Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
1.	2	Victor Industrial	138 San Fernando Road	ENVIROSTOR	Acid	Status: Certified O&M-Land Use Restrictions Only as of March, 1995 (19360528). Disposal pit of buried battery cases is capped on-site (Appendix J-1).	Crossgradient The site is located east of LA River	No	CREC/Low Risk Due to concrete river barrier	No
2.	3	Central Traffic Yard	1831 Pasadena Avenue	CA LUST (2)	TPHs	Status: Case closed as of March, 2002 (T0603793073). LUST leak was reported in July, 1999. Case was closed in February, 2010 (Appendix D).	Crossgradient The site is located east of LA River	No	HREC/ Low Risk Due to concrete river barrier	No
3.	4	Bill's Automotive #2	1796 Spring Street	CA HIST CORTESE, CA LUST	TPHs	Status: Case closed as of January, 2010 (T0603700788). Removal of three gasoline, one diesel, and one waste oil LUSTs in 1987 and 1991. Monitoring occurred between 2002 and 2009 (Appendix J-3).	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to concrete river barrier	No
4.	4	Humboldt	216 Avenue 18	US BROWNFIELDS	Undetermined	No additional data was available on GeoTracker or EnviroStor.	Crossgradient Site is located east of LA River	No	REC/Low Risk Due to concrete river barrier	No
5.	5	Bortz Oil Company	1746 Spring Street	CA HIST UST , CA BOND EXP. PLAN, CA HIST CORTESE , CA LUST, ENVIROSTOR	Groundwater Contamination cis-1,2-DCE and vinyl chloride	Status: Pollution characterization (19290289). Certified O&M-Land Use Restrictions Only as of June, 2014. A total of 462.55 tons of lead contaminated soil and 630 cubic yards of total petroleum hydrocarbons (TPHs) contaminated soils were removed. The groundwater monitoring program implemented at the Site has collected groundwater contaminant data over a 20 year period. The results have documented a continual source of contaminants of concern (COCs) migrating on-site from an upgradient source(s). All of the principal volatile organic compounds (VOCs) at the site have historically been detected in the up-gradient monitoring wells. Currently, cis-1,2-DCE and vinyl chloride are the primary COCs migrating on-site at concentrations above numerical cleanup goals from an unidentified off-site source (Appendix J-5).	Upgradient Located 1,200 feet north of Segment 5	Photo 3	CREC/Moderate Risk Land Use Restrictions	No
6.	6	Union Pacific Railroad/S. CA Transportation	1322 Broadway	CA HIST CORTESE , CA LUST	TPHs	Status: Case closed as of December, 1997 (T0603700512). LUST leak reported November, 1990 (Appendix D).	Upgradient The site is located 1,800 feet west of Segment 5	No	HREC/Low Risk Due to distance	No
7.	8	Domenich Basso, Inc.	1201 Broadway	CA LUST	TPHs	Status: Case closed as of November, 2001 (T0603790010). LUST in March, 1991 and January, 2001 (Appendix D)	Upgradient The site is located 2,500 feet northwest of Segment 5	No	HREC/Low Risk Due to distance	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
8.	9	Main Street Dairy (former)	1620 Spring Street	CA HIST CORTESE, CA LUST	TPHs	Status: Case closed as of January, 1997 (T0603700500). LUST reported August, 1990 (Appendix D).	Upgradient The site is located 1,000 feet northwest of Segment 5	No	HREC/Low Risk Due to distance	No
9.	10	Truflex Rubber / Sage Property	1667 Main Street	SEMS-ARCHIVE, CA HIST CORTESE, ENVIROSTOR	TPHs	Status: Case closed as of April, 2002 (SL204DC2386). Cleanup program site. Leak was reported January, 1965, and a NFA Letter was issued April, 2002 (Appendix D).	Upgradient The site is located 1,500 feet north of Segment 5	No	HREC/Low Risk Due to distance	No
10.	11	U.S. Marine Corps Los Angeles Naval	1700 Stadium Way	CA HIST UST, CA LUST CA CORTESE, CA HIST CORTESE	TPHs	Status: Case closed as of May, 1998 (T0603700529). Cleanup program site for non-petroleum hydrocarbon leak. Status: Inactive, needs evaluation as of July, 2005 (19970021). Former defense site. Site was to be deeded to the City of Los Angeles in July, 1997. Monitoring has occurred on-site since January, 2005 (Appendix J-10).	Upgradient The site is located 3,700 feet northwest of Segment 5	No	REC/Low Risk Due to distance	No
11.	12	Los Angeles Albion Riverside Park Project Ross Swiss Dairies	1739 Albion Street	US BROWNFIELDS, CA HIST CORTESE CA LUST (2), CA UST	TPHs	Status: Case closed as of January, 2014 (T10000003600). Anheuser-Busch Brewing was on-site in the 1910s. LUST site for diesel and gasoline tanks, removed in 2012 with excavation of 9,537 tons of soil between January, 2011 and October, 2013. Status: Case Closed as of November, 1996 (T0603700787). Diesel LUST reported March, 1992 (Appendix J-11).	Upgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
12.	12	Valspar Corporation/Smiland Paint Company	620 Lamar Street	CA HIST CORTESE, CA LUST	VOCs	Status: Case closed as of January, 2010 (T0603770626). Paint manufacturing occurred on-site from 1937 to 1985. Two 7,500 solvent/thinner USTs were abandoned in place at an unknown date. Soil, soil vapor, groundwater, and forensic geochemical studies were conducted. Four USTs were removed in 1985. Free product was encountered on the water table, which was determined to be naturally occurring (Appendix J-12).	Upgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
13.	12	Transit Mixed Concrete Cemex Construction Southdown Concrete	625 Lamar Street	CA LUST CA HIST CORTESE, CA LUST CA UST	TPHs	Status Case closed as of July, 1997 (T0603700794). Leak reported in September, 1989. Status: Case closed as of February, 2008 (T0603797339). Excavation cleanup action completed May, 2007.	Upgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
14.	12	Gibbs Electronic	1754 Main Street	CA UST	Undetermined	Status: Registered UST. No additional data was available on GeoTracker or EnviroStor.	Upgradient The site is located east of LA River	No	None/Low Risk No documented releases and LA River barrier	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
15.	12, 21	UPS Main Street LA Facility	1800 Main Street/714 Lamar Street	CA HIST CORTESE, CA LUST, CA UST	TPHs	Status: Case closed as of September, 2005 (T0603700802). LUST leak was reported September, 1990. Excavations of contaminated soil occurred in June 1997, and monitoring continued through April, 2003 to September, 2005. The site received NFA in September 2005, and the case was closed.	Upgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
16.	13	Western Brassworks	1440 Spring Street	CA LUST	Groundwater Contamination of Diesel Fuel and Metals	Status: Closed case as of December, 2009 (T0603799555). Five USTs were removed between May and June, 2003. Excavation of 7,398 tons of TPH contaminated soil was completed at that time. Groundwater monitoring indicates the groundwater is contaminated with TPH-diesel range (Dx) above applicable cleanup criteria, with a groundwater flow direction to the southeast (Appendix D).	Upgradient The site is located 1,900 feet northwest Segment 5	No	HREC/Moderate Risk Due to groundwater contamination	Yes
17.	14	Main Street Center/Main Street Oil Depot LA Department Water	1630 Main Street	SEMS-ARCHIVE, CORRATS, 2020 COR ACTION, US FIN ASSUR, CA HIST CORTESE, CA LUST, CA UST, ENVIROSTOR ENVIROSTOR	Solvents, Non-Petroleum Hydrocarbons, PCB, Arsenic, Metals, and VOCs	Status: Open-Remediation of the site began in January, 1997 and it was unclear if remediation is complete. (T0603700511). LUST for solvents or non-petroleum hydrocarbons. Status: Undergoing closure (CAD000633305). Facility has a hazardous waste storage permit to store up to sixty 55-gallon drums of hazardous material on-site. Closure plan was implemented and investigation detected up to 2,900 ppb of PCBs and 1,740 ppb of arsenic in the concrete chip and core samples, 1,320 mg/kg of total extractable petroleum hydrocarbons (TEPHs), 114 ug/kg of PCE, 70.8 ug/kg of Dichloroethylene (DCE), and 20,000 ug/kg of PCB in the soil. Several metals exceeding clean up criteria were also detected. Small amounts of VOCs were also detected in soil gas samples. Based on the soil sample results, it is likely the hazardous waste storage unit cannot meet the clean closure criteria (Appendix J-17).	Crossgradient The site is located adjacent to Segment 5	Photo 4	REC/High Risk Open case	Yes
18.	15	California Brass MFG/Champion Brass Manufacturing	1447-1460 Naud Street	SEMS-ARCHIVE, ENVIROSTORCA UST	Groundwater Contamination of Diesel Fuel and Metals	Same listing as Western Brassworks, 1400 N. Spring Street (EDR Map Code 13).	Crossgradient The site is located 1,900 feet north Segment 5	No	HREC /Low Risk Due to distance	No
19.	16	Morgan Linen Service, Inc.	905 Yale Street	CA HIST CORTESE, CA LUST(2)	TPHs	Status: Case closed as of September, 1996 (T0603700504). LUST discovered May, 1986 (Appendix D).	Upgradient The site is located 1,900 feet northwest of the Segment 5	No	HREC/Low Risk Due to distance	No
20.	17	Brewery PCBS	2020 Main Street	SEMS	Undetermined	Status: No additional data was available on GeoTracker or EnviroStor (Appendix D).	Crossgradient The site is located east of LA River		None/Low Risk Due to LA River barrier	No
21.	17	M.O.R.E Oil Company	645 South Avenue 21	CA HIST UST, ENVIROSTOR	Acid and petroleum	Status: Certified cleanup status as of May, 1985 (19130103). A total of 500 drums of hazardous waste were abandoned, causing spillage of acid and waste oil onto the asphalt (Appendix J-21).	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
22.	20	Witco/Allied Kelite	1250 Main Street	ENVIROSTOR	Potential TPH, VOCs, SVOCs, PAHs, PCBs, and Metals in the groundwater	Status: Site was granted NFA as of October, 1995 (19281211) after completing a voluntary cleanup of metals and VOCs in the groundwater. From 1978 through 1994, the site was utilized for the blending and formulation of liquid and solid chemical compounds used in metal finishing and cleaning. DTSC completed its review of the Preliminary Environmental Assessment (PEA) Report for the Witco Corporation, Allied Kelite Division Site in 1995. Based on the information provided, DTSC determined that residual contamination in the site's soil does not pose a threat to human health via the inhalation and ingestion routes of exposure. Accordingly, DTSC concurred with the NFA recommendation for the soil. DTSC determined that groundwater beneath the site has been impacted by site operations and possibly other regional sources of off-site contamination. However groundwater is not a potable source of drinking water and does not pose an imminent and substantial threat to human health or the environment. DTSC did indicate that groundwater quality should be investigated and resurveyed the right to require additional work in the future should conditions change (Appendix J-22)	Upgradient The site is located north and adjacent to Segment 5	Photo 5	HREC/High Risk Historical industrial land use and groundwater contamination	Yes
23.	21	Empire Chemical Company	715 Lamar Street	CA HIST CORTESE, CA LUST (2), ENVIROSTOR	Undetermined	Status: Case closed as of May, 1997 (T0603700792). LUST reported September, 1993 (Appendix D).	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
24.	21	Rail Services, Inc.	730 Lamar Street	CA FID UST, CA HIST UST, SWEEPS UST	TPHs	Status: A 10,000 gallon diesel UST installed in 1982 and a leak occurred in June, 1988. No additional data was available on GeoTracker or EnviroStor	East of the LA River The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
25.	22	Blossom Plaza	900 Broadway	ENVIROSTOR	VOCs, TPHs, Gas Vapor	Status: Voluntary Cleanup, certified as of April, 2015 (60001902). The site was contaminated with VOCs, lead, and TPHs in soil gas, the vadose zone, and groundwater. Three gasoline and one waste oil UST from a former gas station were removed in 1956 without regulatory oversight or closure. This site is located within the boundaries of the City of Los Angeles Methane Zone (Level V Methane Zone). Soil gas investigations at the site reported methane concentrations ranging from 11 to 29,000 ppm. Gas concentrations increased with depth. The highest concentrations were reported between 20 to 45 feet bgs. Free product was found on groundwater in the southwest corner of the site. Chemical analysis indicted the product was consistent with California crude oil derived from the LA City Oil Field, although it was described as severely weathered which indicates it may not be naturally occurring (i.e., "fresh" crude). Based on the Human Health Risk Evaluation (HHRE) completed for the property by Geosyntec Consultants, December, 2013, the petroleum-related	Upgradient The site is located 1,600 feet northeast of Segment 5	No	REC/Moderate Risk Active cleanup site	Yes

