STATISTICS AND RESEARCH DIVISION

DEPARTMENT OF TRAFFIC

City of Los Angeles

P R E F A C E

This publication is a compilation of the machine-type traffic counts made by the Traffic Department of the City of Los Angeles during the calendar years of 1958, 1959 and 1960.

These counts are entirely within the physical boundaries of the City of Los Angeles and were taken on surface streets. Vehicle counts on freeways proper are not included. The following information is included in the tabulation. Reading from left to right:

The alphabetical name of the street upon which the count was taken and the direction from the cross street.

Physical descriptions of certain road characteristics should appear with these counts taken since January 1, 1960. A nine-digit code, which gives physical characteristics of the street, is used. The table on the following page defines this code.

There are two alphabetical characters which indicate the nature of the origin of the request and the purpose for which it was taken.

Day of week.

Date.

Data. The following data is included:

Twenty-four hour total volume (both directions).

Twenty-four hour total volume eastbound or northbound.

Twenty-four hour total volume westbound or southbound.

A.M. peak hours considering both directions and then considering individual directions.

P.M. peak hours considering both directions and then considering individual directions.

The time with which each of these peak hours begins is also included.

Any question pertaining to the information presented in this publication may be referred to the Statistics and Research Division of the Department of Traffic, MADison 4-5211, EXTension 2288.
