relationships and building consensus with legislative bodies, government agencies, the media, and the public.

Planning activities provided in the General Fund include the updates of the Long Range Plan (LRP) and Regional Economic Model updates, liaison to the California Transportation Commission (CTC), ADA planning and compliance activities, analysis of policy scenarios, and National Transit database reporting.

### Revenue

The primary sources of revenue to the General Fund are Propositions A and C sales tax administration fees, Proposition C Discretionary funds, Transportation Development Act (TDA) sales tax administration fees, Federal, State, and Local grants and revenues generated for MTA property management services.

MTA allocates 5% of the ½ cents sales tax approved in 1980 by Los Angeles County voters for administration of Proposition A funds. MTA also allocates 1.5% of the ½ cents sales tax approved in 1990 by Los Angeles County voters for administration of Proposition C funds.

Financials General Fund • 2-35

In the General Fund, TDA funds are provided by the State of California for transit planning purposes. Revenues are derived from ¼ cent of the 7 ¼ cent retail sales tax collected state wide. The ¼ cent is returned by the State Board of Equalization to each county according to the amount of tax collected in that county.

MTA also collects rental and lease revenue on owned property and generates revenue from property management functions provided by the Real Estate department.

### **Expenses**

FY01 General Fund salaries and fringes expenses are for Board support functions, management oversight and regional activities. The major portion of the professional services budgeted are attributable to legal services, auditing, transportation studies and consulting services to support planning models.

### **Debt Fund**

### **Fund Narrative**

Our objective is to borrow at the lowest cost while minimizing risk and maintaining future flexibility for the financing program and other business matters of the MTA. Proceeds from debt issuance will be used primarily to fund its local contribution to major capital projects, including bus, rail and highway facilities, as well as acquisitions of buses, rail vehicles and real property.

Debt will only be issued in accordance with the MTA's Debt Policy, most recently updated and adopted by the Board of Directors in October 1999. The Debt Policy sets forth guidelines for the issuance and management of the MTA's debt, sets limitations on the amount of debt that may be incurred by the MTA from each funding source and specifies other factors to be considered and documented when issuing debt.

The MTA currently has about \$3.8 billion of outstanding obligations, as of June 30, 2000. The MTA has refunded more than \$2.6 billion of its long-term debt to achieve debt service savings. Those savings exceed \$135 million on a present value basis, and total even more on a gross basis.

#### Revenue

Annual revenues pledged to fund the payment of debt service consist primarily of local sales tax revenues from Propositions A and C. Other sources include federal/state/local grants, fare collections and other operating revenues.

### **Expenses**

During the year, it is planned that \$389.0 million of long-term bonds will be issued; of that amount approximately \$131.5 million will be applied to prior period expenditures. Commercial paper will also be issued to provide interim funding for FY01 expenditures prior to issuance of long-term bonds to provide permanent financing. This interim funding will then be refunded into one or more long-term bond issues later in the fiscal year. The planned par amount of long-term bond issuance to provide FY01 project funding is estimated at \$106.4 million for the Proposition A Sales Tax revenue bonds and \$282.6 million for Proposition C Sales Tax revenue bonds. These par amounts incorporate legal expenses and other costs associated with issuance of the bonds.

Of the five debt service funds contributing to payment of \$314.8 in FY01, \$274.5 million of that amount will be paid from the Debt Service Fund. The Debt Service Fund is made up of the Proposition A totaling \$163.5 million, Proposition C totaling \$111.6 million, and others totaling \$5.2 million. See MTA Debt Service Schedule for further detail.

### Debt Limitations/Use Restrictions

MTA carefully manages its plans to issue additional debt through the use of both the Capital Improvement Plan (CIP), a multi-year plan, and the annual budget. Revenues are allocated in accordance with the applicable ordinances, legislation and planning policies.

Financials Debt Fund • 2-39

Although the MTA's bonds are not subject to California constitutional debt limitations, the MTA has contractual covenants as part of its bond indentures that set bounds for additional issuance. Certain of these covenants restrict the percentage amount of specific revenue sources that may be used to service debt. These covenants provide protection to bondholders and limit the amount of additional bonds that may be issued. As a result, the MTA's senior lien sales tax bonds carry the relatively high credit ratings of A+ and AA- and are very well regarded by investors.

#### Foot Notes

- 1 Accrual basis. Reflects 7/1/01 principal payment.
- 2 For transactions existing since before 1999, Miscellaneous Fees are not secured from sales tax revenues and may therefore be budgeted to be paid from other available funding sources.
- 3 The FY01 financing combines FY00 and FY01 capital needs. No new money transactions were issued in FY00. Capital needs are \$55 million and \$51.4 million for Prop A and \$76.5 million and \$206.1 million for Prop C respectively for FY00 and FY01.
- 4 A portion of Prop A 40% Discr. is pledged to fund debt service for these bonds. The developer is expected to reimburse the MTA from net project revenues.
- 5 Assumes a beginning balances of \$314.010 million taken at 4 percent.
- 6 Assumes \$61.509 million balance @ 6.0%
- 7 The MTA has issued COP's to finance the acquisition of buses and/or facilities, for which it anticipates receiving reimbursement from the user as a sublease payment.
- 8 Only the miscellaneous fees are debt. OMB and Accounting have reprogrammed the P&I expenses to be a reduction of a liability -- which is not a debt expense. The P&I expenses are found in the section entitled "Reduction of a Liability."

<sup>9 -</sup> The RTD's Bus JLL's lease expense payment which is forwarded to the Trustee who then makes payment to the CTFC as holder of the bonds. The CTFC then forwards the payment to MTA.

<sup>10 -</sup> This payment is converted into Yen through existing Yen currency swaps with Sumitomo Bank Capital Markets and with Barclays Bank and is then wire transferred to the Japanese lessor.

<sup>11 -</sup> Only the interest expense is debt. OMB and Accounting have reprogrammed the principal expense to be a reduction of a liability -- which is not a debt expense. The principal expense is found in the section entitled "Reduction of a Liability."

<sup>12 -</sup> The Benefit Assessment District debt service is solely an obligation of the respective districts and is paid from assessments received through the County Assessor's Office.

<sup>13 -</sup> OMB and Accounting have reprogrammed the principal and interest of this transaction to overhead administrative costs. Miscellaneous fees have remained in the D/S Fund.

