ECONOMIC SURVEYS DIVISION

Michael G. Farrell, Chief

ACKNOWLEDGMENTS—For the Bureau of the Census, this report was prepared in the Economic Surveys Division under the Direction of **Stanley M. Hyman**, assisted by **Gerald Feuer** and **Andrew Pekala**. **Nancy Bean, Vestah Blye, Helen Corley, Eunice James, Robert Reinard, Kenneth Shanabrough, Marjorie Thomas, and Hung Wong** contributed in resolving establishment processing problems and in the analysis of the data for this report. **Charles Venters**, Chief, Economic Programming Branch, directed the computer programming for the study. **Chuck Fee Lee** was assigned primary programming responsibility with assistance from **Raymond Abercrombie, Frank Frederick, Kim Larson, Deborah E. Schaub, and David Thurston**. **Paul Poissant**, Chief, Directory and Census Programming Branch, directed the computer preparation of the basic data files with assistance from **Mary E. Crum, Donald H. Danbury, Robert Penrod, David Krystosek, Donald Shepherd, and Robert G. Willner**. **Andrew L. Grieco**, Assistant Division Chief for Methods and Systems, provided the general direction of the computer phase of the study. Editing specifications and quality control operations for computer processing were performed under the direction of **Joel Richardson**, Chief, Methods and Research Staff, assisted by **Thomas Mesenbourg**. **Samuel Schweid** made important contributions to the Planning and operational phases of the work. General staff guidance was provided by **Peter Ohs**, Assistant Division Chief, Economic Programs.

For the Social Security Administration, the work necessary to supply the basic coded records was performed by the staffs of **John J. Carroll**, Director, Office of Research and Statistics, **Arthur F. Simermeyer**, Associate Commissioner for Office of Central Operations, and **Margaret Cook**, Acting Director,

Office of Data Services. Guidelines by industrial and geographic classification were provided by the Division of Statistics under **Henry F. Patt**, Director. Wage and salary employment statistics were provided by **Erma W. Barron**, Chief, Earnings and Employment Statistics Branch. The resolution of problems relating to the Establishment Reporting Plan was performed under the direction of **Cheryl I. Williams** and geographic and industrial code problems were handled under the direction of **Linda M. Dill**. Important contributions were made by **Salvatore J. D'Avella, Charles L. Childress, Fredric B. Iwanowski**, and others.

Within the Publications Services Division, many individuals made significant contributions in the areas of publication planning and design, editorial review, composition, and printing procurement.

General Explanation

INTRODUCTION

This is the 26th in a series of publications presenting first-quarter employment and payroll statistics by county and by industry. This series of reports has been revised and represents an extension of the existing County Business Patterns program which has been published annually since 1964 and at irregular intervals prior to that year. A description of previous publications is provided on the inside back cover.

This revised series of reports starting with 1974 provide data covering most of the economic divisions of the economy, i.e., agricultural services, mining, construction, manufacturing, transportation, public utilities, wholesale trade, retail trade, finance, insurance, real estate, and services. The inclusion of data collected by the Bureau of the Census Annual Organization Survey permits the revised program to include data on total payroll for the entire year thus overcoming one of the inherent drawbacks of the publications previous to 1974 which were limited to first-quarter FICA (Federal Insurance Contributions Act) taxable payroll and failed to identify seasonal operations. In this new series, data are tabulated on an establishment basis rather than on a reporting unit basis. Prior to the 1974 publications for nonmanufacturing industries, employers were counted once in each county no matter how many establishments they operated in the same kind of business.

Summary data are provided on number of employees for the mid-March pay period, first-quarter total payroll, total annual payroll, number of establishments, and number of establishments by employment-size class. Data are tabulated by detailed kinds of businesses based on the 1972 Revised Standard Industrial Classification designations. Geographic areas tabulated are the United States, the 50 States, the District of Columbia, and Puerto Rico. In addition, data for all standard metropolitan statistical areas (SMSA's) outside of New England and for New England county metropolitan areas (NECMA's) are shown in a separate publication.