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
						<p>VOCs detected in soil vapor do not pose an acceptable risk to future occupants. The HHRE, determined that off-site and hydraulically upgradient petroleum releases were impacting the site (Appendix J-25).</p> <p>The site is underlain with Quaternary age alluvium. Fill materials were noted at depths ranging from four to 19 feet bgs, consisting of silty sand, silty clay, and sandy silt. The alluvium varies from 20 to a maximum of 65 feet.</p> <p>Groundwater was encountered in 2004 from 33 to 51 feet bgs with groundwater flow direction to the southeast, toward the LA River.</p>				
26.	22	Jimmie Joe's Texaco	900 Hill Street	CA HIST CORTESE , CA LUST	TPHs	Status: Open - remediation, preliminary site assessment underway (T0603700530). LUST was reported in July, 1994 (Appendix J-26).	Upgradient The site is located 1,500 feet northwest of Segment 5	No	REC/Low Risk Due to distance	No
27.	23	Builders Hardware	1846 Sichel Street	SEMS-ARCHIVE, LIENS 2, CONSENT, PRP	Undetermined	Status: No additional data was available on GeoTracker or ENVIROSTOR.	East of the LA River The site is located east of LA River	No	Undetermined/Low Risk Due to LA River barrier	No
28.	24	Fueling Station (former)	1135 Alameda Street	CA LUST	TPHs	<p>Status: Cased closed as of February, 2016 (T10000006317). LUST case was discovered in April 1988. Two USTs were abandoned in place in 1963. An additional four USTs were removed in April 1988. Site and groundwater were sampled for TPH and benzene, toluene, ethylbenzene, and xylenes (BTEX) in June 2015. Results indicated that concentrations of contaminants in the subsurface were not above applicable cleanup goals and the case was closed (Appendix J-28).</p> <p>Fine grained silts and clays were encountered at a depth of 15 to 20 feet bgs. Depth to groundwater is 25 to 40 feet bgs, with a groundwater flow direction to the southeast.</p>	Upgradient The site is located 1,200 feet west of the Segment 5	No	HREC/Low Risk Due to distance	No
29.	24	Blue Line Parcel PA-018	924 Spring Street	CA SLIC	Undetermined, assumed to be Diesel	Status: No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient The site is located 1,200 feet from Segment 5	No	Undetermined/Low Risk Due to distance	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
30.	24	Vacant Union Pacific Railroad (UPRR) Cornfield Yard	1245 Spring Street	CA HIST CORTESE, CA LUST ENVIROSTOR	VOCs, TPHs, SVOCs, and Metals	Status: Preliminary site assessment underway (T06037400537). Status: Active Cleanup Program Site as of July 2010 (SL2047T1683). LUST was reported in January 1965. Excavation of contaminated soil occurred in December 1999. Soil and groundwater were contaminated with... Site groundwater is currently being monitored. RWQCB requested additional sampling in June 2013 (Appendix J-30). No documentation was available indicating that the additional sampling had occurred or if the tanks were removed. Depth to groundwater ranged from 27.2 feet to 61.2 feet bgs. Groundwater flow direction was toward the south/southeast.	Upgradient The site is located 1,700 feet north of Segment 5	No	REC/Low Risk Due to distance	No
31.	25	William Mead Homes	1300 Cardinal Street	CA HIST UST, CA Cortese, ENVIROSTOR	TPH, VOCs, SVOCs, PAHs, PCBs, Metals in groundwater	Status: Active as of October 2001 (19290312). The site is the former location of an oil refinery and tank farm from 1900s to 1920s. It was then used for an iron and steel company until 1942. In 1942, it was converted to multi-family residences. In December 2013, deed restrictions were implemented due to the presence of PAHs, PCE, TCE, and lead in soil r. Dark oily materials were discovered during construction activities in the playground area. Areas were capped with? to prevent contact with potential contaminants. DTSC entered into a Voluntary Cleanup Program Agreement with the RP for oversight of a PEA on or about June 13, 1996. The PEA revealed visible contamination in the upper 5 feet of soil, although it was deeper in some locations. A supplemental investigation was completed in 1997, and a baseline risk assessment was also completed. PAH and lead levels were elevated resulting in excavation of contaminated soil during 2000 and 2001 and disposal of off-site. A site investigation was conducted in August and September 2000 and in September and October 2001. The investigations indicated elevated lead levels in shallow soils (mainly the upper 2 feet) and 2 locations with elevated PAHs. The Housing Authority of the City of Los Angeles entered into a Consent Order with DTSC to perform required remedial actions. Additional contaminated soils were excavated and replaced with clean soil from August 2004 to June 2005. The site has deed restrictions. A Soil Management, Implementation and Enforcement Plan is in effect for the property (Appendix J-31).	Upgradient The site is located adjacent to Segment 5	Photo 6	REC/High Risk Historical industrial use of the property; Potential for residual soil and groundwater contamination, and land use restrictions.	Yes
32.	27	LA City Fire Station	800 Main Street	CA LUST	None	Status: Case closed as of February, 2009 (T0603793074). LUST discovered in July 1999 (Appendix D). No additional data was available on GeoTracker or EnviroStor.	Crossgradient The site is located 475 feet west of Segment 5	No	HREC/ Moderate Risk Due to distance and groundwater flow direction	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
33.	27	Magnus Co. Inc.	860 Main Street	SEMS-ARCHIVE, ENVIROSTOR	None	Status: NFA was granted in January, 1984 (19370356). No additional data was available on GeoTracker or EnviroStor.	Crossgradient The site is located 575 feet northwest of Segment 5	No	HREC/Low Risk Due to distance and groundwater flow direction	No
34.	27	International Bank Property	943 Main Street	CA SLIC	TPHs, PCE, and TCE	Status: Case closed as of September 1997. NFA letter concluded that low levels of TCE, PCE, ethylbenzene, and xylenes were detected in shallow soil samples below applicable cleanup criteria and no further action was required (Appendix J-34)	Upgradient The site is located 500 feet north of Segment 5	No	HREC/Moderate Risk Due to distance and groundwater flow direction	No
35.	27	Los Angeles Recycling	1000 Main Street	CA SWRCY	None	Permitted recycling center	Upgradient The site is located adjacent to Segment 5	No	None/Low Risk	No
36.	27	The California Endowment	1000 Alameda Street	CA LUST	Petroleum, hydrocarbons, VOCs, and chlorinated solvents in the groundwater	Status: Case closed as of September 2008 (T0603790166). LUST was reported in December 2004. A 280-gallon UST was removed in December 2004. PCEs were detected in soil gas samples however no source was identified. VOCs were in groundwater, soil and soil gas. PHCs identified in groundwater (Appendix J-36).	Crossgradient The site is located 500 west of the Segment 1	No	HREC/Moderate Risk	Yes
37.	27	LA Company Parking Garage	1035 Alameda Street and 1055 N. Alameda Street	CA HIST CORTESE, CA LUST, CA UST	Undetermined	Status: Case closed as of January 1998. (T0603700513). LUST was reported in March 1995 (Appendix D). No additional data was available on GeoTracker or ENVIROSTOR.	Crossgradient The site is located 965 feet west of Segment 1	No	HREC/Low Risk Due to distance and groundwater flow direction	No
38.	27	Fansteel CA Drop Forge	1033 Alhambra Avenue	CA HIST CORTESE, CA LUST	Petroleum hydrocarbons due to active business practices	Status: Case closed (T0603700507). No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient The site is located adjacent to Segment 5	Photo 7	HREC/Moderate Risk	Yes
39.	28	Elias Y Zawaheri (Shell)	766 Hill Street	CA HIST CORTESE, CA LUST, CA FID LUST	TPHs	Status: Case closed as of December 1991 (T060370050). LUST was reported in January 1989. Site is currently a parking lot. No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient The site is located 2,200 feet west of Segment 5	No	HREC/Low Risk Due to distance	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
40.	29	BNSF Mission Tower Site	1430 Bolero Lane	SLIC, ENF	Potential TPH, VOCs, SVOCs, PAHs, PCBs, and metals in groundwater	Status: Case closed as of September 2012 (SL204CF2370). Site is listed on the Cleanup Program due to heavy hydrocarbons contamination in soil between five to 35 feet bgs. Groundwater monitoring has occurred between August 1999 and February 2003. No remediation was conducted due to the technical infeasibility of cleaning up the residual heavy, relatively immobile, non-volatile petroleum hydrocarbons, and access limitations within an active railroad yard (Appendix J-40).	Project Area The site is located within Segment 5	Photo 8	HREC/High Risk Historical industrial land use. Potential for residual soil and groundwater contamination	Yes
41.	30	Bank of America Data	1000 Temple Street	ENVIROSTOR	TPHs and Diesel	Status: Case closed as of January, 2012 (T0603700510). LUST reported in May 1994. Excavation of contaminated soils was completed in September 1995. Two gasoline and five diesel USTs were closed in place in 1997. Semi-annual monitoring groundwater was conducted between October 2001 and July 2009. Contaminated groundwater plume is centered around the gasoline UST pipeline breaks near the bus stop and extends laterally for a distance of 100 feet for the benzene plume to 2000 feet the for methyl tertiary butyl ether (MTBE) plume. The plume limits have remained unchanged since 1995, although concentrations have reduced substantially, and free project has been removed. The sedimentary bedrock beneath the site acts as a barrier to impede lateral and downward migration (Appendix J-41). The site is underlain by interbedded sandstone, siltstone, sand siltstone/silty sandstone, and silty mudstone/clayey siltstone to at least 110 feet bgs. Groundwater depths vary on-site from one to two feet to 35 to 45 feet bgs. The groundwater flow direction is to the southwest.	Crossgradient The site is located 2,000 feet west of Segment 2	No	HREC/Low Risk Due to distance and groundwater flow direction	No
42.	31	Mobil #11-H41	774 Broadway	CA LUST	Potential residual petroleum contamination	Status: Case Open-Inactive as of January 1965 (SLT43318316) (Appendix D). No cleanup status was noted on GeoTracker or ENVIROSTOR. The site is currently a parking lot.	Upgradient The site is located 920 feet west of Segment 5	No	HREC/Low Risk	No
43.	33	LA County Central Jail/Sherriff's Department	429 and 441 Bauchet Street	CA HIST CORTESE, LUST (2), CA UST	Potential residual TPH-d contamination in the groundwater	Status: Case closed as of May 1997 (T0603700525). LUST (diesel) reported April 1996. The site also has a permitted UST. No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient/Downgradient The site is located between Segment 1 and the main tracks and Segment 6	Photo 9	HREC/Moderate Risk	Yes
44.	33	Twin Towers Correction	450	CA UST	TPHs and Diesel	Status: Permitted UST	Upgradient The site is located 500 feet east of Segment 6	No	None/Low Risk No documented release	No

