CORE STUDY - CULTURAL RESOURCES  
TECHNICAL REPORT

INTRODUCTION

This Technical Report supplements the January 1983 Historical/Architectural Resources report prepared for the Draft Environmental Impact Statement/Report (FEIS/FEIR). It includes the California Historic Resources Inventory forms (DPR 523) and maps of the Areas of Potential Effect from which the detailed analyses in the Draft Subsequent Environmental Impact Report were prepared.

METHODOLOGY

In order to determine which cultural resources were present along the routes of the five Candidate Alignments, staff conducted research of the national, state and local historic registers; reviewed other cultural resource surveys such as ones done by the Hollywood Revitalization Committee and the Community Redevelopment Agency; and consulted with other researchers such as the L.A. Conservancy, Hollywood Heritage, and the Western History Research Center at the L. A. County Museum of Natural History. These sources provided copies of the DPR 523 forms for eligible resources as well as opinions as to the historic qualifications of resources under study. Field surveys yielded additional and more up-to-date information about resources, while a professional photographer recorded the condition of the resources in high-quality black and white prints. The negatives are available through the District's office of Environmental Engineering, and may be reviewed or used by calling (213) 972-6439.

This technical report will be updated as more information becomes available from field sources and from the State Historic Preservation Officer.

#### IDENTIFICATION

- Common name: Hollywood Presbyterian Medical Center
- Historic name: \_\_\_\_\_
- Street or rural address: 1300 North Vermont Avenue  
City Los Angeles Zip 90027 County Los Angeles
- Parcel number: 5542-017-017
- Present Owner: Hollywood Presbyterian Medical Center Address: 1300 North Vermont Avenue  
City Los Angeles Zip 90027 Ownership is: Public \_\_\_\_\_ Private X
- Present Use: hospital Original use: \_\_\_\_\_

#### DESCRIPTION

- Architectural style: Mediterranean
- Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This building is part of the original hospital built in the early 1920's. It was designed in the Mediterranean style with a red tiled roof, brackets, and a simple course. Palm trees and shrubbery surround this part of the hospital complex that faces Vermont Avenue. This building currently houses hospital offices and the Trauma Center/Emergency Entrance. Early 20th century street lamps are also found on the property at this corner. More modern hospital buildings were added to the complex later.

The only alterations on this building are interior. The exterior facade has been well preserved.

- Construction date: 1924  
Estimated \_\_\_\_\_ Factual X
- Architect Orr, Meyer & Holler
- Builder \_\_\_\_\_
- Approx. property size (in feet)  
Frontage \_\_\_\_\_ Depth \_\_\_\_\_  
or approx. acreage 4.4 acres

The following (Items 14-19) are for structures only.

Primary exterior building material: a. Stone  b. Brick  c. Stucco  d. Adobe  e. Wood   
f. Other

Is the structure: a. On its original site?  b. Moved?  c. Unknown?

16. Year of initial construction 1921 This date is: a. Factual  b. Estimated

17. Architect (if known): Frank Meline

18. Builder (if known): Frank Meline

19. Related features: a. Barn  b. Carriage house  c. Outhouse  d. Shed(s)  e. Formal garden(s)   
f. Windmill  g. Watertower/tankhouse  h. Other  i. None

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

This 1921 apartment and store building was designed by the Frank Meline firm. Frank Meline is known for his design of the Garden Court Apartments on Hollywood Boulevard. Meline was noted for his ornate Beaux Arts, Mediterranean and Spanish designs. The detailing on this building are excellent; relatively little has been altered. The structure is scaled to the pedestrian. The apartments above have a vista on Hollywood Boulevard, which must have been quite dramatic. The original light fixture hangs within the entryway. This building is delightful to view. *currently vacant.*

21. Main theme of the historic resource: (Check only one): a. Architecture  b. Arts & Leisure   
c. Economic/Industrial  d. Exploration/Settlement  e. Government  f. Military   
g. Religion  h. Social/Education

22. Sources: List books, documents, surveys, personal interviews, and their dates:

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

A highly ornamented building of Spanish-Moorish design, this two story office structure has a low tiled roof. The first story facade is completely covered with ornamentation of Moorish motifs; primarily vines and lush foliage. There are five high arches, framed with cut stone separates the first and second story. Five French doors open onto a second story wrought iron balcony. The second story facade is of cut stone. Each door is separated by stone pilasters.

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

By the twenties, the automobile had begun to establish itself as the primary mode of transportation. As the design of the showrooms were an integral component in selling these machines, the choice of show-room designer was critical. Here, the dealer chose Morgan, Walls, and Clements, one of L. A.'s leading architectural firms to design the structure in the latest style- the Spanish Churrigueresque. Still utilized as a showroom the building has endured. As one of Hollywood's earliest still existing auto showrooms, the building evokes the past- the commercialization of Hollywood Boulevard.