In years other than Economic Census years (1972, 1977, etc.), the Census Annual Organization Survey provides the individual establishment data for multilocation firms. Data for single-unit firms are obtained annually from administrative records of the Internal Revenue Service. Specifically, employment and payroll data are obtained from the Internal Revenue Service Form 941. Note that this represents a change from past years, when employment data were obtained from the Social Security Administration Form 941, Schedule A. Starting in 1978, the Social Security Administration changed from a quarterly to an annual reporting system and the Form 941, Schedule A was discontinued. Now, as in the past, these administrative records data are received from other agencies on a confidential basis for statistical purposes only. They are combined with other Bureau of the Census programs to accurately measure the business universe.

Final industry classification codes derived from 1977 Economic Census processing are incorporated into the 1978 County Business Patterns publications.

Because County Business Patterns statistics provide information on establishments, payroll, and employment by industry

classification and county location, they are useful for analyzing market potential, measuring the effectiveness of sales and advertising programs, setting sales quotas and budgets, analyzing the industrial structure of regions, making basic economic studies of small areas, and serving other business uses. They are also useful to government agencies for administration and planning purposes. If you are interested in small business data, please see page XI—County Business Patterns Data Available on Computer Tapes.

Included in an appendix to this edition are Federal employment and payroll data by county for most States. These data, which are not part of the basic County Business Patterns tabulations, have been made available by the Regional Economics Division, Bureau of Economic Analysis, Department of Commerce, through the cooperation of the Bureau of Labor Statistics of the Department of Labor.

TYPES OF EMPLOYMENT COVERED

Prior to 1978, data in this publication represented the following types of employment covered by FICA (a) all covered wage and salary employment of private nonfarm employers and of nonprofit membership organizations under compulsory coverage and (b) all employment of charitable, educational, and other nonprofit organizations covered under the elective provisions of FICA Act.¹ (See the following for an

Estimated Percent Distribution of Paid Civilian Wage and Salary Employment, by Coverage Status Under the Social Security Program

| Employment group | Percent |
|---|---------|
| Total, paid civilian wage and salary employment ¹ | 100.0 |
| Covered by Social Security | 91.0 |
| In County Business Patterns scope | 76.5 |
| Not in County Business Patterns scope ² | 14.5 |
| Government | 11.5 |
| Railroad employment, ³ agriculture, and domestic service | 3.0 |
| Not covered by Social Security | 9.0 |
| Government | 7.0 |
| Agriculture, domestic service and other | 2.0 |

Source: Department of Health, Education, and Welfare, Social Security Administration, Office of Research and Statistics, Division of OASDI Statistics, October 26, 1978.

¹ Excluded from these data are self-employed persons who make up about 8 percent of all paid civilian employment.

² Total employment represents individuals covered by Social Security at any time during the year.

³ Railroad employment jointly covered by Social Security and railroad retirement programs.

¹ Exception being the multilocation firm electing exemption status for all or part of its establishments but reporting data in the Annual Organization Survey.

example of employment coverage under the Social Security Program). The employment data obtained from the Internal Revenue Service since 1978 differs somewhat from previously published employment data, in that all persons employed by an establishment filing a Form 941 are included in the County Business Patterns program. Although Form 941 is used only by employers covered (at least partially) by FICA, the data also include individual employees of the same establishment who are themselves not covered by FICA. In past years, employees of this type were not included. The difference in employment coverage will affect only certain types of activities, notably those where retirement systems other than Social Security are provided, or where part-time employees are prevalent. Examples would include hospitals and educational institutions. Administrative data for employees of establishments totally exempt from FICA continue to be excluded, as detailed in later section.

DEFINITIONS OF BASIC DATA ITEMS

Establishment

The statistics in County Business Patterns are tabulated in terms of "establishments" beginning with the 1974 publication. An establishment is a single physical location where business is conducted or where services or industrial operations are performed. A central administrative office is an establishment primarily engaged in management and general administrative functions performed centrally for other establishments primarily engaged in performing supporting services for other establishments of the same company rather than for the general public or for other business firms.

Each legal entity (corporation, partnership, single proprietorship, etc.) having paid employees is required to file a separate Employer's Quarterly Federal Tax Return, Treasury Form 941, identified by an Employer Identification Number. In the case of single-location legal entities, each fourth-quarter 941 report is counted as an establishment. For those legal entities comprising more than one location (multiestablishment), data are obtained on an individual establishment basis from the Bureau of the Census 1979 Annual Company Organization Survey. The data in County Business Patterns reports for such legal entities are distributed by county and industry, on the basis of the report. The distribution for nonrespondents is based on the last previous Annual Company Organization Survey of Economic Census report.

