P R E F A C E

These counts are entirely within the physical boundaries of the City of Los Angeles and were taken on surface streets and some freeway ramps connecting to surface streets. Vehicle counts on freeways are not included.

Data from both the 6-hour manual counts and the 24-hour automatic counts are included. The manual counts are identified as such. A single * preceding the words manual count indicates an expanded 24-hour total based on a 6-hour count.

All intersections in this book are listed by low alpha. The use of the term "at", e.g., (Academy Road at Park Road) in referring to a machine count indicates which approaches to the intersection were counted. The terms N/O, E/O, S/O, and W/O, e.g., (Academy Road E/O Park Road) in referring to a machine count indicates that the count was taken north of, east of, south of, or west of the cross street mentioned.

The physical description of certain road characteristics is defined by a nine-digit code. The table on the following page defines this code.

There are two alphabetical characters which indicate the nature and origin of the request.

Day of week.

Date.

Data. The following data includes:

Twenty-four hour total volume northbound and southbound. Machine counts only.

Twenty-four hour total volume eastbound and westbound. Machine counts only.

A.M. peak hour for both directions combined and then for individual directions.

P.M. peak hour for both directions combined and then for individual directions.

The beginning time for each of these peak hours is also included.

Any questions pertaining to the information presented in this publication may be referred to the Survey Division of the Department of Transportation, 485-4521.
