Quarterly Update:	Active facility - RCRA units undergoing Closure: A hazardous waste facility permit, issued to LADWP on August 10, 1983, allowed the facility to store up to 60 55-gallon drums of hazardous waste. The site was first acquired by LADWP in 1915 which was used as the service maintenance for several LADWP s operations. Prior to the acquisition, the site was for residential use with exception of the northeastern portion of the facility which was occupied by a former manufactured gas company. LADWP did not renew the permit and requested the closure of the hazardous waste storage unit. Closure plan was implemented and investigation detected up to 2,900 ppb of PCB and 1,740 ppb of arsenic in the concrete chip and core samples, 1,320 mg/kg of TEPH, 114 ug/kg of PCE, 70.8 ug/kg of DCE, and 20,000 ug/Kg of PCB in the soil. Several metals (As, Ba, Cd, Co, Pb, Ni, Se, Tl, V, Hg) exceeding the clean up criteria were also detected. Small amount of VOCs was also detected in soil gas samples. Based on the soil sample results, it is likely the hazardous waste storage unit cannot meet the clean closure criteria. LADWP is currently preparing a closure certification report for the hazardous waste storage unit.

The former Aliso Street Manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "B" sector consists of 14 acres south of the Cesar Chavez Avenue, west of Keller Street, east of Lyon Street and north of Ramirez Street. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide, polycyclic aromatic hydrocarbons and heavy metals. See also Sites 19490235, 19490240, 19490241, 19490242, 19490243, and 19490248. Sector D Former MGP Aliso Street Site History Sector D of the Aliso Street Towne Gas facility covers approximately 11 acres and was the sector historically used for lampblack pits, processing, and storage. An area of the sector was converted to 1,3-Butadiene production in the 1940s. The Metropolitan Transportation Authority (MTA) owns and currently uses the property for offices, storage, and maintenance of buses.

Background Info: The Bortz Oil Company (BOC) was a petroleum products blending and packaging facility. The site produced various petroleum products (i.e. kerosene, paint, acetone, methyl ethyl ketone (MEK), lacquer thinners, and denatured alcohol). High levels of hydrocarbons and chlorinated solvents have been identified in the soil, while 1,1-dichloroethane (DCE), vinyl chloride, petroleum hydrocarbons, and benzene have been detected in the groundwater. On August 9, 1984, a fire broke out in one of the metal and concrete warehouse facilities on the North Spring Street property. Undetermined amounts of chemicals were consumed by the fire and spilled on the ground, which has since percolated into the soil. The Department's inspection in

December 1985, and January 1986, revealed that there were numerous uncontrolled chemical spills, leaking valves and drums, and illegal disposal of chemicals at the site. Since the groundwater is not being used as a drinking water source, the potential impact of the contaminated groundwater is not an immediate concern. The groundwater investigation will be conducted after the Spring Street property is sold. Direct contact with the contaminated soil, inhalation, and dermal absorption are the potential routes of exposure.

On April 14, 1987, the Department issued a Remedial Action Order (RAO) to BOC to develop and implement the Remedial Investigation/Feasibility Study (RI/FS), Remedial Action Plan (RAP) and remediation. On July 6, 1988, the RAO was modified to include additional property (1726 N. Naud Street) owned by (BOC). Although remedial activities have been slowed due to the death of the owner in March 1990 the Department approved the Focused Feasibility Study Report for the Naud Street property. The Probate Court has determined that BOC's assets will be used towards the remediation of the Naud Street Property. On October 23, 1992, the Dept. negotiated a Consent Order with the Executor of the BOC estate.

In August 1996, DTSC completed a removal action on the North Spring Street property. Bortz removed above-ground tanks and structures and near surface piping.

 Project Revenue Source Desc: The responsible parties have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This has not been identified as a NPL site, nor does it appear, to be a likely NPL candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for this site.

Site Description: Bortz Oil was a petroleum products blending and packaging facility. The packaging warehouse was destroyed by fire in 1984. During reconstruction, pervasive subsurface contamination was detected. The site now operates only as a warehouse for storage of chemical products.