Establishment size designations are measured by paid employment in the mid-March 1979 pay period. The size group "1 to 4" also includes establishments that did not have any paid employees in the mid-March pay period but paid wages to at least one employee at some time during the year.

The count of establishments for single-location firms is based on the presence of fourth-quarter payroll. Each single-location firm reporting fourth-quarter payroll is counted as an establishment.

The count of establishments for multilocation firms is based on the date of change as reported in the 1979 Annual Company Organization Survey. Each multiestablishment location is

counted as one establishment if determined to be in an active status as of December 15. An establishment determined to be not active on December 15 is not counted as an establishment.

Payrolls

Total annual payroll includes all forms of compensation which are subject to income tax withholding, such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Employees' tips and gratuities reported to employers are included.

For corporations, annual payroll includes amounts paid to officers and executives which are subject to income tax withholding; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. For single-establishment firms, annual payroll is the sum of the four quarters of the 1979 Internal Revenue Service Form 941 data for total compensation subject to withholding. For multiestablishment firms, annual payroll data is that reported in the 1979 Annual Company Organization Survey.

First-quarter total payroll consists of payroll, as defined above, paid to persons employed at any time during the January to March 1979 quarter.

Estimating techniques were used to obtain payroll for those few employers determined to be delinquent based on the reporting patterns of eight quarters of payroll.

Mid-March Employment

Mid-March pay period employment is the count of employees during the pay period that includes March 12, 1979, as reported on Internal Revenue Service Form 941, or as corrected by estimates in those cases where it was incompletely or improperly reported. Employment of establishments of multi-establishment employers is obtained from the Annual Company Organization Survey or is estimated for those establishments which did not report employment.

Estimating techniques were used to provide mid-March employment figures for a considerable number of employers (most of whom were small employers) who failed to report mid-March employment on their quarterly Form 941 or who reported an obviously incorrect employment entry. To estimate employment for single-establishment employers, the first-quarter payroll entry was divided by the adjusted prior-year average payroll per employee ratio for the establishment. If prior-year data were not available, average wage factors computed from reported data were used to impute missing employment entries. In order to develop the average wage factors, reported employment data were tabulated by quarterly payroll size group within each major Standard Industrial Classification group within each State. For nonrespondent multiestablishment employers, current-year administrative records data were used to derive the missing employment figures.

INDUSTRY AND COUNTY CLASSIFICATIONS

General

Initially, all employers are assigned industry and county classifications by the Social Security Administration on the basis of nature of business and location information supplied on their applications for employer identification numbers (Treasury Form SS-4). Where classification information has not been satisfactorily reported on Form SS-4, the Social Security Administration has obtained this information on larger cases through direct contact with the new business.

The Bureau of the Census also assigned or updated industry and county classifications to a substantial number of establishments canvassed in the Economic Censuses, Annual Surveys of Manufactures, and Report of Organization Forms NC-XIT, NC-XIS. These changes were based on current information on actual physical location and major activity, as determined by nature of businesses, type of operation (importer, manufacturers' agent, etc.), and commodities handled or services rendered.

Based on detailed data collected in the 5-year Economic Census, the Bureau of the Census and the Social Security Administration participate in a coordination program designed to update the industry and county classification in the Social Security Administration files and to provide County Business Patterns data comparable and consistent with other statistics issued by the Bureau of the Census.

All currently available industry and county codes assigned to establishments in the 1977 Economic Census were used to update the industry classifications and county codes in the 1978 and 1979 County Business Patterns. Newly organized single-location business establishments were assigned industrial classifications based on their completed Form SS-4.

Industry Classification

Industry classifications are based on the 1972 edition of the Standard Industrial Classification (SIC) Manual, including the 1977 supplement.² Additional information on industry classification is furnished in various appendixes that appear in the U.S. Summary report. In a few instances, the most detailed industrial classifications for which data are presented represent combinations of more detailed SIC industries. These classifications are explained in an appendix of the U.S. Summary.

The industry titles shown in County Business Patterns are the short SIC titles. Complete descriptions are contained in the 1972 Standard Industrial Classification Manual.