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

At 5766 Hollywood Boulevard is a one story brick commercial structure. Designed to accommodate the automobile, the building has a large show-window. Surrounding this window is a flourish of Churrigueresque ornamentation. A thirties neon sign partially covers the decoration. To the west side of the front facade is the entrance. Two large palms flank the corners of the structure. A streetlamp, one of the few remaining early fixtures, is situated between the palms.

DESCRIPTION

- 7a. Architectural style: Streamline Moderne
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This school is located on the east side of Vermont Avenue between First Street and Beverly Boulevard. It is comprised of a number of classroom buildings in addition to an auditorium. The buildings were constructed in the Streamline Moderne style characterized by the use of sharp angles and segments of circles in its design. The school property is approximately 9 acres including buildings and playing fields. The auditorium and some classroom portions front on Vermont Avenue but there is a natural barrier of trees separating the buildings from the street traffic.

Alterations have been made to accomodate the building to modern times.

DESCRIPTION

- Architectural style: Spanish Colonial Revival
- Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This apartment building is designed in the Spanish Colonial style. It is four stories in height with a campanile projecting above the low-pitched red tile roof. The massing of the building is symmetrical. The upper stories are slightly recessed. The entrance is highly ornamented. Many windows are wrought iron grillework or balconies. Windows are arranged so as to draw attention to the verticality of the structure. Cut stone caps first floor windows and the recessed fire escape. There is a slight tile overhang on the first floor.

- Construction date: 1927

## DESCRIPTION

- 7a. Architectural style: Moorish
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This Moorish styled building exhibits pronounced architectural features including a large fan window with extensive detailing around it, and a five-arch entranceway. An elaborate course surrounds the entranceway and windows and continues along the front of the building. Other small front windows are also in the Moorish design - slim and detailed. The roof is arched and has a stepped cornice. Palm trees are located in the front of the building. This domed structure typifies Romanesque, Moorish, and "California Hollywood" styles.

The interior of this structure has been altered.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Noted local architect E. B. Rust designed the building in 1927. Rust designed a number of structures on Hollywood Boulevard and in the surrounding neighborhood tracts. The apartment is tastefully done, and a lot of attention has been paid to detail. It serviced the large influx of prospective residents which Hollywood experienced in the twenties. Many of these were prospective actors and actresses who shuttled back and forth between Hollywood and New York.

DESCRIPTION

- 7a. Architectural style: Spanish Moorish Influence
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

A highly ornamented building of Spanish-Moorish design, this two-story office structure has a low tiled roof. The first story facade is completely covered with ornamentation of Moorish motifs, primarily vines and lush foliage. There are five high arches, framed with cut stone, that separate the first and second stories. Five french doors open onto a second story wrought iron balcony. The second story facade is of cut stone. Each door is separated by stone pilasters.

#### SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This 1921 apartment and store building was designed by the Frank Meline firm. Frank Meline is known for his design of the Garden Court Apartments on Hollywood Boulevard. Meline was also noted for his ornate Beaux Arts, Mediterranean, and Spanish designs. The detailing on this building is excellent; relatively little has been altered. The structure is scaled to the pedestrian. The apartments above have a vista on Hollywood Boulevard, which must have been quite dramatic. The original light fixture hangs within the entryway. This building is currently vacant.

DESCRIPTION

- Architectural style: Spanish/Beaux Arts Style Influence
- Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

At the corner of Normandie and Hollywood Boulevard is a two-story brick commercial building in a mild Spanish design. The building has a clipped corner and a terracotta decorated entrance. Another entrance on Hollywood Boulevard has the same type of vaguely Spanish design over the entrance. White terracotta outlines many of the window frames and the upper portions of the top story windows.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This is a relatively intact commercial structure on this end of Hollywood Boulevard. While Beaux Arts in style, the ornament appears to be looking forward when the Churrigueresque would dominate the style of buildings. The building is in scale with the surrounding commercial and residential neighborhood.

DESCRIPTION

- 7a. Architectural style: Churrigueresque Spanish
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This is a two-story Churrigueresque Spanish commercial structure. Originally stores and offices, the building now houses a school. The front facade has a series of arches across the first floor. Inserted above windows and above doorways are Churrigueresque panels. Over the entrance the embellishment is that of a stylized harp. The building has been extensively remodeled to accommodate the school, on the interior. The roof is flat.