Table A1. Potential Sites of Concern to the Project Area

HDR Map Number ¹	EDR Map Code ²	Site Name	Address	Regulatory Listings ³	Contaminants of Concern	EnviroStor or GeoTracker Agency Information	Upgradient/Downgradient and Location	Associated Photo (Appendix K)	Determination/Risk Ranking	Phase II Recommendation
45.	33	Van Der Horst Corporation	496 Bauchet Street	SEMS, LIENS 2	Residual TPH-d contamination in groundwater	Status: Active as of June 2010 (70000159). Voluntary cleanup site as of October 1996 associated with the former Aliso Street MGP. The site has deed restrictions. Sector E occupies approximately 9 acres in downtown Los Angeles. It is bordered on the north by the former Alhambra Avenue, on the east by the railroad tracks of Union Pacific Railroad, on the south by a MTA bus maintenance facility, and on the west by the Los Angeles County Men's Central Jail (Appendix J-45/46). Groundwater was documented to be 25 to 30 feet bgs.	Upgradient The site is located 500 feet south of Segment 5 and adjacent to Segment 6	No	REC/High Risk	Yes
46.	33	Bauchet Partners / So. CA Gas Company	490 Bauchet Street	SEMS-ARCHIVE, PRP, ENVIROSTOR	PCE, TCE and dicyclo-pentadiene in groundwater	Status: Active as of June, 2010 (19490241). Voluntary cleanup site as of October 1996 for the Former Aliso Street MGP. Soil at the site is contaminated with PCE, TCE and dicyclo-pentadiene. A Removal Action Completion Report was completed and approved in 2007. The Certification of Removal Action was finalized and completed in 2014 (Appendix J-45/46). The site has deed restrictions since 2014. Groundwater was documented to be 25 to 30 feet bgs.	Upgradient The site is located 500 feet south of Segment 5 and adjacent to Segment 6	No	REC/Moderate Risk	Yes
47.	34	LATC Intermodal Facility	750 Lamar Street	ENVIROSTOR, VCP	Lead, TPHs and VOC,	Status: Active as of November 2013 (60001944). . Voluntary cleanup of lead, TPH-Gx, and VOCs completed in 2014. Cleanup include the removal of the UST found during construction of a building in the former Mission Coach Yare Complex in January 2014. Analytical results for the soil were below the industrial screening levels which required additional soil removal (Appendix J-47). The site contains Holocene alluvial-fan deposits consisting of cobbles gravel, sand, and silt. Depth to groundwater is between 35 to 40 feet bgs.	Crossgradient The site is located east of LA River	Yes	REC/Low Risk Due to LA River barrier	No
48.	35	U.S. Postal Service Terminal Annex	900 Alameda Street	CA LUST	Potential residual petroleum hydrocarbons, VOCs, and chlorinated solvents in groundwater	Status: Case closed as of November 1999 (T0603700527). LUST (diesel) was reported in January 1994. No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient The site is located adjacent to Segment 1	No	HREC/High Risk	Yes
49.	35	Chevron Station	901 Alameda Street	CA LUST, CA UST	Potential groundwater contamination	Status: Case closed as of July 2011 (T0603708220). A waste oil tank was removed in 1983, and piping was replaced in 1994. Sampling of soil and groundwater was conducted between 1994 and 2011. Low levels of MTBE were detected in the groundwater. No MTBE was detected in soil vapor samples at 15 or 20 feet bgs (Appendix J-49).	Upgradient The site is located 700 feet northeast of the Segment 1	No	HREC/Moderate Risk Residual petroleum hydrocarbons, groundwater contamination	Yes
50.	35	First Central Bank	686 Spring Street	CA UST	TPHs	Status: Permitted UST	Upgradient The site is located 900 feet west of Segment 5	No	None/Low Risk No documented release and distance	No

51.	36	Mogul Corp. Western	967 Vignes Street	SEMS-ARCHIVE, CA HIST CORTESE, ENVIROSTOR	VOCs, PCBs, Pesticides, and Metals	Status: No further action as of September 1995. Subsurface investigation was completed because of previous chemical manufacturing at the site. Shallow soil borings were installed to 15 feet and sampled at five foot intervals. Detected VOCs, PCBs, pesticides, and heavy metals were below regulatory detection limits (Appendix D). Silty sand (0-20') and Silty clay (20'-35'), and the groundwater flow direction was unknown.	Downgradient The site is located adjacent to the Segment 1 and the main tracks	No	HREC/Low Risk Due to shallow contamination, no impact to groundwater and downgradient	No
52.	36	Jose, Abrego	414 Bauchet Street	EDR HIST CLEANER	VOCs	Status: No additional data was available on GeoTracker or ENVIROSTOR.	Downgradient The site is located downgradient from Segment 1 and the main tracks	No	None/Low Risk Site is located downgradient	No
53.	37	Veterans Affairs	351 Temple Street	CA HIST CORTESE , CA LUST	None	Status: Case closed as of July, 1997 (T0603700522). LUST reported discovered in June 1984. No additional data was available on GeoTracker or ENVIROSTOR.	Downgradient The site is located south of Segments 2 and 3	No	HREC/Low Risk Site is located downgradient	No
54.	37	Commercial Street Traffic Yard – Temp	430 Commercial Street	CA FID UST	None	Status: No additional data was available on GeoTracker or ENVIROSTOR.	Project Area The site is located south of the Segments 1 and 2	No	None/Low Risk	No
55.	37	Caltrans – Commercial	501 Commercial Street	CA HIST CORTESE	TPHs, VOCs, SVOCs, PAHs, PCBs, and Metals	Status: Open – inactive case as of January 2016 (SLT43720718). Cleanup Program Site, in which seven USTs (waste oil, fuel oil, and barley) were removed in 1988 with no regulatory oversight. Previous location of the Maier Brewing Company (Appendix D). A portion of 501 and 531 E. Commercial Street are used by US-101 ramp. The remainder of the site is vacant. Groundwater depth ranges from 32 feet to 40 feet bgs, with a groundwater flow direction to the south/southeast.	Project Area The site is located south of the Segment 2 and adjacent to Segment 3	Photo 11	REC/High Risk Historical industrial land uses, Open Cleanup Program Site	Yes
56.	37	Vacant Lot	510 Commercial Street	None Listed	Previously identified in the Kleinfelder ISA as located within the Aliso MGP area.	Status: No additional data was available on GeoTracker or ENVIROSTOR for the current lot.	Project Area The site is located adjacent to Segment 2 and Segment 3	Photo 12	HREC/High Risk Historical land uses	Yes
57.	37	PBR Realty, LLC/Caltrans District 7)	531 Commercial Street	CA LUST, CA SLIC	Potential TPH, VOCs, SVOCs, PAHs, PCBs, metals in soil and groundwater	Status: Open – inactive as of February 2015 (T0603700523). LUST reported in April 1993. Cleanup Program Site for “other solvents or non-petroleum hydrocarbons”. Portions of the site are part of the US-101 ramp realignment (Appendix D). The site is currently being used for Metro construction storage. No additional data was available on GeoTracker or ENVIROSTOR.	Project Area The site is located adjacent to Segment 2 and Segment 3	Photo 13	REC/High Risk Due to historical land uses and open-inactive LUST case	Yes

63.	37	Los Angeles County Metro Transportation Authority Manley Oil	410 Center Street	CA DEED, ENVIROSTORCA VCP(2) ENVIROSTOR	PCE soil vapor from the former Aliso MGP site	Status: Voluntary Cleanup – Land Use Restrictions as of December 2007 for former Aliso Street MGP, Sector C, Block N. Status: Certified O&M-Land Use Restrictions as of December 2007 (60000170). Part of the Former Aliso Street MGP site used for crude oil collection and storage. In 2006, Southern California Gas Company (Sempra Energy) completed removal action activities specified in the Removal Action Workplan (October 2006). As of spring 2007, the site remains impacted by PCE in soil vapor (Appendix J-63)	Crossgradient The site is located adjacent to Segment 3	Photo 15	CREC/High Risk Land use restrictions	Yes
64.	37	National Cold Storage Company	820 Jackson Street	CA VCP, ENVIROSTOR	PCE soil vapor from the former Aliso MGP site	Status: No listings for the National Cold Storage Company. However, the site is listed as a on the Voluntary Cleanup site with Land Use Restrictions associated with the former Aliso Street MGP. A gas vent is located on-site.	Upgradient The site is located adjacent to Segment 3	Photo 16	CREC/High Risk Land use restrictions	Yes
65.	37	Brutoco Engineering & Construction	500 Ramirez Street	WDS	Undetermined	Status: Construction staging area. No additional data was available on GeoTracker or ENVIROSTOR.	Upgradient The site is located north of Segment 3	Photo 17	None/Low Risk Limited potential for petroleum releases	No
66.	37	Former Aliso Sector - Denny Site	530 Ramirez Street	ENVIROSTOR	Land use restrictions association with the former Aliso MGP site.	Status: Certified/Operation & Maintenance as of February 2000 (60001379). The site is part of the former Aliso Street MGP. Contaminated soil has been documented at a depth of 26 feet bgs. COCs remaining on-site include carcinogenic PAHs (cPAHs) with a benzo(a)pyrene equivalent, concentration ranging from non-detect to of 255.68 mg/kg, at 22 feet bgs. Naphthalene concentrations in soils range from non-detect to 11,600 mg/kg also at 22 feet bgs. SoCal Gas is continuing to monitor the groundwater at the Property as part of the entire former Aliso Street MGP Site Groundwater Operable Unit. As of May 2015, one monitoring well was located on the Property. DTSC has prepared a Land Use Covenant which is currently under legal review (Appendix J-66).	Upgradient The site is located north and adjacent to Segment 2 and 3, and west of Segment 6	Photo 18	CREC/High Risk Land use restrictions and groundwater contamination	Yes
67.	37	So. CAL Gas/Formal Aliso / LA PD Central Garage	555 Ramirez Street	CA HIST CORTESE , CA LUST, CA UST, ENVIROSTOR	PCE and TCE contamination	Status: Open site assessment as of March 1993. (T0603700534). UST was removed in October 2000. Since October 2009, Groundwater monitoring has occurred. The City of Los Angeles Engineering Group referred site matters to the SRWQCB for further action in August 2011. PCE and TCE was detected in groundwater above applicable cleanup criteria (Appendix J-67). Site is underlain with 100 feet of unconsolidated alluvial gravels, sands, and cobbles. Groundwater occurs at a depth of between 25 to 35 feet bgs with a groundwater flow direction toward the LA River.	Upgradient The site is located north of Segment 2 and 3, and adjacent to Segment 6	Photo 19	REC/High Risk Open Case	Yes

