APPENDIX C—ACQUISITIONS

C.1 Build Alternatives Acquisitions

As described in the Acquisition and Displacement of Existing Uses section of the Westside Draft EIS/EIR, all Build Alternatives would require a number of acquisitions and easements for the purposes of station boxes, station entrances, and construction staging (see Table C-1). Table C-2 lists the individual parcels that would be acquired under Alternatives 1-5 and MOS 1 & 2. This table includes both full and partial acquisitions. Figure C-1 through Figure C-18 illustrate the location of each of these acquisitions. The number labels on the maps correspond with the numbers listed in Table C-2. A detailed description of the easements (permanent, temporary, and permanent underground) can be found in the *Westside Real Estate and Acquisitions Technical Report*.

It should be noted that not all of the parcels identified will be acquired. This report identifies all potential acquisitions. There are several possible station entrance locations and construction staging areas identified, but not all will be utilized. The Draft EIS/EIR discloses all possible locations; however, actual property acquisitions will depend on the selection of station entrances and construction sites.