# **Summary Description**

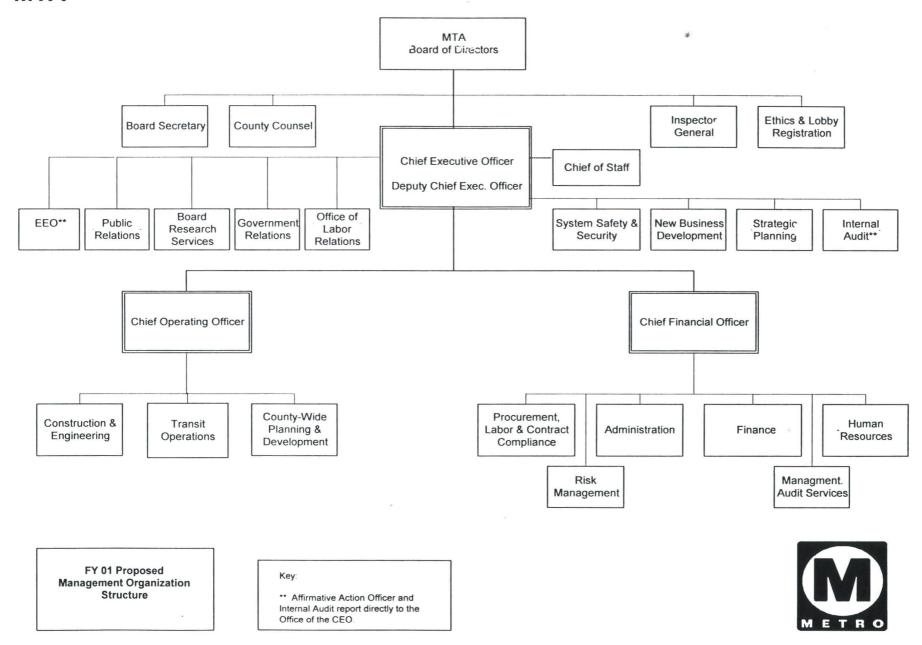

The Balanced Scorecard management approach was initiated by the MTA for the FY01 strategic business planning process. Balanced Scorecard initiatives build on areas of quality management, strategic planning and performance measurement. The balanced scorecard model focuses the organization on achieving strategic results in terms of four perspectives; customers/constituents, internal process, innovation (skill and knowledge improvements), and resource management (financial costs). Strategic planning elements and performance measures related to each perspective drove the development of the MTA's mission, vision and goals.

The first step to implementing the Balanced Scorecard approach was to align and focus the organization on the overall mission, vision and goals. The organizational structure was realigned into Strategic Business Units which are the core business and support functions of the MTA. The four major SBUs are Transit Operations, Countywide Planning and Developing, Engineering and Construction and Support Services.

The second step in the process was to identify the related key change initiatives required to realize the strategy and mobilize the organization. An Executive Leadership Team (ELT), which consists of the leaders of the four SBUs, the Chief Executive Officer, the Chief Operating Officer and the County Counsel, was convened to define the MTA's strategic priorities. The priorities were communicated to the SBU teams and subsequently each unit formulated major objectives that are integrated with the MTA's overall mission and vision. The collaborative process developed unit-level objectives that are linked. All unit level goals are focused on continued process and efficiency improvements at the MTA.

The final step is to create feedback at all levels of the organization to evaluate progress against strategy, monitor and manage issues and priorities, and measure performance and contribution to the MTA mission vision and goals. Each department is responsible for aligning strategic goals to their management action plans. This will lead to a integration of budgeting and strategic planning. Departments will define what resources are necessary for their work processes to contribute to the attainment of the MTA's overall goals.

## **Transit Operations**

## **Organization Chart**

## **Strategic Business Unit Description**

Transit Operations manages all aspects of MTA Metro Bus and Metro Rail operations and related activities. Transit Operations provides clean, safe, efficient and reliable transit services to more than 1.2 million patrons per day, covering Los Angeles County's 2,200 square miles. During FY01, Transit Operations will operate over seven million bus revenue service hours, and over 500 thousand rail revenue service hours.

## **Transit Operations Objectives**

OBJECTIVES	<ul> <li>Reduce operating subsidy to achieve blended bus and rail targets by FY03</li> <li>Increase gross revenue per revenue (vehicle) service hour to align with bus and rail targets by FY03</li> <li>Achieve performance and quality targets in the areas of reliability, timeliness, cleanliness and safety by FY03</li> </ul>
	announces, eveniminess and surery by 1 1 05

## FY01 Highlights:

- 3.4% bus service increase with a reduction of 7.1% cost per hour.
- Addition of 49 FTEs to support the opening of Division 22 (Metro Green Line Transportation and Maintenance-of-Way (MOW)
- 65 additional FTEs due to an increase in the operator to assignment ratio from 1.16 to 1.18 to meet service demands and lower cost
- \$1.4 million increase to elevator/escalator maintenance cost
- \$6.0 million capital bus acquisition budgeted for purchased transportation equipment supplied by contractors
- Increase of seventeen Maintenance Specialists and two Maintenance Specialist Leaders to support the Heavy and Light Rail vehicle expansion
- Additional Operators, five Service Attendants and three Mechanics to support Metro Rapid Bus

# Countywide Planning & Development (CP&D)

## **Organization Chart**

## **Strategic Business Unit**

Countywide Planning and Development (CP&D) Strategic Business Unit is responsible for programming and administering federal, state and local transportation funds, preparing a financially constrained Transportation Improvement Plan (TIP), and planning and coordinating regional transportation services and infrastructure improvements among eighty-nine cities, County of Los Angeles, Caltrans, and the seventeen municipal operator/included operators, as well as planning, implementing and monitoring MTA bus and rail service delivery.

Countywide Planning & Development is organized functionally with resources assigned to support multi-modal transportation segments. Component departments in the SBU include Operations Planning and Systems Analysis, Capital Development and Programming, Transportation Planning Integration, and Transportation Development & Implementation.

Countywide Planning & Development assumed responsibility for managing the MTA's auxiliary units, Service Authority for Freeway Emergencies (SAFE), Freeway Service Patrol/Major Incident Response (FSP/MIR) and coordinating with the SAFE program office. Commencing in FY01, the Metro Art program will be aligned to CP&D. Metro Art plans, directs, and implements all aspects of the MTA's public art policy. It seeks to increase the awareness of quality art design and enhance the public transit experience on Metro Rail, Metro Bus and Metrolink.

## **Countywide Planning and Development Objectives**

<b>OBJECTIVES</b>	Complete 90% of all CFP and CP&D internal projects on schedule, on			
	budget and meeting mobility goals as measured by adopted project			
	objectives and consistent with funding requirements on an annual basis by			
	FY01			
	Secure federal, state, and local discretionary appropriations that achieve			
	annualized targets			
	Complete a viable consolidated countywide LRTP specifying planned levels			
	of mobility and effective multi-modal resource allocation by FY03			
	Improve customer awareness and satisfaction by geography and mode by			
	10% over FY00 baseline in identified customer/market segments by FY03			

## **Unit Description**

- The Executive Officer directs the overall programs of MTA's multi-modal planning & programming services, develop strategies, defines major priorities and resolution to critical transportation issues.
- Operations Planning and Scheduling Administration provides direction and support to the Scheduling, Service Planning, and Transportation Analysis/Technical Support sections. This unit is also responsible for ensuring that the activities of the three sections are coordinated with each other as well as with the rest of the Agency. The Deputy Executive Officer of this unit is designated the Consent Decree Compliance Officer responsible for meeting the requirements of the Consent Decree. This unit is also responsible for LADOT memorandum of Understanding implementation.
- The Countywide Planning Development Department provides technical assistance to other MTA functions and to municipalities (travel demand modeling, transportation demand management, library); and coordinates with other agencies in the development and implementation of transportation plans, programs and improvements (CMP, highway planning). Countywide Planning has the lead role in strategic planning for countywide transportation issues and represents the MTA in regional and state forums in the development and analysis of transportation policies and programs
- Transportation Development and Implementation Department is responsible for project management across all modes, including Highway/Freeway, Transit Planning, TDM, Rail Planning, Signal Synchronization, Intelligent Transportation Systems, and other multimodal planning efforts; approves and monitors the utilization of funds by the cities and transit operators; conducts joint development activities; is the MTA liaison to the cities on Proposition A and C Local Return and Discretionary funds, TDA Article 3 and 8; serves as the project planning lead in the Long Range Plan and Call-for-Projects.
- The Capital Development and Programming Department (CD&P) is responsible for strategic capital planning, regional programming, and grants management and administration for all fund sources that support the MTA's mission of improving mobility and promoting innovative and comprehensive transportation systems throughout Los Angeles County. CD&P also programs the Call-for-Projects, analyzes state, federal, and local programming proposals and policies, allocates the local and municipal operator funding as well as provides policy development for regional planning, local programs and organizational directions.