DESCRIPTION

- 7a. Architectural style: Art Deco
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

An imposing tower dominates this one-story Art Deco building. Pilasters lend verticality to the horizontal line and support the tower as a focal point. The stores are in a series of squared arches. Facades have been altered. Detailing on the tower has been changed, but a sculptured decoration over the main entrance is intact. The building creates a vista looking south on Gramercy. Linear, hardedged composition combined with stylized ornamentation gives the building its scope. The emphasis on geometric form is clear.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

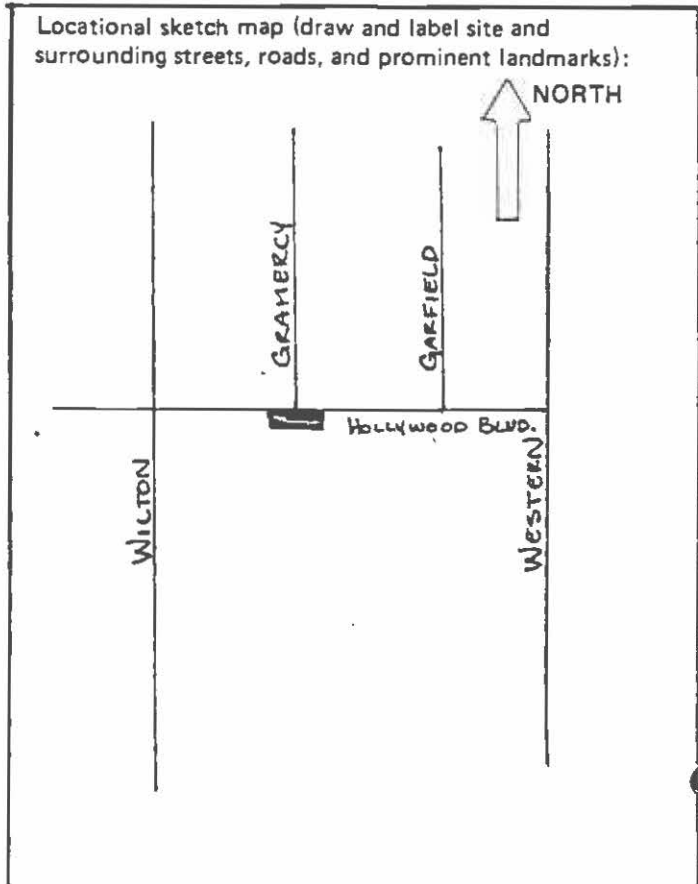

In 1930, the firm of John and Donald Parkinson built this noted Art Deco building on Hollywood Boulevard and Gramercy Place, creating a vista of imposing dimensions. Built for the California Bank, one of the building's first tenants was Florsheim Shoes. The ziggurat tower, characteristic of the Art Deco style, stresses verticality. Flattened pilasters break the building's horizontal dimensions. There are some elements in the building which hint at a moderne "transportation" mood. While the facade is very plain, the pilasters and other mechanisms of changing dimension give the building a great deal of character.

DESCRIPTION

- 7a. Architectural style: Art Deco
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This is a two-story flat roofed Art Deco commercial building. The doors on each end of the front facade have framing which steps vertically. An Art Deco design has been placed above each door. The upper story of the facade has fine recessed windows. The two end windows have vertical bands flanking their sides. The facade steps slightly forward and centers on the middle window. Recessed vertical bands flank each side of this window and a large decorative emblem is located above it. A thin band of horizontal molding at the roofline suggests a cornice. Large signs now detract from the facade.

#### DESCRIPTION

- 7a. Architectural style: Beaux Arts
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This is a strong rectangular box sitting squarely against the sidewalk at the corner of Hollywood Boulevard and Wilton Place. Two fluted engaged columns separate the front entrance into bays. Four pilasters on the Wilton side are interspersed with tall paned windows. Three wrought iron black window caps frame the two windows and the entrance door in identical fret work, each is topped by an eagle. There are two identical windows at the ends of the structure on the Wilton side. There are also four small wrought iron cases at the four sides. An entablature consisting of a dark grey concrete frieze, surmounted by a row of dentils and crowned by a full feather type motif tops the structure. Portions of the frieze have a decorative pattern. The integrity of the design is also to the inside where one can see a high coffered ceiling.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

By the late Twenties, Art Deco had become the "style" for commercial buildings. As this structure illustrates, Art Deco was utilized for even the smallest buildings. Basically a horizontal structure, here the architect creates verticality through the use of stepped vertical projections and vertical bands. The cornice is minimized to de-emphasize its horizontal effect.

This structure is one of the few Art Deco structures in this area. Built for the DeMille Production Company, this building illustrates the desire of the industry to invest in Hollywood's thriving business economy of the Twenties.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)  
Morgan, Walls and Clements were one of the large Los Angeles firms. They designed numerous structures throughout the Hollywood area. This edifice was designed for the Security Pacific Bank, which was one of the first Los Angeles banks to open branches in the Hollywood suburbs. This structure has been carefully designed in scale with the surrounding residential area. While designed in the late Beaux Arts tradition, the structure remains a unique entity because few alterations have been made on the interior and exterior. The structure stands as a strong reminder of an earlier, more wealthier period.

DESCRIPTION

- 7a. Architectural style: Spanish Churrigueresque
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

At 5766 Hollywood Boulevard is a one-story brick commercial structure. Designed to accomodate the automobile, the building has a large show window. Surrounding this window is a flourish of Churrigueresque ornamentation. A thirties neon sign partially covers the decoration. To the west side of the front facade is the entrance. Two large palms flank the corners of the structure. A street-lamp, one of the few remaining early fixtures, is situated between the palms.