Table A1. Potential Sites of Concern to the Project Area

68.	37, 60	Parker Center	151 Judge John Former Aliso Street	CA LUST	Undetermined	Status: Case closed as of January 2013 (T0603700531). LUST was reported in July 1990. Four USTs of unknown contents were removed in 1999, and groundwater monitoring occurred from 2000 to 2002. During construction of an underground parking structure a previously unknown UST was encountered in 2009. The UST was removed in December 2009 and a total of 1,098 tons of contaminated soil were excavated in April 2010. Groundwater monitoring occurred from semi-annually from October 2010 to July 2012 (Appendix J-68). The site is underlain up to 40 feet of unconsolidated alluvial gravels, sands, and silts. Groundwater on-site averaged 27 feet bgs, with a groundwater flow direction to the northwest.	Downgradient The site is located 1,400 feet southwest of Segment 2	No	HREC/Low Risk Due to distance	No
69.	37	Central District HQ	410 Ducommun Street	CA UST	TPHs	Status: Permitted UST	Downgradient The site is located south Segment 2	No	None/Low Risk No documented releases	No
70.	37	Unocal, Conoco Phillips Center Street Terminal / S & P Company	501 Center Street / 706 Commercial Street	CA FID UST	Petroleum hydrocarbons, PAHs, and VOCs in soil	Status: Open – inactive as of January 1997 (SL376402463). Cleanup Program Site with a petroleum leak reported in January 1965. No additional data was available on GeoTracker or ENVIROSTOR.	Project Area Located within Segment 3	No	REC/High Risk Open inactive case	Yes
71.	39	LA to Pasadena Metro Blue Line Construction Author (SL204EG2409)	None listed	CA SLIC	Diesel and petroleum, and potential soil vapor	Status: Case closed as of March 2012. Historically, the site was used as wood and coal yard, an oil warehouse, dwellings, and small businesses. Groundwater in the southwestern portion of the site has been impacted by diesel and petroleum hydrocarbons from off-site sources. In XXX, 238 tons of contaminated soil was excavated and disposed of off-site as hazardous waste (Appendix K-71).	Project Area	No	HREC/High Risk Accumulation of diesel and petroleum, and potential soil vapor	Yes
72.	40	LAC MTA, Division 10	742 Mission Road	CA LUST	None	Status: Case closed and pollution characterization (T0603700840).	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
73.	41	So. CA Gas / Former Aliso MGP	600 Cesar Chavez Street	CA Cortese	TPH, VOCs, SVOCs, PAH, PCB, metals, and MGP chemical in soil and groundwater	Status: Open – inactive as of January 2015. (SLT4L9651903). The site is part of the former Aliso Street MGP site.	Downgradient The site is located east of Segment 1 and upgradient from Segment 6	No	REC/High Risk Open-inactive case status	Yes

102.	82	Butterfield Sun Chemical Corp.	590 Santa Fe Avenue	CA HIST UST, CA HIST CORTESE, ENVIROSTOR CA LUST	Metals, PAHs, TPHs, VOCs	Status: Active – Inactive as of December 2012 (SL204761666). Voluntary cleanup site of a former paint, lacquer, and printing manufacturing facility contaminated with VOCs. The Los Angeles County Metropolitan Transportation Authority (MTA) took ownership of the property in April 2015. Five USTs and piping were removed, and excavation of impacted soil was completed in December 2015. Chemicals in shallow soils include metals, PAHs, and TPHs. TPH concentrations were in the high end carbon chain exceeding the cleanup goal and were left in place in the northern portion of area identified as Excavation C bottom. Further excavation would require additional shoring and major street disturbances, given the area is directly adjacent to S. Santa Fe Avenue. Cleanup has met shallow soil cleanup requirements for commercial and industrial land use (Appendix J-102). Gaspur aquifer ranged from 184 to 196.6 feet amsl in 2013 with a west to southwest groundwater flow direction.	Crossgradient The site is located 500 feet west of Segment 4	No	REC/High Risk Active site and distance to the Project	Yes
103.	82	Max Fischer/Sons, Inc.	1327 Palmetto Street	CA UST	TPHs	Permitted UST	Crossgradient The site is located 700 west of Segment 4	No	None/Low Risk No documented releases	No
104.	82	Substation	600 Mesquit Street	None	Metals and PCB oil	No listings of substations fires in the EDR report.	Crossgradient The site is located 200 feet west of Segment 4	Photo 27	None/Low Risk No substation fire listings	No
105.	82	At Mateo	555 Mateo Street	ENVIROSTOR	Lead, Cadmium, and TPHs	Status: Active Voluntary Cleanup Site as of June 2015 (60002188). Soils investigations undertaken at the property revealed that soil is contaminated with elevated concentrations of lead, cadmium, and TPH. The specific source(s) of the soil contamination is unclear, but it is suspected to originate from the site's previous industrial uses, dating back to the early 1900s. Site investigations have concluded that the contaminated soil appears to be confined to the uppermost four feet beneath a portion of the site. A total of 1,585 tons of soil was excavated from the site and properly disposed in March, 2016. Mitigation Measure: Excavation and off site transportation of contaminated soils shall be performed in accordance with the specific recommended remedial alternative set forth in the Remedial Action Work Plan, subject to approval by DTSC. Implementation of the RAW shall proceed in accordance with all applicable local, state, and federal regulations. The Project Applicant shall comply with all conditions contained in the RAW, as it may be subsequently amended or modified (Appendix J-105).	Crossgradient The site is located 1,100 feet west Segment 4	No	REC/Low Risk Due to distance	No

109.	86	Ace Plating Company, Inc.	719 Towne Avenue	ENVIROSTOR	VOC, Metals, PCE, and soil vapor	Status: Open – site assessment as of June 2013 (T10000004814). Plating operations started in the mid-1910s in the southwestern portion of the site until 2005. Ace Plating owned and conducted plating related operations on the 11 contiguous parcels, specifically electrochemical coating of metal parts. Numerous assessments conducted at the site indicate that the soil is contaminated with VOCs and metals. The soil vapor has been sampled throughout the site with detectable concentrations of PCE at 5 feet bgs The soil vapor data is limited at depths greater than 30 feet bgs. The maximum concentrations of chromium were both collected at one foot bgs located in the alley between the Crocker Street and Towne Avenue buildings and is adjacent to the location of the former chromium tanks. The contaminated soil at the former chromium tanks have not been delineated vertically or laterally to the southeast. PCE was only detected in five sampling locations at depths greater than five feet bgs (Appendix D). Depth of groundwater is documented at 128 feet bgs with a groundwater flow direction to the southwest.	Cross or Downgradient The site is located 5,000 feet west of Segment 4	No	REC/Low Risk Due to distance	No

121.	91	Western Electrochemical Company (WECCO)	2348 Eighth Street	ENVIROSTOR	Perchlorate	Status: NFA as of November 2013 (60001827). From 1942 to 1948, perchlorate was produced. The site also occupied a metal enameling and chromodizing company (1953-1970). According to the Soil and Groundwater Site Investigation Report, perchlorate was detected from 31 micrograms per kilogram (ug/kg) at one foot bgs to 200 ug/kg at 80 feet bgs in the soil. The former AAD Distribution and Dry Cleaning Services, Inc. is a state orphan site located 1.5 miles downgradient from the WECCO site. The Phase I conducted for this site identified the WECCO site as the source of perchlorate in upgradient groundwater wells at concentrations up to 4,400 micrograms per liter (Appendix J-121). Soil lithology consisted of interbedded silt, sandy silt, clay, and silty sand, sands and gravels to a depth of 135 feet bgs. Groundwater was encountered at 128 feet bgs.	Crossgradient The site is located 1,800 feet west of Segment 4a	No	HREC/Low Risk Due to distance	No

122.	92	Greyhound Lines, Inc.	1614 Seventh Street	CA LUST	TPHs	Status: Open - eligible for closure as of May, 2016 (T0603770957). LUST was reported in April 1990. Six USTs and associated piping were removed and three new tanks were installed in 1994. Excavation of contaminated soil was completed to a depth of 15 feet and 767 tons of soil was disposed of off-site (Appendix J-122). Depth to groundwater was noted as 95 feet bgs.	Crossgradient The site is located 2,400 feet west of Segment 4a	No	REC/Low Risk Due to distance	No
123.	92	Farmers Produce/So CA Gas/LA-Alameda MGP	725 Channing Street	ENVIROSTOR	Lampblack, PAH, and BTEX	Status: DTSC approved CEQA documents in March 2003. Previously identified COC in soil include lampblack, PAH, and BTEX. The site is part of the former Aliso Street MGP site (Appendix J-123). The CEQA document proposed the removal of 615 cubic yards of contaminated soil.	Crossgradient The site is located 2,400 feet west Segment 4a	No	HREC/Low Risk Due to distance	No
124.	94	Santa Fe/W.A. Grant	2144 Seventh Street	ENVIROSTOR, CA HIST UST	Lead	Status: Previous location of the LA-Alameda MGP. Site was identified with a 2,000 gasoline tank in June, 1988. No data was available on GeoTracker or ENVIROSTOR.	Crossgradient The site is located east of LA River	No	Undetermined/Low Risk Due to LA River barrier	No
125.	95, 98	Consolidated Facility	2222 Seventh Street 786 Mission Road	CA LUST CA UST	TPHs and Kerosene	Status: Case closed as of January 2015 (T0603720097). Four USTs (three diesel and one kerosene) were removed in August 1993. A total of 141 tons of soil were excavated and disposed of off-site.	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
126.	95	Seventh Street L.A. Public / Seventh Street Consolidated Maintenance Yard	2300 Seventh Street	CA LUST	PCE	Status: Case closed as of Jun, 2009 (T0603779702). LUST was reported in March 2004. Soil sampling was conducted in September 2006, which confirmed the presence of PCE in soil. A soil vapor extraction (SVE) system was installed in XXX for site remediation and was operated until XXX. Subsequent soil samples indicated no detectable concentrations of PCE (Appendix J-126).	Crossgradient The site is located east of LA River	No	HREC/Low Risk Due to LA River barrier	No
127.	95	South LA Training Center	2310 Seventh Street	CA LUST	TPHs and PCE	Status: Open-site assessment as of July 2015 (T10000007089). Two oil USTs, one used oil former transition sump, and associated piping were removed in April 2014. TPH and PCE were detected in soils. A Phase II ESA to delineate the extent of the release was recommended in 2014, which is still pending (Appendix J-127). Depth to groundwater is estimated to be 120 feet bgs in this general area.	Crossgradient The site is located east of LA River	No	REC/Low Risk Due to LA River barrier	No
128.	100	Mission Road Recycling	840 Mission Road	CA SWF/LF (2)	Solid Waste	Recycling facility	Crossgradient The site is located east of LA River	No	None/Low Risk Due to LA River barrier	No

