### Introduction

The Metropolitan Transportation Commission (MTC) is proud to present this year's edition of one of its most requested documents, the *Statistical Summary of Bay Area Transit Operators,* which includes a summary of financial and operating information for the majority of public transit agencies in the nine-county San Francisco Bay Area.

We have improved the report's usability to allow for quicker and easier access to profiles of 25 public transit agencies. We hope our target audience — which includes transit operators, agencies, consultants, academic and industry researchers, elected officials and the general public — will get a clear sense of regional trends in the past 5 years.

### Format

#### **Operator Profile**

The operator profile is a one-page basic introduction to the agency, including a general description of the organization type and structure, operational information, system characteristics, inter-operator coordination, fare structure and operating revenue allocation.

#### **Financial and Operating Data**

The tables following each operator profile contain current (as of September 2010) operatorspecific financial and operating data for fiscal years 2005-06 through 2009-10 for each transit mode provided by the agency.\*

Data for this publication are taken from transit operators' annual Transportation Development Act claim for funds, the Federal Transit Administration National Transit Database reports, State Controllers' reports and from data provided to MTC through correspondence with the transit agencies.

Data for fiscal years 2005-06 through 2008-09 have been audited. This edition of the *Statistical Summary of Bay Area Transit Operators* continues to include estimated figures for the most current fiscal year (2009-10). The inclusion of fiscal year 2009-10 data is an effort to provide readers with up-to-date information. Please note that fiscal year 2009-10 data are only estimates and are subject to change. Further, because of the time period captured, the data generally does not reflect the economic downturn that many transit operators are now experiencing.

For definitions of terms that are commonly used in the text of this document, please refer to the "Definitions" section that begins on page 123.

 $^{\ast}$  In some cases, columns may not sum to total due to rounding.

# **Performance Measures**

Performance measures often are used by transit agencies for monitoring progress toward policy goals and objectives. With the five-year data presented in this report, performance measures can be used to identify trends over time, as well as for forecasting future performance. The following table lists performance concepts, the performance measures used to illuminate each concept and the formula for calculating each measure (in terms of the variables used in this document). Cost effectiveness calculations are presented both in current dollars and in constant fiscal year 2005-06 dollars, using a Bay Area-specific Consumer Price Index (CPI) to account for inflation.

| Performance Concept   | Performance Measure                             | Formula   |  |
|-----------------------|---|-----------|--|
| Cost Efficiency       | Operating cost per revenue-vehicle hour         | Cost/RVH  |  |
| Cost Effectiveness    | Operating cost per passenger                    | Cost/Pass |  |
| Service Effectiveness | Passengers per revenue-vehicle hour             | Pass/RVH  |  |
| Service Effectiveness | Passengers per revenue-vehicle mile             | Pass/RVM  |  |
| Labor Efficiency      | Revenue-vehicle hours per employee              | RVH/FTE   |  |
| Farebox Recovery      | Ratio of fares received to total operating cost | Rev/Cost  |  |

### Graphs

To effectively communicate the financial and operating data of the individual transit operators, this edition of the *Statistical Summary* continues to include graphs that highlight operating costs, total passengers, cost efficiency and cost effectiveness in addition to two new graphs: farebox recovery and service effectiveness. Also in this year's edition, the *Statistical Summary* includes regional trend graphs focusing on operating costs, total passengers, cost efficiency and cost effectiveness during the five-year period in addition to a transit operator comparison graph focusing on farebox recovery and service effectiveness.

Different scales are used in the graphs because transit operations differ by mode, operating environment, system size and other factors. Readers should be aware of the varying scales when comparing graphs between both operators and modes.

\*In partnership with AC Transit, BART provides paratransit in western Alameda and Contra Costa counties and in part of San Francisco through the East Bay Paratransit Consortium (EBPC). BART contributes 31% of the funding for EBPC. Operating Data and Performance Concepts reflect 31% of the EBPC operations.

