## **1.0 PURPOSE**

This Memorandum (Addendum to Technical Report: Patronage Forecast Documentation, November, 1987) documents the approach, network development, and key simulation results of a supplemental CORE (Congressionally Ordered Re-Engineering Study) alignment alternative with specified operable segments. This is a support document for the Addendum to the Draft SEIS/SEIR for the Los Angeles Rail Rapid Transit Project (Metro Rail) which is an evaluation of the impacts of Candidate Alignment 6.

These demand forecast simulations provide a basis for the analysis of an alignment reconfiguration which, in terms of adjustments to an existing base network, would involve a shift in the existing Sunset/Vine station location in base network, Candidate Alignment 4, to a new proposed design location of Hollywood/Vine, to form a new alternative, Candidate Alignment 6. While the greatest extent of Alignment 6 is similar in coding to Alignment 4, the station configuration in the area bounded by Sunset/Vermont and Hollywood/Highland would more closely resemble Candidate Alignment 3. In addition, the Hollywood Bowl, as coded into the base network, has been eliminated as a station node in these transit networks. A list of the network alternatives prepared for this task with reference to page in this report is given in Table 1-1.

CANDIDATE ALIGNMENT 6: MOS-2B	46	2000	COR3OS14

## 2.0 NETWORK PREPARATION AND SIMULATION METHOD

These, among the third screening of CORE networks, were prepared in a manner pursuant to ongoing SCRTD network development and simulation practices. For a detailed summary of the transit network simulation process used by the GPC and District Planning Department, refer to Technical Memorandum 86.1.4, Patronage Forecasting Procedures, Barton Aschman Associates, inc., et. al, April 1987.

For this task, the District's UTPS transit demand forecast models have been applied to a modified network edition of former Candidate Alignment 4. As discussed in Section 1.0, the adjustments to the base network were essentially the network relocation of a station at Sunset/Vine to Hollywood/Vine and the removal of the Hollywood Bowl station node attributes that were included in the base Alignment 4 coding. Modifications to station coding were the construction of walk and kiss-and-ride station access networks for the new station location, Hollywood/Vine. Likewise there were required removal of unwanted attributes, i.e. extraction of walk and kiss-and-ride links associated with the Sunset/Vine and Hollywood Bowl stations.

Definition of the required background bus changes associated with each of these guideway projects were provided at the start of this project by the District Planning Department with exception to MOS-1 which was developed in accordance with the bus/rail interface described in Supporting Services Plan, Milestone 9, adopted: May, 1983. These modifications to the current SCRTD transit services are documented for the full Candidate Alignment 6 and its three operable segments in sections 3.1 through 3.4.

### 3.0 CORE STUDY ALIGNMENTS: NETWORK SIMULATIONS

#### 3.1 CANDIDATE ALIGNMENT 6: MOS-3

When MOS-1 is included, Candidate Alignment-6 is a 20.4 mile aerial and subway line with nineteen stations (Figure 3-1). Leaving the Wilshire/Alvarado station, which is common to all alignments, the alignment would proceed west, passing under Macarthur Park lake to Wilshire Blvd at Park View. It would follow Wilshire Blvd. to Virgil where it would turn northeast to the Wilshire/Vermont station, located on a diagonal in the northern half of the block formed by Wilshire Blvd., Vermont Ave., Sixth St., and Shatto Place. after leaving the Wilshire/Vermont station, the alignment would branch with one line continuing west in the Wilshire corridor and the other line turning north along Vermont to Hollywood and the San Fernando Valley. Leaving the Wilshire/Vermont station, the Western branch would be the same as for Alignment-2, described in section 1.2.1 of Chapter 2 of the Draft SEIS/SEIR.

The alignment for the valley branch would leave the Wilshire/Vermont station headed northwest then curve back under Vermont Ave at Third st. The alignment would transition from subway to aerial between Third and First streets and continue as an aerial structure in the center of Vermont Ave. through stations at Beverly and Santa Monica Boulevards. leaving the Vermont/Santa Monica station the alignment would continue on Vermont, then curve west onto Sunset Blvd., passing through the Sunset/Vermont station. The alignment would proceed past the Sunset/Western station in an aerial configuration on Sunset Blvd. and transition into subway in the block north of Sunset Blvd. and just east of the Hollywood Fwy.. The alignment would continue in subway along Hollywood blvd to stations at Hollywood/Vine and Hollywood/Highland. West of Hollywood/ Highland station, it would curve to the northwest along the original LPA alignment through the Santa Monica Mountains to the Universal City and North Hollywood stations.

Three operable segments have been identified for Alignment-6:

- o MOS-1, as identified in the August 1984 Environmental Assessment
- o MOS-2, with temporary terminals at the Wilshire/Western and Sunset/Vine stations (Section 3.2).
- o MOS-3, the full alignment with an interim west terminal at the Wilshire/Fairfax station and the north terminal at the North Hollywood station (Section 3.1).