**SIGNIFICANCE**

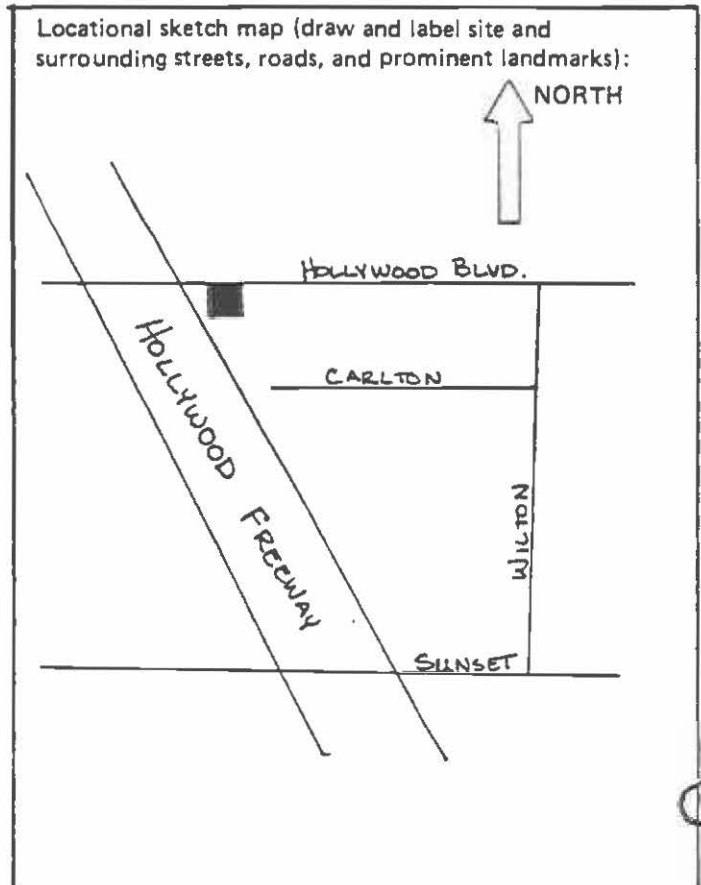

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)  
 By the twenties, the automobile had begun to establish itself as the primary mode of transportation. As the design of the showrooms were an integral component to the sales of automobiles, the choice of showroom designer was critical. Here, the dealer chose Morgan, Walls and Clements, one of Los Angeles' leading architectural firms. They designed this structure in the latest style - Spanish Churrigueresque. Still utilized as a showroom, this building has endured. As one of Hollywood's earliest still existing showrooms, the building evokes the past -- the commercialization of Hollywood Boulevard.

DESCRIPTION

- 7a. Architectural style: Gothic/Italian Romanesque
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

The main church building is a poured concrete structure of a warm brown color and designed in an Italian style of Gothic-Romanesque. It is said to be one of the first of its kind in the country. On the Wilshire Boulevard side are three recessed doorways, decorated with moulded arches and tympanums. Above the main arch is a large rose window, flanked on either side by smaller ones. The church bell-tower, modeled after a campanile in Cremona Italy, stands at the northwest corner of the structure and some 152 feet above ground. It is embellished with tile and spires and surmounted by a cross.

#### SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The firm of Allison and Allison was responsible for some of Los Angeles' most beautiful houses of worship. This church is one of their finest designs. It combines excellent reproduction of elements from the Church of St. Frances in Brescia, Italy, with functionalism demanded by modern worship. The bell tower is a Wilshire Boulevard landmark and the church interior is distinguished by its decorative beamed ceiling and stained glass windows.

The church is a designated local landmark.

DESCRIPTION

- 7a. Architectural style: Art Deco
- 7b. Briefly describe the present *physical appearance* of the site or structure and describe any major alterations from its original condition:

This Art Deco building is located on Wilshire Boulevard between Mansfield Drive and Orange Avenue. The design of the building stresses its verticality. There is a stepped roof accentuated by the use of columns of varying sizes. The geometric form is clear. Part of the building is used for retail purposes. There have been alterations for this use, as well as to the theater entrance.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This theater is significant due to its design. The theater was built in 1937 but the original structure was used for bleachers. The theater is also significant for its contribution to the arts. Although there have been alterations to the structure, its Art Deco style is most notable. It is located just east of the Miracle Mile Historic District which contains the greatest collections of Art Deco buildings in Los Angeles.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Gogerty and Weyl were local Hollywood architects who specialized in the Spanish styles. They designed such buildings as the Hollywood Playhouse on Vine St. and the Baine building at the corner of Hollywood and Whitley. This particular building is one of their designs which does not have heavy Churrigueresque embellishment. Instead the architects designed the buildings around a heavily landscaped central courtyard. A large arch screens the lush courtyard from the street. Asymmetrical massing, tiled roofs and wrought iron round off the stylistic features. In excellent condition, this is certainly one building that captures the Spanish atmosphere. Situated next to other Spanish buildings, this grouping is one of the finest on Sunset Blvd.