Hazardous Waste Desc: Subsurface exploration has revealed that the soil and ground water are contaminated with acetone, toluene, xylene, benzene, methyl ethyl ketone (MEK), methylene chloride and 1,2-dichloroethane (DCE).

Threat To Public Health & Env: Major routes of concern for human and animal exposure are soils, surface water and ground water. The Los Angeles River Channel is 100 feet from the site. Contamination of the soil and ground water was documented in January, 1986. The shallow and deeper aquifers are believed to be hydraulically connected. Soil gas vapors could pose an explosive threat; no threat has been identified to date.

Site Activity Status: A remedial action order was issued April 13, 1987 directing the RPs to mitigate the site. A remedial investigation work plan was submitted and approved with modifications by DHS. Implementation of the remedial investigation commenced August 10, 1987. Routine monitoring of the ground water monitoring wells and vapor collection system is being conducted. The responsible parties were found in non-compliance with the order on April 28, 1988. Completion of the RI/FS is projected for January, 1990.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide, polycyclic aromatic hydrocarbons and heavy metals

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/26/2004
Comments: Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/10/2003
Comments: Block L - The Special initial Study described the proposed polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil remediation activity and its insignificant impact upon the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/27/2003
Comments: Block L - PEA-E investigated the former manufactured gas plant and petroleum transfer site. VOCs, SVOCs, PAHs and hydrocarbons were found to impact the site. A Renivak Action Work Plan will address clean up of this contamination. PEA-E completion was delayed due to further Site Characterization activities and delays in receiving the Human Human Health Risk Assessment reports associated with the PEA-E.

SO CAL GAS/ALISO SECTOR C, BLOCK L (Continued)

Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/26/2004
Comments: Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/10/2003
Comments: Block L - The Special initial Study described the proposed polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil remediation activity and its insignificant impact upon the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/27/2003
Comments: Block L - PEA-E investigated the former manufactured gas plant and petroleum transfer site. VOCs, SVOCs, PAHs and hydrocarbons were found to impact the site. A Renivak Action Work Plan will address clean up of this contamination. PEA-E completion was delayed due to further Site Characterization activities and delays in receiving the Human Human Health Risk Assessment reports associated with the PEA-E.

Site History: The Site is a triangular-shaped, 0.5-acre industrial property near downtown Los Angeles and is occupied by two major railroad lines (Figures 1 and 2). The Site is generally vacant and includes numerous railroad tracks, a rail switching box, aboveground and underground utility lines and small intermittently occupied building, the Mission Tower , which contains decommissioned rail traffic control and

switching equipment. The Site is located within a mixed industrial/residential area and bordered by a low-income federal housing project to the northwest, the Los Angeles City Jail to the southwest, the Los Angeles River to the east and an east-west trending major railroad line to the south. Access to the Site is restricted by high-security fencing. Surrounding properties were initially developed in the latter part of the nineteenth century, and portions of the existing railroad right-of-way were present by the early 1900s. The two major railways (Pasadena Branch and Union Pacific Line) were present by the late nineteenth century. During the late nineteenth and early twentieth centuries, crude oil was extracted from multiple small oilfields nearby and processed at the former Southern Refining Company located immediately northwest of the Site. Historical aerial photos and Sanborn maps indicate that the refinery contained four aboveground storage tanks (ASTs) for storing crude oil. The refinery was apparently dismantled by 1921 and the ASTs were removed sometime between 1921 and 1928. The Site has been used as a railroad junction for over 100 years and is currently maintained as such for use by three major passenger and freight lines. It has some of the heaviest rail traffic in Southern California, with approximately 135 passenger and two freight trains daily. The property will most likely continue to be used as a railroad junction well into the foreseeable future. Between 1990 and 2003, eight phases of site investigation were conducted. During this time, a total of 32 soil borings and six groundwater monitoring wells were installed onsite and offsite (Figure 3). Soil samples were collected generally at 5- or 10-foot intervals to a maximum depth of 45 feet bgs. The soil consists mainly of sand with relatively minor silt and gravel, and is impacted with heavy petroleum hydrocarbons primarily at depths between 5 and 35 feet bgs. Results of fuel fingerprinting analyses indicated that residual hydrocarbons in shallow soil (<15 feet bgs) were similar to asphalt or tar, whereas those in deeper soils (>15 feet) were more typical of Bunker C or crude oil. Maximum total extractable petroleum hydrocarbons (TEPH) of 16,000 milligrams per kilogram (mg/kg) were initially detected in soil from the central portion of the Site. Subsequent sampling at this location showed TEPH levels of 5,800 mg/kg. Simulated hydrocarbon distribution (carbon-chain) analyses indicated that 7% of the hydrocarbons were within the gasoline-range of C6-C12, 10% were within the diesel-range of C13-C22, and 83% were within the extended-range of C23-C40. The highest concentrations in soil were detected between 20 and 35 feet bgs within MW-4 and along portions of the western and southern railways. Eight volatile organic compounds (VOCs) and six polynuclear aromatic hydrocarbons (PAHs) were detected in soil from 0.0078 to 5.5 mg/kg. The highest VOCs were detected in soil between 25 and 35 feet bgs in MW-4 and along the southern railway track. The detected VOCs and PAHs were consistent with heavy-end hydrocarbons. Of the seventeen metals analyzed, twelve were detected, five of which were above background levels. Groundwater monitoring was conducted during six events between August 1999 and February 2003. During this time, both depth to groundwater (~ 35 feet bgs) and flow direction (south, southwest) have been relatively consistent. Groundwater has been impacted with diesel-range petroleum hydrocarbons from 0.19 to 14 milligrams per liter (mg/L), but no measurable free product has been observed. Six VOCs were detected in groundwater, including three petroleum-related VOCs (methyl-tertiary butyl ether (MTBE), isopropylbenzene and t-butylbenzene) and three

