PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey
 EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey
 A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW[®] Information System

Source: EDR proprietary database of groundwater flow information
 EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services
 The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
 Telephone: 800-672-5559
 SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites...

A review of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there is 1

EXECUTIVE SUMMARY

CERCLIS site within approximately 1 mile of the target property.

Table with columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Row: BAUCHET STREET, 496 BAUCHET ST, ESE 1/8 - 1/4 (0.206 mi.), L85, 128.

Federal CERCLIS NFRAP site List

CERCLIS NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites.

A review of the CERCLIS NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 8 CERCLIS NFRAP sites within approximately 1 mile of the target property.

Table with columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Rows: CALIFORNIA BRASS MFG, LA DEPARTMENT OF WATER & POWER, TRUFLEX RUBBER PRODUCTS CO.

Table with columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Rows: MAGNUS CO INC, BAUCHET PARTNERS, MOGUL CORP WESTERN DIV, UNION STATION, A & H GREENFIELD SHEET METAL.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 05/25/2010 has revealed that there is 1 CORRACTS site within approximately 1.5 miles of the target property.

Table with columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Row: LA DEPARTMENT OF WATER & POWER, 1630 NORTH MAIN ST., NE 1/4 - 1/2 (0.499 mi.), BB405, 478.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSD: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1 RCRA-TSDF site within approximately 1 mile of the target property.

Table with columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Row: LA DEPARTMENT OF WATER & POWER, 1630 NORTH MAIN ST., NE 1/4 - 1/2 (0.499 mi.), BB405, 478.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 19 RCRA-LQG sites within approximately 0.75 miles of the target property.

Table with columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Rows: 1060 NORTH VIGNES STREET, LOS ANN STREET ELEMENTARY SCHOOL, WESTERN BRASS WORKS, LA DEPARTMENT OF WATER & POWER, SMLAND PAINT COMPANY, LA FIRE STATION 4, BAUCHET STREET, GOLDEN NATURAL COMPANY, LA COUNTY METROPOLITAN TRANSPRO, C. EXECUTIVE SUMMARY

Table with 5 columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like LA CO PARKING GARAGE and MENDOZA SERVICE, INC.

The Los Angeles County Site Mitigation Log comes from Community Health Services.

A review of the LA Co. Site Mitigation list, as provided by EDR, and dated 02/09/2010 has revealed that there are 6 LA Co. Site Mitigation sites within approximately 0.5 miles of the target property.

Table with 5 columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like FORMER HYDRIL COMPANY and LINGS PROPERTY.

Table with 5 columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like VAN DER HORST PLATING and LA UNION PASSENGER TERMINAL.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial laundries; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 09/15/2010 has revealed that there are 4 DRYCLEANERS sites within approximately 0.75 miles of the target property.

Table with 5 columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like MORGAN SERVICE INC and ELITE CLEANERS.

Table with 5 columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like LA. TRANSPORTATION CENTER and TTCC, INC DBA TRIED AND TRUE C.

Los Angeles County Industrial Waste and Underground Storage Tank Sites.

A review of the LOS ANGELES CO. HMS list, as provided by EDR, and dated 12/31/2009 has revealed that there are 5 LOS ANGELES CO. HMS sites within approximately 0.5 miles of the target property.

Table with 5 columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like MAIN BURGER & CHINESE FOOD.

Table with 5 columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like LA CO FMD MENS CENTRAL JAIL and LA CO MENS DETN CENTER.

TC2922059.16 EXECUTIVE SUMMARY 27

EXECUTIVE SUMMARY

Table with 5 columns: Lower Elevation, Address, Direction / Distance, Map ID, Page. Lists sites like LA CO CENTRAL JAIL FACILITY and ALAMEDA STREET GARAGE.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2009 has revealed that there are 124 HAZNET sites within approximately 0.5 miles of the target property.

Table with 5 columns: Equal/Higher Elevation, Address, Direction / Distance, Map ID, Page.  Environmental Interest/Information System
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Classification: Small Quantity Generator

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

FINDS:

Registry ID: 110001153162

Environmental Interest/Information System
 NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Alternate Address: 1300 CARDINAL STREET
 Alternate City,St,Zip: LOS ANGELES, CA 90012
 Background Info: This site south of Cardinal Street previously operated as a refinery from 1900 - 1924 by the Southern Refining Company and Amalgamated Oil Company.
 Not reported
 Historical documents indicated refining equipment and above ground storage tanks (AGST). Dark oily materials were discovered during construction activities in the playground area. Areas were covered to prevent contact with potential contaminants.
 DTSC entered into a Voluntary Cleanup Program Agreement with the RP for oversight of a Preliminary Endangerment Assessment.
 Not reported
 AREA NORTH OF CARDINAL STREET
 This Site is divided into two areas, the area South of Cardinal Street is designated by the letter "S" following the commitment description, and the DTSC LEAD ACTIVITIES area North of Cardinal Street is designated by the letter "N" following each description.
 Comments Date: 01052001
 Comments: DTSC held an open house on Saturday 01/05/2001 from 11:00 a.m. to 2:00 p.m. at William Mead Homes Community Center. The purpose of the meeting was to present to the community the results of DTSC's investigation and to address any comment/concern.
 Comments Date: 01052001
 Comments: DTSCs Investigation and to address any comment/concern.
 Comments Date: 01092003
 Comments: DTSC approved the CEQA Initial Study.
 Comments Date: 01152003
 Comments: Draft RAP & Draft CEQA Negative Declaration released for 30 day public comment period.
 Comments Date: 01262002
 Comments: Removal Action at School completed.
 Comments Date: 01292003
 Comments: Public Meeting held at William Mead to present RAP and receive comments.
 Comments Date: 02011998
 Comments: RAW submitted 01/09/98 for DTSC review.
 Comments Date: 02221999
 Comments: CEQA package was submitted to Planning & Environmental Analysis Section for review and approval.

WILLIAM MEAD HOMES (Continued)

S101482998

Comments Date: 02282001
 Comments: DTSCs contractor completed the Site Investigation Report for William Mead Homes, North of Cardinal Street Area. The SI Reports summarized the results of the investigation that was conducted by DTSCs contractor. A total of 568 samples were collected for 178 borings and analyzed for PAHs, semi-VOCs, metals and lead.
 Comments Date: 03021995
 Comments: Site visit conducted. Site currently a low income housing project. Area identified for investigation is a playground in the center of housing project. No obvious releases or threat observed.
 Comments Date: 03112002
 Comments: DTSC reviewed and approved the "Implementation Report" for the Removal Action that took place South of Cardinal Street.
 Comments Date: 03112003
 Comments: DTSC approved the CEQA Negative Declaration.
 Comments Date: 03262004
 Comments: Housing Authority of the City of Los Angeles chose a subcontractor (Earhtech) to excavate contaminated soils.
 Comments Date: 03311998
 Comments: Comments submitted, and revised RAW for DTSC review. CEQA package under development.
 Comments Date: 04051997
 Comments: Several preliminary site control actions were taken. A fence was installed around the playground to prevent community from potential exposure. Signs were also posted around the fence to prevent trespassing. Edible and medicinal plants were removed throughout the site to prevent exposure to and ingestion of contaminants. Planter buckets/pots were distributed to the community to replace removed plants. Approximately 7000 sq. ft. of soil were reseeded with Bermuda grass. Increased irrigation of site to maintain grass.
 Comments Date: 04131995
 Comments: DTSC entered into a Voluntary Cleanup Program Agreement with the City of Los Angeles to conduct a Preliminary Site Investigation Report (SIR).
 Comments Date: 04131995

WILLIAM MEAD HOMES (Continued)

S101482998

Comments Date: 04161996
 Comments: Endangerment Assessment.
 Comments Date: 04161996
 Comments: PEA soil samples collected in Jan 1996. PAHs and heavy metals identified at depths of 0-16 ft throughout the site.
 Comments Date: 04161996
 Comments: High PAHs at 0-2 ft have prompted measures to prevent exposure to dermal and ingestion routes of exposure. Re-sod playing area & dirt cap on baseball diamond to be done. An advisory letter with preliminary measures were sent 4/19/96.
 Comments Date: 04161996
 Comments: On April 27, an informational public meeting was held to inform the community.

Environmental Interest/Information System
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

WITCO-ALLIED-KELITE (Continued)

S101617151

Completed Sub Area Name: Not reported
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 1995-10-24 00:00:00
 Comments: DTSC completed its review of the PEA Report for the Witco Corporation, Allied Kelite Division Site. Based on the information provided, DTSC determined that the residual contamination observed in the Site's soil does not pose a threat to human health via the inhalation and ingestion routes of exposure. Accordingly, DTSC concurs with the "No Further Action" recommendation for the soil with respect to the aforementioned routes of exposure. DTSC has determined that the groundwater beneath the Site has been impacted by Site operations and possibly other regional sources. The groundwater beneath the Site is not a potable source of drinking water and does not pose an imminent and substantial endangerment. However, the groundwater should be investigated. DTSC reserves the right to require additional work in the future should the Site's conditions differ from those described in the PEA

Environmental Interest/Information System
 California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Environmental Interest/Information System
 AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
 The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Historical Generators:

Date form received by agency: 03/09/1987
 Facility name: FORMER CITY OF LOS ANGELES FIRE STATION
 Site name: LA FIRE STATION 4
 Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

LA FIRE STATION 4 (Continued)

1000229423

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
 Waste name: LEAD

Violation Status: No violations found

FINDS:

Registry ID: 110002756321

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Site History: Parcel PA-018 is located at the intersection of North Spring Street and College Street in the City of Los Angeles, and across the street from the Metro Chinatown Station. The Site was previously owned by Union Pacific Railroad Company and at present is owned by the Los

BLUELINE CONSTRUCTION AUTHORITY (Continued) S106087297

Angeles to Pasadena Metro Blue Line Construction Authority (Authority). The Site is about 6 acres and is surrounded by industrial and commercial use land. Historically the Site has been used for a wood and coal yard, an oil warehouse, dwellings, and for small businesses. Since 1905 it was used as a rail freight yard, but it has been vacant since about 1970. Buildings at the Site were demolished in the late 1980s. A gasoline tank was removed in April 1987 with no evidence of leakage. Reports from 1989 indicate that the Site was used for the storage of tanks and shipping containers. Several water-bearing zones underlie the Site, but there are no production wells within one mile of the property. The shallow semi-perched zone is about 30 ft below ground surface, and the groundwater flow direction is in a south-southwest direction. Groundwater in the southwestern portion of the Site has been impacted by heavy-end hydrocarbons (diesel-range and total recoverable petroleum hydrocarbons). Based on regional groundwater flow and documented historic service station operations at neighboring off-site properties, the groundwater contamination appears to be from off-site sources. The Site is planned for development of a four-story building, with commercial, retail business on the lower level, and housing on the other three floors. There are no planned underground structures, green areas, or unpaved areas at the Site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US Geographic Names Information System (GNIS) is the official vehicle for geographic names used by the federal government and the source for applying geographic names to federal maps and other printed and electronic documents.