135.	114	Southern California So Cal Gas/Olympic Base Looney Bins/Downtown	2424 Olympic Blvd.	SEMS-ARCHIVE, CA BOND EXP. PLAN, CA UST CA HIST, CA SWF/LF CA SWF/LF	PAHs, TPHs, VOCs, and Metals	Status: Active as of October 2013 (19490179). Land use restrictions. The Southern California Gas (SCG), Olympic Base Site was once a gas manufacturing plant where oil was converted into gas for lighting, heating, and cooking. Residues from the gasification process, mainly consisting of "lamp black," were discovered at the site. A Consent Order was signed in December 1986, which addressed the work needed to complete the Remedial Investigation/Feasibility Study (RI/FS) process. The RI/FS was approved by the DTSC on September 17, 1987. The RI/FS found that soil from about 2 to 12 feet bgs was contaminated. The contaminants were not readily vaporized, nor do they enter aqueous phase solution. Groundwater aquifers beneath the site are unsaturated to a depth of 90 feet. Air monitoring at the site did not indicate that the contaminants are emitting vapors to the air. SCG then submitted a Feasibility Study (FS) report in May 1988. DHS reviewed the FS report and requested a full Health Risk Assessment (HRA) based on appropriate biological receptors and exposure pathways on October 20, 1988. The HRA was approved by the Department on June 4, 1990. An asphalt cap on the site, groundwater monitoring, and a deed restriction were proposed. The deed restriction, protected the integrity of the cap by limiting land use and excavation of the waste. The Department directed the responsible party to prepare a Remedial Design and Implementation plan. The plan included engineering specifications for the asphalt cap, permits, and a schedule for completion of the cap. The cap will be repaired as necessary; necessary; it is expected to require replacement every ten years. This operation and maintenance program will last for 20 years (Appendix J-135).	Crossgradient Low risk The site is located east of LA River	No	REC/Low Risk Due to LA river barrier	No
136.	114, 116	Asphalt Plant # 1	2484 Olympic Blvd.	CA HIST CORTESE, CA LUST, CA UST	TPHs	Status: Case closed as of February 2010 (T0603700854). LUST was reported in September 1989. One gasoline and two diesel USTs were removed in 2000, and 21.59 tons of contaminated soil were excavated. Groundwater monitoring occurred from December 2000 to March 2007. The site has been remediated, and residual contamination levels are within the appropriate risk levels. Vapor intrusion benzene concentration levels are below the interim vapor intrusion guidance (0.18 mg/kg benzene at five feet bgs) (Appendix J-136). Silty sand and sand to a maximum depth of 160 feet bgs. No groundwater was encountered.	Crossgradient The site is located adjacent to Segment 4a	Photo 31	HREC/Moderate Risk	No
137.	115, 105	LA Waste Recycling	2181 E. 10 th Street	CA SWRCY	Solid Waste	Permitted recycling facility	Crossgradient The site is located 2,300 feet west of Segment 4a	No	None/Low Risk Due to distance	No

Table A1. Potential Sites of Concern to the Project Area

138.	N/A	Auto Dismantling	2425 Enterprise Street	None listed	Metals	Status: An auto dismantling business beneath the I-10 freeway was noted during the site reconnaissance. No information was available on GeoTracker or ENVIROSTOR.	Crossgradient The site is located adjacent Segment 4a that has potential for metals	No	REC/Moderate Risk	Yes
139.	117	Western Lead and Metal	2182 11 th Street	SEMS, CA Cortese	Lead, Arsenic, and Metals	Status: Certified/Operation & Maintenance – Land Use Restrictions as of December 2007 (19390044). The site was occupied by several different companies which operated a lead smelter from 1946 to 1965. After 1965, the site was used for die-cast manufacturing operations. Since 1991, several site assessments have been conducted. These assessments involved soil sampling and analyses for metals including lead, antimony, and arsenic. In 1996, the property was paved with three inches of asphalt. In addition, DTSC collected several surface soil samples in the areas surrounding the Property. Extremely high levels of lead (up to 574,000 ppm), antimony (up to 14,000 ppm), and arsenic (up to 920 ppm) were detected in the narrow strip along the southern and western boundaries. High concentrations of lead, copper, and zinc were detected along the railroad ROW; and elevated levels of lead (up to 1,450 ppm) were detected on a residential property. A Consent Order (Imminent and Substantial Endangerment) was entered into with Quemetco Inc., and Union Pacific Railroad Company. As required by the Order, Quemetco completed an Emergency Removal Action in 1977 at Areas 3 and 4 which are located at the perimeter of the property and the residential property. Union Pacific also conducted an Emergency Removal Action at Areas 1 and 2 (railroad ROW). The Remedial Investigation determined the extent of metal contamination. Excavation of contaminated soil and construction of a 4-inch asphalt cap c was proposed. The Responsible Parties (RPs) prepared the Remedial Action Completion Report, which summarized the removal activities. Currently, as part of the Operation and Maintenance, the RPs evaluate the asphalt cap annually (Appendix J-139).	Crossgradient The site is located 2,800 feet west of Segment 4a	No	CREC/Low Risk	No
140.	118	Sears	2650 Olympic Blvd.	CA LUST	TPHs	Status: Case closed as of April 1991 (T0603739167). LUST was reported in November 1990. No additional information was available on GeoTracker or ENVIROSTOR.	Crossgradient Located east of LA river	No	HREC/Low Risk Due to LA River barrier	No
141.	119	National Aerosol Products	2193 14 th Street	SEMS	Methylene Chloride, Toluene, and Naptha	Status: Inactive case which online sources indicates the need for evaluation as of January 2006 (19220018). The facility was built in 1947. Three USTs (one methylene chloride, one toluene, and one naptha) were removed (no date given) (Appendix D). A preliminary Endangerment Assessment Report as completed March 2001; however, it was not available on ENVIROSTOR.	Crossgradient The site is located 2,400 feet southwest of Segment 4a	No	REC/ Low Risk Due to distance	No

148.	126	Safe Planet Recycling	2255 1Sixth Street	CA SWRCY	Solid Waste	Permitted recycling facility.	Downgradient The site is located 2,600 feet southwest of Segment 4a	No	None/Low Risk Due to distance	No
149.	127	Vacant Lot	2455 Washington Blvd	CA LUST	VOCs, TCE, and PCE	Status: Open – site assessment as of December 2014 (T10000006072). LUST cleanup site. Same information listed as the Crown Coach Site (Appendix J-145). The site is underlain by interbedded layers of gravel, sand, silt, and clay. Deposits underlying the site are; Alluvium, Lakewood Formation, and San Pedro Formation. Groundwater was encountered at a depth of 330 feet bgs	Downgradient The site is located 700 feet south of Segment 4a	No	REC/Low Risk Due to distance, groundwater flow direction, and limited ground disturbance	No
150.	127	Central Repair Yard Amtrack Redondo Junction Facility	2469 Washington Blvd. 2435 Washington Blvd.	CA SWF/LF, CA HIST CORTESE, CA LUST CA HIST UST, CA Cortese	PAHs, VOCs, and TPHs	Status: Case closed as of July 1996 (T0603700644). LUST was reported in June 1991. No additional documentation was available on GeoTracker or ENVIROSTOR. Status: Active since January 2003 (19400012). DTSC entered into a Voluntary Cleanup Agreement with the National Railroad Passenger Corporation. The purpose of this Agreement is to provide the terms and conditions to conduct a soil gas investigation of the site under the oversight of DTSC. A Human Health Risk Assessment was completed in July 2010. DTSC recommended the preparation of a workplan for a soil vapor risk assessment. COCs include TPH, PAHS, and VOCs (Appendix J-150).	Downgradient The site is located 1,100 feet south of Segment 4a	Photo 32	REC/Low Risk Due to distance	No
151.	127	ACTA	2026 Santa Fe Avenue	CA LUST	Undetermined	Status: Case closed as of April 2002 (T0603760880). LUST case reported December 1998.	Downgradient The site is located 1,800 feet southwest of Segment 4a	No	HREC/Low Risk Due to distance	No
152.	129	Industrial Service Oil Company	1700 Soto Street	CORRACTS, 2020 COR ACTION, US FIN ASSUR	PCE, TCE, and TPH	Status: Case active as of January 2008 (80001737). The site was formerly an oil and anti-freeze treatment and storage facility and PCE, TCE and TPH-motor oil were detected in soil and soil vapor. The facility has been in negotiation with DTSC to continue the corrective action project and begin the RCRA Facility Investigation portion of the project. Sampling of the site is needed to identify and characterize contaminants that may have been released at the facility. A Groundwater Migration Control Plan was submitted in December, 2010, which stated that water contamination was considered unlikely due to the depth to groundwater. Groundwater flow direction near the site is to the south.	Downgradient The site is located east of LA River barrier	No	REC/Low Risk Due to LA River barrier	No