chlorinated VOCs (cVOCs) (1,1-dichloroethane, trichloroethylene, and cis-1,2-dichloroethene (cis-1,2-DCE). Most of the detected VOCs were at low concentrations and generally below their respective maximum contaminant levels (MCLs). However, cis-1,2-DCE and MTBE were detected up to 17 micrograms per liter (g/L) and 160 g/L, respectively. Although some cVOCs were detected in groundwater, no cVOCs were detected in the soil. Of the seventeen metals analyzed, eight metals were detected in filtered groundwater samples and four of those (antimony, cobalt, silver, and zinc) were detected at higher concentrations in downgradient wells. No PAHs were detected in any of the groundwater samples. No remediation has been conducted at the Site due to the technical infeasibility of cleaning up the residual heavy, relatively immobile, non-volatile petroleum hydrocarbons and access limitations within such a highly active railroad yard. Soil excavation would require shutting down a major railroad hub and dismantling or undermining portions of the railroad tracks. Surfactant chemicals could be applied that might mobilize the heavy hydrocarbons and allow for their extraction from the soil. However, such methods could also spread the contamination offsite and into groundwater and create more of a problem. Based on the past, present and likely future use of this site, an industrial/commercial land use restriction is considered the best option at this time to limit exposure to site-related chemicals of concern (COCs). Environmental Resources Management (ERM) conducted a human health risk assessment (HHRA) in 2003. Their risk evaluation was based primarily on two major exposure scenarios: risks to onsite industrial workers and onsite construction workers. The differences in these two exposure scenarios are based on the duration and degree of exposure to the COCs in soil. A third exposure scenario involves the use of shallow groundwater for residential supply. However, the shallow groundwater is of poor quality (high total dissolved solids, naturally petroleum deposits) and residential use at the Site is precluded due to its current and future use as a railroad junction and an intended deed restriction that will be recorded as part of the site closure. ERM considered exposure routes based on ingestion, dermal contact and inhalation (including VOCs, fugitive dust, etc.) and considered exposure to all site-related organic constituents in soil and groundwater as well as metals that exceeded regulatory screening levels. Based on these data, ERM calculated incremental lifetime carcinogenic risks (ILCR) of 4×10^{-6} (Industrial worker) and 1×10^{-7} (construction worker), and respective non-cancer hazard indices (HI) of 1.0 and 0.4. The HHRA was reviewed by a toxicologist with the California Office of Environmental Health Hazard Assessment (OEHHA) in 2005. OEHHA's comments were based on data collection, sampling analyses, and risk assessment assumptions. ERM provided detailed technical responses to OEHHA's comments for OEHHA and Regional Board responses that are documented in multiple response to comments sessions and best summarized in ERM's September 5, 2007 Response to Comments Concerning Human Health Risk Assessment (report). Regional Board staff reviewed the report and met with representatives from ERM and URS on November 17, 2011 to discuss the prior multiple comments and responses between OEHHA and ERM. Following this meeting, Regional Board staff determined that all but a few of OEHHA's comments had been addressed. The few outstanding comments were subsequently addressed by URS and ERM in follow-up emails to Regional Board staff. The revised risk estimates included contributions from VOCs in soil vapor and groundwater that could potentially affect indoor air quality