## **Major Budget Variances**

Description	FY00	FY01	Variance	Percent Change
Call	24.9	16.9	-8	-32.13%
Grant	13	28.1	15.1	116.15%
Capital	16.3	36.3	20	122.70%
Consent Decree	16.9	0.6	-16.3	-96.45%
FSP/SAFE	34.5	30	-4.5	-13.04%
BAD	0.4	0.5	0.1	25.00%
Operating	23.3	21.2	-2.1	-9.01%
Total Budget	129.3	133.6	4.3	3.33%

## **Operating Budget Variances**

- Capital Planning & Development's budget has increased in the area of Call and Grant-funded projects. Major growth in this category include: Three Corridor Studies for Mid-City, Eastside and San Fernando Valley, Rideshare 2000/Club Metro, Welfare to Work Transportation Plan, Long Range Plan (LRP) update, Survey Planning/ Market Research Programs (SPMRP) and Joint Development activities.
- Purchased transportation related to consent decree services and the service monitoring and scheduling department has been realigned the Transit Operations in FY01 budget.

## **Capital Budget Variance**

• Capital projects include the implementation of the regional Universal Fare System (UFS) and the Metro Rapid Bus demonstration.

## **Regional Programs Variance**

• The FY01 budget for local funding commitments to the Call-for-Projects reflect current year cash flow, rather than programmed amounts, and includes estimated expenditure of prior year commitments; thus resulting in a \$68.9M decrease from FY00 to FY01.

# **Engineering & Construction**

## **Organization Chart**

## Strategic Business Unit

Engineering and Construction is responsible for providing the engineering services and construction oversight for large rail projects and over 125 Capital Improvement Program (CIP) projects. FY01 budget totals \$306.5 million, an eleven percent reduction from the FY00 budget. Engineering and Construction is responsible for providing engineering and construction oversight to four major rail projects totaling \$236 million; nine minor rail projects totaling \$28.2 million; and bus/rail CIP projects totaling \$42.3 million. In light of the April 6, 2000, State commitment to fund light rail, we will also focus on planning for implementation of the newly funded rail start up projects. Motivated by our vision and the desire to perform engineering work more economically and with greater control, Engineering and Construction has shifted from its oversight role with consultants to that of a self performing, technically proficient organization. The Engineering and Construction expects to see continued strides during FY01 in maximizing productivity and the quality of finished products.

## **Engineering & Construction Objectives**

# Achieve 95% on-time and on-budget delivery of engineering and construction services Achieve targeted close out of all construction projects within six months of contract conclusion within the original fixed project budget by FY03 Prepare lifecycle cost reduction options in conformity with project classification targets Achieve a 0% budget variance for all community mitigation by FY03

## **Unit Description**

To facilitate the efficient and effective management of the projects and programs, Engineering and Construction is comprised of eight cost departments as follows:

• Public Affairs is responsible for representing and building support for MTA plans, projects, construction, operation activities with the community, elected officials, businesses, and the general public.

- The Executive Office for Engineering and Construction is responsible for managing division and cost center activities in support of the MTA in addition to providing technical and administrative guidance and assistance.
- Quality Management/Assurance is responsible for the implementation of administrative and control
  measures during design, procurement, construction, installation, testing, start-up, and turnover that
  assure the transit system meets the expectations of ultimate customers.
- Engineering is responsible for the cost-effective provision of design and other engineering professional services from preliminary engineering through final design and construction of bus and rail projects. These projects range from minor updates to bus facilities to design of major projects.
- Project Engineering is responsible for providing engineering support staff for each of the projects.
- The Construction unit is responsible for the management and oversight for all rail construction related activities and construction related capital improvement projects.
- Environmental Services is responsible for providing the appropriate plan, labor and equipment to
  mitigate contamination impacts; to maintain compliance with all environmental regulations
  pertaining to hazardous wastes and materials; to monitor environmental contractors working on
  projects; and to provide regulatory interface to resolve MTA concerns and address MTA
  requirements imposed on projects.
- Environmental Compliance provides environmental clearance for MTA projects and ensures
  compliance with the provisions of federal, state and local laws, regulations and guidelines related to
  impacts of the projects on the environment and on cultural resources. In addition, the section
  monitors and updates mitigation measures status reports for the projects.
- The MTA Construction Contracts Department is responsible for directing contract administration in the engineering and construction of MTA capital projects in procurement, purchasing, construction and professional services contracts consistent with MTA policies and procedures. Directs the overall process of quality control and general management of contract operations.
- Program Management is responsible for monitoring the impact on the financial resources of the MTA's developing and consolidated project financial status data into short range and long range cash management and strategic planning tools, evaluating and coordinating all program and project schedules and cost controls; forecasting and reporting all activities for rail transit projects and related Capital Improvement Projects; provide timely and accurate change status data, assume in-house responsibility for design change control, process bid packages, drawings and contract document changes.

## **Major Budget Variances**

With the arrival of revenue service for the North Hollywood Extension of the Metro Red Line on June 24, 2000, Engineering and Construction can begin a reduction in staffing from the FY00 approved levels. Eleven positions will be eliminated in FY01. This reflects the evolution of priorities from primarily constructing a rail system to the administrative close-out of contract change orders and resolving contractor claims. At the same time, the requested staffing level reflects the on-going demands of an agency-wide capital improvement program. This expanded role also includes the assumption of engineering activities previously performed by consultants. The unification of all MTA

engineering responsibilities within the Engineering and Construction will improve accountability and control as well as reduce costs.

The project budgets total \$306.5 million for FY01 as follows:

- Metro Red Line Segment 2: The FY01 budget totals \$58.6 million which includes costs for completion of all remaining contract close-outs, claim settlements, and litigation. Metro Red Line Segment 2 includes two rail corridors: the Wilshire Corridor and the Vermont-Hollywood Corridor. The Wilshire Corridor began Revenue Operations July 1996. The Vermont-Hollywood Corridor began revenue operations June 1999.
- Metro Red Line Segment 3, North Hollywood: The FY01 budget for North Hollywood Extension totals \$119.9 million and is based on a Revenue Operation date of June 2000. The project activity includes receiving the certificate of occupancy, completing US-101 freeway overcrossing and Universal City Station site restoration; and completing Lankershim bridge widening and Lankershim Boulevard restoration.
- Metro Green Line: The FY01 budget totals \$13.9 million and includes funding for the completion of the Automatic Train Control System; costs relating to testing and startup of the vehicles; testing of the train control wayside equipment with carbine equipment; Caltrans outstanding claims and the continuing construction of the Maintenance-of-Way facility.
- Metro Blue Line Transit Enhancements: The FY01 budget totals \$5 million and includes funding
  for the design and construction of station platforms to accommodate three-car consist for nineteen
  Metro Blue Line stations. Work at each station includes platform extensions, lighting and PA
  systems, signal modifications, emergency and handicap access, pedestrian walkways, landscaping
  and utility relocation.
- Minor Rail Capital Improvements: The FY01 budget totals \$28.3 million and includes funding for
  on-going minor rail projects such as the Metro Blue Line punch list and claims, the Metro Blue Line
  corrosion control studies and construction, the Imperial Highway punch list, Pasadena Engineering
  Management Consultant (EMC) claims mitigation, the Metro Red Line Eastside house mitigation
  program, and Deferred Metro Red Line Projects environmental mitigation.
- Capital Improvement Plan (CIP):
  - Rail: The FY01 budget includes \$24.2 million for Engineering and Construction technical support to Procurement for GEC solicitation, the Lessons Learned Program support, Engineering Management Consultant contract close-outs, the CADD ad Graphic Information System implementation, radio retrofit, environmental mitigation, and tunnel grouting.
  - **Bus:** The FY01 budget includes \$18.1 million for various projects requiring Engineering and Construction support to maintain and upgrade Operation Facilities such as re-roofing, lighting, tank replacement, leak detection, pavement replacement, CNG compressors and ADA compliance requirements.

## **Support Services**

## **Organization Chart**

## **Strategic Business Unit**

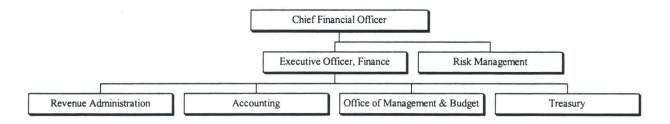

The Support Services business unit was created as a centralized functional organization, whose mission is to provide timely services in support the MTA organization team. Support Services is comprised of departments and resources that serve all operating units. As an internal supplier of services and resources, Support Services' strategic objectives and performance drivers are integral to supporting cross-business initiatives for improved efficiencies in Transit Operations, Planning and Construction. This strategic business unit's primary focus is to improve internal business processes. Support Services is responsible for implementing customer-focused objectives that reduce cycle time by alleviating non-value added activities. These service departments provide key cross-business and fundamental processes to support the core business units. This cross-functional team will develop and implement business plans that yield problem-solving processes for management control and improved efficiencies throughout the organization.

## Support Services Objectives

<b>OBJECTIVES</b>	Improve access to timely and accurate mission critical management
	information for key customers by FY02
	Identify and map core processes with a 20% target improvement in cycle
	time with no additional net cost or performance degradation by December
	31, 2001
4	Achieve 20% improvement in customer satisfaction levels by FY02

# **Support Services - Finance**

## **Organization Chart**

Finance is responsible for managing MTA's fiscal affairs. It consists of the following functions:

- Office of the Chief Financial Officer, along with the Executive Office-Finance, oversees Accounting, Office of Management and Budget, Treasury, Revenue, and Risk Management departments and provides support for the MTA's operating and capital plans.
- Accounting records all assets and liabilities, prepares monthly/quarterly financial statements; pays bi-weekly payroll; manages accounts payable and receivables.
- Treasury forecasts, monitors and manages cash requirements; oversees and directs the investment of available funds and debt proceeds; and administers Debt program.
- Office of Management & Budget develops the annual operating, capital and subsidy budgets; prepares monthly/quarterly revenue and expense projections; manages operating and capital expenditure and revenue plans; and conducts special studies to analyze and improve the MTA's operations.
- Risk Management is responsible for protecting the MTA's assets through the identification, management and control of insurable risks. Responsibilities include management and oversight of the following: the Owner-Controlled Insurance Program (OCIP) for construction activities, worker's compensation programs, Public Liability/Property Damage (PL/PD) programs including litigation, the identification, purchase and management of appropriate insurance programs, oversight of self-insured liability reserves through risk financing techniques and recovery of insurance proceeds for damage to the MTA's property.
- Revenue collects, counts, and deposits fare revenue; maintains and replaces fare collection equipment; stores, maintains and provides security for the fare media inventory; manages the vendor sales program and collects delinquent accounts receivable.

## **Major Budget Variances**

- Accounting is adding one FTE in the Payroll section to improve customer service to the Transportation unit of Operations
- Revenue Administration is adding one FTE to supervise the Revenue Compliance Unit

- Executive Office, Finance was reorganized creating separate departments for the Office of the CFO
  and Strategic Planning & Analysis. As part of the agency reorganization, Strategic Planning and
  Analysis department was transferred to Office of CEO
- An increase of \$10M in Workers' Compensation premium for FY01 is based on Risk Management's
  forecast of Traveler's insurance policy maximum retro premium and incurred loss estimates, and
  growth increase in payroll
- The Transitional Duty program increased from \$3.2M in FY00 to \$3.7M in FY01. The increase reflects the full implementation of the program in Metro bus and rail divisions and support cost centers for FY01. The objective of this program is to reduce Workers' Compensation claim expenses
- Property premium decreased from \$3.9M to \$3.4M due to reassessment of covered assets.

# **Support Services - Management Audit Service Department**

# **Organization Chart**

# **Management Audit Services Department**

Management Audit Services Department (MASD) is responsible for supporting the MTA and management and assisting in the resolution of issues related to CEO hotline calls, OIG, FTA, and PMOC reports.

- Internal Audit reviews internal controls, verify compliance with laws and regulations, determine whether assets are safeguarded, review the accuracy and timeliness of financial reports.
- Contract Audit conducts construction and professional service contract audits according to legislature AB1869 and FTA required interim and close-out audits.
- Project Audit performs required Call-for-Projects close-out audits and administers the mandated Consolidated Audit.
- Contractor Pre-Qualification function implements the audit requirements of California Assembly Bill 1869.
- COSO/CSA assesses MTA work processes and procedures. It recommends and establishes internal controls to improve processes throughout MTA.
- Audit Resolution and Recovery reports and track and issue monthly reports on recoveries and recommendations which have been implemented, proposed and scheduled.

# **Major Budget Variances**

- MASD has increased services by \$2.4 million much of the increase is for CPA services for close-out audits of contracts with Engineering Management Consultant (EMC), Parson-Dillingham, Fluor-Daniels, Call-For-Projects awards and Red Line Segments 2 and 3.
- MASD has not increased its staff from the FY00 approved level of 72 FTEs.

# **Support Services - Administration**

# **Organization Chart**

Administration is responsible for providing support services to MTA departments and, in certain respects, to our public. It consists of the following functions:

- General Services provides facility and administrative services, including building management and maintenance, records management and mail, graphic design and printing services
- Real Estate provides real estate appraisal, relocation and management services, environmental investigations, lease and property management and disposition strategies
- Marketing creates informational materials and programs that help customers understand MTA services
- Customer Relations handles customer requests for information and all other customer communications received via telephone, written correspondence, e-mail, and in-person
- Information & Technology Services (ITS) is responsible for the development, operation, maintenance and technical support of MTA's integrated communications network and data processing systems
- The Information Services Department (ISD) is responsible for the development, maintenance and technical support of computer programs which serve the entire agency

# **Major Budget Variances**

Administration's FY01 budget of \$80.2 million is down \$6.0 million from the previous year's budget. This primarily reflects the successful completion of Y2K systems remediation, partially offset by continuing development and implementation of technological improvements to increase the MTA's efficiency, and by the Santa Monica Transit Parkway Project. The staff increase of ten positions (nine new positions and one transfer in from Transit Operations) is required to support technology development and support in the Information Services and Information Technology departments. The following highlights major variances by department within Administration.