Table A2. Sanborn® Fire Insurance Maps Summary				
Years	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
1888	Tenements (“Chinese Quarters”), housing and vineyards were in this general area. The Los Angeles Oil Burning and Supply Company and two asphalt refining companies were located in the northern section, south of Alhambra Avenue. Kerchoff, Cuzner Mill and Lumber Company, Chinese Quarters, vineyards, and the Los Angeles Vintage Company Winery and Distillery were located to the west. The Los Angeles Cracker Company was located to the southeast, and the Philadelphia Brewery was located across Former Aliso Street. University Medical College, miscellaneous commercial businesses, and residences were located east of Segment 1.	Residences and lodging structures were located north and south of Sainsevain Street (renamed Commercial Street) between Vignes and Center Streets. Residences were located the east, beyond Center Street. Residences and the Philadelphia Brewery were located to the west. Beyond Former Aliso Street included small commercial properties, residences, and the Los Angeles Gas Company. Facilities and features associated with the Los Angeles Gas Company included a large “gasometer” AST, a purifying house, a coal yard, and industrial machinery. Residences were located to the south across Ducommun Street.	Several sheds were located east of Center Street, between Sainsevain Street (Commercial Street) and Lazard Street (Ducommun Street). Atchison, Topeka, and Santa Fe (AT&SF) railroad tracks were located west of the Los Angeles River. An office, stable, and construction shed were located north of First Street. Adjoining properties to the west included residences and commercial properties along Sainsevain Street (Commercial Street), and lodging structures to the north.	Sanborn® coverage was limited to small, isolated sections along this Segment. The Los Angeles River paralleled this Segment. The Los Angeles Oil Burning and Supply Company was located in the western portion. C.W. Duffy’s Asphalt Refining Works and Asphalt Oil Refining Company were located immediately east of the LOAB facility. Both companies contained crude oil and refined oil ASTs, with a 20-foot tall crude oil AST. Railroad tracks were located along Alhambra Avenue. The Mission Tower and the railroad ROW. An orchard was located north of Macy Street (current Cesar Chavez Avenue); a platform and AT&SF railroad tracks were located south of Macy Street; and a plumbing supply warehouse was located east of Keller Street. A lodge, residences, and a candy store were located south of Former Aliso Street, north of Commercial Street. Adjoining properties to the west include: Stearns Manufacturing Iron and Woodwork and Machine Shop, Willamette Steam Mills Lumbering Company Lumber Yard, J.D. Hooker and Company Riveted Sheet Iron Water Pipe Works, and residences. Adjoining properties to the east include: the California Star Winery, residences, and orchards.
1894	Commercial properties, tenements, Hay Wood Coal and Feed Yard, and the Southern California Cracker Company were located on the southern portion. Chinese Quarters and residences were located on the central portion. The Los Angeles Oil Burning and Supply Company, which included numerous oil and petroleum ASTs, was located in the northern portion, just south of Alhambra Avenue. The remaining adjoining properties were consistent with the previous year map.	Residences, a saloon, a grocery store, the Bethlehem Church, and lodging structures were located to the north and south of Commercial Street (formerly Sainsevain Street), between Vignes and Center Streets. Residences and the Maier and Zobelein Brewery were located to the west. Small commercial properties, the Southern California Macaroni Factory, residences, and the Los Angeles Lightning Company were located to the north. The Los Angeles Lightning Company consisted of five large “gasometer” ASTs, an oil AST, a 15,000-gallon water AST, a purifying house, lime house, condenser, and industrial machinery. Stables, dwellings and lodging structures were located across Center Street, adjacent to the eastern portion Segment 3. Residences were located south of Ducommun Street.	Sparsely spaced residences were located east of Center Street, between Commercial and Ducommun Streets. The W.P. Fuller Company Oil warehouse and oil tanks were located to the north. The Crescent Coal Company Wood and Coal Yard were located within the railroad ROW between Turner and First Streets. Adjoining properties to the west include the Los Angeles Mineral Mill (east end of Jackson Street) with associated crude oil ASTs, Crescent Oil Company, Citizens Ice Company Works with associated oil ASTs, Diamond Coal Company Coal Yard, and the James Hill and Sons Company Pickle Works. Residences, and the Busch and Hannon Wagons and Agricultural Implements company were located to the north. The Los Angeles River paralleled this Segment. Azusa Ice and Cold Storage, and Smith Paving Company Yard and Works were located within the railroad ROW.	Railroad tracks were located along Alhambra Avenue throughout the northern portion of Segment 5. The Morris and Jones Wood Yard was located on the southeast corner at the intersection of Alhambra Avenue and Date Street. The C.W. Duffy’s Asphalt Refining Works and Asphalt Oil Refining Company were both gone by this time. Cudahy Packing Company (Cudahy) was located northwest of the Macy Street and the Los Angeles River intersection. The Cudahy facility consisted of numerous sheds, warehouses, and processing facilities for pork products. Several crude oil ASTs were also located on the property. South of Macy Street, an agricultural implement warehouse and furniture company warehouse were noted. A coal derrick with a tramway was located within the railroad ROW to move coal from railroad cars to the Los Angeles Lighting Company, located at the northwest corner of the intersection of Keller and Former Aliso Streets. The Los Angeles Lighting Company consisted of a 43,500-cubic-foot gas AST and a crude oil AST. Bush and Hanon Wagons and Agricultural Implements were located south of Former Aliso Street. The remaining adjoining properties were consistent with the previous year map.
1906	Stables, feed yards, and stockyards were located in Segment 1 from Former Aliso Street (current US-101) to Macy Street (current Cesar Chavez Avenue). Pioneer Roll Paper Company, American Conduit Company, and portions of E.K. Wood Lumber Company Yard and Planning Mill were located on the central portion of Segment 1, south of Macy Street. A railroad spur (side track) was located on this portion of the Site alongside these facilities. Chinese Quarters was located south of these facilities	A railroad spur was located on Commercial Street within Segment 3. A property labeled as “Oil and Asbestos Warehouse” was located within Segment 3, north of Commercial and between Vignes and Center Streets. The Los Angeles Gas and Electric Company had additional structures at its facility, north of the Segment 3. The Macaroni and Candy Factory, a partially constructed warehouse, and residential tenements were located adjoining east of Segment 3. A Los Angeles Gas and Electric	A hydrated lime factory, furniture warehouse, lime and cement warehouse (east end of Turner Street), and the Lee Chamberlain Company with associated grinding room and coal shed, were located within the AT&SF railroad right-of-way of Segment 4. Two Los Angeles Gas and Electric Company 1,000,000-gallon gas ASTs were located adjoining west of Segment 4, between Ducommun and Jackson Streets. The Diamond Oil Company with associated coal storage shed	The western portion of Segment 5 was occupied by industrial facilities. Fulton Engine Works, The Barber Asphalt Paving Company, a Puente Oil Company storage yard, and an Amalgamated Oil Company Distillate Plant were located between Alhambra Avenue/Data Street and the Los Angeles River (from west to east). Each facility consisted of numerous ASTs containing crude oil, refined oil or distillate. The Fulton Engine Works facility consisted of three USTs of crude oil.

Table A2. Sanborn® Fire Insurance Maps Summary				
Years	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
	on the southern portion of Segment 1. Adjoining facilities included: the Barber Asphalt Company (north), which contained several large ASTs labeled as “oil tanks on ground”; Kerckhoff Cuzner Mill & Lumber Company; California Truck Company’s Stable and Corral; additional industrial and residential structures (west); and the Maier & Zobelein Brewery (southeast and south beyond Former Aliso Street). A pipe tunnel was located beneath Former Aliso Street connecting two Maier Brewing Company facilities.	Company property consisting of two, one-million gallon “gas holder” ASTs and an associated compressor were located at the southeast corner of the intersection of Ducommon and Center Streets, southeast of Segment 3.	and oil ASTs were located adjoining west of Segment 4, between Jackson and Turner Streets. The National Ice Company Plant, Diamond Oil Company Yard and Western Door and Sash Company were also located adjoining west of Segment 4. The California Ornamental Brick Company with associated gas ASTs and coal storage areas was located adjoining south of Segment 4, across First Street. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1894 map.	Alhambra Avenue consisted of separate railroad tracks with railroad spurs branching off to the north and south of Alhambra Avenue. Southern Refining Company and an Amalgamated Oil Company storage yard were located on the north side of Alhambra Avenue. Both companies consisted of numerous oil ASTs. The Southern Refining Company property also maintained an AST with “iron agitator.” Adjoining properties were generally industrial (pipe and iron works) facilities and residential. The Los Angeles Pressed Brick Company was located adjoining south of the western portion of Segment 5, and several oil ASTs and an oil UST were located on the property. The eastern portion of Segment 5 consisted of several sets of railroad tracks running adjoining to the west of the Los Angeles River. The Amalgamated Oil Company was partially located on the eastern portion of Segment 5. Facilities (from north to south) included cattle pins and the Cudahy Packing Company, north of Macy Street. The Cudahy facility consisted of numerous ASTs and a crude oil UST. R. Schoenhofen Brewing Company warehouse, James Hill & Son Pickle Company, Los Angeles Gas and Electric Company, Crane Company Warehouse, and Plumber Supply Warehouse were located between Macy and Former Aliso Streets. The Los Angeles Gas and Electric Company maintained several crude oil ASTs. The National Mill and Lumber Company occupied the property between Former Aliso and Commercial Streets. This facility consisted of lumber and coal storage yards. Adjoining properties to the eastern portion this Segment were generally the same as on the 1894 map.
1920	The 1920 Sanborn® map showed numerous structures, but no land use detail. Railroad spurs south of Macy Street replaced the former locations of Pioneer Roll Paper Company, American Conduit Company and E.K. Wood Lumber Company Yard and Planning Mill. The configuration of the structures located south of the railroad spurs were consistent with the Chinese Quarters illustrated on the 1906 map. Also, structures were configured similar to residences shown on the 1906 map.	The 1920 Sanborn® map showed numerous structures, but no land use detail. An additional gas holder AST was located southeast of Segment 3.	The 1920 Sanborn® map showed numerous structures, but no land use detail. Multiple railroad tracks and structures between the tracks were located within the eastern portion of Segment 4. A gas holder AST was located on the property east of Center Street, between Commercial and Ducommun Streets.	The 1920 Sanborn® map has limited coverage for this Segment, with no coverage for the western portion. The eastern portion was generally the same as on the 1906 map. Several steel ASTs containing oil were located south of Macy Street and west of Keller Street. Two large gas holder ASTs were located west of Center Street. The remaining adjoining properties were consistent with the 1906 map.
1950	Railroad ROWs and a LAUS train concourse, passenger loading platforms, and an access tunnel were noted. A Post Office mail bag loading dock and warehouse were located east of the train platforms, between Ramirez Street and Lyon Street. A tool warehouse, and a beer bottling warehouse and other associated structures of the Maier Brewing Company were located south of Former Aliso Street. Two Maier Brewing Company storage warehouses were located between Lyon and Vignes Streets. An auto repair facility with associated gas and oil operations and truck storage yard were located to the east. A United States (US) Post Office Terminal Annex, LA County Fire Station #4, railroad spurs, and Hydril Inter-American Company Oil Well Equipment	A metal oven equipment manufacturer, burlap sack manufacturer, SCG warehouse and 15,000,000 cubic-foot steel gas AST were located within this Segment. Maier Brewing Company, an old tire and scrap metal yard, and a rotary aluminum smelter were located to the west, across Vignes Street. The SCG Butadiene Division and Los Angeles County Agricultural Commission were located adjoining north this Segment across Former Aliso Street. A burlap sack warehouse and several small storage warehouses were located adjoining east, and a 6,000,000-cubic-foot SCG gas AST with industrial materials were located to the east-southeast of Segment 3. The SCG Ducommun Street Plant and a 10,000,000-cubic-foot SCG gas AST were located on the east and	The SCG yard with elevated butadiene storage ASTs have been removed.	The western portion was industrial. Hydril Corporation Oil Equipment Manufacturing, Gladding, McBean and Company, Diamond Oil Company, and Connelly Iron Sponge and Governor Company Manufactured Gas Purifying Compound were located south of Alhambra Avenue. Each facility consisted of numerous ASTs of varying size, containing oil or some sort of petroleum product. AT&SF railroad tracks and railroad spurs were located parallel the Los Angeles River, from Mission Tower south to Commercial Street. A facility consisting of a building for hydrogen gas, vegetable oil refinery building, and numerous ASTs were located adjoining a manufactured Dutch cleanser facility. Roofs for the hydrogen gas and vegetable oil refinery