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM;

GOLDEN NATURAL COMPANY (Continued) **1012175636**
(2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interests/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Environmental Interest/Information System
 US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Agency Type: Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)
 SIC Code: 4111
 SIC Code 2: 4173
 Primary Waste: Stormwater Runoff
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity:
 Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
 AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

LA COUNTY METROPOLITAN TRANSPORTATION AUTHORITY REGIONAL RE (Continued) 1000396768

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include: Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:
 Facility ID: 4 191014245
 Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
 Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
 NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
 Subregion: 4
 Facility Telephone: Not reported
 Facility Contact: Sheldon Peterson
 Agency Name: LOS ANGELES UNION STATION
 Agency Address: Not reported
 Agency City, St, Zip: 0
 Agency Contact: Not reported
 Agency Telephone: Not reported
 Agency Type: Private
 SIC Code: 4011
 SIC Code 2: Not reported
 Primary Waste: Stormwater Runoff
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared

L A UNION PASSENGER TERMINAL (Continued)

S106027472

to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Remedial Investigation / Feasibility Study
 Completed Date: 1997-03-27 00:00:00
 Comments: RI/FS for soil only. Groundwater to be evaluated as part of the Towne Gas Study. Interim measures include, capping and removal of contaminated soil from top two feet.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Removal Action Completion Report
 Completed Date: 2007-02-01 00:00:00
 Comments: VOC & PAH contaminated soil removed. Residual contamination to be addressed in overall groundwater investigation proposed for the entire 52-acre site.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Removal Action Workplan
 Completed Date: 1998-06-16 00:00:00
 Comments: On June 16, 1998, DTSC approved the RAW for removal of contaminated soil at the site. Approximately 9000 cubic yards of contaminated soil will be removed. Soil contamination includes PAHs, VOCs and Metals.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Amendment - Order/Agreement
 Completed Date: 1999-01-04 00:00:00
 Comments: Transition to Chapter 6.5 - Amendment to the existing Consent Order, No. 96/97-064 signed by the RP.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Voluntary Cleanup Agreement
 Completed Date: 1997-07-07 00:00:00
 Comments: DTSC and The Gas Company signed a Consent Order calling for the preparation of a Removal Action Workplan and the implementation of

SO CAL GAS/ALISO MGP, SECTOR A - WEST PARCEL (Continued) S102564460
 remedial action at the site.
 Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Voluntary Cleanup Agreement
 Completed Date: 1994-08-16 00:00:00
 Comments: A Remedial Action Consent Order is executed by the Department. The Order provides for the completion of a Remedial Investigation/Feasibility Study to determine the extent of removal/remedial action necessary to allow planned highway construction.

 Description: Two car derailment with both cars hanging off a bridge. The derailment occurred within the Union Pacific railyard. Per the R/P there are no hazardous spills or releases but at this time she did not know what is in the cars. Union Pacific has an elevated track that goes above the entrance to the railyard and this is where the cars derailed.

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
 Waste code: D018
 Waste name: BENZENE
 Waste code: D039
 Waste name: TETRACHLOROETHYLENE
 Waste code: D040
 Waste name: TRICHLOROETHYLENE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants
or organic wastes and have little adverse impact on water quality.
Such wastes could cause turbidity and siltation. Uncontaminated soils,
rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: 0
POTW: No reclamation requirements associated with this facility.
The POTW Does not have an approved pretreatment program. Some POTWs
may have local pretreatment programs that have not been approved by
the regional board and/or EPA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order
should cause a relatively minor impairment of beneficial uses compared
to a major or minor threat. Not: All nurds without a TTWQ will be
considered a minor threat to water quality unless coded at a higher
Level. A Zero (0) may be used to code those NURDS that are found to
represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as
cooling water dischargers or those who must comply through best
management practices, facilities with passive waste treatment and
disposal systems, such as septic systems with subsurface disposal, or
dischargers having waste storage systems with land disposal such as
dairy waste ponds.

 their precursors, as well as hazardous air pollutants (HAPs).
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

LA CITY DEPARTMENT OF GENERAL SERVICES (Continued) 1005775596

provides California with information on hazardous waste shipments from
 generators, transporters, and treatment, storage, and disposal
 facilities.

RCRAInfo is a national information system that supports the Resource
 Conservation and Recovery Act (RCRA) program through the tracking of
 events and activities related to facilities that generate, transport,
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
 program staff to track the notification, permit, compliance, and
 corrective action activities required under RCRA.

 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

BB396 SO CAL GAS/ LA MAIN ST MGP Manufactured Gas Plants 1008407702
NE 1630 NORTH MAIN STREET N/A
 1/4-1/2 LOS ANGELES, CA 90012
 0.499 mi. Site 2 of 15 in cluster BB
 2634 ft. Relative: Manufactured Gas Plants:
 Higher MGP operated at the site from approximately 1906 to 1919. The MGP operations ceased at the site in 1919 when the Southern California Gas Company acquired the MGP property. In 1922 the Los Angeles City Water and Power acquired the property and dismantled the gas plant.

 California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 1995-05-02 00:00:00
 Comments: The Department completed review of the PEA report. Based on the information provided in the PEA, the site does not constitute an immediate threat that would require an expedited response action. However, DTSC recommends further action, in that the current asphalt must be maintained and a deed restriction notification be placed on the site. DTSC considers the PEA complete.

SO CAL GAS/LA MAIN ST MGP (Continued)

S102564459

Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 1993-10-28 00:00:00
 Comments: The Department received a notice of intent to initiate a PEA dated September 27, 1993. Manufactured Gas Plant (MGP) was operated at the site from approximately 1906 to 1919??? The MGP operations ceased at the site on 1919? when the Southern California Gas Company acquired the MGP properties. In 1922 Los Angeles City Water and Power acquired the property and dismantled the gas plant. The hazardous wastes found at the former MGP sites includes PAHs, Cyanides, TPHs, BTEX, Sulphides/sulfates, and Metals. Due to the evidence of hazardous wastes in the other MGP sites, the Department recommends a PEA. The Department completed review of the sampling plan. RP is investigating the site.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
 Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES

LA DEPARTMENT OF WATER & POWER (Continued)

1000102032

WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

1000102032

Site Code: 300425, 530028
 Assembly District: 45
 Senate District: 22
 Public Information Officer: Not reported
 Facility Status: Active facility - RCRA units undergoing Closure: A hazardous waste facility permit, issued to LADWP on August 10, 1983, allowed the facility to store up to 60 55-gallon drums of hazardous waste. The site was first acquired by LADWP in 1915 which was used as the service maintenance for several LADWP's operations. Prior to the acquisition, the site was for residential use with exception of the northeastern portion of the facility which was occupied by a former manufactured gas company. LADWP did not renew the permit and requested the closure of the hazardous waste storage unit. Closure plan was implemented and investigation detected up to 2,900 ppb of PCB and 1,740 ppb of arsenic in the concrete chip and core samples, 1,320 mg/kg of TEPH, 114 ug/kg of PCE, 70.8 ug/kg of DCE, and 20,000 ug/kg of PCB in the soil. Several metals (As, Ba, Cd, Co, Pb, Ni, Se, Ti, V, Hg) exceeding the clean up criteria were also detected. Small amount of VOCs was also detected in soil gas samples. Based on the soil sample results, it is likely the hazardous waste storage unit cannot meet the clean closure criteria. LADWP is currently preparing a closure certification report for the hazardous waste storage unit.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
 Waste code: D008
 Waste name: LEAD
 Waste code: F003
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
 Waste code: F005
 Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:
 Last Biennial Reporting Year: 2009

Environment Interest/Information System
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Completed Document Type: Site Screening
 Completed Date: 1994-04-15 00:00:00
 Comments: The Department received a Notice of Intent to Commence Action Under RCRA and CERCLA dated June 22, 1993. On July 30, 1993, the Department mailed the Information Request to all PRPs. The information received from the PRPs indicates that in 1945 the Empire Chemical Co. moved to the subject location. The current owner is Jerry Elkind. The company was involved in the sale of janitorial products and insecticides. It did some packing in the permises as part of their operation. One 5000-gallon UST was installed in 1947-1950 to store kerosene. Soil around the area of the UST is contaminated with TPH and the groundwater is also suspected to be contaminated. The Department's contact with the Los Angeles City Fire Department, UG Tank Plan Check indicates that they are the lead agency. Therefore, the Department's involvement is unnecessary.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Case Type: Cleanup Program Site
 Case Worker: SSH
 Local Agency: Not reported
 RB Case Number: 1088
 File Location: Regional Board
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Under Investigation
 Potential Contaminants of Concern: Benzene, Other Chlorinated Hydrocarbons, Vinyl chloride, Xylene, Heating Oil / Fuel Oil, Other Petroleum, Waste Oil / Motor / Hydraulic / Lubricating
 Site History: The site includes the street addresses 501 E. Commercial Street, 531 E. Commercial Street, and 516 Also Street in Los Angeles. The eastern portion of the site was occupied from approximately 1929 to 1957 by the Maier Brewing Company (MBC) brewery. The areas within the brewery included a blacksmith and repair shop, copper shop, kettle and mash tubs, and a beer cellar. The western third of the site was occupied by a wire and metal works shop, truck storage and shops. In addition, an auto painting facility (existing between 1906 and 1929) was identified on this portion of the site. In 1965, the western portion of the site (former parking lot) was transformed into a beer bottling and warehouse facility. By 1957, the brewery structures occupied the majority of the site. The brewery was demolished before the removal of seven underground storage tanks (USTs) in 1988. An asphalt paved parking lot occupied the site after the brewery was demolished. The documentation is not clear with

CALTRANS - COMMERCIAL STREET PROPERTY (Continued) S106485908

regard to the precise location of each former UST. However, the USTs included the 3,000-gallon fuel oil tank (Tank No. 4), the 550-gallon waste oil tank (Tanks No. 5), and the 6,000-gallon fuel oil tanks (Tanks No. 6 and No. 7), Tanks No. 1 (10,000-gallon), No. 2 (10,000-gallon), and No. 3 (3,000-gallon) stored barley. Depth to groundwater has ranged from 32 to 40 feet below ground surface (bgs). Groundwater flows south to southwest. The site was part of the realignment of ramps which allows ingress and egress to State Route 101. The properties at 501 and 531 E. Commercial Street are currently used by State Route 101 ramp. The property at 516 Also Street was graded, is an undeveloped land, and is currently not used by State Route 101 ramp.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

SMILAND PAINT COMPANY (Continued)