Two additional alternative segments have been identified for Alignment-6. These alignments would have interim terminals at the following stations:

- o MOS-2A, with temporary terminals at the Wilshire/Western and Universal City stations (Section 3.3).
- o MOS-2B, with temporary terminals at the Wilshire/Vermont and Universal City stations (Section 3.4).

The full configuration of Alignment 6 has terminals at Wilshire/Fairfax and North Hollywood stations and is comprised of the 19 stations listed in Table 3-1.

The bus/rail interface and kiss-and-ride/walk link configuration for MOS-3 as effect existing bus operations are shown in Figure 3-2 and documented in Table 3-2.

Tables 3-3, 3-4, and 3-5 summarize estimated mode choice, rail station boardings (from Mode-of-Arrival) and bus system characteristics for the full alignment as simulated. Figures 3-3 and 3-4 present directional rail station access and egress, and link volumes for 24-hour and AM-Peak hour periods respectively.

 (CANDIDATE ALIGNMENT 6: MOS-3)

LINE #	BUS ROUTE / o CODED DESCRIPTION
<WEST/NORTH BRANCH LINES>	
3	SUNSET BLVD., BEVERLY DR. - BEVERLY HILLS
	o Service terminated on Sunset at the Sunset/Western station.
20	WILSHIRE BLVD. - SANTA MONICA TO LA-CBD
	o Shifts to a short-line operation at Fairfax, terminating at Wilshire/Vermont. Short-line headways are ten minutes compared to nine minutes for regular service.
21	WILSHIRE BLVD., UCLA - WESTWOOD TO LA-CBD
	o Regular service at nine minute intervals at Wilshire/Fairfax with a short-line operation resuming at the Wilshire/Vermont station and running into the LA-CBD on twelve minute headways.
22	WILSHIRE BLVD., UCLA - SANTA MONICA TO LA-CBD
	o Service terminated at the Wilshire/Fairfax station.
26	7TH ST., VIRGIL AVE., FRANKLIN AVE.
	o Franklin Ave. service turns south on Vine and terminates at the Hollywood/Vine station, accounting for half of the service frequency with the other half intercepting the Sunset/Vermont station via Sunset Blvd.
66	OLYMPIC BLVD., 8TH ST. - KOREATOWN TO EAST LA COMMERCE
	o Route extended from its current terminus at 8th/Western, north on Western two blocks to the Wilshire/Western station.

MODIFICATIONS TO BACKGROUND BUS NETWORK  
(CANDIDATE ALIGNMENT 6: MOS-3)

LINE #	BUS ROUTE / o CODED DESCRIPTION
210	VINE ST., CRENSHAW BLVD. - HOLLYWOOD TO LAWNDALE
	o Regular service turns around at the Hollywood/Vine station. An additional short-line spur operating at half hour headways feeds the Wilshire/Crenshaw station.
212	HOLLYWOOD WAY, LA BREA - BURBANK TO INGLEWOOD
	o Regular service route terminates on Hollywood (short of its Burbank service destination) at the Hollywood/Highland station. a connecting line covers the remainder of regular service from Hollywood/Vine to the Lincoln St. & Empire ave. turnaround in Burbank.
216	PARK/LA BREA SHUTTLE
	o New line circulates along Fairfax, 3rd, Hauser, and Wilshire serving the Wilshire/Fairfax and Wilshire/La Brea stations.
217	FAIRFAX, HOLLYWOOD BLVD.
	o Serves the Wilshire/Fairfax and Hollywood/Vine stations. a short-line interfaces with the Park/La Brea shuttle.
304	(LIMITED) SANTA MONICA BLVD. - SANTA MONICA TO LA-CBD
	o Service to downtown terminates at the Vermont/Santa Monica station.
320	(LIMITED) WILSHIRE BLVD. - SANTA MONICA TO LA-CBD
	o Service terminates at the Wilshire/Fairfax station.

### 3.2 CANDIDATE ALIGNMENT 6: MOS-2

The MOS-2 configuration of Alignment 6 has temporary terminals at Wilshire/Western and Sunset/Vine stations and is comprised of the 13 stations shown in Figure 3-5 and listed in Table 3-6. Figure 3-6 diagrams the bus route/rail station intercept scheme for which individual line modifications to the network coding are described in Table 3-7.

Tables 3-8, 3-9, and 3-10 summarize estimated mode choice, rail station boardings (from Mode-of-Arrival) and bus system characteristics for the operable segment as simulated. Additional network summary statistics may be found in Section 4. The disposition of all input/output datasets involved in this forecast simulation are provided in the form of a flowchart and accompanying dataset directory in Section 5.