• General Services' budget of \$12.8 million is down \$2.9 million versus the FY00 budget. This primarily reflects a year-over-year reduction in the budget for capital projects. In addition, the prior year included a reserve for a legal claim. There is no change in the department's staffing level from FY00.

- Real Estate's budget is increasing \$4.0 million to \$14.9 million. Real estate acquisition and relocation services to be provided under contract to the City of Los Angeles for the Santa Monica Transit Parkway Project offsets decreases in the capital projects. There is no change in the department's staffing level from FY00.
- Marketing & Customer Relations budget of \$8.7 million is down approximately \$0.5 million.
   Completion of North Hollywood activities slightly offsets increases in other projects, such as the Metro Rapid Bus. In addition, the budget is down due to the completion of the customer complaint system capital project in the prior year. There is no change in the department's staffing level from FY00.
- Information & Technology Services budget of \$28.3 million is down \$0.8 million from FY00,
  primarily the result of budget reductions for maintenance and technical support services. Staff level
  is increasing by three FTEs, (two new positions and one transfer in from Information Services). The
  new positions support capital projects and provide additional supervision at ITS' technical support
  shops.
- Information Services budget is down \$5.7 million to \$15.1 million. Budget reductions due to the completion of Y2K activities are partially offset by increased activity in continuing projects or new projects, such as: developing the Maintenance and Materiel Management System and the Document Processing and Management System, modernizing the Customer Information System, and integrating the Human Resources / Payroll Systems. To support the technology development, the staff level increases by seven FTEs. In addition one position is transferring into Information Services from Transit Operations and one position is transferring out to Information & Technology Services.

# **Support Services - Procurement**

# **Organization Chart**

### Office of Procurement

The Office of Procurement is organized into four departments: Materiel, Contracts, Contract Support, and the Executive Office of Procurement. The Office of Procurement is responsible for materiel management; storage; distribution; issuance of goods; and the execution of purchase orders, contracts, modifications, and supplemental agreements. It also directs and oversees bids, contract analysis, preparation of awards, contract administration, negotiations of contract changes, and ensures compliance with contractual terms and conditions.

# **Major Budget Variances**

The Office of Procurement's organizational changes are included in the FY01 budget. Currently, the Office of Procurement is organized into four departments: Materiel, Contracts, Contracts Support and the Executive Office of Procurement. Acquisition Warranty function was transferred to Transit Operations in FY00 due to organization realignment of functions. Total FTEs increased by twenty-five FTEs in FY01, from 297 to 322.

- Materiel Department increased by eleven FTEs. This reflects increased support for purchasing activities to buy parts for new buses, acquisition and installation of the new maintenance material management system, receipt of P2000 Car materials, Maintenance-of-Way Projects, 3<sup>rd</sup> shift storeroom support at Division 6, and storeroom personnel to support the opening of Division 22 Rail Equipment Maintenance
- The additional fourteen FTEs increase are spread throughout other Procurement functions, Executive
  Office of Procurement, Contracts, and Contract Support Department. Seven of these FTEs are
  contract administrators positions, currently employed as temporary staff through a professional
  services contract, that will be converted to temporary regular employees status
- Acquisitions and Services decreased by \$5.2 million. \$4.2 million of the reduction is for inventory management capital projects in Logistics which were completed in FY00; \$1 million reduction in Professional Services for reorganization costs for the conversion of seven professional contract staff to temporary regular FTEs
- Material & Supplies decreased by \$260K: \$140K of the reduction results from the reconciliation of the differences between the general ledger/Material Management System inventory costing methodology; other changes include \$85K reduction in freight expenses and \$27K reduction in office supplies

# **Support Services - Human Resources**

# **Organization Chart**

### **Human Resources**

- Human Resources (HR) is responsible for providing overall guidance on human resource matters. It
  includes the Executive Office, Administration, Employee Activities, Special Programs, Pension and
  Benefits and Personnel Support Unit.
- Personnel recruits and selects all staff and administers the classification and compensation issues for non-contract employees.
- Human Resources Development provides staff with training and development programs including core business skills and updated policies and procedures
- Employee Relations administers grievances and dispute resolution for non-represented employees
- Equal Employment Opportunity (EEO) provides training on EEO policies and practices and investigates discrimination and complaints
- Non-departmental manages and administers all fringe benefits

# **Major Budget Variances**

- Employee Relations responsibility was revised to only handle disputes and grievances for noncontract employees only. Employee Relations transferred eight FTEs to move Labor Relations function to the Office of the CEO. One new position was created to manage the separate Employee Relations function
- Personnel is adding one FTE to assist in the recruitment of bus operators and all Operation positions, and one FTE to facilitate the task of salary equity reviews by Classification & Compensation. In addition, one FTE was transferred from HR-Administration to Personnel.
- Career Development and Human Resources Training functions were consolidated. There was no net increase in headcount
- Non-Departmental Human Resources is adding \$6.1 million to Post-Retirement Medical Insurance in order to comply with the Financial Accounting Standard Board's Rule No. 87 that requires employers to charge all retiree medical costs to post retiree medical accounts

# **Organization Chart**

### **Board/CEO/Other Narrative**

Board Administration/Office of Chief Executive Officer/Other Reporting units has overall management responsibility for the MTA. This unit includes key functional departments that provide support and administer policies of the Board of Directors and CEO.

The Office of CEO (OCEO) is responsible for planning, formulating and implementing the MTA's long and short-term business strategies and objectives. OCEO has responsibility for ensuring that MTA's policies are implemented and that processes are integrated to achieve an efficient and effective organization. OCEO directs the implementation of strategies and monitors the results in conjunction with the Strategic Business Unit Executives.

Other departments in this unit support the enterprise-wide objectives of the MTA. Included in this unit are Government Relations, Labor Relations, Board Research Services, Ethics, Media Relations and The Office of Safety and Security. These units provide linkages to internal and external customers including our business partners, the unions and community stakeholders. This cross-functional team is chartered with supporting policies to improve the efficiency and effectiveness of the transportation system.

This unit also includes Office of Safety and Security, whose role is to protect and support the safety of the public, transit riders, employees and MTA assets.

### **Board Office and Office of Board Secretary**

#### Board Office And Office of Board Secretary Narrative

The Board of Directors budget includes expenditures for the directors' activities on behalf of the MTA. The Office of Board Secretary is responsible for the Board meeting process including agendas, minutes, resolutions, and scheduling. It includes the Legal Services Department, which is responsible for the acceptance and processing of all legal documents served on the MTA and its employees.

#### **Major Budget Variances**

- The Board Office increased FY99 actual expenditures for professional services by \$1.307 million to
  pay for the Yaroslavsky special Sales Tax Los Angeles County Election (passed at June 1999 Board
  meeting) to stop use of Proposition A and C sales tax revenue for future rail construction. Board
  Contingency Funds were transferred to the Board Office budget to reimburse Los Angeles County
  for election costs
- Staffing for the Office of Board Secretary remains stable at nine FTEs or nine positions
- The non-labor budget for the Board Office and the Office of the Board Secretary will increase about \$34K in FY01: the photocopies budget is forecasted to increase about \$26K, based on actual historical usage; the remainder of the increase about \$8K is spread in materials and supplies and miscellaneous expenditure accounts.