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

This commercial structure is a combination of Art Deco and moderne styles. The massing of the building, with its stepped facade is typical of the Art Deco style, as is the ornamentation on the piers. Each wing has rounded corners and a recessed entrance. Some alteration has occurred. The frontispiece has a circular overhang between two wide stylized piers.

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

Brooks Randall Insurance had this building designed by Gilbert C. Underwood in 1936 as office and store space. It is representative of the Art Deco both in massing and ornamentation. The stepped facade, rising 3 stories in height, is the focal point of the structure. The trend in Hollywood during the Thirties was to these large stylized buildings, and they made a dramatic impression on visitors to the area.

DESCRIPTION

- 7a. Architectural style:
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

As 6121 Sunset Blvd. is CBS a large complex of buildings ranging from one to six stories. This International style building complex fills the entire block from Gower to Vista Del Mar. Buildings range from one to five stories and are sited around a large landscaped square which opens up on Sunset Blvd. The unadorned buildings feature a variety of International style techniques: horizontally bonded windows, simple flat planes of windows and walls, and the cantilevering of the structures. The clean simple image is enhanced by the utilization of modern materials glass and concrete. Moderne features can be seen on the five story tower and include port-hole windows, glass brick and touches of streamlined corners. The building has been badly remodelled on the ground floor by the filling-in of most of the windows.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

CBS is located on the site of the old Christie Studios. This is one of Hollywood's oldest studios. In 1937 CBS began construction of its new broadcasting studio. Designed by William Lescauze and E. Heitschmidt the modern up-to-date facility, one of California's first, large commercial edifices in the International style, William Lescauze, assisted in the designing of one of this country's first International Style office towers, the Philadelphia Savings fund Society. Originally the building had first floor commercial but this has been removed. Utilizing the language of the International style, this is an effective composition designed around a courtyard. Numerous radio broadcasts originated from this building during radios heyday of the thirties and forties. This is one of the most significant buildings historically and architecturally in Hollywood.

DESCRIPTION

- 7a. Architectural style:
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This is a two story brick structure with a nine story reinforced concrete tower at one corner. The building is designed in the Italian Renaissance Revival style. The tower has a first floor of simulated stone with three arches. The second thru eight stories are relatively unadorned, except for a small balcony at the fifth floor. The ninth floor tops the tower and has balconies columns, and balustrades. This floor is set back from the lower stories, the corners are clipped and are topped by a tile roof and a flag pole. The two story section of the structure is simple with wrought iron, arched windows, a variety of stringcourses and some rusticated stone. This end of the structure is also capped with tiles. The interior is unusual, featuring an Olympic size pool, a Gothic arched dining room and spanish meeting rooms.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Hollywood Athletic Club was founded in 1921 by local resident George Moor. In 1923, they commissioned the firm of Meyer and Holler to design the most modern facility at a cost of almost half a million dollars.

The exterior dressed in Renaissance Revival garb, had modern facilities with a large gymnasium, pool, billiard rooms, library, handball courts, etc. The athletic club was the place for Hollywood's celebrities during the twenties and thirties. Rudolf Valentino frequently utilized the indoor running track. As one of the tallest buildings on Sunset Blvd., this building has been a community landmark to Hollywood. Winner of a 1923 AIA design award, the building is one of the largest Italian Renaissance Revival buildings in Hollywood.

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

Morgan, Walls and Clements designed this building in 1925 for the Hollywood Chamber of Commerce. It featured an elaborate entrance room and a large film screening room in the rear. Much of the Spanish interior and exterior are intact, making this an unusual structure. Numerous Spanish commercial buildings are in proximity to the structure, creating an unusually attractive grouping. As one of the smaller buildings on Sunset Blvd it has made the transition from the Chamber of Commerce to commercial use.

DESCRIPTION

- 7a. Architectural style: Classical Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The KMPC Studios is a large three story square boxy structure with a classical revival facade. Constructed of reinforced concrete, wood and plaster the front facade presents a series of large Doric columns. The front is symmetrical with the mid-portion closer to the street. The second story of this mid-portion has a series of Doric columns joined together by a series of balustrades. A cornice with dentils tops the structure. The entry is below a small Classical Revival canopy. A series of large palms and trees are at the front.

#### SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This complex of buildings is Warner Brothers first studio on the West Coast. Originally a pasture, the structure was built when Sunset Blvd. was a residential street. The building appears as it did during the twenties having almost no alterations. It was here that Al Jolson and John Barrymore mad their first sound films in 1926 and 1928. Don Juan was the first sound synchorized film made at this studio. In 1928, Warner brothers began their move to Burbank Studio. This structure is important to the film industry, it is where a number of innovations in film took place. It is one of hollywood's grandest studios and now one of the last on Sunset Blvd. The site represents one of Hollywood's most important eras--the silent movie.

