Re: Metro Westside Extension

Dear Mr. Morales,

I am writing to request Sacred Lands information for a proposed Metro Westside Extension Project. The Metro Westside Extension Project proposes to construct a subway extending from Wilshire/Western along Wilshire Blvd to Santa Monica. In addition, an alternative alignment will extend from the Wilshire/Western line into Hollywood. The project falls within the following USGS 7.5 minute quadrangles:

Hollywood and Beverly Hills

The primary purpose of this Project is to increase public transportation to alleviate traffic congestion. Excavation would be undertaken as part of the project. (Please see attached figure).

I am requesting the following information:

- Notification of any sacred lands or cultural resources in the area

Please feel free to phone me at 213-996-2200, ext 2370; or via email at laurie_solis@urscorp.com.

Thank you for your attention to this request. I appreciate your continued assistance.

Sincerely,

Metro Initiates Draft EIS/EIR

On January 22, 2009, the Metro Board of Directors authorized preparation of a Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) for the Westside Subway Extension. They also approved the results of the Alternatives Analysis (AA) Study for the Metro Westside Subway Extension. The AA recommended two build alternatives for further evaluation in the Draft EIS/EIR:

- Metro Purple Line Subway Extension via Wilshire Boulevard to Santa Monica; and
- Metro Purple Line Subway Extension via Wilshire Boulevard to Santa Monica plus Subway Extension from Metro Red Line Hollywood/Highland Station via Santa Monica Boulevard.

In addition, the Draft EIS/EIR must evaluate a “no-build” and a Transportation Systems Management (TSM) alternative.

Background

Over the past 30 years, tremendous population and employment growth, worsening congestion, changing land uses and traffic patterns, as well as Metro’s challenge to meet transit demand, have led to the need to improve mobility in the Westside Corridor.

In fall 2007, Metro began an Alternatives Analysis Study (AA) for the Westside Extension Transit Corridor Study. Over a year-and-a-half, the AA considered whether a transit improvement was needed in the area and evaluated various types of transit improvements and alignments. The AA was completed in winter 2008/09.

Draft EIS/EIR Process

The purpose of the Draft EIS/EIR process is to further refine the project alternatives, assess the impacts of those alternatives both during construction and once the system is operating, and to look at possible mitigation measures. Issues to be addressed as the alternatives are refined include decisions about station locations and ultimate alignments.

At the conclusion of the Draft EIS/EIR process, Metro will recommend a Locally Preferred Alternative (LPA). The LPA will identify the project that will move forward into the Final EIS/EIR process. Elements to be considered prior to identification of the LPA are defining the initial Wilshire Boulevard segment(s) as well as future segment(s), specifying station details, examining the cost effectiveness of various segments, and the timing and funding for the implementation plan.

The Draft EIS/EIR process begins in April 2009 with public scoping meetings which provide the public an opportunity to comment on the project purpose, alternatives, and the potential effects of construction and operation that should be considered in the Draft EIS/EIR. Metro and the Federal Transit Administration (FTA) will be preparing a joint document that meets the requirements of both the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA).

The Westside Subway Extension project is slated to receive partial funding from Measure R, the half-cent sales tax increase approved by voters in November 2008.

Study Area

The 38 square mile study corridor extends from the existing Metro Rail Hollywood/Highland and Wilshire/Western Stations to the Pacific Ocean. The northern boundary of the study area follows the base of the Santa Monica Mountains along

Hollywood, Sunset and San Vicente Boulevards. The southern boundary follows Pico Boulevard. The overall study area is approximately 38 square miles.

Upcoming Meetings Metro began the current Draft Environmental Impact Statement/Environmental Impact Report (Draft EIS/EIR) for the Westside Subway Extension with six community scoping meetings held in April 2009, and attended by more than 330 people. You are invited to attend a community meeting to provide an update on Metro's continued progress with this project. These upcoming meetings will present a summary of what was heard during the April scoping meetings, provide an update as we continue to refine the alternatives, and discuss the potential construction process.

Re: Request for a Sacred Lands File search and Native American Contacts List Metro Westside Extension, with routes from downtown Los Angeles to Santa Monica and to Hollywood; Los Angeles County, California

Dear Ms. Solis:

The Native American Heritage Commission (NAHC) was able to perform record searches of its Sacred Lands File (SLF) for the affected project areas (APEs). The SLF search did indicate the presence of Native American cultural resources within one-half mile of the project areas (APEs or 'areas of potential effect'). This was the case on both routes/alignments, based on your project description and maps.

Early consultation with Native American tribes in your area is the best way to avoid unanticipated discoveries once a project is underway. Enclosed are the names of the nearest tribes that may have knowledge of cultural resources in the project areas. We recommend that you contact persons on the attached list of Native American contacts, in particular Chairperson Anthony Morales for this project. . A Native American tribe or individual may be the only source of information about a cultural resource. A Native American Tribe or Tribal Elder may be the only source of information about a cultural resource.. We also suggest that you contact the nearest information center of the California Historic Resources Information System (CHRIS); a location nearest you can be obtained by calling the Office of Historic Preservation at (916) 653-7278. Also, consultation with tribes and interested Native American individuals, on the NAHC list, should be conducted in compliance with the requirements of federal NEPA (42 U.S.C. 4321-43351) and Section 106 and 4(f) of federal NHPA (16 U.S.C. 470 (f) *et seq.*, as appropriate. .

Lead agencies should consider avoidance, as defined in Section 15370 of the California Environmental Quality Act (CEQA) when significant cultural resources could be affected by a project. Also, Public Resources Code Section 5097.98 and Health & Safety Code Section 7050.5 provide for provisions for accidentally discovered archeological resources during construction and mandate the processes to be followed in the event of an accidental discovery of any human remains in a project location other than a 'dedicated cemetery'. Discussion of these should be included in your environmental documents, as appropriate.

If you have any questions about this response to your request, please do not hesitate to contact me at (916) 653-6251.

Sincerely,