in the Mission Tower Building. Revised HHRA calculations by ERM in January 2012 yielded cumulative risks/hazard indices of 5×10^{-6} to 1.3×10^{-4} for industrial workers and 5×10^{-7} to 0.8×10^{-4} for construction workers. These values are within the USEPA acceptable risk range of 10^{-6} to 10^{-4} , with hazard indices < 1 . Furthermore, these risk/hazard values are below the target incremental lifetime cancer risk (ILCR) and hazard index (HI) values of 10^{-5} and 1.0, respectively, for commercial/industrial use. The slight exceedance of the hazard index of 1.3 for industrial workers above the commercial/industrial target value of 1.0 is negligible considering that hazard indices are generally expressed as one significant figure only according to the USEPA's 1989 Risk Assessment Guidance for Superfund, Volume 1 Human Health Evaluation Manual (Part A), Interim Final. In summary, the calculated risk/hazard values from residual soil, soil vapor and groundwater contamination at the Site will not result in significant risks to human health or groundwater based on the anticipated future commercial/industrial use and minimal human occupancy of the Site.

Background Info: The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA) consists of approximately 6 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer conducted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide administrative, training, and logistics support to reserve units. The facility has one Installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service Station was built in 1943 and was used for fueling vehicles on site. The aboveground portion of the station has been removed. Adjacent to the former Service Station, the Vehicle Lube Rack was used for vehicle maintenance and drained directly to a waste of oil underground storage tank(UST). Between 1987 to 1989, hazardous substances (including used oil, solvents, hydraulic fluid, and other new and used vehicle maintenance products) were stored in 55-gallon drums on the Vehicle Lube Rack. In November 1994, the waste oil UST was removed in 1994 under supervision of the Los Angeles Fire Department. Soil with detected levels of total recoverable petroleum hydrocarbons was excavated and disposed off site. In 1995, an Environmental Baseline Study (EBS) was conducted. The EBS identified the Vehicle Lube Rack and the former Service Station gasoline UST as areas requiring further investigation. In 1996, a subsurface soil investigation conducted for Site 1 indicated the presence of gasoline-range hydrocarbons, benzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroethane.

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide, polycyclic aromatic hydrocarbons and heavy metals

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: The Department received a Notice of Intent to Commence Action Under RCRA and CERCLA dated June 22, 1993. On July 30, 1993, the Department mailed the Information Request to all PRPs. The information received from the PRPs indicates that in 1945 the Empire Chemical Co. moved to the subject location. The current owner is Jerry Elkind. The company was involved in the sale of janitorial products and insecticides. It did some packing in the permises as part of their operation. One 5000-gallon UST was installed in 1947-1950 to store kerosene. Soil around the area of of the UST is contaminated with TPH and the groundwater is also suspected to be contaminated. The Department's contact with the Los Angeles City Fire Department, UG Tank Plan Check indicates that they are the lead agency. Therefore, the Department's involvement is unnecessary.