DESCRIPTION

- Architectural style: Moderne
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition: The Hollywood Reporter building on Sunset Blvd. is actually two buildings, a one story front section and a two story rear addition. The front section is a fabulous interpretation of the thirties moderne. Its facade is sheathed in colored marble. One corner of the facade curves. A string course divides the upper and lower story portions, with the lower story being a series of showcase windows. The upper portion has a fluted rounded corner and round light fixtures. The entrance is curved into the building and is also fluted. Marvelous art moderne letters announce the structure. A flat cornice tops the one story facade. The interior is designed in an attractive Regency style. The rear addition is simple concrete with vertically banded windows a la International style.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)  
W. R. Wilkerson founded the first motion picture trade paper, the "Hollywood Reporter" in 1930. This newspaper has served the needs of the entertainment industry ever since. In 1936 A. Hanel designed the first phase of the office complex. In 1937 Vernon Russel and J. Johnson designed the exterior facade and the interior office room. The moderne was chosen as the style for the exterior; here a grey marble-like material was utilized to sheath the building in an attractive garb. The interior office-room was designed in an elegant Regency Revival mode. This attractive design remains intact with little or no alterations apparent.

**DESCRIPTION**

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

This is a series of small one and one half story shops constructed to face into a central court area which is entered from Sunset Boulevard. These shop buildings are eclectic in design, ranging from French and Italian to more traditional Spanish. The shops are multi-colored and are intentionally non-uniform in their design. The center of the court yard has a building designed like a tower that is lower rising from it. The top the tower is a glass, cylindrical structure. The name of the center. There have been three alterations to this site since the houses of subsequent shop owners.

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

The Crossroads of the World symbolizes, in its mingling of architectural styles and its "old world" atmosphere, the great social mingling which took place in Los Angeles at the time of its construction and which undoubtedly inspired its design. The centrally-located ship-style building is outstanding as an example of the unusual and eccentric architecture of Hollywood. This style of small "shopping center" situated on a major artery but facing into a quiet patio area was perhaps indicative of the small town image Hollywood was cultivating at the time, and even today remains a quiet haven in the area.

This has been designated historic-cultural monument number 134 by the Los Angeles Cultural Heritage Com.

DESCRIPTION

- 7a. Architectural style: \_\_\_\_\_
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

At 6641 Sunset Blvd, is the Blessed Sacrament School, constructed of stucco, this two story building combines the classical Beaux-Arts tradition with touches of the Spanish style. The structure is symmetrical and its plan is horizontal. At the center is the entrance which features four smooth columns with Ionic capitals. The name of the school is etched into the entablature. This front entrance culminates in a Spanish-like emblem topped by a cross. The heavy cornice wraps around the multi-planned surface of the facade. Arches are at the entrance at the first floor. The front entrance has been closed and two small ugly one story buildings flank each side of the building obscuring it. Steps lead up to the building from Sunset Blvd.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Along with the Garden Court Apartments, this school is one of few Beaux Art structures in Hollywood, situated next to the large Churrigueresque church, it certainly provides a vivid contrast of styles. This building shows the rapid development of Hollywood's Catholic community. Along with the Immaculate Heart School these are two of the oldest Catholic schools in the community. Along with the Immaculate Heart School these are two of the oldest Catholic schools in the community. J. Franklin Power, the architect for the catholic diocese designed the church next store, and the priest's residence.

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

At 6657 Sunset Blvd. is a large Spanish-Churrigueresque concrete church. A bell tower rises to one side and is topped by open domes and a cross. A large window, flanked by niches with saints faces the boulevard. Below this window is a flat roofed entrance canopy. Columns with modern motifs support the canopy. The church and tower, are decorated with a Churrigueresque ornament that in some places looks very modern. Detail around the entrance and the front wrought iron tend to appear very modern. The entire roof is covered with terra cotta tiles. The interior is a unique combination of twenties and fifties styles in a very ornate fashion.

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

Originally, Blessed Sacrament Church was located on Hollywood Blvd. The tremendous need for commercial space prompted the church to locate on Sunset Blvd and construct a new facility. Work began on the new church in 1927, but with the onset of the depression the church found itself with insufficient funds. The shell of the structure was completed but the interior and exterior ornament had to wait until further funding could be found. In 1952, under the direction of architect, Eric Trudeau the church was completed. Blessed Sacrament is an unusual combination of twenties and fifties motifs. As a visual landmark as well as an auditory one, Blessed Sacrament adds character to the surrounding low rise Spanish commercial buildings.

## DESCRIPTION

- Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

This is a two story brick Spanish-Churrigueresque commercial building at the corner of Sunset and Seward. The edifice has two perpendicular intersecting tiled roofs. A gable faces onto Sunset Blvd. It has ornate ornament which extend above the roof. A second story bay dripping with ornament is below the gable. Next to it is a series of four simple unadorned windows. The lower story has a bayed showcase window. The Seward side of the structure has an upper story wrought iron balcony. The building is well maintained and has little alterations.