Table A2. Sanborn® Fire Insurance Maps Summary				
Years	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
	<p>Manufacturing facilities were located west of the northern portion of Segment 1. A turf manufacturer, gas and oil facility, and Gladding, McBean & Company (pottery company) were located to the east, along Clara, Avila and Bauchet Streets. The pottery company contained an oil house, lab, and auto repair facility.</p> <p>Commercial and industrial facilities were located along Former Aliso Street. Gas and oil stations were located at 323 Former Aliso Street, and 620 Alameda Street. The SCG Butadiene Division was located to the east with three large purifier storage ASTs, oil scrubbers and other industrial processing machinery.</p>	<p>west sides of Center Street, respectively, to the south-southeast of Segment 3.</p>		<p>buildings were made of corrugated asbestos. The Cudahy Packing facility, containing numerous crude oil ASTs, a fertilizer factory, and pork and poultry processing facilities, was located north of Macy Street. A pipe warehouse and crane were located between Macy and Former Aliso Streets. A paper and cloth baling company and beer warehouse were located between Former Aliso and Commercial Streets. The SCG Butadiene Division was located to the west from Alhambra Avenue (Mission Tower) to Former Aliso Street. The SCG Butadiene Division consisted of industrial processing equipment and numerous large (up to 19,000,000 cubic feet in capacity) natural gas holder, crude oil, and purifier ASTs.</p>
1953	<p>The Santa Ana Freeway (US-101) was located south of Segment 1, at the former location of Former Aliso Street. The US Post Office located west of Segment 1 was expanded to the north. A rubber product manufacturing plant, with a paint dipping area, was located east of the northern portion of Segment 1. The remaining Site and vicinity was generally the same as the 1950 map.</p>	<p>The SCG warehouse located north of Commercial Street within Segment 3 was occupied by the Maier Brewing Company. The Santa Ana Freeway (US-101) was located north of Segment 3, at the former location of Former Aliso Street. The rotary aluminum smelter west of Segment 3 was gone. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1950 map.</p>	<p>The remaining portions of the adjoining properties are generally similar as the previous year map.</p>	<p>Several structures (kilns and storage structures) within the Gladding, McBean and Company facility had been modified or removed. The ASTs associated with the SCG Butadiene Division, located adjacent to Mission Tower had been removed. Additional ASTs were located on the eastern portion, north of Macy Street. The large ASTs on the SCG Butadiene Division property were gone, with the exception of a 10,000,000-cubic-foot natural gas AST located at the SCG Macy Street Plant. The remaining portions of the adjoining properties are generally similar as the previous year map.</p>
1954	<p>A lumber yard was located on the eastern portion of Segment 1, just south of Macy Street. Additional residences were located east of the northern portion of Segment 1 on Avila and Bauchet Streets.</p>	<p>Additional buildings were located at the Maier Brewing Company located north of Commercial Street, between Vignes and Center Streets. A salvage yard and parking area were located northeast of the intersection of Vignes and Ducommun Streets within Segment 3. The SCG Butadiene Division and LA County Agricultural Commission north of Segment 3, across the freeway, were gone. A freeway onramp was located on the property that adjoined west of Segment 3, north of Commercial Street. The remaining portions of Segment 3 and adjoining properties were generally the same as the 1953 map.</p>	<p>In 1954, the Southern California Poultry Company had expanded north onto the property occupied by the former SCG yard.</p>	<p>The Connelly Iron Sponge and Governor Company Manufactured Gas Purifying Compound, which formerly adjoined south of the western portion of Segment 5, was gone. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1953 map.</p>
1957	<p>A post office loading dock was located east of the Segment 1 passenger loading platforms, between Ramirez and Lyon Streets. A large warehouse associated with the Maier Brewing Company, occupied a portion of the property southeast of Segment 1, between Lyon and Vignes Streets. Maier Brewing Company also occupied the property west of Vignes Street, which ended in a cul-de-sac. Additional residences were located east of the northern portion of Segment 1 on Avila and Bauchet Streets. The Gladding, McBean & Company facility was no longer occupied or operational.</p>	<p>No land significant land use changes were noted from the previous year.</p>	<p>Segment 4 and the adjoining properties were generally the same as on the 1954 map.</p>	<p>Two structures consisting of a hard chrome plating facility and a frozen food packaging and shipping facility, were located near adjoining south-southwest of the northwestern portion of Segment 5 (near Mission Tower). A grocery warehouse and bottle warehouse were located west of the eastern portion of Segment 5, north of the former Cudahy Packing facility, which was now mostly vacant. The remaining portions of Segment 5 and the adjoining properties were generally the same as the 1954 map.</p>
1960	<p>A post office loading dock was located east of the Segment 1 passenger loading platforms, between Ramirez and Lyon Streets. A large warehouse associated with the Maier Brewing Company, occupied a portion of the property southeast of Segment 1, between Lyon and Vignes Streets. Maier Brewing Company also</p>	<p>Additional burlap bag manufacturing facilities were located adjoining south of Segment 3. The remaining portions of Segment 3 and adjoining properties were generally the same as the 1957 map.</p>	<p>No land significant land use changes were noted from the previous year.</p>	<p>A glass warehouse was located north of the hard chrome plating facility adjoining south of the northwestern portion of Segment 5. The manufactured Dutch cleanser facility and adjacent hydrogen gas building, vegetable oil refinery building, and associated ASTs were gone, and a paper towel warehouse and</p>

Table A2. Sanborn® Fire Insurance Maps Summary				
Years	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
	occupied the property west of Vignes Street, which ended in a cul-de-sac. Additional residences were located east of the northern portion of Segment 1 on Avila and Bauchet Streets. The Gladding, McBean & Company facility was no longer occupied or operational.			scrap metal storage yard were located in the same area. A ceramic warehouse, laundry and textile chemical manufacturing company, and rolled paper warehouse, were located north of the former Cudahy Packing facility. The remaining portions and the adjoining properties were generally the same as the 1957 map.
1964	The Maier Brewing Company beer bottling warehouse was located south of the LAUS passenger platforms and US-101. The A.B.C. Brewery and Brewery Bottling, was located between Lyons Street and Vignes Street. Residences were noted east of Avila Street. An auto repair facility containing oil and gas operations was located to the east, adjoining the LAUS passenger platform area. The US Post Office expanded further to the north.	A truck storage structure with associated gas and oil equipment was located on the property at intersection of Vignes and Commercial Streets. Maier Brewing Company was located to the west, south of Commercial Street. The remaining portions and the adjoining properties were generally the same as the 1960 map.	No land significant land use changes were noted from the previous year.	The Gladding, McBean and Company and the Diamond Oil company were removed, and the Los Angeles County Central Jail was constructed. Several buildings (miscellaneous storage and vehicle repair) at the former Cudahy Packing facility, the pipe warehouse and crane located between Macy and Former Aliso Streets, and the SCG Butadiene Division development in the eastern portion were removed. The remaining portions and the adjoining properties were generally the same as the 1960 map.
1965	One of the Maier Brewing Company warehouse structures located southeast of the LAUS passenger loading platforms was removed. The Los Angeles County Central Jail was constructed, just north of Vignes Street. The remaining portions and vicinity were generally the same as on the 1960 Sanborn® map.	A burlap bag warehouse was located at the intersection of Vignes and Ducommun Streets. The remaining portions and the adjoining properties were generally the same as on the 1964 map.	The Consolidated Milling Company located between Commercial and Ducommun Streets was replaced by the Continental Chemical Products Company. The remaining portions and the adjoining properties were generally the same as on the 1964 map.	Additional structures (containing former meat processing and storage areas) at the former Cudahy Packing facility were removed. The remaining portions and the adjoining properties were generally the same as on the 1964 map.
1968	A scaffolding storage facility, with a welding shop and offices, was located east and adjoining the LAUS passenger platforms. The remaining portions and vicinity were generally the same as on the 1960 Sanborn® map.	No land significant land use changes were noted from the previous year.	The Southern California Poultry Company previously located on the north and south side of Temple Street was replaced by the Poppy Food Company. The remaining portions and the adjoining properties were generally the same as on the 1965 map.	No land significant land use changes were noted from the previous year.
1970	Segment 1 and the immediate vicinity were generally the same as on the 1965 map. LAUS railroad tracks were located on Segment 1.	No land significant land use changes were noted from the previous year.	No land significant use changes were noted from the previous year.	No land significant land use changes were noted from the previous year.

Table A3. Summary of Historical Aerial Photographs

Year	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
1923			Segment 4 was located in a developed area. Commercial, Center, Ducommun, Jackson, Temple, and Banning Streets were located within or in the vicinity of Segment 4. Numerous structures, consistent with those shown on a 1920 Sanborn® map, were located within Segment 4. A large AST was located east of Center Street, between Commercial and Ducommun Streets. Railroad tracks were located on portions of Segment 4. A large structure was located between two sets of railroad tracks south of Commercial Street, and another structure was located between Ducommun and Jackson Streets. Adjoining properties consisted of several large industrial type facilities to the north, the Los Angeles River to the east, and numerous industrial type facilities to the west. A large AST was located west of Center Street, between Ducommun and Jackson Streets, and a facility with several large ASTs was located south of Jackson Street, adjoining Segment 4. Aerial photo coverage south of Temple Street was not provided on the 1923 photograph.	Segment 5 was developed with mixed commercial/industrial and residential type structures. Railroad tracks and railroad spurs were located throughout the western portion of Segment 5, along Alhambra Avenue. Two large industrial type facilities, consistent with Gladding, McBean and Company and the Puente Oil Company, as shown on maps, were located on the western portion of Segment 5, south of Alhambra Avenue. Both facilities maintained of several ASTs. Adjoining properties near the western portion of Segment 5 were primarily industrial type properties and vacant land. Four large ASTs were located northwest of the intersection of Alhambra Avenue and the Los Angeles River, near Mission Tower; and an AST was located at the southwest corner. Railroad tracks and industrial type properties were located on the eastern portion of the Segment 5, between Macy Street and Mission Tower. Commercial type properties were located on the eastern portion of Segment 5, between Macy and Commercial Streets. Mission Tower and industrial type properties, including four ASTs, adjoining north of Segment 5. The Los Angeles River adjoined to the east. Commercial Street and industrial type properties, including several large ASTs, adjoined to the south-southwest. Three large ASTs, consistent with those associated with the SCG Butadiene Division, as shown on Sanborn® maps, were located adjoining west of the eastern portion of Segment 5, between Former Aliso and Macy Streets. Numerous industrial type facilities and vacant land were located adjoining west of this portion of Segment 5, north of Macy Street.
1923 and 1928	Segment 1 was located in a developed area with both commercial/industrial and residential size structures. Railroad tracks and railroad spurs were located throughout the southern portion of Segment 1, north of Former Aliso Street and south of Macy Street. A large facility, consistent with structures at Gladding, McBean and Company noted on Sanborn® maps, was located on the northern portion of Segment 1. Former Aliso Street was located south of Segment 1, and Lyon and Ramirez Streets were located east of Segment 1 with commercial and residential size structures beyond. Alhambra Avenue and industrial facilities were located north of Segment 1; residential and industrial sized structures were located to the west. Three large ASTs were located east of Segment 1 and east of Vignes Street.	1923- Segment 3 was located in a developed area. Adjoining streets included Former Aliso Street (north), Vignes Street (west) and Center Street (east). Commercial Street was located through the central portion of Segment 3. Numerous commercial/industrial structures, consistent with those shown on a 1920 map, were located within and adjoining to Segment 3. Six ASTs were located north of Segment 3, across Former Aliso Street, and two large ASTs were located south-southeast of Segment 3. 1928 - A large AST was located within Segment 3 at the southwest corner of the intersection of Commercial Street and Center Street. The configuration of the structures located within the remaining portions of Segment 3 and on adjoining properties were generally the same as on the 1923 photograph.	An additional large AST was located west of Center Street, between Commercial and Ducommun Streets. Railroad tracks were located within Segment 4, south of Temple Street, and large industrial structures were located adjoining west of Segment 4 in this area. The First Street overpass, railroad tracks, storage yards, and several small structures were located adjoining south of Segment 4. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1923 photograph.	Several industrial facilities were located on the western portion of Segment 5, north of Alhambra Avenue. Several additional ASTs were located on the south side of railroad tracks near Mission Tower (northern portion of Segment 5). The four ASTs located north of the railroad tracks were gone. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1923 photograph.
1938	Railroad tracks and LAUS railroad passenger platforms were located within Segment 1. Five passenger platforms were located from Former Aliso Street (on the south) to the Macy Street undercrossing. Railroad tracks continued north from the platforms to just past Vignes Street at the northern end of Segment 1. A structure was located east of the railroad tracks between Vignes and Bauchet Streets. The LAUS (in construction	No Changes Noted	No Changes Noted	The railroad tracks on the western portion of Segment 5 were oriented similar to the current layout. The railroad tracks on the northern portion of Segment 5 (near Mission Tower), curved southeast and continued south along the eastern portion of Segment 5. The ASTs located on the western portion of Segment 5, associated with the Puente Oil Company south of Alhambra Avenue, and railroad tracks were gone. Vacant land was located