Comments: The Department received a referral dated March 8, 1994 from the County of Los Angeles, Fire Department. The site was previously a battery recycler whose owner, Victor Pena, was under investigation by LA County and the LA City Attorney's Office for the illegal discharge of hazardous waste onto the subject property. The waste materials were being discharged into an unlined pit in the rear of the property and the driveway. The RP was subsequently convicted of illegal discharge of hazardous waste, sentenced and ordered to remediate the site. The "Subsurface Investigation Report" indicates that the maximum concentration of lead in the soil is 30,000 mg/kg and minimum pH is 0.48. RP has not been compiled with the County's directives. Therefore, the site was referred to the Department. Due to the evidence of onsite contamination, the Department recommends a PEA. The RP will be notified of this recommendation.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2020
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Staff discussed the inspection findings with Mr. Esposito. Mr. Esposito contacted site personnel to order new gravel bags while Staff was onsite. Staff observed a street sweeper by the entrance to where minor sediment track-out was observed and requested that Mr. Esposito send a photograph to show that it is swept. On January 17, 2020, Mr. Esposito sent a photograph to Staff showing that the SWPPP was onsite and notified Staff that the stormwater representative would address the remaining issues. On February 4, 2020, Staff followed up to inquire about the remaining action items.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Hereby GRANTS to THE STATE OF CALIFORNIA, acting by and through the DEPARTMENT OF PARKS AND RECREATION, the following described real property situated in the State of California, County of Los Angeles:

DESCRIBED IN EXHIBIT "A" CONSISTING OF ONE (1) PAGE ATTACHED HERETO
AND BY THIS REFERENCE MADE A PART HEREOF

THE PROPERTY IS CONVEYED SUBJECT TO MATTERS OF RECORD, INCLUDING THE FOLLOWING PROVISION REGARDING USE RESTRICTIONS APPLICABLE TO HAZARDOUS MATERIALS AS SUCH TERM IS DEFINED IN THE BELOW-REFERENCED DOCUMENT:

Pursuant to that certain Covenant and Agreement dated August 17, 2001 and recorded on August 21, 2001 in the Official Records of Los Angeles County as Instrument No. 11547441 by Grantor in favor of UP, Grantee covenants and agrees with Grantor for the benefit of Grantor and UP, that the Property shall be used only for industrial activities including but not limited to manufacturing, warehousing, processing, fabrication, commercial activities, and administrative activities in support of industrial use of the Property. This covenant shall run with the land, shall inure to the benefit of and pass with each and every portion of the Property, and shall apply to and bind the respective successors-in-interest of Grantee. Notwithstanding this restriction on use, Grantee or any successor to Grantee may change or apply to change the use, operation or zoning of all or any portion of the Property to a use or zoning which may require remediation standards more stringent than industrial (such as residential, private or recreational uses), provided, however, Grantee or any successor to Grantee will be solely responsible, at its sole cost and expense, to remediate the Property (or cause the Property to be remediated) to any more stringent level required by the appropriate "Jurisdictional Agency" in connection with such change or proposed change in use, operation or zoning. "Jurisdictional Agency" shall mean any of the governmental agencies having jurisdiction with respect to the Property, including, without limitation, the California Regional Water Quality Control Board or the California Department of Toxic Substances Control.

IN WITNESS WHEREOF, the undersigned has executed this Deed as of December 21, 2001.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GRANT DEED

**TRANSFER TAX
NOT A PUBLIC RECORD**

In accordance with Section 11932 of the California Revenue and Taxation Code, Grantor has declared the amount of the transfer tax that is due by a separate statement which is not being recorded with this Grant Deed.

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, PROLOGIS LOGISTICS SERVICES INCORPORATED, a Delaware corporation ("Grantor"), hereby GRANTS to LOS ANGELES COUNTY METROPOLITAN TRANSPORTATION AUTHORITY, a California county transportation authority existing under the authority of Section 130050.2 et seq. of the California Public Utility Code ("Grantee"), all that certain real property situated in the City of Los Angeles, County of Los Angeles, State of California, described on Exhibit A which is attached hereto and by this reference incorporated herein (the "Property").

TO HAVE AND TO HOLD the Property with all the rights, privileges and appurtenances thereto belonging, or in any way appertaining, unto the said Grantee and Grantee's successors and assigns.

SUBJECT TO: (a) a lien not yet delinquent for non-delinquent real property taxes, (b) all easements, covenants, conditions, restrictions and other matters of record as of the date hereof, and (c) all matters disclosed by an ALTA/ACSM survey made by SITE TECH INC. on March 18, 2011, designated Job Number 201100344,001.