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

Gogerty and Weyl were a local firm which specialized in Spanish designs. The firm was known for their designs of the Baine Building at Hollywood Blvd, and Whitley and the Hollywood Playhouse on Vine St. This building retains most of its original design and is an excellent example of their variety of the churrigueresque. Situated near several other Spanish buildings (including one of their own designs) this is certainly one of Sunset Boulevard's most impressive groupings.

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

This is one of the remarkable Churrigueresque buildings found on Sunset Blvd. Designed by Milton Sutton, the ornament is rich creating a romantic Spanish feeling. These small buildings are reminders of the early development of Sunset Blvd before it began to go high rise. Situated close to other ornate Spanish buildings, this grouping is one of the best examples of Spanish style commercial architecture in Hollywood.

DESCRIPTION

- 7a. Architectural style:
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

At 6638-40 Sunset Blvd. is a one story brick commercial building designed in the Regency, Chateausque style. The side walls extend to support two roofs, a steeply pitched manzard roof and a steeply pitched roof behind it. The roof has a stepped up appearance. At the corners of the building artificial rusticated stone extends up to the roof. Between these corners is a glass wall. Horizontal bands connect the corners above the glass. The interior lobby has some detail intact.

### SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building with its glass facade is an unusually designed structure. While the glass facade could be a remodeling, the unusual high-pitched roof is original. A mezzanine level was later added to the structure. The building's masses massing and scale is sympathetic to its neighbors.

20. Main theme of the historic resource: (If more than one is checked, number in order of importance.)  
Architecture XXX Arts & Leisure \_\_\_  
Economic/Industrial \_\_\_ Exploration/Settlement \_\_\_

1. Common name: Dr. Adams Medical Center
  2. Historic name, if known: \_\_\_\_\_
  3. Street or rural address 6634 Sunset Blvd.  
 City: Hollywood ZIP: 90028 County: Los Angeles
  4. Present owner, if known: Lawrence Adams Address: 9220 Robin Dr.  
 City: Los Angeles ZIP: 90069 Ownership is: Public  Private
  5. Present Use: Doctor Office Original Use: Residence
- Other past uses: \_\_\_\_\_

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

At 6634 Sunset Blvd is a two story moderne doctor's office. Typical moderne devices are utilized, rounded corners, glass brick and horizontal bands. The second story steps back from the first. A horizontal band runs across the front facade and extends out over the driveway. The upper story curves at the side. Glass brick fills the upper story windows. Metal screens have been placed over the front facade windows, obscuring the front facade. Such alterations have not destroyed the design of the structure.

7. Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

8. Approximate property size:

#### SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

This two story moderne building is a remodeling of an earlier residential building. All of the stylistic features associated with the moderne have been utilized in this remodeled house. This building provides a good contrast to the surrounding Spanish buildings. Its massing and height are sympathetic to the existing structures.

21. Main theme of the historic resource: (Check only one): a. Architecture  b. Arts & Leisure

**DESCRIPTION**

- Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

This is a two story brick commercial building at the corner of Las Palmas and Sunset Blvd. This flat roofed building has a small stringcourse separating the first and second floors. The corner has been clipped and the entryway is at the corner. An open loggia is a feature of the upper story-Sunset Blvd side. Numerous signs distract from the building. Window shades appear on the upper story windows.

DESCRIPTION

- 7a. Architectural style: Mediterranean
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

Mediterranean styling enlivens this two story apartment house. Hipped, tile roof cap the stucco volumes. Ornamented brackets and an egg and dart molding adorn the enclosed soffit. The building steps back on its principal (west) facade to form two nearly equally sized blocks, each framed by quoins. A bracketed balcony caps the central entry in the north block.—The windows are mostly paired, adorned with iron balconets set on corbeled ledges and topped by plasterwork pediments in scrolls and shield design. Set at an angle to the street, the building is fronted by landscaped planters. It is unaltered with the exception of the front door.