#### **Ethics Office**

#### **Ethics Office Narrative**

The Ethics Office advises the Board of Directors, executive management, and staff on ethical, financial disclosure and conflict of interest issues. It also researches state laws and regulation governing campaign contributions, fund raising activities, conflicts of interest and lobby regulations.

#### Major Budget Variances

- Staffing for the Ethics Department remains stable at six positions
- The Ethics Office realized cost efficiencies due to new technology that reduce paper dependencies.
   The Ethics Office implemented on-line registration and quarterly reporting for lobbyists which has significantly reduced paper volume and improved management of information
- In FY01, the Ethics Office increased their budget compared to FY00 about \$35K for non-labor expenditures due to: a \$14K increase in travel, seminars, training and memberships; and a \$21K increase in Professional and Technical Services that reflects higher charges for photocopying, printing and graphics for informational materials and program brochures.

### **County Counsel**

#### **County Counsel Narrative**

As General Counsel to the MTA, Office of the County Counsel's mission is to provide timely and effective legal representation, advice, and counsel of the highest professional caliber to the MTA.

County Counsel attorneys attend Board and committee meetings, and provide advice on issues of governmental law such as the Brown Act, procurement law, eminent domain, Public Records Act, conflict of interest laws, and Federal and State laws relating to transportation. Additionally, the County Counsel provides advice and representation on construction matters, employee relations and personnel matters, drafts and reviews contracts, represents the MTA in litigation and arbitration, coordinates, administers, and oversees legal services provided by outside law firms.

#### Major Budget Variances

County Counsel decreased budget in both Non-Departmental and in legal cost centers.

- The decrease in the Non-Departmental Legal cost center is due to reduced contingency for construction litigation and a decrease for unplanned lawsuits and other unanticipated legal services
- The decrease in the Legal cost center is due to an expectation that a number of large cases will be resolved in the early part of FY01

### Office of the Inspector General

#### Office of the Inspector General Narrative

The mission of the Office of Inspector General is to preserve and enhance on behalf of the MTA Board, the integrity, efficiency, effectiveness, safety and quality of the services provided by the MTA by conducting independent investigations, audits, and inspection analyses in a professional, constructive and cost-effective manner; to provide law enforcement officials with information and evidence regarding possible criminal activities; and to assist the MTA with timely recommendations to improve operations and performance.

# Major Budget Variances

- FTEs remain stable at forty-two positions both in FY00 budget and in the FY01 budget
- The OIG FY01 budget represents a reduction of \$176K in non-labor accounts compared to the FY00 budget. The OIG has cut non-labor expenditures by \$265K offset by a Workers' Compensation charge back of \$89K

#### Office of the Chief Executive Officer

#### Office of the CEO Narrative

The Office of the Chief Executive Officer (OCEO) includes the CEO and senior officers to whom he specifically delegates certain of his responsibility and authority. These include the Deputy CEO/Chief Operating Officer, who is responsible for oversight of day-to-day operations and a Chief of Staff who coordinates his schedule and workflow. The OCEO also includes the New Business Department, which manages programs requiring entrepreneurial leadership. The Strategic Planning and Analysis department, which analyses organization alternatives and measures success in achieving goals and objectives, is also part of the OCEO. The following additional departments also are part of the OCEO: Labor Relations, Government Relations, Board Research Services and Public Relations. Internal Audit and EEO have a matrixed relationship directly to the CEO, but are budgeted elsewhere.

#### **Major Budget Variances**

- Two new positions were added to the New Business Development department to support expanded
  activities and this department increased responsibilities for Consent Decree quarterly reports, fleet
  management planning and other special projects.
- The budget for Professional and Technical Services increased to cover potential consulting and other special services.

#### **Labor Relations**

#### Labor Relations Narrative

Labor Relations is responsible for interpreting and administering MTA's collective bargaining agreements. Labor Relations was reorganized during the mid-year process to handle all negotiations, grievances and dispute resolutions with MTA's represented employees.

### Major Budget Variances

- Labor Relations and Employee Relations functions were reorganized into separate units in mid-year. Staff from Operations, Labor Relations, and eight FTEs were transferred from Employee Relations
- Two additional FTEs are being requested to support AFSCME bargaining unit and arbitration
- Increase in professional and contract services will be used to fund labor negotiations and support activities

### Office of System Safety & Security

#### Office of System Safety & Security Narrative

Office of Safety & Security is responsible for system safety and security programs and are focused on enhanced management and employee accountability for safety, specialized training, improved accident analyses and employee recognition. The department's four major sections are:

- Operations Safety is responsible for Metro Rail, Metro Bus and facility safety programs
- Construction/Systems Safety handles Metro construction safety oversight, capital project safety oversight, CPUC self-certification program and the Metro Blue Line Grade crossing safety program
- Occupational Health & Safety encompasses mandated safety training, education and awareness programs, safety compliance and audit performance, workers' compensation and Transit Operations accident and injury analysis
- Security & Law Enforcement manages direct and contract security services for employees, facilities
  and revenues as well as provides contractual oversight of the Los Angeles Police Department(LAPD)
  and Los Angeles County Sheriff's Department (LASD) public safety contracts.

#### Major Budget Variances

- Eleven positions are added for new Security Guard posts for Regional Rebuild Center (RRC), dispatch center and Gateway building
- The LAPD and LASD security service contracts increase by \$7 million

#### **Media Relations**

#### Media Relations Narrative

Media Relations is responsible for media relations and employee communications. It is the central clearinghouse for all media contacts and handles responses to media inquiries and stages numerous press events. Also, it publishes a variety of employee publications from News-in-a Flash to MTA Report, and also coordinates the "All Hands" staff meetings with the CEO. Its staff is responsible for editing the Intranet content. Media Relations also coordinates an MTA Speakers Bureau. Staff writes many of the executive and Board member speeches and it works closely with Marketing, Customer Relations, executive staff, and virtually every department at the MTA.

# **Public Transportation Services Corporation (PTSC)**

In December, 1996, MTA created the Public Transportation Services Corporation (PTSC), a nonprofit public benefit corporation organized under the laws of the State. PTSC was created in order to transfer certain functions, currently performed by the MTA, and the employees related to those functions, to this new corporation. The purpose of the PTSC is to conduct essential public transportation activities including but not limited to the following: (a) to coordinate multi-modal multi-jurisdictional transportation planning; (b) to program Federal, State and Local funds for transportation projects county-wide within Los Angeles County: (c) to oversee construction; (d) to provide certain administrative services to the County's Service Authority for Freeway Emergencies (SAFE) and the Southern California Regional Rail Authority (SCRRA); (e) to provide administrative support and security services for the foregoing and to the operation of the MTA's Metro Bus and Metro Rail system; and (f) such other activities and provide such other services as it deems necessary. One advantage of the PTSC is that it allows the employees of the corporation, including those transferred from the MTA, to participate in the California Public Employees Retirement System (PERS).