It is the intent of Grantor and Grantee that the fee title to the Property, on the one hand, and the easements and other rights in the Property or any portion thereof under the agreements and documents described on Exhibit B attached hereto and by this reference incorporated herein, on the other hand, shall not merge, but shall be kept separate and distinct.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

AND BY THIS REFERENCE MADE A PART HEREOF

THE PROPERTY IS CONVEYED SUBJECT TO MATTERS OF RECORD, INCLUDING THE FOLLOWING PROVISION REGARDING USE RESTRICTIONS APPLICABLE TO HAZARDOUS MATERIALS AS SUCH TERM IS DEFINED IN THE BELOW-REFERENCED DOCUMENT:

Pursuant to that certain Covenant and Agreement dated August 17, 2001 and recorded on August 21, 2001 in the Official Records of Los Angeles County as Instrument No. 11547441 by Grantor in favor of UP, Grantee covenants and agrees with Grantor for the benefit of Grantor and UP, that the Property shall be used only for industrial activities including but not limited to manufacturing, warehousing, processing, fabrication, commercial activities, and administrative activities in support of industrial use of the Property. This covenant shall run with the land, shall inure to the benefit of and pass with each and every portion of the Property, and shall apply to and bind the respective successors-in-interest of Grantee. Notwithstanding this restriction on use, Grantee or any successor to Grantee may change or apply to change the use, operation or zoning of all or any portion of the Property to a use or zoning which may require remediation standards more stringent than industrial (such as residential, private or recreational uses), provided, however, Grantee or any successor to Grantee will be solely responsible, at its sole cost and expense, to remediate the Property (or cause the Property to be remediated) to any more stringent level required by the appropriate "Jurisdictional Agency" in connection with such change or proposed change in use, operation or zoning. "Jurisdictional Agency" shall mean any of the governmental agencies having jurisdiction with respect to the Property, including, without limitation, the California Regional Water Quality Control Board or the California Department of Toxic Substances Control.

IN WITNESS WHEREOF, the undersigned has executed this Deed as of December 21, 2001.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SUMMARY

Ms. Himebauch has over 25 years of environmental due diligence experience working for clients in the government and private sector. As an environmental due diligence consultant, Jessica's experience encompasses project management, report preparation, technical editing, quality control, and client interaction. She has worked with various regulatory agencies including the Regional Water Quality Control Board, the Department of Toxic Substances Control, local fire departments, and various city and county departments. A summary of past selected work experience is provided below.

EXPERIENCE

Due Diligence, Northern & Southern California, Multiple Projects, City and County of Los Angeles, TA Realty, TH Real Estate, The New Home Company, Toll Brothers, Rockefeller Group, Nuveen Real Estate, Cornerstone Real Estate Advisers LLC, Lincoln Property Company, Regency Centers, MetLife Real Estate Investments, Bixby Land Company, Pacific Harbor Line, and other private real estate investment/management firms. Senior Geologist providing project management, client interaction, reviewing and assisting with Phase I ESA report writing for various projects including industrial, manufacturing, agricultural, health care, commercial, and retail properties.

Hazardous Materials Lead Technical Resource, City of Los Angeles Department of Public Works, Bureau of Engineering, Homeless Bridge Housing Project in the City of Los Angeles, CA. Prepared hazardous materials technical memorandums and environmental site assessment reports in support of the Los Angeles City Mayor's Homeless Bridge Housing Project throughout the City's council districts.

Due Diligence, City of Irvine and Tierra Verde Industries at Orange County Great Park, Irvine, CA. Prepared Phase I ESA reports for City-leased property at the Orange County Great Park (former Marine Corps Air Station El Toro) to meet City of Irvine lease requirements.

Caltrans Initial Site Assessment; Long Beach Freeway (I-710) Corridor, Los Angeles County, CA; Los Angeles County Metropolitan Transportation Authority (Metro) and Partner Agencies. Managed and conducted a California Department of Transportation (Caltrans) Initial Site Assessment (ISA) for the properties associated with the proposed Long Beach Freeway (I-710) Corridor Project, which project involved 19 miles of I-710 between Long Beach and State Route 60 (SR-60). Purpose of the ISA was to evaluate the potential presence of hazardous materials prior to design and construction within the proposed project so that liability issues could be identified relating to site clean-up and construction impacts.

