Traffic Counts-1962

City of Los Angeles
Department of Traffic

S.C.R.T.D. LIBRARY

S. E. TAYLOR, City Traffic Engineer

P R E F A C E

This publication is a compilation of traffic counts made by the Traffic Department of the City of Los Angeles during the calendar year 1962.

These counts are entirely within the physical boundaries of the City of Los Angeles and were taken on surface streets and some freeway ramps connecting to surface streets. Vehicle counts on freeways proper are not included.

Data from both manual 6 hour counts and 24 hour machine counts are included. The manual counts are identifiable by an absence of any 24 hour volume data.

The following information is included in the tabulation. Reading from left to right.

The alphabetical name of the street on which the count was taken and the cardinal direction from the cross street. The use of the term "at" in referring to a machine count indicates the approaches to the intersection were counted.

The physical description of certain road characteristics is defined by a nine digit code. The table on the following page defines this code.

There are two alphabetical characters which indicate the nature of the origin of the request and the purpose for which it was taken.

Day of week.

Date.

Data. The following data is included:

Twenty-four hour total volume (both directions.)

Twenty-four hour total volume eastbound or northbound. Machine counts only.

Twenty-four hour total volume westbound or southbound. Machine counts only.

A.M. peak hour for both directions combined and then for individual directions.

P.M. peak hour for both directions combined and then for individual directions.

The time of beginning for each of these peak hours is also included.

Any questions pertaining to the information presented in this publication may be referred to the Statistics and Research Division of the Department of Traffic, MADison 4-5211, Extension 2288.

STREET PHYSICAL CHARACTERISTICS CODE

The counts in this publication should include a 9 character code indicating the following physical characteristics of the street upon which the count was taken:

1st character	Median and Pavement Types	(See Code Below)
2nd & 3rd characters	Median Width	(Feet)
4th & 5th characters	N/E Roadway Width	(Feet)
6th & 7th characters	S/W Roadway Width	(Feet)
8th character	N/E Marked Lanes	(No.)
9th character	S/W Marked Lanes	(No.)

Median and Pavement Type Code

<u>Median Treatment</u>	<u>AC Pvmt</u>	<u>PCC Pvmt</u>
None	A	1
Single Centerline	B	2
Double Centerline	C	3
Double - Double Centerline or Paint Channelization	D	4
Paint and Bar Channelization	F	5
Raised Curb	G	6
Unimproved	J	7