1000277287

of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include: Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWG will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 RB Case Number: 1185
 File Location: Regional Board
 Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
 Potential Contaminants of Concern: * Solvents, Acetone, Arsenic, Chromium, Heating Oil / Fuel Oil
 Site History: The Site is a vacant building complex owned by Lamar Plaza LLC, which purchased the property from Smiland Land Company (SLC) on October 31, 2007. The property is approximately 3.4 acres in size and was a former paint manufacturing facility, Smiland Paint Company (SPC), predecessor to SLC, occupied and operated the paint manufacturing facility from approximately 1986 to 2004. SPC stopped its paint manufacturing operations in 2004 and leased the facility to Moreware Paint Company (MPC). MPC operated the facility until November 2007. After MPC discontinued its operations, the machinery, ASTs, raw materials, etc have been removed from the property. Similar operations were conducted at the Site by North American Paint Company and Valspar Corporation from approximately 1937 to 1985. The Site was occupied by residences and horse stables prior to 1937. Site investigations were initiated at the Site in 1985 in conjunction with the abandonment-in-place of two 7,500-gallon solvent/thinner underground storage tanks (USTs). Expanded site assessments were conducted onsite and offsite in 1999, 2007, 2008 and 2009. The subsurface investigations detected low level volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and heavy metals at varying background concentrations in soil and groundwater. Total petroleum hydrocarbons (TPH) were detected in soil samples collected near the water table. Free product was also encountered floating on the water table in the onsite and offsite soil borings. The results of the site assessments indicate that the residual VOC

SMILAND PAINT COMPANY (Continued)

1000277287

contaminants in soil are localized, limited in mass and extent and are below the SLS established by the Regional Board in the Interim Site Assessment & Cleanup Guidebook, May 1996. All other potential contaminants, such as SVOCs and heavy metals, are below the United States Environmental Protection Agency (U.S. EPA) Region IX Regional Soil Screening Levels (SSLs) for the protection of human health and groundwater or at background concentrations. The TPH contamination in the soil is mostly confined to a smear zone approximately between 15 feet and 20 feet bgs and is likely resulted from the free product floating on the water table. The free product appears to be the result of a natural condition, rather than attributed to onsite releases. Based on the results of the site investigations, the Regional Board determined no further requirements (NFR) are needed with respect to soil and groundwater beneath the Site. The case has been closed.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Relative: CA BOND EXP. PLAN:
Higher Reponsible Party: DETAILED SITE EXPENDITURE PLAN
 Project Revenue Source Company: Not reported
Actual: Project Revenue Source Addr: Not reported
310 ft. Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The responsible parties have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This has not been identified as a NPL site, nor does it appear, to be a likely NPL candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for this site.

Site Description: Bortz Oil was a petroleum products blending and packaging facility. The packaging warehouse was destroyed by fire in 1984. During reconstruction, pervasive subsurface contamination was detected. The site now operates only as a warehouse for storage of chemical products.

Hazardous Waste Desc: Subsurface exploration has revealed that the soil and ground water are contaminated with acetone, toluene, xylene, benzene, methyl ethyl ketone (MEK), methylene chloride and 1,2-dichloroethane (DCE).

Threat To Public Health & Env: Major routes of concern for human and animal exposure are soils, surface water and ground water. The Los Angeles River Channel is 100 feet from the site. Contamination of the soil and ground water was documented in January, 1986. The shallow and deeper aquifers are believed to be hydraulically connected. Soil gas vapors could pose an explosive threat; no threat has been identified to date.

Site Activity Status: A remedial action order was issued April 13, 1987 directing the RPs to mitigate the site. A remedial investigation work plan was submitted and approved with modifications by DHS. Implementation of the remedial investigation commenced August 10, 1987. Routine monitoring of the ground water monitoring wells and vapor collection system is being conducted. The responsible parties were found in non-compliance with the order on April 28, 1988. Completion of the RUIFS is projected for January, 1990.

 Alternate Address: PO BOX 60368
 Alternate City,St,Zip: LOS ANGELES, CA 90012
 Alternate Address: 1746 NORTH SPRING STREET
 Alternate City,St,Zip: LOS ANGELES, CA 90012
 Background Info:
 The Bortz Oil Company (BOC) was a petroleum products blending and packaging facility. The site produced various petroleum products (i.e. kerosene, paint, acetone, methyl ethyl ketone (MEK), lacquer thinners, and denatured alcohol). High levels of hydrocarbons and chlorinated solvents have been identified in the soil, while 1,1-dichloroethane (DCE), vinyl chloride, petroleum hydrocarbons, and benzene have been detected in the groundwater.
 On August 9, 1984, a fire broke out in one of the metal and concrete warehouse facilities on the North Spring Street property. Undetermined amounts of chemicals were consumed by the fire and spilled on the ground, which has since percolated into the soil. The Department's inspection in December 1985, and January 1986, revealed that there were numerous uncontrolled chemical spills, leaking valves and drums, and illegal disposal of chemicals at the site. Since the groundwater is not being used as a drinking water source, the potential impact of the contaminated groundwater is not an immediate concern. The groundwater investigation will be conducted after the Spring Street property is sold. Direct contact with the contaminated soil, inhalation, and dermal absorption are the potential routes of exposure.

BORTZ OIL COMPANY (Continued)

S100833375

On April 14, 1987, the Department issued a Remedial Action Order (RAO) to BOC to develop and implement the Remedial Investigation/Feasibility Study (RI/FS), Remedial Action Plan (RAP) and remediation. On July 6, 1988, the RAO was modified to include additional property (1726 N. Naud Street) owned by BOC). Although remedial activities have been slowed due to the death of the owner in March 1990 the Department approved the Focused Feasibility Study Report for the Naud Street property. The Probate Court has determined that BOC's assets will be used towards the remediation of the Naud Street Property. On October 23, 1992, the Dept. negotiated a Consent Order with the Executor of the BOC estate.
 In August 1996, DTSC completed a removal action on the North Spring Street property. Bortz removed above-ground tanks and structures and near surface piping.
 Comments Date: 06302000
 Comments: former Bortz Oil site. Bortz will implement a soil vapor extraction technology to achieve the remedial goals set forth in the RAW. DTSC has determined and filed a CEQA Notice of Exemption for the Site.
 Comments Date: 06302000
 Comments: The Removal Action Workplan (RAW) for the above site was approved on June 30, 2000. As indicated in the RAW, Soil Vapor Extraction will be implemented at the area designated as AOPC-2.
 Comments Date: 06302000
 Comments: Not reported
 Comments Date: 07071993
 Comments: The CEQA documents (negative declaration) for the Bortz Oil Company are submitted to the State Clearinghouse. The only comment received was from Caltrans who requested that transportation be conducted on off-peak hours.
 Comments Date: 07071993
 Comments: The Final RAP for the Bortz Oil Company is approved. The alternative selected is to excavate and dispose of contaminated soil. The Final RAP also contains the Remedial Design Workplan which was approved concurrent with the adoption of the Final RAP.
 Comments Date: 07251991
 Comments: Petroleum products blending and packaging facility. During production of petroleum products, various hazardous substances were used, including mineral spirits & kerosene.
 Comments Date: 07251991

BORTZ OIL COMPANY (Continued)

S10083375

Comments: High levels of hydrocarbons and chlorinated solvents have been identified in the soil while 1,1-dichloroethane (DCE), vinyl chloride, petroleum hydrocarbons, and benzene have been detected in the groundwater.

Comments Date: 07251991
 Comments: DTSC approves the Removal Action Workplan and Neg. Dec. for Bortz Oil-Spring Street property. The Removal Action involves removal of above-ground tanks and structures.

Comments Date: 08021996
 Comments: A deed restriction to restrict use of the property was recorded on August 19, 2002. The deed restriction prohibits sensitive uses of the property including, but not limited to residential, hospital, public or private school uses for persons under 21 years of age, and daycare uses for children.

Comments Date: 08192002
 Comments: DTSC certified that the soil cleanup has been completed in accordance with the provisions of the approval RAW. A deed restriction has been recorded prior to DTSC's issuance of certification. This certification is for the soil only.

Comments Date: 08292002
 Comments: DTSC reviews the Feasibility Studies (FS) report dated 10/6/99. Due to the potential presence of MTBE, a revised Baseline Risk Assessment is being considered. Estimated time of approval is June 2000.

Comments Date: 10281993
 Comments: The Department of Toxic Substances Control completes review of the Bortz Oil Company, Naud Street Property. Final Site Closure Report. DTSC determined that the removal activities are in accordance with the provisions of the Remedial Action Plan.

Comments Date: 10301997
 Comments: Completion of RA. The RA included removal of above-ground tanks and structures and rough grading.

BORTZ OIL COMPANY (Continued)

S10083375

Comments Date: 12082004
 Comments: DTSC signed an acceptance of Allowance of Creditors Claim with the Bortz Estate in December 8th, 2004. The Estate settled past costs.

Comments Date: 12211998
 Comments: Transition to Chapter 6.5. Amendment to the existing Consent Order No. 86/87-039RA signed by the RP.

Comments Date: 01071998
 Comments: Bortz conducts a soil gas survey on the North Spring Street property. Bortz also samples all the groundwater monitoring wells.

Comments Date: 02102003
 Comments: Semi-annual groundwater monitoring begins. ISOC groundwater remediation pilot test begins.

Comments Date: 03012000
 Comments: DTSC reviews a draft Soil Removal Action Workplan for the North Spring Street property was submitted to DTSC for review and approval.

Comments Date: 04042002
 Comments: Soil Vapor extraction was operated from June 2000 to April 2001. Soil Vapor confirmation sampling completed on 12/15/2001 indicate that cleanup goals for the Site have been met.

Comments Date: 04151998
 Comments: Sampling report submitted and accepted by DTSC.

Comments Date: 05131999
 Comments: DTSC reviews the Baseline Risk Assessment (BRA) report dated May 13, 1999. DTSC concurs with the BRA with minor comments.

Comments Date: 06302000
 Comments: DTSC approves the Soil Removal Action Workplan (RAW) for the BEP DATABASE PCODE

 Completed Sub Area Name: Not reported
 Completed Document Type: CEQA - Notice of Exemption
 Completed Date: 2000-06-30 00:00:00
 Comments: DTSC approves the Soil Removal Action Workplan (RAW) for the former Bortz Oil site. Bortz will implement a soil vapor extraction technology to achieve the remedial goals set forth in the RAW. DTSC has determined and filed a CEQA Notice of Exemption for the Site. The Removal Action Workplan (RAW) for the above site was approved on June 30, 2000. As indicated in the RAW, Soil Vapor Extraction will be implemented at the area designated as AOPC-2.

Environmental Interest/Information System
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interests/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Generated waste on-site: No

Historical Generators:
 Date form received by agency: 03/07/2004
 Facility name: EXXONMOBIL OIL CORPORATION NO 11252
 Classification: Large Quantity Generator

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)
 provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
 Waste code: D008
 Waste name: LEAD

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
 Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D016

 Used oil fuel burner: No
 Used oil processor: No
 Used oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No
 Off-site waste receiver: Verified to be non-commercial

Hazardous Waste Summary:
 Waste code: D000
 Waste name: Not Defined

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
 Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BE WASTE GUNPOWDER.

Waste code: D006
 Waste name: CADMIUM

Waste code: D008
 Waste name: LEAD

Waste code: D010
 Waste name: SELENIUM

UNITED PARCEL SERVICE MAIN ST (Continued) 1001815505

Environmental Interest/Information System
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:
 Facility ID: 4 191015307
 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semi-solid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CA500001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWG will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Background Info:
 The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA) consists of approximately 5 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer conducted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide administrative, training, and logistics support to reserve units. The facility has one installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service station was built in 1943 and was used for fueling vehicles on site. The aboveground portion of the station has been removed. Adjacent to the former Service Station, the Vehicle Lube Rack was used for vehicle maintenance and drained directly to a waste oil underground storage tank(UST). Between 1987 to 1989, hazardous substances (including used oil, solvents, hydraulic fluid, and other new and used vehicle maintenance products) were stored in 55-gallon drums on the Vehicle Lube Rack. In November 1994, the waste oil UST was removed in 1994 under supervision of the Los Angeles Fire Department. Soil with detected levels of total recoverable petroleum hydrocarbons was excavated and disposed.