Caltrans ISA; The Old Road over Santa Clara River and Southern Pacific Transportation Company (SPT Co.) Bridge Project, County of Los Angeles Department of Public Works in Cooperation with Caltrans and City of Santa Clarita. Conducted a Caltrans ISA for The Old Road Improvement Project. The project consisted of 2.12 miles of The Old Road from Henry Mayo Drive and Magic Mountain Parkway in the unincorporated Castaic Junction in western Los Angeles County. The purpose of the ISA was to evaluate the potential for the presence of

hazardous materials prior to design and construction within the proposed improvements to Colima Road so that liability issues can be identified relating to site cleanup and construction impacts.

Caltrans ISA; Interstate 405 (I-405) Auxiliary Lanes Improvement Project, Los Angeles County, CA; Los Angeles County Metropolitan Transportation Authority (Metro), California Department of Transportation (Caltrans) District 7, and South Bay Cities Council of Governments (SBCCOG). Managed and conducted a Caltrans ISA for the proposed I-405 Auxiliary Lanes Project from Redondo Beach Boulevard to El Segundo Boulevard. Objective of the ISA was to evaluate the potential for the presence of hazardous materials prior to design and construction within the proposed project right-of-way so that liability issues can be identified relating to site clean-up and construction impacts.

Caltrans ISA; Colima Road Improvement Project; Los Angeles County, CA; County of Los Angeles Department of Public Works in Cooperation with the City of Industry and Caltrans. Conducted a Caltrans ISA for the Colima Road Improvement Project. The project consisted of Colima Road, extending 4.8 miles from the City of Whittier Boundary through unincorporated Hacienda Heights. Purpose of the ISA was to evaluate the potential for the presence of hazardous materials prior to design and construction within the proposed improvements to Colima Road so that liability issues can be identified relating to site cleanup and construction impacts.

Caltrans ISA; State Route 47 (SR-47) Interchange Project; City of Los Angeles, CA; Port of Los Angeles in cooperation with the City of Los Angeles and Caltrans. Conducted a Caltrans ISA for the SR-47 Interchange Project. The project included the proposed reconfiguration of the existing interchange at State Route 47/Vincent Thomas Bridge and Harbor Boulevard/Front Street. Purpose of the ISA was to identify sites that have the potential to affect the proposed project with hazardous materials and/or wastes from current and historical environmental conditions.

Principal Investigator and Project Manager, Phase I Environmental Site Assessments throughout the United States; Canada, and Colombia, Major Media and Entertainment Company (Confidential). Scope of work included a standard Phase I and the addition of a limited compliance and environmental health and safety audit of various facilities.

Other Projects include:

Lead Technical Resource of the PEA Program for the Los Angeles Unified School District (LAUSD). Directed the background research efforts for multiple proposed new schools and school additions for LAUSD. Assisted the project director in the preparation of work plans for LAUSD proposed school sites pursuant to California regulatory requirements and attended meetings with regulatory agencies on behalf of the LAUSD.

Assisted with the Palmdale to Burbank Section of the California High Speed (HSR) System, Hazardous Materials and Wastes Technical Report for the California High-Speed Rail Authority and US Department of Transportation (DOT) Federal Railroad Administration including technical review and QA/QC.

Assisted with the Westside Subway Extension Hazardous Materials Technical Report for Metro including report preparation/writing, QA/QC, and technical review.

Managed Phase I Investigations for the Alameda Corridor Transportation Authority (ACTA) including technical review, report preparation/writing, QA/QC, and client correspondence.

Performed environmental assessments for cellular telephone antenna installations for a major cellular operator. Tasks included inspections of numerous buildings, installations, additions, collocations, and vacant land, and asbestos and lead sampling at these facilities throughout Southern California.

Principal Investigator and participant in various Phase II Investigations including soil sampling, groundwater sampling, and soil-vapor sampling through Geoprobe

drilling techniques. Activities included review of historical documents, analysis of previous reports, scheduling and overseeing subcontractors, site reconnaissance, preparation of work plans and health and safety plans, regulatory agency interaction, data analysis, and technical report preparation.