# PTSC/MTA Risk Management Authority (PRMA)

PTSC/MTA Risk Management Authority (PRMA) was established in September, 1998. It is a public entity, created pursuant to section 6500, et seq., of the Government Code, between the MTA and PTSC for the purposes of establishing and operating a program of cooperative self-insurance and risk management. Each of the member parties desired to join together with the other for the purpose of pooling certain self-insured claims and losses and transferring risk between the parties, as permitted under Article XVI, section 6 of the California Constitution, and as provided in Government Code section 990.8.

The purposes of PRMA are to secure insurance on behalf of the parties, including excess insurance on a group basis; to accumulate, administer and invest funds for risk management purposes; and to effect cost savings in the administration of such self-insurance, insurance and risk management programs as may be established by PRMA in order to reduce the cost of transportation services to the public.

Appendices Appendix 9 • 4-9

### **Service Authority For Freeway Emergencies (SAFE)**

The Service Authority for Freeway Emergencies (SAFE) was established in Los Angeles County in 1988. SAFE is a separate legal entity created under state law and is responsible for implementing and managing the motorist aid call box system within Los Angeles County.

There have been just under 4,500 call boxes installed in the County, the largest such program in the nation. On any day, upwards of 1,400 call box calls are answered by SAFE. A retrofit campaign is underway to make the call boxes more accessible to drivers with speech or hearing-impairments, and also to those that are mobility-impaired. SAFE receives its funding from a dedicated \$1 surcharge to the annual vehicle registration fees.

Glossary

					12

### **Terms**

**ABC** 

Activity Based Cost. Methodology that measures the cost and performance of activities, resources, and cost objects. Resources are assigned to activities, then activities are assigned to cost objectives based on their use. ABC recognizes the causal relationships of cost drivers to activities.

**ABM** 

Activity Based Management. Focuses on the management of activities as the route to improving cost performance, efficiency, effectiveness, and efficacy in the consumption of public resources.

**ADA** 

Americans with Disabilities Act. A comprehensive civil rights measure signed into law July, 1990 to ensure persons with disabilities receive equal access to transportation and other services.

**AFSCME** 

American Federation of State County and Municipal Employees. The union represents maintenance and transportation supervisors.

ASI

Access Services Incorporated. ASI is a private non-profit corporation which is the Consolidated Transportation Services (CTSA) for Los Angeles County, and as such has the responsibility to improve and coordinate the paratransit services for 187 different social service and public paratransit operators.

**ATTB** 

Advanced Technology Transit Bus. A fuel cell powered, zero emissions, low floor, lightweight prototype transit bus that the LACMTA is helping to fund. It uses aerospace composite material for a curb weight 10,000 lbs. below current buses.

**ATU** 

Amalgamated Transit Union. The union represents mechanics and other maintenance employees.

**BAD** 

Benefit Assessment District. A limited area around public transportation stations in which non-residential property owners are taxed for benefits derived from proximity to the system.

BALANCED SCORECARD A management instrument which translates an organization's

mission and strategy into a comprehensive set of performance measures that provide a framework for strategic measurement and management. The balanced scorecard has 4 perspectives: financial management, customer, internal processes, and

innovation or learning.

BIAS Budget Information Analysis System. A computerized database

application designed to enable departments (cost centers) to enter

their budget requests and report those requests.

**BOND** An interest-bearing promise to pay a specified sum of money due

on a specified date.

BOS Bus Operations Subcommittee.

BSIP Bus Service Improvement Program - Additional buses on

existing lines for overcrowding relief in FY97, plus that and

additional bus routes in FY98.

BUDGET A plan of financial operations for a given period including

proposed expenditures and revenues, and authorized staffing

levels.

**CALL-FOR-PROJECTS** Primary process for the selection of transportation improvement

projects for funding with discretionary federal, state, and local

revenues.

CALTRANS California Department of Transportation.

CAPITAL ASSET

The acquisition of property, facility, or equipment whose cost

exceeds \$2,500 per unit. Capital project costs include installation, delivery cost, sales and use taxes, and General and

Administrative overhead costs.

**CBD** Central Business District.

CCIS Custom Computerized Information System.

CIP Capital Improvement Plan.

**CNG** Compressed Natural Gas.

COMMERCIAL PAPER Short-term interest-bearing promissory

Short-term interest-bearing promissory note secured by pledged

revenues and a liquidity/credit facility. The maturity can range

from 1 to 270 days.

COTR

Contracting Officer's Technical Representative.

COSO/CSA

Committee of Sponsoring Organization/Control Self-Assessment.

**CPD** 

Countywide Planning & Development.

**CPI** 

Consumer Price Index.

**CPUC** 

California Public Utilities Commission.

**CTSA** 

Consolidated Transportation Services Agency. The LACMTA has been designated as the CTSA for Los Angeles County to coordinate all paratransit services to ensure compliance with the Americans with Disabilities Act (ADA).

CWO

Contract Work Order.

**DBE** 

Disadvantaged Business Enterprise. Businesses owned and operated primarily by minorities and women.

**DEBT SERVICE FUND** 

Fund which accounts for those resources used to repay the principal and interest on long-term debt.

DOJ

United States Department of Justice - The LACMTA has a multi-

year grant from the DOJ for community policing.

DOT

United States Department of Transportation.

EEO/AA

Equal Employment Opportunity/Affirmative Action.

EIS

Environmental Impact Statement. Same as EIR, except prepared

under the (federal) National Environmental Policy Act.

**ELT** 

Executive Leadership Team.

**EMC** 

Engineering Management Consultant.

**ENCUMBRANCES** 

Commitments related to the unperformed portion of a contract for

goods or services.

**ENTERPRISE FUND** 

Fund established to finance and account for the operation and

maintenance of facilities and services that are entirely or

predominantly self-supporting.

**FAP** Formula Allocation Program. FAP is the adopted method for

allocation of federal, state, and local transit operating subsidies to Los Angeles County bus operators. The current formula allocates funds as follows: 50% based on vehicle service miles and 50% based on "fare units". Allocations made using audited

performance data.

**FAU** Federal Aid Urban. Authorized by the enactment of the Federal

Highway Act every five years. Cities and the county are eligible for FAU funds for projects such as street reconstruction and

widening, and installation of lights and signals.

**FFGA** Full-Funding Grant Agreement. Agreement with the FTA for the

funding of Metro Rail Segments.

FIS Financial Information System. An automated, integrated

financial accounting and control system.

FISCAL YEAR The period at the end of which a governmental agency determines

its financial position and results of operations. The fiscal year

begins July 1 and ends June 30 of the following calendar year.

FSP Metro Freeway Service Patrol - Service financed by the

LACMTA which uses roving tow trucks to remove disabled

vehicles and debris from freeways.

FTA Federal Transit Administration. Formerly the Urban Mass

Transportation Administration (UMTA).

FTE Full-Time Equivalent, calculated on 2,080 work hours.

FUNCTION An activity or a group of related activities for which the

Reporting Unit is responsible.

**FUND** 

A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources together with all related liabilities and changes in these assets and liabilities.

FY

Fiscal Year.

**GHQ** 

Gateway Headquarters building.

**GOALS** 

Target that guides an organization's efforts in moving toward a desired future state.

HEAVY RAIL

High-speed passenger rail cars operating singly or in trains of two or more cars on fixed rails in separate rights-of-way from which all other vehicular and foot traffic is excluded.

IMMEDIATE NEEDS PROGRAM

As a response to the Los Angeles uprisings, the LACMTA supports the First African Methodist Episcopal Church (FAME) and the International Institute of Los Angeles to distribute taxi vouchers and bus tokens in South Central Los Angeles.