 (CANDIDATE ALIGNMENT 6: MOS-2)

LINE #	BUS ROUTE / o CODED DESCRIPTION
<WEST/NORTH BRANCH LINES>	
3	SUNSET BLVD., BEVERLY DR. - BEVERLY HILLS
	o Service terminated on Sunset at the Sunset/Western station.
20	WILSHIRE BLVD. - SANTA MONICA TO LA-CBD
	o Shifts to a short-line operation at Western, terminating at Wilshire/Western. short-line headways are ten minutes compared to nine minutes for regular service.
21	WILSHIRE BLVD., UCLA - WESTWOOD TO LA-CBD
	o Service terminated at the Wilshire/Western station.
22	WILSHIRE BLVD., UCLA - SANTA MONICA TO LA-CBD
	o Service terminated at the Wilshire/Western station.
26	7TH ST., VIRGIL AVE., FRANKLIN AVE.
	o Franklin Ave. service turns south on Vine and terminates at the Hollywood/Vine station, accounting for approximately half of the service frequency with the other half intercepting the Sunset/Vermont station via Sunset Blvd.
66	OLYMPIC BLVD., 8TH ST. - KOREATOWN TO EAST LA COMMERCE
	o Route extended from its current terminus at 8th/Western, north on Western two blocks to the Wilshire/Western station.
67	OLYMPIC BLVD., 8TH ST. - KOREATOWN TO EAST LA COMMERCE
	o Route extended from its current terminus at 8th/Western, north on Western two blocks to the Wilshire/Western station.

### 3.3 CANDIDATE ALIGNMENT 6: MOS-2A

The MOS-2A configuration of Alignment 6 has temporary terminals at Wilshire/Western and Universal City stations and is comprised of the 15 stations shown in Figure 3-7 and listed in Table 3-11. Figure 3-8 diagrams the bus route/rail station intercept scheme for which individual line modifications to the network coding are described in Table 3-12.

Tables 3-13, 3-14, and 3-15 summarize estimated mode choice, rail station boardings (from Mode-of-Arrival) and bus system characteristics for the operable segment as simulated. Additional network summary statistics may be found in Section 4. The disposition of all input/output datasets involved in this forecast simulation are provided in the form of a flowchart and accompanying dataset directory in Section 5.

### 3.4 CANDIDATE ALIGNMENT 6: MOS-2B

the MOS-2B configuration of Alignment 6 has temporary terminals at Wilshire/Western and Universal City stations and is comprised of the 13 stations shown in Figure 3-9 and listed in Table 3-16. Figure 3-10 diagrams the bus route/rail station intercept scheme for which individual line modifications to the network coding are described in Table 3-17.

Tables 3-18, 3-19, and 3-20 summarize estimated mode choice, rail station boardings (from Mode-of-Arrival) and bus system characteristics for the operable segment as simulated. Additional network summary statistics may be found in Section 4. The disposition of all input/output datasets involved in this forecast simulation are provided in the form of a flowchart and accompanying dataset directory in Section 5.

S.C.R.T.D. LIBRARY

#### 4.0 SUMMARY STATISTICS

The following tables provide a comparative look at the Candidate Alignment alternatives simulated for this task over against the five networks originally developed in the third screening of C.O.R.E. alternatives. These tables include comparative network details (Table 4-1), skim tree specifications (Table 4-2), and fare matrix product components such as transfer and non-transfer zone-to-zone trip interchanges (ZZI's) by mode (Table 4-3).

Tables 4-4 through 4-7 give full alignment and operable segment station-to-station trip movements which detail all Metro Rail boardings and alightings relative to station of origin and station of destination. These matrices are constructed as an intermediate step in the Diamond program sequence and fit the directional Diamond diagram (24-hour) included with the full alignment in Section 3.1.

As an addendum to the documentation of the first five Candidate Alignments, this section follows, Technical Report, Patronage Forecast Documentation Volume II, Summary Statistics and Dataset Directory, November, 1987.

## 5.0 NETWORK FLOWCHART AND DATASET DIRECTORY

The remainder of this volume is an inventory of input and output datasets applicable to each of the four forecast simulations. The first of the two flowcharts presented for each simulation illustrates steps leading to the Mode-Choice Work and Mode-Choice Non-Work models where transit trip tables are developed. The second of the two flowcharts similarly tracks the remaining job steps which produce the station boarding estimates (Mode-of-Arrival) and the overall transit system patronage and performance statistics (ULOAD/URAP). Attached to each set of flowcharts (Tables 5-1 through 5-4) is a complete, stepwise documentation of the disposition of all input and output datasets catalogued on the district mainframe at the time this memo is being prepared.

As an addendum to the documentation of the first five Candidate Alignments, this section follows, Technical Report, Patronage Forecast Documentation Volume II, Summary Statistics and Dataset Directory, November, 1987.