NAVAL MARINE COMILITARYS RESERVE CENTER, LOS ANGEL (Continued) S101584386

ed off site. In 1995, an Environmental Baseline Study (EBS) was conducted. The EBS identified the Vehicle Lube Rack and the former Service Station gasoline UST as areas requiring further investigation. In 1996, a subsurface soil investigation conducted for Site 1 indicated the presence of gasoline-range hydrocarbons, benzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroethane.

Comments Date: 01182005
 Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program.

Comments Date: 01182005
 Comments: am. DTSC concurs with this recommendation.

 Completed Sub Area Name: Not reported
 Completed Document Type: Preliminary Endangerment Assessment Report
 Completed Date: 2005-01-18 00:00:00
 Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program. DTSC concurs with this recommendation.

 Background Info: M.O.R.E Oil "Mikhele Finkel" abandoned 500 drums of hazardous waste at 645 South Ave, 21. This caused spillage of acid and waste oil onto asphalt material.

Comments Date: 05/29/1985
 Comments: 545 drums of hazardous waste solids, 28 crushed drums, 3,150 gallons of waste oil were removed. The property was steam cleaned and tested by Crosby and Overton.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Voluntary Cleanup Agreement
 Completed Date: 1995-03-29 00:00:00
 Comments: The Responsible Party recorded a Deed Restriction notification with the County of Los Angeles on March 27, 1995 and a copy has been provided to the Department. The Department has reviewed the Covenant and recommended that "No Further Action" is warranted provided the current cap is in place. Based on the Covenant, the Department should be notified prior to any soil disturbance at the site.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: Site Screening
 Completed Date: 1994-03-16 00:00:00
 Comments: The Department received a referral dated March 8, 1994 from the County of Los Angeles, Fire Department. The site was previously a battery recycler whose owner, Victor Pena, was under investigation by LA County and the LA City Attorney's Office for the illegal discharge of hazardous waste onto the subject property. The waste materials were being discharged into an unlined pit in the rear of the property and the driveway. The RP was subsequently convicted of illegal discharge of hazardous waste, sentenced and ordered to remediate the site. The "Subsurface Investigation Report" indicates that the maximum concentration of lead in the soil is 30,000 mg/kg and minimum pH is 0.48. RP has not been complied with the County's directives. Therefore, the site was referred to the Department. Due to the evidence of onsite contamination, the Department recommends a PEA. The RP will be notified of this recommendation.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

BUILDERS HARDWARE FINISHERS (Continued) 1000278696

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 Completed Date: 1995-09-14 00:00:00
 Comments: The Department received a Non-Emergency Hazardous Substance Release Report dated July 8, 1994. The report indicates that the property was contaminated at the time of purchase in March 1990. Leaking underground storage tanks have been removed by the previous owner. Some of the contaminated soils have been removed from the site. Soils contaminated with lead are still exist at the site. Due to evidence of a release, DTSC recommended a PEA, and notified the RP thereof.

ORPHAN SUMMARY

Table with columns: City, EDR ID, Site Name, Site Address, Zip, Database(s). Lists various locations across Los Angeles, Brea, and Sulphur Mountain.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.
Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS
Federal NPL site list

NPL: National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.
Date of Government Version: 07/02/2010
Date Data Arrived at EDR: 07/14/2010
Date Made Active in Reports: 10/04/2010
Number of Days to Update: 82
Source: EPA
Telephone: N/A
Last EDR Contact: 10/13/2010
Next Scheduled EDR Contact: 01/24/2011
Data Release Frequency: Quarterly

NPL Site Boundaries

Table listing EPA Region (1-10) and corresponding EPA Region phone numbers (e.g., EPA Region 1: 617-918-1143).

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.
Date of Government Version: 07/02/2010
Date Data Arrived at EDR: 07/14/2010
Date Made Active in Reports: 10/04/2010

Source: EPA
Telephone: N/A
Last EDR Contact: 10/13/2010
Next Scheduled EDR Contact: 01/24/2011
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Next Scheduled EDR Contact: 02/28/2011
Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425 (e), sites may be deleted from the NPL where no further response is appropriate.
Date of Government Version: 07/02/2010
Date Data Arrived at EDR: 07/14/2010
Date Made Active in Reports: 10/04/2010

Next Scheduled EDR Contact: 01/24/2011
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.
Date of Government Version: 01/29/2010
Date Data Arrived at EDR: 02/09/2010
Date Made Active in Reports: 04/12/2010

Last EDR Contact: 10/13/2010
Next Scheduled EDR Contact: 01/24/2011
Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.
Date of Government Version: 06/23/2009
Date Data Arrived at EDR: 09/02/2009

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
 RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010 Source: Environmental Protection Agency
 Date Data Arrived at EDR: 02/19/2010 Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
 RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010 Source: Environmental Protection Agency
 Date Data Arrived at EDR: 02/19/2010 Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
 A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/20/2009 Source: Environmental Protection Agency
 Date Data Arrived at EDR: 01/20/2010 Telephone: 703-603-0695
 Date Made Active in Reports: 04/12/2010 Last EDR Contact: 09/13/2010
 Number of Days to Update: 82 Next Scheduled EDR Contact: 12/27/2010
 Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/20/2009 Source: Environmental Protection Agency

State- and tribal - equivalent NPL

RESPONSE: State Response Sites
 Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 08/18/2010 Source: Department of Toxic Substances Control
 Date Data Arrived at EDR: 09/16/2010 Telephone: 916-323-3400
 Date Made Active in Reports: 09/29/2010 Last EDR Contact: 11/09/2010
 Number of Days to Update: 13 Next Scheduled EDR Contact: 02/21/2011
 Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)), State Response, including Military Facilities and State Superfund, Voluntary Cleanup, and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have not been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients—States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

 Next Scheduled EDR Contact: 12/27/2010
 Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used waste oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oilly waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
 Source: Rextag Strategies Corp.
 Telephone: (281) 769-2247
 U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
 Telephone: 312-280-5991
 The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
 Telephone: 410-786-3000
 A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
 Telephone: 301-594-6248
 Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
 Telephone: 202-502-7300
 The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
 Telephone: 202-502-7300
 The National Center for Education Statistics' primary database on private school locations in the United States.
 Daycare Centers: Licensed Facilities
 Source: Department of Social Services
 Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NW: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SANBORN MAP REVIEW SUMMARY

Historic Station Area

Dates	Inquiry # / Pages	Site Observations	Surrounding Observations
1894-1920	2917951.1; pages 16-19, 26-38, 84-96, 113-115	The Property was used for commercial use; a vineyard and winery/distillery, well/water pipe manufacturing company, stable/corral, the Los Angeles orphan asylum, and Chinese quarters occupied the Property simultaneously between 1888 and 1894 (pages 19, 95-96, 115). By 1906, the orphan asylum was replaced by E.K. Wood Lumber Company, American Conduit, and Pioneer Roll Paper Company (page 17).	<p>North: Surrounding properties to the north of the Site were of residential, agricultural, and commercial use. The Kerchoff Cuzner Mill and Lumber Company and J.M. Griffith Co Planing Mill and Lumber were observed north adjacent to the Property on the 1888-1906 Sanborn maps (pages 36-38). Cultivated fields were observed north of the Site (east of the Cuzner Mill) in the 1888 Sanborn map (page 19).</p> <p>West: Surrounding properties to the west were of commercial use. Stables, several warehouses, auto repair shops, machine shops, printing shops, G. Demateis Bros. Winery, LA Railway Sub-Station battery storage area and printing shop, hotels, churches, and dwellings were observed (pages 35-38, 94-96, 113-115).</p> <p>South: Surrounding properties to the south were used for residential and commercial use. Food storage warehouses, hotels and other lodgings, and dwellings were observed (page 112- 115).</p> <p>East: Surrounding properties to the east were residential from 1888 to at least 1920 (pages 16-19).</p>
1950-1970	2912366.3; pages 9-15 29117951.1; pages 26-38, 103-111, 141-149	By 1950, the property was in its early construction as a train station. Structures observed on the 1950 Sanborn map included a concourse, waiting rooms, patio, parking area. A blacksmith and numerous automotive facilities were observed on the southwest corner of the Property on the 1950 Sanborn map (page 111). The completed Los Angeles Union Passenger Terminal (Site) was first observed on the 1953 Sanborn map (page 91).	<p>North: Surrounding properties to the north of the Site were of commercial use. The Cuzner Mill Co. was replaced by the United States Post Office (Terminal Annex) sometime before 1950, which occupied the property until at least 1970. Garages, storage buildings, warehouses, auto repair shops, and the Oil Well Supply Company were also observed (page 34).</p> <p>West: Surrounding properties to the west of the Site were mostly redeveloped from residential to commercial use by 1950 (page 34). Commercial properties included retail stores, restaurants, auto repair shops, parking structures, various warehouses, county administrative offices, and sheet metal shops between 1950 and 1970 (pages 26-37, 84-91).</p> <p>South: Surrounding areas to the south were redeveloped for commercial use. A gas and oil structure was observed in the 1950 Sanborn map, but removed by 1953 in place of the Hollywood freeway (currently the Santa Ana freeway). Other properties include municipal offices and warehouses, suppliers of electrical equipment, an auto parking area, restaurants, and several gas and oil structures (page 103-111). A gas and oil structure was observed on the southeast intersection of Commercial Rd and N. Alameda St on the 1954-1970 Sanborn maps (pages 103-109).</p> <p>East: By 1950, residential dwellings were removed and the rail tracks were emplaced (pages 9-15).</p>

SANBORN MAP REVIEW SUMMARY

Rail Line Area

Dates	Inquiry # / Pages	Site Observations	Surrounding Observations
1888-1970	2917951.3; pages 9-19, 2917951.1; pages 45-57, 122-134	The southern portion of the Rail Area is shown as used for a mixture of residential, warehousing, stables, and a bakery between 1888 and 1920. The central portion of the Rail Area numerous residential buildings (Chinese Quarters) between 1888 and 1894, and in 1906 contained rail lines (east-west orientation) and EK Woods Lumber Co and Yard. Additional rail lines in 1920 with current rail lines (north-south orientation) from 1950 onward. The northern portion consists of residential dwellings from 1888 to 1920 and rail lines from 1950 onward.	Surrounding observations for the rail area are described in other area observations.