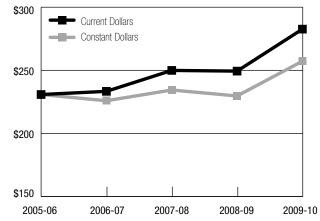

\*\*BART also provides funding to MUNI, CCCTA, Tri-Delta, and LAVTA for paratransit outside the EBPC area. Operating and performance data for those services are listed by those operators.

\*\* FTE numbers for Caltrain/JPB were not reported to the National Transit Database. Per the Joint Powers Agreement, SamTrans acts as the managing agency for Caltrain/JPB. FTE noted here for the purpose of the Bay Area Transit Operators Statistical Summary were calculated based on numbers of SamTrans staff hours billed to the JPB for work performed on behalf of Caltrain/JPB. The number of hours were then divided by 2000 hours/FTE to arrive at the FTE figure reported above; these numbers were generated for the purpose of this report only.

Total Passengers [In Thousands]

# Definitions

**Fiscal Year (FY)** Reporting period for data (e.g., FY 2008-09 runs from July 1, 2008 to June 30, 2009).

**Operating Costs (by Mode)** Total expenses from operations, vehicle maintenance, non-vehicle maintenance, general administration, adjustments, direct costs for providing charter services, and all vehicle lease costs. Excludes depreciation and amortization expenses.

**Per Capita Ridership** Total passengers for all Fixed-Routes divided by total population in service area (Fixed-Route includes all modes with the exception of paratransit).

**Total Passengers** Total of all adult, youth and student, senior and disabled, inter-operator paid transfer, and non-revenue boarding.

**Revenue Vehicle Hours** (Also referred to as "Vehicle Service Hours") The total number of hours that each transit vehicle is in revenue service, including layover time. The measure excludes hours consumed while traveling to and from storage facility, and during other deadhead travel.

**Revenue Vehicle Miles** (Also referred to as "Vehicle Service Miles") The total number of miles that each transit vehicle is in revenue service. The measure excludes miles traveled to and from storage facility, and other deadhead travel.

**Employee Equivalents** One full-time employee (FTE) equivalent equals 2,000 hours per year.

**Farebox Recovery Ratio** A basic formula of fare revenues divided by the total operating cost. MTC's formula does not reflect the legal ratio required by the Transportation Development Act.

**Average Weekday Ridership** Reflects the National Transit Database definition of Average Weekday Unlinked passenger trips defined as the number of passengers who board public transportation vehicles on an average weekday during a month.

## **Operating Revenue**

**Farebox (by Mode)** Revenue from passenger fares (single fare and passes), including revenue earned directly, special transit fares (which may include funds paid as route guarantees by organizations rather than riders), and revenue derived from revenue-sharing agreements with other services and/or operators.

**Non-Fare Revenue** Operating revenue derived from sources other than farebox, including funds from schools for the provision of service exclusively to carry students to and from school, freight charges on passenger runs, and income derived from operations associated with transit (including station and vehicle concessions from vendors, onboard and in-station advertising and automotive vehicle ferriage).

**Property Tax** Operating revenue from property tax directly levied by the transit agency.

**County Sales Tax** Operating revenue from sales taxes directly levied by the transit agency or from sales tax contributed by other agencies.

**TDA (Transportation Development Act)** Operating revenue generated by a one-quarter of one percent sales tax on all retail sales in each county; used for transit, special transit for disabled persons, and pedestrian and bicycle purposes.

**STA (State Transit Assistance)** Operating revenue generated by state funding program for mass transit operations and capital projects.

**Federal Transit Grants** Operating revenue from Job Access and Reverse Commute Grant, FTA Section 5307 Grants, Section 5311 Grants and Section 5303 Planning Grants.

**Other** Operating revenue from charter service, city or county general funds, subsidy from other sectors of operation, the Five Percent Unrestricted State Fund Reserves, feeder bus funds, AB 1107 funds, other federal, state, and local non-operator sources, and other operator sources.