**SIGNIFICANCE**

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

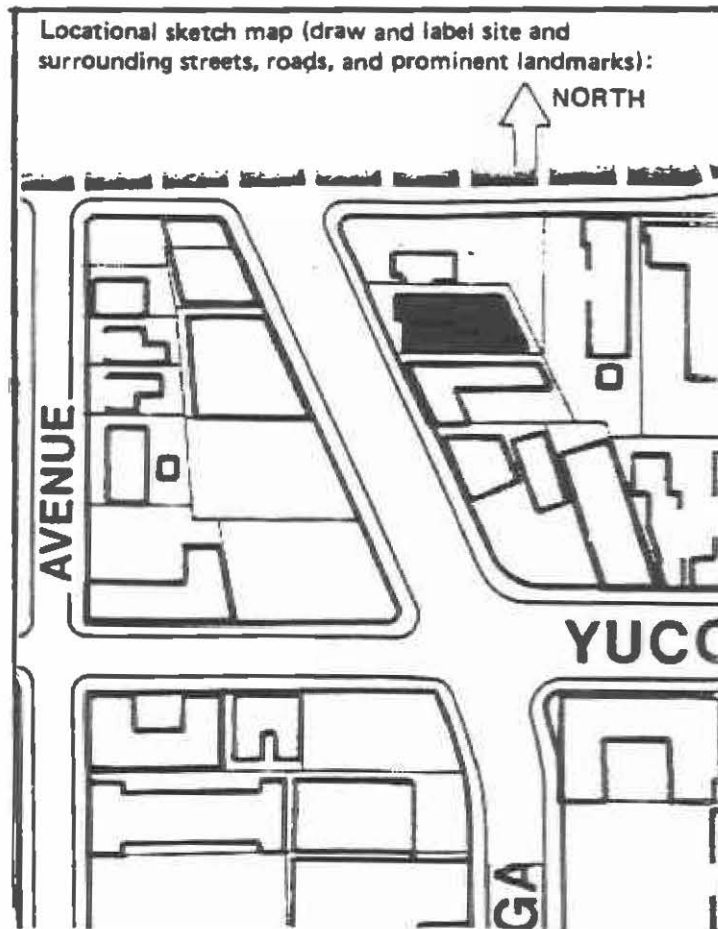

The Cahuenga Apartments were built in 1922 by the builder D.C. Messinger, who also designed the structure. Messinger's work also appears a block away, at 6424 Yucca Street. Like numerous nearby apartments, the Cahuenga satisfied a growing demand for housing near to the thriving film industry and related commercial district.

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

The Trans America Video Building is a two story structure the composition of which employs all the standard techniques and materials of the Moderne such as glass brick and streamlined curved forms. The second story is set well back from the first and at its south end curves towards the rear of the building. Its north end terminates in the buildings only visible right angle. The north and south ends of the street level curve towards the rear as well. A recessed entrance is flanked by curved bays. Rising slightly off-center from the base of the second story is yet another curved component; the sign-bearing tower. The verticality of this tower contrasts with the basic horizontality. A cornice-like element with indented moulding directly beneath it forms the main roofline. At south and north ends of the second floor are sunk relief panels, their subject matter relating to the movie industry. Glass bricks and windows form a horizontal band at this same level.

20. SIGNIFICANCE

Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

The present Trans America Video Building is a fine example of the moderne. Its designers, Walker & Eisen, successfully employed every modern device in its construction. To this they added the figurative relief panels to each corner. The firm of Walker & Eisen was the largest and most successful in Los Angeles. Part of its formula for success involved being able to follow architectural fashion and change with it when required. The TAV building is an example of this adaptability, for only slightly over a decade earlier they were designing Beaux Arts buildings. The building was the home of radio star Tom Breneman's restaurant.

DESCRIPTION

- 7a. Architectural style: Art Deco
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

1611-15 Cahuenga Blvd. is a two-story brick building with a stucco and metal art deco facade. The front facade encloses three store fronts within a metal frame ornamented with a chevron design. The second story floor windows (now closed off) are also chevron shaped as is the building's roofline. Rising from the middle of the second story is a large sign. It is a series of inverted steps coming to a point at the front of the sign - thus carrying out the chevron shape. At the street level, the stores have a common black tile base and recessed entrances which seem to be original. The Department of Water and Power office has been in the building since its construction of the building. A large cast metal art deco table sits in the middle of the office.

#### SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

S. Charles Lee was a noted theatre architect who designed such buildings as Los Angeles Theatre in downtown Los Angeles, the Max Factor Building, and the Motion Picture Producers Association Building at the corner of Hollywood Blvd. and Western Ave. S. Charles Lee designed this building so that it would be as flamboyant as possible. The large projecting art deco pylon on the roof of the building is certainly unique. S. Charles Lee demonstrates that a simple brick building can be given life by the addition of a vertical pylon.

20. Main theme of the historic resource: (If more than one is checked, number in order of importance.)

 Other past uses: \_\_\_\_\_

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:  
 At 1601 Cahuenga Blvd. is a two story brick commercial building which is a hybrid variety of the Beaux Arts classicism. Pedimented upper story windows are set between full columns of artificial rusticated stone. At the Cahuenga entrance is a broken pediment which has a large urn and a keystone. The arched lower story windows also have keystones. These windows have been blocked off. Some signage on the Cahuenga side distract from the character of the building. The roof is flat with a tiny cornice topping the building.

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):

The firm of Meyer and Holler designed this structure in 1925 for Francis Marion Thompson. Meyer and Holler designed such buildings as Grauman's Egyptian and Chinese Theatres. Here the architects have designed a structure that is classical in nature. The large broken pediment stands out. The row of pedimented windows on the Selma side provide interesting visual harmony.

Many of the surrounding buildings have been remodeled, making this an even more visually outstanding corner. The adoption of classical elements to a simple brick building is remarkable.