Gateway Area

Dates	Inquiry # / Pages	Site Observations	Surrounding Observations
1888-1920	2917951.1; pages 16-18, 131-134, 150-154, 170-172	The Site was historically residential from 1888 to at least 1920 (pages 16-19).	<p>North: Surrounding properties were predominately residential to the north (pages 16-18).</p> <p>West: See Historic discussion above for observations west of Gateway.</p> <p>South/East: Surrounding sites to the south and east were commercial properties. These properties included breweries, bakeries, machine shops, a wood and coal yard, and stables (pages 131-134 and 170-172).</p>
1950-1970	2912366.3; pages 9-15 291795.1; pages 123-130, 141-149, 161-169	The Site used for commercial and manufacturing purposes between 1950 and 1970. The Maier Brewing Company occupied the southeast corner of the Site from 1950 to 1957, after which this area became a beer warehouse until 1968 (pages 123-130). A Gas & Oil structure and an auto repair facility were observed on the eastern portion of the Site 1950-1965 Sanborn maps. By 1965, several gas & oil structures and auto repair	<p>North: Surrounding properties to the north included commercial/light industrial and residential structures. See Amtrak discussion above for detailed observations north of Gateway.</p> <p>West: See the Gateway discussion above for details regarding properties to the west of the Site.</p> <p>South: Commercial properties including breweries/bottling companies, warehouses, storage areas, and parking areas were observed south of the Site (pages 122-130).</p> <p>East: Surrounding sites to the east included commercial properties (auto repair shops, welding shops, gas & oil structures), county offices (LA County Agriculture Commission), and municipal utility suppliers (Southern California Gas Company) (pages 141-149). Numerous storage tanks, boilers, machine/equipment repair shops,</p>

SANBORN MAP REVIEW SUMMARY

		facilities and a welding structure were established on the Site (pages 9-15).	separator tanks, and a 65,000 gallon aboveground fuel oil tank used in Southern CA Gas Company operations were observed on the 1950 Sanborn map (page 149). Several gas & oil, and auto repair facilities were observed east adjacent to the Property (pages 161-169).
--	--	---	--

Amtrak Use Area

Dates	Inquiry # / Pages	Site Observations	Surrounding Observations
1888-1920	2917951.1; pages 16-18, 55-57, 74-76, 170-173	The Site was historically residential from 1888 to at least 1920 (pages 16-19).	<p>North: Surrounding properties were commercial and light to heavy industrial between 1888 and 1906. Properties to the north-northeast of the Site included several petroleum refineries (including Los Angeles Oil Burning & Supply, Asphalt Oil Refinery, and C.W. Duffy's Asphalt Refining); all containing several oil tanks observed on the 1888 and 1894 Sanborn maps (pages 57 and 75-76). The Los Angeles Oil Burning & Supply Company historically occupied the property currently known as the CA Drop Forge area. By 1894, the northwest corner of this property was replaced by the Morris & Jones Wood Yard, which occupied the property until 1906. The remaining portion of the property was occupied by the Los Angeles Oil Burning & Supply Company. Structures, including tanks and sheds, were observed in this area on the 1906 Sanborn map; however, the 1906 occupants of this area were not identified (page 55). Several oil tanks located on properties identified as The Los Angeles Pressed Brick Company, Barber Asphalt Paving company, and Puente Oil Company were observed northeast of the Site on the 1906 Sanborn map (page 74).</p> <p>West: See Historic discussion above (North section) for observations west of Amtrak.</p> <p>South: See Gateway discussion for observations south of Amtrak.</p> <p>East: Surrounding properties to the east were mostly residential and commercial. Residential dwellings and the New Macy St. School were observed east adjacent to the Property between Avila St and N. Vignes St (pages 170-173). The California Star winery and distillery was observed east of N. Vignes St. on the 1894 and 1906 Sanborn map.</p>
1950-1970	2912366.3; pages 9-15 2917951.1; pages 45-53, 68 and 72, 170-	By 1950, the rail tracks replaced residential dwellings at the Site (page 15). In the northeast portion of the Site, a 70,000 gallon steel tank (possibly containing water) and a pump house	<p>North: Surrounding properties were light to heavy industrial between 1950 and 1970. The northwest corner of the property currently known as the CA Drop Forge area was used as a United States Post Office mail shed from 1950 to 1957. By 1960, this area was vacant and remained so until at least 1970 (pages 46-49). The Sanborn maps do not specifically depict whether or not the LA Oil & Supply Company occupied the remaining portion of the property between 1950 and 1970. Two manufacturers of oil</p>

SANBORN MAP REVIEW SUMMARY

	173	<p>were observed on the 1950-1953 Sanborn maps (pages 45-53). Three other structures were also observed in this area, but were unidentifiable due to the poor quality of the maps. By 1954, the 70,000 gallon tank was removed from the Site.</p> <p>A structure labeled “motor” (currently used as the Amtrak maintenance building) was observed on the western portion of the Site (west side of the rail tracks) on the 1950-1970 Sanborn maps (pages 9-15).</p>	<p>well tools were observed north of the Site. The California Drop Forge Company occupied the property on the northeast corner of the intersection of Alhambra Ave and N. Vignes St from at least 1957 to 1970 (pages 45-50). The Hydril Corporation (an oil well company) was observed northwest adjacent to the Site on the 1950-1970 Sanborn maps (pages 45-53). Observed property features included, but not limited to, a pipe machine shop, welding shop, equipment warehouses, heat treating department, and storage areas.</p> <p>Surrounding properties to the west of the Site were occupied by the USPS and US Forest Service during 1950-1970 (pages 9-15).</p> <p>West: See Historic discussion above (North section) for observations west of Amtrak.</p> <p>South: See Gateway discussion for observations south of Amtrak.</p> <p>East: The New Macy St. School property was redeveloped by 1950 and used as various manufacturing plants between 1950 and 1970 (pages 161-169). A gas & oil structure located on the northwest intersection of E. Macy St (currently E. Cesar Chavez Ave) and N. Vignes St. was observed in the 1964-1970 Sanborn maps. The wine cellar was replaced by Eureka Iron & Metal Co. by 1950 where waste metal, rags, and paper were handled (page 169). The Southern California Gas Company, which used in their operations, heat exchangers, gas tanks, cooling towers, was observed in the 1950-1970 Sanborn maps (pages 161-169).</p> <p>Gladding McBean & Co, a brick and tile manufacturing plant containing a machine shop, several kilns, storage areas, auto repair shop, and numerous other structures used in production, was observed on the northeast intersection of N. Vignes Street and Bauchet Street (northeast adjacent to the Property) (1950-1960; pages 68 and 72). By 1964, this property housed the Los Angeles County Central Jail (1964-1970; pages 64-67). Specific site features of the county jail were difficult to identify on the Sanborn maps.</p> <p>The Wilson & Co, Inc, which based on site features identified on the Sanborn maps (1950-1970; pages 64-72) was a meat processing facility that contained two grease-containing tanks, one several thousand gallon gas tank, and two large capacity storage tanks of unknown content, and an auto repair shop.</p>

SANBORN MAP REVIEW SUMMARY

CA Drop Forge Area

Dates	Inquiry # / Pages	Site Observations	Surrounding Observations
1888-1970	2917951.1; pages 45-57	<p>In 1888 the CA Drop Forge Area is occupied by Los Angeles Oil Burning Supply Co. (western portion) and CW Duffy's Asphalt Refining Works (eastern portion). Three tanks (oil, refining, and petroleum) are shown on the western, northwestern and north-central portion of the Los Angeles Oil Burning Supply facility, and two oil tanks are shown on the southern portion of the CW Duffy's facility. In 1894 the area is occupied by Morris & Jones Wood Yard. In 1906 a dwelling and shed exist along the southern property line and three tanks (contents illegible) on the northern property line. Between 1950 and 1957 a new building is present labeled US Mail Shed. This same building is labeled as vacant between 1960 and 1970.</p>	<p>North: This area is bordered to the north by Alhambra Avenue and rail lines in each map, with no coverage further north.</p> <p>West: College Street borders the western boundary in each map. Further west is Vineyards and residential dwellings exist west of the roadway in 1888 and 1894. Unlabeled manufacturing with a foundry are present in 1906. The remaining maps show the western property occupied by an oil well equipment manufacturer (Hydril Corp of California).</p> <p>South: Illegible industrial activities exist to the south with tanks (crude oil) present between 1888 and 1906. The southern area is listed as Railroad Right of Way in the remaining maps.</p> <p>East: Properties to the east are not covered in the maps.</p>

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

- 1. Executive Summary.** The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
- 2. Page Images.** Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
- 3. Findings Listed by Location.** Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

- 1. You Select Addresses and EDR Selects Addresses.** Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
- 2. EDR Selects Addresses.** Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
- 3. You Select Addresses.** Use this method for research based solely on the addresses you select or enter into the system.
- 4. Hold City Directory Research Option.** If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

PRIOR ASSESSMENT DOCUMENTS REVIEW SUMMARY

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
1	9/4/1987	Earth Technology	The Phase I Subsurface Investigation at the Metro Rail A-130 Corridor	Off-site east of Gateway Area	Investigation consisted of 12 borings to 15 to 60 feet bgs in the vicinity of the Dennys restaurant. Elevated levels of petroleum hydrocarbons and SVOCs detected in soil. Low levels of VOCs and SVOCs detected in groundwater	S / GW
2	2/25/1988	PIC	Site Investigation Geologic Report	Unspecified, suspected off-site eastern High-Density Residential area north of the Station Area	Four soil borings were drilled to 40 feet near former UST at north end of building. Soil collected at 10, 15, 20, 30, 35 and 40'. One 10 foot sample had TPH of 2,700 ppm. All others were ND for TPH and background for lead. This area was completely excavated as described in report #26.	S
3	4/25/1988	Woodward-Clyde	Hazardous Materials Investigation of Southern Portion of Union Station	Southern portion of the Rail Line Area	Performed for CalTrans for the LA Busway ramp excavation, which appears to be the southern portion of the Rail Line Area. 12 soil borings advanced to unknown depths. Soil samples were collected to certify soil being hauled offsite during construction of busway ramp was non-haz. (north of 101). The origin of soils was fill material from Fort Moore Hill. Historic research revealed Fort Moore Hill was used primarily for residential purposes. Historic research for the southern portion of the current rail lines revealed the area was used for hotels, apartments, and lodging houses. 33 soil samples were tested for lead and total TPH. Elevated lead was reported in shallow soil up to 1,400 ppm in two small areas (10 x 10 x 10 each). Final disposition of these soils was not indicated.	S
4	5/31/1989	Ecology & Environment	CERCLA Listing Site Inspection, Southern California RTD Busway	Southern portion of Gateway Area and southern portion of Rail Line Area and off-site to the southeast	The report describes elevated concentrations of SVOCs in soil but the locations of the testing could not be determined. The report describes waste disposal from track bed soils originating from the southern portion of the Rail Line Area, which reportedly contained VOCs and SVOCs. No specific details on this Site-specific waste were provided.	NS