JOINT DEVELOPMENT

Projects which combine public and private resources to build mixed use development around transit station areas.

KEY PERFORMANCE INDICATOR

Measurable factors of extreme importance to the organization in achieving the strategic goals, objectives, vision, and values that if not implemented properly would likely result in significant decrease in customer satisfaction, employee morale, and financial management.

Los Angeles CAR

Los Angeles Car. Patterned after the Blue Line Car, the LA CAR will be a generic vehicle that will allow for upgrades in technology and automation.

**LACMTA** 

Los Angeles County Metropolitan Transportation Authority.

LIGHT RAIL

Lightweight passenger rail cars operating singly on fixed rails in right-of-way that is not separated from other traffic for much of the way. Light rail vehicles are driven electronically with power drawn from an overhead electric line.

LOSSAN

Los Angeles-San Diego Intercity Railway.

LRV

Light Rail Vehicle

**MAPs** 

Management Action Plans.

**MMS** 

Materiel Management System

METRO BLUE LINE

Long-Beach-Los Angeles Light Rail Transit Project. A 22-mile electrically-powered light rail line constructed by the LACMTA. It opened for service July 14, 1990.

**METRO GREEN LINE** 

Norwalk-El Segundo Light Rail Transit Project. A 20-mile electric rail line constructed by the LACMTA on the median of the I-105 freeway. It opened for service August 12, 1995.

METRO RED LINE -SEGMENT I Segment I of the Metro Rail project constructed by the LACMTA from Union Station to Wilshire/Alvarado (4.4 miles). Operation began in January 1993.

METRO RED LINE - SEGMENT II

Segment II of the Metro Rail project includes Wilshire/Alvarado west to Wilshire-Western, which opened for service in August, 1996. Wilshire/Vermont north to Hollywood/Vine opened for service in June, 1999.

METRO RED LINE -SEGMENT III Segment III of the Metro Rail project under construction. Segment III includes three branches: Branch 1 will be from Hollywood/Vine to Lankershim Blvd./Chandler Blvd.; Branch 2 will extend from Wilshire-Western to Pico/San Vicente; and Branch 3 is still under study but will serve East Los Angeles. Branch 1 will be completed in the Spring of 2000. Branches 2 & 2 have been suggested.

3 have been suspended.

5-6 • Terms Glossary

METROLINK The regional commuter rail system connecting Los Angeles,

Orange, Riverside, San Bernardino, and Ventura counties.

Service began in October 1992.

MISSION An enduring statement of purpose, the organization's reason for

existence. Describes what the organization does, who it does it

for, and how it does it.

MODE A particular form of transportation identified by the vehicle used

i.e., bus, light rail, heavy rail, or automated guideway.

MOU Memorandum of Understanding. A formal contractual

agreement between two or more public agencies.

MOW Maintenance of Way.

MTA Metropolitan Transportation Authority. Also known as

LACMTA.

MULTIMODAL Public transportation system which employs a combination of

highway, bus, rail, HOV, bikeway, pedestrian land use, and

demand management systems.

MUNICIPAL OPERATOR A city or county (including any non-profit corporation or other

legal entity wholly-owned or controlled by the city or county) which operates a public transportation system, or which on July 1, 1972, financially supported in whole or in part a privately-owned public transportation system and which is not included

within an existing transit district.

**NON-REVENUE VEHICLES** Vehicles which do not carry fare-paying passengers.

**OBJECTIVE** Time-phased measurable accomplishment required to realize the

successful completion of a strategic goal.

**OVERHEAD** Expenses not directly chargeable to a particular program which

support multiple programs of the LACMTA.

PERFORMANCE MEASURE The means by which progress in meeting or attaining an

objective may be demonstrated.

PROP A

Proposition A. Sales tax initiative approved by Los Angeles County voters in 1980. It established one-half cent sales tax to

be used for public transit.

PROP C

Proposition C. It established sales tax which was approved by the Los Angeles County voters in 1990. A one half-cent sales

tax to be used for public transportation purposes.

**PTSC** 

Public Transportation Services Corporation. Created by the LACMTA in December, 1996, the PTSC is a non-profit public benefit corporation organized under the laws of the State. It was created to transfer certain functions currently performed by LACMTA and its employees to this new corporation.

**REVENUE SERVICE HOURS** 

Total number of scheduled hours that a bus or train is in service. This total excludes hours spent traveling to and from storage facilities and during other non-service travel.

REVENUE VEHICLE

Vehicles which carry fare-paying passengers.

REVENUE VEHICLE HOURS

Total number of scheduled hours that a vehicle is in service. Excludes hours spent traveling to and from storage facilities and during other non-service travel.

REVENUE VEHICLE MILES

Total number of miles traveled by a vehicle operating on rails or tracks, bus, van trolley, ferry, cable car, or other vehicle used to provide public transportation for which a fare is collected. Excludes miles spent traveling to and from storage facilities and during other non-service travel.

ROD

Revenue Operations Date.

RTAA

Regional Transit Alternatives Analysis.

SAFE Service MTA for Freeway Emergencies, a separate legal entity.

Funds generated from one dollar from each vehicle registration within Los Angeles County used to provide expanded and

improved emergency call box service along the highways.

SB-45 Senate Bill 45. This bill revised the procedures for the

development and implementation of the State Transportation

Improvement Program.

SBE Small Business Enterprise. Businesses in which at least 51% of

the business is owned and operated primarily by socially or

economically disadvantaged individuals.

SBP Strategic Business Plan.

SBU Strategic Business Unit.

SCRRA Southern California Regional Rail Authority. A joint powers

agency including Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties formed to plan, construct, and

operate the regional commuter rail system known as Metrolink.

SHORE PROGRAM Support of the Homeless Re-entry Program. The LACMTA

provides bus tokens to Los Angeles County shelters and

missions.

SPECIAL REVENUE FUND Fund used to account for resources which are legally or

administratively restricted for specific purposes.

**SRTP** Short Range Transit Plan. A five-year business plan, completed

every three years, which is used for internal planning.

STA State Transit Assistance Fund. Used to account for the revenue

from the sales tax on gasoline used for transit purposes. The STA fund was created as an amendment to the Transportation

Development Act of 1976.

STIP State Transportation Improvement Program. This program was

adopted by the California Transportation Commission (CTC) and serves as the primary vehicle for programming funds for highway

projects.

TCU Transportation Communications Union. Union represents clerical workers.

TDA Transportation Development Act. Created by state law in 1972,

the TDA authorized the use of ¼ of 1% of the state sales tax for transportation purposes. 1% of this revenue is allocated to the

LACMTA for its transportation planning activities.

TEA-21 Transportation Equity Act for the 21<sup>st</sup> Century

**TEAMSTERS** Union representing security guards.

TIP Transportation Improvement Program. The programming

document which establishes allocation of funding for Los

Angeles County highways and transit.

TSM Transportation Systems Management. A program of user

incentives and disincentives to maximize capacity and usage of

the existing transportation network.

TVM Ticket Vending Machines.

UTU United Transportation Union. Union which represents bus

operators, schedule makers, and schedule checkers.

VISION An idealized view of a desirable and potentially achievable

future state - where or what an organization would like to be in

the future.