Year	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
	phase) between Former Aliso Street and Macy Street, residential structures, and industrial size properties between Macy Street and Alhambra Avenue, were located adjoining west of Segment 1. Railroad tracks (Segment 5) and a vacant property, were located adjoining north of Segment 1. Lyons and Ramirez Streets (dirt road) with industrial and residential type structures were located adjoining east of Segment 1, east of Macy Street. Numerous structures were located adjoining east of Segment 1 between Macy and Vignes Streets. A large industrial type facility, with structures consistent with the Gladding, McBean and Company shown on Sanborn® maps, was located east of Segment 1, north of Vignes Street. Former Aliso Street and commercial/industrial type were located adjoining south of Segment 1. An additional AST was located east of Segment 1, east of Vignes Street.			adjoining north of the western portion of Segment 5. At least eight ASTs were located adjoining north of the eastern portion of Segment 5, near Mission Tower. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1928 photograph.
1947, 1948, and 1952	LAUS and a large facility (existing US Post Office) located immediately north of Macy Street were located adjoining west of Segment 1. A large AST was located north of Macy Street, east of Segment 1. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 1938 photograph.	Structures present on Segment 3 were consistent with the structures shown on the 1950 Sanborn® map. The property at the northwest corner of the intersection of Commercial and Center Streets was vacant. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1938 photograph, with the exception of minor structural configuration changes.	An industrial cooling tower, consistent with that shown at a SCG Absorption Plant on the 1950 Sanborn® map, was located on the property adjoining west of Segment 4, between Jackson and Temple Streets. The former ASTs on this same property were gone. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1938 photograph.	The railroad tracks were expanded on the western portion of Segment 5. Several new industrial facilities were located south of the railroad right-of-way, each which contained several ASTs. Three large ASTs related to the SCG Butadiene Division facility were located adjoining west of the eastern portion of the Segment 5, south of Alhambra Avenue near Mission Tower. A residential development and additional industrial type facilities were located adjoining north of the northern portion of Segment 5. The SCG Butadiene Division facility (as noted on Sanborn® maps) was expanded north from Macy Street to Mission Tower. The SCG facility consisted of numerous large ASTs. South of E. Macy Street, a group of three ASTs located adjoining west of the eastern portion of Segment 5, south of Macy Street, were replaced by two ASTs. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1938 photograph.
1952	No Changes Noted	No Changes Noted	No Changes Noted	Several large ASTs, including one affiliated with the SCG Butadiene Division facility, were removed from the adjoining properties near the western portion of Segment 5, south of Alhambra Avenue. A structure located south of the railroad right-of-way on the eastern portion of Segment 5, and several large ASTs affiliated with the SCG Butadiene Division facility between Macy Street and Alhambra Avenue, adjoining west of the eastern portion of Segment 5, were removed. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1947 and 1948 photographs.
1964 and 1965	A large building was located adjoining east of the railroad platforms. Four large ASTs east of Segment 1 and Vignes Street were gone. The Gladding, McBean and Company facility, located east of the northern portion of Segment 1, was replaced with the Los Angeles County Central Jail facility. The Santa Ana Freeway (US-101) and a large structure were located south of Segment 1. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 1952 photograph.	US-101 was an 8-lane highway. A freeway onramp was located on the western portion of Segment 3. Center Street was paved and continued north through Segment 3 beneath US-101. The property north of Commercial Street and east of the Vignes Street onramp was vacant. The six ASTs located north of US-101 (formerly Former Aliso Street) were gone. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1952 photograph.	The structure located between two sets of railroad tracks near Ducommun Street was gone and a smaller structure was located in the general vicinity. The facilities were modified on the properties adjoining west of Segment 4, between Jackson and Temple Streets, and between Temple and Banning Streets. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1952 photograph.	The Gladding, McBean and Company facility, adjoining east of the western portion and south of the northern portion of Segment 5, was replaced with the Los Angeles County Central Jail facility. A parking lot was located east of the Los Angeles County Central Jail facility. The SCG Butadiene Division ASTs located south of Mission Tower were gone, and three large structures, consistent with the 1960 Sanborn® map, were located adjoining south of the tracks. The ASTs adjoining the Mission Tower area

Table A3. Summary of Historical Aerial Photographs

Year	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
				were gone and a large structure was located to the south of Segment 5. Numerous structures associated with The Cudahy Packing and SCG Butadiene Division facilities were removed from the properties that adjoined west of the eastern portion of Segment 5. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1952 photograph.
1976 and 1977	No Changes Noted	The large AST located on Segment 3 (east of Center Street) and the two ASTs located near Ducommun Street were gone. Large structures were located on the properties north of Commercial Street and west of Center Street, and south of Commercial Street and east of Vignes Street. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1964 photograph.	The large AST and two other ASTs located west of Center Street, both north and south of Ducommun Street, were gone. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1964 and 1965 photographs.	The Los Angeles County Central Jail facility was expanded to the north and south of the existing structure at that location. A large structure was located where the parking adjoined to the east of this facility. Structures associated with the Cudahy Packing facility, a large AST (19 million-cubic-foot capacity based on Sanborn® maps) associated with the SCG Butadiene Division facility north of Macy Street, and remaining SCG structures between Macy Street and US-101, were gone. The large SCG ASTs located south of US-101 were also gone. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1964 and 1965 photographs.
1979	No Changes Noted	A parking lot was located adjoining east of Segment 3 at the southeast corner of Commercial and Center Streets. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1976 and 1977 photographs.	No Changes Noted	The property located adjoining west of the eastern portion of Segment 5, between Macy Street and US-101 (former SCG Butadiene Division facility), was in a construction phase, and several new structures were located in this area. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1976 and 1977 photographs.
1981 and 1983	No Changes Noted	Six large ASTs were located on the property at the southwest corner of Commercial and Center Streets. A structure was located south of Segment 3 at the southwest corner of the intersection of Ducommun and Center Streets. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1979 photograph.	A parking lot was located on the northwest portion of Segment 4, between Commercial and Ducommun Streets. Six ASTs were located adjoining west of Segment 4, across Center Street. A large warehouse was located at the southwest corner of Ducommun and Center Streets. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1976 and 1977 photographs.	1981 - A large new structure was located north of US-101, just south of Macy Street and west of the eastern portion of Segment 5. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1979 photograph. 1983- Two remaining structures associated with the Cudahy Packing facility, located north of Macy Street and adjoining west of the eastern portion of Segment 5, were gone. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1981 photograph.
1989	A tunnel was under construction beneath the southern portion of Segment 1. Several passenger platforms were removed; two platforms and two partial platforms were located on the southern portion of Segment 1. Structures adjoining the railroad platforms were removed, and numerous smaller (possibly temporary structures) were located in this area. Cleared, vacant land and additional temporary structures were located adjoining east of Segment 1. A large structure south of Segment 1, beyond US-101, was gone and this property was vacant. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 1983 photograph.	No Changes Noted	A rail tunnel (LA County Metro) was under construction along the western portion of Segment 4 from First Street to Ducommun Street, and to the southeast corner of Commercial and Center Streets. The structure located between the two sets of railroad tracks near Ducommun Street was gone, and the property was converted into a parking lot. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1981 photograph.	Structures located adjoining south of the northern portion of Segment 5, near Mission Tower, were gone. Several large structures were located on the property north of Macy Street, adjoining west of the eastern portion of Segment 5. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1983 photograph.

Table A3. Summary of Historical Aerial Photographs

Year	Segment 1	Segment 2 and 3	Segment 4	Segment 5 and 6
1994	The LAUS passenger platforms were in a construction phase. Four platforms were located over the area of the tunnel that was constructed beneath the platforms. Foundations of two large structures were located east of the platforms. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 1989 photograph.	The trench on the adjoining property east of Segment 3 was not shown. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1989 photograph.	The rail tunnel was completed, and the property within Segment 4, between Commercial and Ducommun Streets, was developed as a parking lot on its western portion and a separate fenced storage yard on its eastern portion. The rail tunnel emerged to surface level at the eastern end of Ducommun Street, and traversed south along the western edge of Segment 4. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1989 photograph.	No Changes Noted
2002	Construction activities associated with the LAUS passenger platforms and surrounding properties was completed. Seven passenger platforms were located on Segment 1, and the existing LA County Metro and Eastern Union Station buildings, and associated landscaping and parking, were located to the east. The LA County Metro Gold Line tracks were located west of the passenger platforms. A parking lot was located south of Segment 1, beyond US-101. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 1994 photograph.	The six ASTs within Segment 3 at the southwest corner of Commercial and Center Streets were gone. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 1994 photograph.	The six ASTs located adjoining west of Segment 4 were gone. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 1994 photograph.	
2005	The parking lot south of Segment 1, beyond US-101, was gone and this property was vacant. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 2002 photograph.	A large structure was constructed at the southwest corner of Commercial and Center Streets. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 2002 photograph.	No Changes Noted	No Changes Noted
2009, 2010, and 2012	The vacant property south of Segment 1, beyond US-101, was developed with an offramp associated with southbound US-101. The property located west-northwest of the northern portion of Segment 1, just north of LA County Metro Gold Line tracks, were gone and this property was vacant. The remaining portions of Segment 1 and adjoining properties were generally the same as on the 2005 photograph.	The freeway onramp at Vignes Street was gone and the property was combined with the adjoining property to the west. The remaining portions of Segment 3 and adjoining properties were generally the same as on the 2005 photograph.	A parking facility and several small structures were located adjoining west of Segment 4, between Ducommun and Jackson Streets. A large warehouse was located adjoining west of Segment 4, between Commercial and Ducommun Streets. The remaining portions of Segment 4 and adjoining properties were generally the same as on the 2005 photograph.	Two structures located south of the northern portion of Segment 5, near Mission Tower, were gone and a large structure was located in their place. The remaining portions of Segment 5 and the adjoining properties were generally the same as on the 1989 photograph.

CALIFORNIA GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

Water Well Database

Source: Department of Public Health

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 SEMS site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/07/2016 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.25 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/09/2015 has revealed that there are 15 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 02/01/2016 has revealed that there are 16 ENVIROSTOR sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 29 SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 5 EDR MGP sites within approximately 0.25 miles of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 18 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.