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
5	12/20/1989	Levine-Fricke	Phase I Soil and Groundwater Investigation, Los Angeles Union Station	Site-wide	<p>Report describes numerous off-site sources of groundwater impact. Testing included soil, soil gas, and groundwater.</p> <p>Soil gas testing included 21 locations: four along Alameda Street (both on and off the Historic Station Area), three along the southern portion of the Rail Area, and 14 on the Gateway Area (both on- and off-site). The survey identified low to moderate levels of hydrocarbon VOCs at two locations; one on the Gateway Area and one on the Historic Station Area. The report does not recommend further soil gas testing.</p> <p>Report provides results from 12 soil borings (B-1 through B-12) in the Rail Area. Scattered composite samples from these borings reveal some areas of elevated TPH, and low to moderate concentrations of SVOCs. The report recommends leaving impacted soils in place.</p> <p>Assessment included testing of four groundwater monitoring wells (MW-1 through MW-4). Two of these wells were located on the subject property (MW-2 on the western portion of Amtrak Use Area and MW-3 on the southern Rail Area). Report also depicts two groundwater dewatering wells (DW-4 and DW-5) on the eastern portion of the Site, potentially within the Gateway Area. Groundwater flow direction was to the southeast. Groundwater analytical results from the two on-site wells revealed low levels of VOCs in groundwater. The highest VOCs were detected in well MW-1 located on the off-site portion of the Gateway Area. The report recommends additional groundwater testing in this area.</p>	S/ SG/ GW
6	12/20/1989	Boelter Env. Consultants	Executive Summary, Preliminary ACM Inspection	Historic Station Area	Provides asbestos abatement cost estimates based on priority class.	NS
7	December 1989	WESTON	Remedial Cost Appraisal Los Angeles Terminal Site	Uncertain, believed to be entire on- and off-site areas.	Report provides remedial estimates for an unspecified portion of the site. A gas manufacturing facility was formerly located east of the site. Described significant soil contamination discovered during installation of the Metrorail-Busway. Speculated that the cone of depression created by dewatering during construction could	NS

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
					be drawing in PCE, TCE and DCE contamination from off-site sources.	
8	7/30/1990	Levine-Fricke	Environmental Assessment Los Angeles Union Passenger Terminal	Limited historic data provided for on-site and off-site Gateway Area, southern rail area, Historic Station Area, and off-site 1 st Five LA and High-Density Residential areas. Current data for Rail Area and Gateway Area	Report prepared for Santa Fe Pacific Realty. Includes historic research that identified numerous surrounding potential release properties that may have impacted groundwater beneath the site. Report describes historic testing performed in the 1980's. This historic testing is summarized but details are not provided. The summary describes PNAs in soil exceeding regulator criteria for protecting groundwater (specific regulatory criteria not provided). TPH was detected at a maximum concentration of 100 ppm. VOCs were reported for historic groundwater samples which were attributed to likely be from off-site sources. Assessment included current testing of 4 groundwater monitoring wells (MW-1 through MW-4). Two of these wells were located on the subject property (MW-2 on the western portion of Amtrak Use Area and MW-3 on the southern Rail Area). Groundwater flow direction was to the southeast. Groundwater analytical results from the two on-site wells revealed low levels of VOCs in groundwater. Elevated concentrations of benzene were detected in two dewatering wells on the Gateway Area of the subject property. Elevated levels of PCE were detected in one off-site well. Benzene and PCE in groundwater were attributed to off-site sources. Report recommends installation of additional monitoring wells (MW-5 through MW-7) north of the Gateway Area, and on the eastern Amtrak Use Area.	S/GW
9	9/26/1990	Levine-Fricke	Phase II Investigation Data Report Summarizing Groundwater Conditions at the Los Angeles Union Passenger Terminal	On-site eastern Amtrak Use Area, off-site Gateway Area, off-site High Density Residential	Report provides groundwater monitoring data for six wells (MW-1, MW-2, and MW-4 through MW-7). Moderate levels of VOCs detected in off-site Gateway Area. Low levels of VOCs detected in on-site Amtrak Use Area (eastern porton, MW-6 and MW-7). Groundwater flow was generally south with Gateway Area dewatering effects indicated.	GW
10	1/14/1991	Levine-Fricke	Preliminary soils Investigation for an Active gasoline UST,	Off-site eastern High-Density	Report describes investigation of an active 1,000-gallon Amtrak gasoline UST located on the eastern High-Density Residential area. Three soil borings (including 2 angle borings) up to 26 feet bgs.	S

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
			Los Angeles Union Passenger Terminal	Residential area north of the Station Area	One hot soil sample at 15 feet depth beneath fuel dispenser (TPH 20,000 ppm, benzene 25 ppm). The 20 foot sample from this location was clean. The report recommended soil remediation. This area was completely excavated as described in report #26.	
11	1/15/1991	Levine-Fricke	Phase II Soil and Ground-Water Investigation, Los Angeles Union Passenger Terminal	Site-wide and off-site eastern High-Density Residential area north of the Station Area, and Off-site (MWD property) south of Historic Station Area	<p>The report reiterates previous results from Document #8 and includes the second phase of investigation. The current assessment included soil testing at the following locations: 1) USTs on the MWD property (south of Historic Station Area) and eastern High-Density Residential property (north of the Historic Station Area); 2) former machine shop clarifier on the northeastern portion of the Amtrak Use Area; and 3) southern Rail Area. Petroleum impact was identified at each of the off-site UST locations. A low level of toluene was detected soil adjacent to the on-site former clarifier. Moderate concentrations of SVOCs were detected in soil in other areas, but were found to not be vertically extensive.</p> <p>The current assessment for groundwater included installation of five wells (MW-5 through MW-9). Two of these wells (MW-6 and MW-7) were installed on the eastern Amtrak Use Area. One well (MW-9) was installed adjacent to the Rail Area, potentially on the Gateway Area. One well (MW-8) was installed on the southern portion of the Rail Area. Groundwater flow direction was found to be influenced by dewatering wells near the Gateway Area. Sampling of all monitoring wells revealed low to moderate levels of VOCs in groundwater, with the highest concentrations occurring off-site (north) of the Gateway Area. PNAs were not present in any groundwater samples.</p>	S/ GW
12	3/26/1991	WESTON	Soil Investigation Report, Union Station	Unspecified, suspected off-site eastern High-Density Residential area north of the Station Area	Drilled 5 borings to max depth of 40 feet to define hydrocarbon impacts from a fuel dispenser One soil sample from 15 feet beneath dispenser reported TPH at 20,000 ppm. Estimated 145cy of impacted soil.	S

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
13	4/15/1991	Ecology & Environment	CERCLA Listing Site Inspection, Southern California RTD Busway	Gateway Area and Amtrak Use Area and off-site to the east	Report describes the Southern California Gas Company historically existing east of Vignes Street (off-site). This plant was a butadiene production facility. The report describes the majority of environmental impact existing beneath the neighboring Dennys restaurant, the Piper Tech City Building, and County Jail properties. Soil was described as impacted by metals above hazardous waste criteria, and elevated BTEX and SVOCs. Groundwater was described as impacted by moderate to low levels of BTEX, and low levels of SVOCs. Soil sampling was performed during the assessment at off-site locations.	S
14	4/22/91	WESTON	Work Plan for Excavation and Disposal of Contaminated Soil	Unspecified, suspected off-site eastern High-Density Residential area north of the Station Area	Work plan to excavate and dispose of 150 CY of petroleum impacted soil.	NS
15	5/10/1991	WESTON	Addendum to Soil Investigation Report, Union Station	Unspecified, suspected off-site eastern High-Density Residential area north of the Station Area	Collected one additional soil sample for BTEX and lead. Did not affect the conclusions of previous report (Document 14)	S
16	5/26/1991	Bechtel	Site Inspection	Off-site east of Gateway Area	Prepared on behalf of the USEPA, concluded groundwater impact in the area but no groundwater use so no further action for EPA.	NS
17	5/31/91	Levine-Fricke	Site Information Report for Remediation of Gasoline Affected Soils	Off-site (MWD property) south of Historic Station Area	Soil and soil gas investigation report for a 1,000 gallon gasoline UST. 10 borings were sampled to a max depth of 30 feet and tested for TPH and BTEX. A small area of shallow soil contamination was found with TPH up to 15,000 ppm and benzene up to 14 ppm. Limited to top 18 feet of soil. Recommended soil remediation. Location believed to be adjacent (south) Metropolitan Water District property.	S

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
18	6/3/91	Levine-Fricke	Tank Closure Report for 550 Gallon Waste Oil Tank.	Off-site (MWD property) south of Historic Station Area	Summarizes removal of 550-gallon waste oil UST and a hydraulic lift reservoir. One soil sample was collected from 8 feet bgs and tested for TPH and BTEX. Soil sampling indicated no significant impact. Location believed to be adjacent (south) Metropolitan Water District property.	S
19	6/5/91	Levine-Fricke	Tank Closure Report for Two Underground Fuel Oil Tanks.	Off-site (MWD property) south of Historic Station Area	Summarizes in-place abandonment of two 12,750-gallon underground fuel oil tanks. Collected 10 soil samples from 7 borings to max of 40 feet. Analyzed for TPH and BTEX. TPH reported at 2,900 ppm in one soil sample collected at 35 feet next to tanks. 40 foot sample was ND. Location believed to be adjacent (south) Metropolitan Water District property.	S
19A	7/2/91	RWQCB	Los Angeles Union Passenger Terminal	Site-Wide	The letter was prepared at the request of Catellus following a meeting on 2/4/91,. Catellus requested the RWQCB to make a determination that the Union Station is not the source or a contributor to VOC impact to groundwater beneath the site. The RWQCB states since the work was not performed under the direction of their staff, a blanket clearance is not reasonable, and the duration of monitoring was insufficient. The letter goes on to state <i>it is possible to indicate that at this time, based upon the data and information provided by Catellus, staff of this Regional Board do not intend to require remedial action...to cleanup ground water. However, soils remediation relative to on-site underground tanks and/or other sources should be implemented to minimize or eliminate future threat to groundwater.</i>	NS
20	9/91	Parsons-Dillingham	Site Closure Investigation, Metro Red Line, MOS-1, Groundwater Treatment Facilities and Hazardous Material Storage Area	Primarily off-site north of Gateway Area but may include Gateway Area	Closure of dewatering and storage areas related to the Metro Red Line tunnel. Six soil borings advanced as confirmation that the activities did not impact the area. The samples results revealed low levels of petroleum hydrocarbons and no SVOCs.	S
21	9/30/1991	Precept Env.	Report of Soil Boring Investigation at Union Station	Unspecified, suspected off-site eastern High-Density Residential	Investigated the dispenser area previously investigated and partially remediated by WESTON. Three soil borings were sampled to define the north and south sides of the soil plume associated with the former fuel dispenser. TPH was reported up to 2,900 ppm at 5 feet bgs. Estimated that an additional 380 cy of soil remained to be	S

**Prior Assessment Documents Summary
LA Union Station, Los Angeles, California**

Doc#	Date	Author	Title	Location	Summary	Media
				area north of the Station Area	excavated. This area was completely excavated as described in report #26.	
21A	10/20/1991	Precept Env.	Status Report, Union Station Remediation Project	Unknown, suspected off-site UST location	Provides verification sample results an excavation pit and soil stockpiles. Some elevated TPH results indicated. No recommendations provided, no site location maps provided.	S
21B	11/8/1991	Precept Env.	Additional Soil Boring, West Side of Felix Trailer	Unknown, suspected off-site UST location	Single page letter outlining additional testing required by LAFD. No details provided	NS
21C	11/12/1991	Precept Env.	Completion of Task 3 – Excavation of Additional Soil	Unknown, suspected off-site UST location	Single page letter describing total volume excavated to be 500 cubic yards. No details provided.	NS
21D	11/14/1991	Amtrak	Soil Remediation at Los Angeles Union Station	Unknown, suspected off-site UST location	Single letter describing a commitment by Amtrak to remediate TPH impacted soil beneath a Railway Mail Building during demolition.	NA
22	11/21/1991	Levine-Fricke	Environmental Plan for Los Angeles Union Passenger Terminal	Both on- and off-site portions of the station	<p>This report is a compilation of previous reports prepared by the author. Figures depict four abandoned USTs on the MWD property (south of the Station Area) and two abandoned USTs on the eastern High-Density Residential area north of the Station Area. Figures also depict three additional monitoring wells; MW-8 on the southern Rail Area, MW-9 potentially on the Gateway Area, and MW-10 on the northeast portion of the Amtrak Area. A former machine shop clarifier is shown on the northeastern Amtrak Area, adjacent to MW-10 (see Document #36).</p> <p>Report states a July 2, 1991 letter from the RWQCB stated the <i>Regional Board do not intend to require remedial action...to cleanup groundwater. However, soils remediation relative to on-site underground tanks and/or other sources should be implemented to minimize or eliminate future threat to groundwater.</i></p> <p>For issues related to subject property areas, the report recommends:</p>	NS

					1) two years of continued groundwater monitoring of area wells to evaluate VOC trends; 2) for SVOCs in soils beneath rail lines, monitor groundwater in down gradient well MW-8 (on southern Rail Area); and 3) prepare a formal closure report for the machine shop clarifier on the northeastern Amtrak Use Area (performed under Document 36).	
23	12/18/1991	Levine-Fricke	Draft Conceptual Construction Dewatering Scheme for the Proposed Gateway Center Site	Gateway Area and Amtrak Use Area	Hydrolic testing for dewatering requirements for future development. Provides alternatives for groundwater treatment.	NS
24	12/20/1991	Levine-Fricke	Additional Soil Data Near Amtraks former UST, Los Angeles Union Station	Off-site eastern High-Density Residential area north of the Station Area	11 additional soil borings were drilled to depths of 20 to 25 feet, and sampled every 5 feet for TPH and BTEX. 3 borings reported TPH up to 530 ppm in the upper 10 feet of soil. Benzene was reported up to 1.9 ppm in two 10 foot soil samples. This area was completely excavated as described in report #26.	S
24A	1/22/1992	Catellus	Los Angeles Union Station	Non-specific	Describes submittal of Levine-Fricke reports to the USEPA. Describes VOCs in groundwater originating from off-site sources and notes testing data from an off-site facility that stored PCE in a tank at 496 Bauchet Street.	NS
25	2/7/1992	Levine-Fricke	Review Comments for Converse Consultants West's Draft Report for the RTD Headquarters Site	Site-wide	Provides various comments on completeness of a data evaluation performed by Converse on behalf of RTD.	NS
26	2/14/1992	Precept Env.	Report of Soil Boring Investigation at Union Station	Off-site eastern High-Density Residential area north of the Station Area	Soil was excavated from after building demolition. 784 CY of contaminated soil was removed from the 1,000 gallon gasoline UST vicinity. Confirmation sampling confirmed that the remediation was complete.	S
27	3/20/1992	Levine-Fricke	Phase I Soil and Ground-Water	On- and off-site Gateway	Historic review did not identify releases on the Gateway Area. Documented off-site impact east of the Gateway Area. 26 soil gas	S/ SG/

			Investigation, Rapid Transit District Site	Area	<p>samples collected to evaluate for the potential presence of VOCs and methane. No VOCs or methane were detected in the soil gas samples.</p> <p>Two soil borings were advanced in the Gateway Area (unknown if on- or off-site). Low levels of TPH and SVOCs detected at depths of 10 feet bgs or greater. VOCs not detected.</p> <p>Groundwater testing included installing four wells (LF-1 through LF-4) on the Gateway Area (unknown if on- or off-site). Low levels of SVOCs and low to moderate levels of VOCs detected in groundwater, with the highest detections occurring on the eastern portion of the Gateway Area, closest to off-site sources. Petroleum hydrocarbons were not detected in groundwater.</p>	GW
27A	3/24/1992	Levine-Fricke	Underground Storage Tank Closure at Los Angeles Union Passenger Terminal	Suspected off-site eastern High-Density Residential area north of the Station Area, and Off-site (MWD property) south of Historic Station Area	Letter to the LAFD describing completion of remedial actions for a 550-gallon waste oil UST and a 1,000-gallon gasoline UST. The letter was asking for confirmation from the agency that no further work would be required. Specific UST locations not provided.	NS
28	3/25/92	Levine-Fricke	Tank Closure Report summary of Soil Remediation for a 1,000 gallon gasoline Storage Tank	Off-site (MWD property) south of Historic Station Area	Three soil samples were collected at 5 feet bgs along fuel lines and 2 soil samples were collected at 10 feet below UST. The two 10 foot samples reported TPH at 1100 and 880 ppm. Benzene also exceeded soil screening levels in these samples. 4,000 cy of soil were subsequently excavated, treated on-site with hydrogen peroxide, and then returned and compacted.	S
29	3/27/92	Levine-Fricke	Addendum to Tank Closure Report for Two Underground Fuel Oil Tanks.	Off-site (MWD property) south of	Companion to document 19. To further evaluate the extent of soil contamination from USTs, five additional soil borings were drilled to depths from 48 to 55 feet bgs. Soils were sampled at 30, 35, 40 and 45 feet bgs. An angle boring was drilled to sample soil at 25,	S

Doc#	Date	Author	Title	Location	Summary	Media
			for the Proposed Gateway Center Development Site			
34	3/15/1993	Levine-Fricke	Vignes Street Realignment Site, Ramirez Street Site (Denny's), and Macy Street Site (Former Shell Lot)	Off-site east of Gateway Area	Provides historic data for the titled sites. Elevated levels of SVOCs and moderate levels of VOCs present in soil along the Vignes Street and Ramirez Street realignments (believed to exist off-site east of Gateway Area). Low levels of gasoline present in soil at the Macy Street lot (located off-site east of Gateway Area).	S
34A	3/22/1993	Levine-Fricke	Field Notes and Laboratory Sampling Report for Soils in Clarifier Area	Unknown, suspected eastern Amtrak Use Area	Consists of field notes, lab data, and a sketch for an unknown location related to a clarifier and suspected UST location. Indicates results not presented in a formal report. Excavation did not reveal the presence of a UST but identifies a pump island and various other objects apparently discovered through a geotechnical investigation. Two soil borings advanced near the clarifier and soil samples submitted for VOC and TPH analyses. Samples collected to a maximum depth of 16.5 feet bgs. Low levels of TPH and naphthalene were detected in one soil sample.	S
35	4/19/1993	Levine-Fricke	Phase II Environmental Assessment for 530 Ramirez Street	Off-site east of Gateway Area	34 soil samples collected on the off-site Dennys property and further east (former gas purification plant). Elevated levels of VOCs and SVOCs detected in soil. No significant concentrations of metals detected. Remedial estimates provided for soil.	S
36	4/26/1993	Levine-Fricke	Closure Report for a Former Machine Shop Clarifier Los Angeles Union Station	On-site northeaster Amtrak Use Area	The report describes clarifier cleaning, soil sampling, permitting, and closure activities. The clarifier was located north of the current Amtrak Signal Shop. One angle boring was advanced beneath the clarifier to 20 feet bgs, and one vertical boring was advanced adjacent to the outlet to 30 feet bgs. Soil samples were analyzed for VOCs, and only low levels of toluene were detected in one sample. The clarifier was filled with concrete.	S
37	7/16/1993	Levine-Fricke	Phase II Environmental Site Assessment, Vignes Street Realignment Site	Off-site east of Gateway Area	23 soil samples collected on the current Vignes Street alignment (east of Gateway Area). Results identified trace levels of VOCs and elevated concentrations of SVOCs in soil. Metal concentrations were low with the exception of elevated lead at two locations. Remedial estimates for shallow soil provided. Groundwater samples from existing wells were consistent with previous results	S/ GW

			Street Ramps Site (Parcel C), Vignes and Ramirez Streets	boundary and off-site to the east	and metals. SVOCs and acetone detected in soils to 10 feet bgs. Elevated concentrations of metals were not encountered.	
44	7/14/1995	Erlor & Kalinowski	Transmittal of Soil Analysis Data for Parcel C Trench Sampling	Gateway Area, Amtrak Area, and off-site to the east	Provides soil data from a utility trench installation area. Five samples collected for SVOC analysis and total lead. Moderate concentrations of SVOCs and elevated concentrations of lead reported.	S
45	7/27/94	Erlor and Kalinowski	Groundwater Investigation Report	Historic Station Area and adjacent properties to the south, southwest and northwest of this area (MWD, 1 st Five LA, and high-density residential)	Installed 6 new groundwater monitoring wells (MW-13 through MW-18) between 42 feet and 61 feet total depth to monitor groundwater for impact from overlying soil contamination. Soil samples were collected at 5 foot intervals. 21 soil samples were analyzed for TPH, BTEX, lead and SVOCs. Elevated lead (770 ppm) was reported in one 2 foot sample located on the MWD property. Low to moderate levels of SVOCs were detected in one 2 foot samples located on the Historic Station Area. Groundwater flow is south-southeast. In groundwater, 6 new wells and 2 historic wells m(MW-4 and MW-8) were sampled, VOCs and SVOCs were below detection limits in all new wells.	S/GW
46	11/9/1994	Law Crandall	Report of Phase I Environmental Site Assessment	Entire subject property, including off-site Terminal Annex property east of the Historic Station Area	Consists of an ASTM Phase I ESA on behalf of Cordoba Corporation. The report did not identify environmental concerns for the subject property, but recommended significant additional investigation of the off-site Terminal Annex property. Report references an active fuel UST on the eastern Amtrak use area, north of the Amtrak Maintenance Building.	NS
47	8/23/1996	Metrolink	Notice of Results of Train Yard Testing	Believed to be Rail Area	Provides results of 32 soil samples from 18 borings described as from the Terminal Tower project. Figure provided inconclusive on sampling locations. Results show diesel detected up to 526 mg/kg (present in most samples), TRPH up to 2800 mg/kg (present in most samples), and low concentrations of metals.	S
48	12/2000	Winzler and Kelly	Hazardous Materials Survey Report	Historic Station Area	Found that there were lead paint covered surfaces in the old Amtrak office and the Pedestrian Tunnel and Asbestos containing tile in the old police station.	NS

			Environmental Site Assessment, 1 Union Station	western High Density Residential area north of the Station Area	parking lot and fill material added prior to development, and MTBE and toluene present in groundwater from off-site sources. Identifies fill material and elevated organic vapor readings as a REC. Recommends characterizing fill material and performing a soil gas survey for methane and hydrogen sulfide.	
50	4/10/2001	Geomatrix	Phase II Environmental Site Assessment, 1 Union Station Plaza	Off-site western High Density Residential area north of the Station Area	Follow up to recommendations in Document 49, collection of soil and soil gas samples from six borings. PCE was detected in 5 of 6 boring locations at a maximum concentration of 10 ug/l. A low concentration of methane was detected in one location. Heavy hydrocarbons were present in shallow soils at 5 of 6 locations at a maximum concentration of 990 mg/kg. Elevated concentrations of lead were detected in select soil samples. One low level detection of SVOCs was identified. VOCs were not detected in soil. Report identified specialized disposal may be required for excavated soils during development.	S/ SG
51	10/29/2002	SI Group	Phase II Environmental Site Assessment Parcels 1 and 3	Off-site High Density Residential areas north of the Station Area	Performed for Lincoln Property Company. Consisted of testing on the High-Residential areas north of Station Area. Elevated levels of lead detected in fill soil samples (maximum 3,320 ppm). The report recommended additional lead characterization. VOCs and SVOCs were not detected.	S
52	3/4/2003	IRIS Env.	Phase II Subsurface Investigation	Off-site (1 st Five LA property) southwest of Historic Station Area	Soil and soil gas samples were collected from 6 borings (up to 5 feet bgs) in the future building footprint and outside play area for risk assessment. Results indicated that the soils in a proposed outdoor play area were below background for metals and below risk screening levels except for motor oil. No further action was recommended. Location believed to be adjacent (southwest) 1 st Five LA property.	S/SG
53	4/17/2003	BAS	Limited Phase II Environmental Site Assessment	Off-site (1 st Five LA property) southwest of Historic Station Area	Six soil borings were drilled to 1 foot and tested for VOCs, PCBs, SVOCs, TPH and metals. TPH was reported up to 650 mg/kg in 1 foot soil samples. VOCs and TPH were detected below MCLs in 3 grab groundwater samples. Risk to residents was determined to be 3.85 E-5 mostly due to naturally occurring metals.	S/ GW
54	4/1/2003	BAS	Results of Limited soil	Off-site (1 st	Soil gas samples were collected from 6 shallow borings and	SG

			gas Sampling at the Los Angeles Union Station site	Five LA property) southwest of Historic Station Area	analyzed for methane and VOCs for due diligence. Results indicated that there was not an indoor air risk. Location believed to be adjacent (southwest) 1 st Five LA property.	
55	7/18/2003	Iris Env.	Results of Subsurface Site Characterization , Parcels 1 and 3	Off-site High Density Residential areas north of the Station Area	Characterization performed prior to High-Density residential development. 16 borings advanced to characterize the shallow fill unit that was suspected of having elevated metals. TPHd was reported up to 990 ppm and TPHmo was reported at up to 4,200 ppm. Elevated concentrations of metals were not detected.	S
56	9/29/2002	ERM	Site Characterization Report and Human Health Risk Assessment	Off-site Mission Tower Area	<p>Report prepared on behalf of BNSF, and the RWQCB was consulted during the activities. The report documents refinery activities on the northwest adjacent property (current William Meads Homes Housing Project), and industrial iron works west of this location (also off-site). The report also documents oil production activities within one-mile of the area.</p> <p>The report describes numerous previous investigations of the Mission Tower property between 1990 and 2002. These investigations included soil and groundwater sampling, and analysis for TPH, VOCs, PAHs, metals, and PCBs. Additional investigation activities were performed during the assessment. The combined investigations of the area appeared robust.</p> <p>The report concluded the follow for soils: 1) heavy hydrocarbons are present in soil up to 16,000 mg/kg. The leachability of these hydrocarbons are very low; 2) Concentrations of VOCs and PAHs in soil are below residential PRGs (risk based regulatory criteria); 3) metals present in soil were below residential PRGs, with the exception of lead and antimony, which are isolated to surficial soils.</p> <p>The report concluded the following for groundwater: 1) heavy hydrocarbons are present in groundwater up to 17 mg/l. Free-phase hydrocarbons were not identified and the hydrocarbon impact is</p>	S/ GW

PAHs - Polycyclic aromatic hydrocarbons by EPA Method 8270. Analytes not shown were below the laboratory reporting limits.

RSL - EPA Region IX Regional Screening Levels (Industrial Setting), April 2009.

ESL - California Regional Water Quality Control Board, San Francisco Region, Table A - Environmental Screening Level, Shallow Soils (<3M bgs), Groundwater is Current or Potential Drinking Water Source, May 2008

CHHSL - California Environmental Protection Agency, California Human Health Screening Levels, Table 1, January 2005.

mg/kg - Milligrams per kilogram.

2-Meth - 2-Methylnaphthalene

1-Meth - 1-Methylnaphthalene

Aceny - Acenaphthylene

Acene - Acenaphthene

Floure - Flourene

Phen - Phenanthrene

Anth - Anthracene

Fluora - Fluoranthene

B (a) A - Benzo (a) Anthracene

B (k) F - Benzo (k) Fluoranthene

B (b) F - Benzo (b) Fluoranthene

B (a) P - Benzo (a) Pyrene

I-Pyrene - Indeno (1,2,3-c,d) Pyrene

D (ah) A - Dibenz (a,h) Anthracene

B (ghi) P - Benzo (g,h,i) Perylene

--- - Not analyzed.

NA - Not available

Supplemental Report 1

December 13, 2010

Additional requested analyses are reported as a stand-alone report.

Scott Allin
URS Corporation
2870 Gateway Oaks Drive, Suite 300
Sacramento, CA 95833-4324

Subject: **CalScience Work Order No.: 10-12-0271**
Client Reference: 17326502.00007

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 12/3/2010 and analyzed in accordance with the attached chain-of-custody.

CalScience Environmental Laboratories certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analysis, if any, is provided herein, and follows the standard CalScience data package. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

A handwritten signature in black ink that reads "Vikas Patel".

Glossary of Terms and Qualifiers

Work Order Number: 10-12-0271

<u>Qualifier</u>	<u>Definition</u>
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution, therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to matrix interference. The associated LCS and/or LCSD was in control and, therefore, the sample data was reported without further clarification.
4	The MS/MSD RPD was out of control due to matrix interference. The LCS/LCSD RPD was in control and, therefore, the sample data was reported without further clarification.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to a matrix interference effect. The associated batch LCS/LCSD was in control and, hence, the associated sample data was reported without further clarification.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
ME	LCS Recovery Percentage is within LCS ME Control Limit range.
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture.

To: Vikas Patel
Subject: Modifications to COC

Hi Vik,
I have the following modifications to project number 17326502.00007, submitted by Andrew Vigna on 12/3/10.

- 1) On COC dated 12/2, page 2 of 3, sample ID B-12-10, change from hold to analyze TPH, VOCs, PNAs same methods as other samples.
- 2) On COC dated 12/2, page 2 of 3, sample ID B-11-5, add analysis for PCBs and Title 22 metals.
- 3) On COC dated 12/3, page 1 of 2, sample ID B-13-30, add analysis for TPHg, BTEX, and Oxygenates.

Please let me know if you need anything else and please confirm receipt. Thanks

Scott Allin, R.E.A. II

Subject: Work Order 10-12-0271 *Urgent*

Don et al,

We need to have samples B-1-5 and B-1-10 run for Title 22 Metals as quickly as possible. Can you please let me know how quickly you could turn it around? Thanks

Subject: **CalScience Work Order No.: 10-12-0271**
Client Reference: 17326502.00007

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 12/3/2010 and analyzed in accordance with the attached chain-of-custody.

CalScience Environmental Laboratories certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analysis, if any, is provided herein, and follows the standard CalScience data package. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Vikas Patel".

Glossary of Terms and Qualifiers

Work Order Number: 10-12-0271

<u>Qualifier</u>	<u>Definition</u>
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution, therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to matrix interference. The associated LCS and/or LCSD was in control and, therefore, the sample data was reported without further clarification.
4	The MS/MSD RPD was out of control due to matrix interference. The LCS/LCSD RPD was in control and, therefore, the sample data was reported without further clarification.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to a matrix interference effect. The associated batch LCS/LCSD was in control and, hence, the associated sample data was reported without further clarification.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
ME	LCS Recovery Percentage is within LCS ME Control Limit range.
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture.

WORK ORDER #: 10-12-0271

SAMPLE RECEIPT FORM

Cooler 1 of 2

CLIENT: URS

DATE: 12/3/10

TEMPERATURE: Thermometer ID: SC1 (Criteria: 0.0 °C – 6.0 °C, not frozen)

Temperature 2.3 °C + 0.5 °C (CF) = 2.8 °C Blank Sample

Sample(s) outside temperature criteria (PM/APM contacted by: _____).

Sample(s) outside temperature criteria but received on ice/chilled on same day of sampling.

Received at ambient temperature, placed on ice for transport by Courier.

Ambient Temperature: Air Filter

Initial: [Signature]

CUSTODY SEALS INTACT:

Cooler _____ No (Not Intact) Not Present N/A

Sample _____ No (Not Intact) Not Present

To: Vikas Patel
Subject: Modifications to COC

Hi Vik,
I have the following modifications to project number 17326502.00007, submitted by Andrew Vigna on 12/3/10.

- 1) On COC dated 12/2, page 2 of 3, sample ID B-12-10, change from hold to analyze TPH, VOCs, PNAs same methods as other samples.
- 2) On COC dated 12/2, page 2 of 3, sample ID B-11-5, add analysis for PCBs and Title 22 metals.
- 3) On COC dated 12/3, page 1 of 2, sample ID B-13-30, add analysis for TPHg, BTEX, and Oxygenates.

Please let me know if you need anything else and please confirm receipt. Thanks

Scott Allin, R.E.A. II

Subject: **CalScience Work Order No.: 10-12-0311**
Client Reference: 17326502.00007

Dear Client:

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received 12/3/2010 and analyzed in accordance with the attached chain-of-custody.

CalScience Environmental Laboratories certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analysis, if any, is provided herein, and follows the standard CalScience data package. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report, please do not hesitate to contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Vikas Patel".

Glossary of Terms and Qualifiers

Work Order Number: 10-12-0311

<u>Qualifier</u>	<u>Definition</u>
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution, therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to matrix interference. The associated LCS and/or LCSD was in control and, therefore, the sample data was reported without further clarification.
4	The MS/MSD RPD was out of control due to matrix interference. The LCS/LCSD RPD was in control and, therefore, the sample data was reported without further clarification.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to a matrix interference effect. The associated batch LCS/LCSD was in control and, hence, the associated sample data was reported without further clarification.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
ME	LCS Recovery Percentage is within LCS ME Control Limit range.
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture.

Subject: Modifications to COC

Hi Vik,
I have the following modifications to project number 17326502.00007, submitted by Andrew Vigna on 12/3/10.

- 1) On COC dated 12/2, page 2 of 3, sample ID B-12-10, change from hold to analyze TPH, VOCs, PNAs same methods as other samples.
- 2) On COC dated 12/2, page 2 of 3, sample ID B-11-5, add analysis for PCBs and Title 22 metals.
- 3) On COC dated 12/3, page 1 of 2, sample ID B-13-30, add analysis for TPHg, BTEX, and Oxygenates.

Please let me know if you need anything else and please confirm receipt. Thanks

Scott Allin, R.E.A. II