"Unclassified establishments" include establishments, typically new businesses, that could not be classified in any major industry group because of insufficient information. An advance

estimate indicates about 3.3 percent of the total number of establishments remain unclassified by industry because nature-of-business information is incomplete or unreported, accounting for 0.7 percent of total employment and 0.6 percent of total payroll.

The administrative and auxiliary establishment classification in this publication represents central administrative offices and auxiliary establishments, such as warehouses, research laboratories, and maintenance locations. Such data are shown separately by industry division for each county and by major industry group for each State and for the United States.

Industry classification of an establishment is based on the primary activity which is determined by its principal product or group of products produced or distributed, or by services rendered. For activities such as construction, transportation, communications, electric, gas, and sanitary services, dispersed sales activities, and similar physically dispersed operations, establishments are represented by those relatively permanent main or branch offices, terminals, stations, etc., which are either (1) directly responsible for supervising such activities or (2) the base from which personnel operate to carry out these activities. Hence, the individual sites, projects, fields, networks, lines, or systems of such dispersed activities are not ordinarily considered to be establishments. As an example, a construction establishment is defined as a relatively permanent office, or other place of business, at which or from which the usual business activities related to construction are conducted.

Employees engaged in force-account construction (construction work performed for its own account and used by an establishment primarily engaged in some business other than construction) are classified in the principal nonconstruction activity that is being performed or will be performed at the site.

Establishments that are selling and installing or erecting such products as structural steel buildings and bridges, elevators and escalators, sprinkler systems, central air-conditioning systems, automatic temperature controls, prefabricated metal room dividers, and others where the installation or erection costs are a major part of the total costs are classified as contract construction.

County Classification

Establishments are assigned county classifications on the basis of the physical location of the establishments. The independent cities in Virginia and the independent cities of Baltimore, Md., Carson City, Nev., St. Louis, Mo., and others are treated as separate counties.

Employees without a fixed location within a State or of unknown county locations are included in County Business Patterns under a "statewide" classification at the end of the county tables for each State. This incomplete county detail causes only slight understatement of county employment in most major industry groups and significant understatement in only a few cases. "Statewide" data represented are estimated to be about 0.1 percent of total employment in 1979. However, this percent varies by State.

² Issued by the office of Federal Statistical Policy and Standards, Department of Commerce.

SOURCES OF DATA

Basic Items

The data for the 1979 County Business Patterns are extracted from the Bureau of the Census Standard Statistical Establishment List. The SSEL is updated annually by the Bureau of the Census and consists of the following data files:

1. Internal Revenue Service quarterly 941 payroll file consisting of four quarters for 1979 and four quarters for 1978. These data are primarily used to obtain payroll data for single-establishment employers. This issue of County Business Patterns includes fourth-quarter 1979 data on Form 941 reports received through the first quarter of 1980. Quarterly payroll estimates have been included for those firms known to be in business but delinquent at the time of closeout. Reports received after the tabulation cutoff date are not included and will cause a slight understatement of annual payroll.

2. Bureau of the Census 1977 Economic Censuses and 1978 and 1979 Annual Organization Surveys, which provide multiestablishment employer employment and first-quarter and annual payroll data for each establishment.

Federal Employment and Payroll Data

Data on Federal employment and payrolls include Federal civilian employment and payroll data covered under 5-U.S.C. 8501-8508 (formerly 42 U.S.C. 1361-1369) of the Social Security Act. These data are not included in the regular County Business Patterns tables.

The data include all installations of Federal agencies having employees covered by the Act except the Central Intelligence Agency, the National Security Agency, and the Federal Bureau of Investigation, which for security reasons have been omitted.

The Department of Defense (except units paid from non-appropriated funds) reports separately for each installation with 101 or more employees. Installations with less than 101 employees are included in a statewide category.

Other Federal agencies and units from nonappropriated funds report data separately by installation except where the option is exercised to combine small installations in a single "statewide" report.

Mid-March pay period employment (except for Department of Defense) is the count of employees during the pay period that includes March 12, 1979. The Department of Defense includes persons employed on the last work day of the month plus all intermittent employees during the month. Intermittent workers are defined as occasional workers who were employed at any time during the month.

Total wages for the quarter are shown for Federal employees. They include cash allowances and the cash equivalent of any type of remuneration. They also include all payments for sick

leave, lump sum payments for terminal leave, withholding taxes, and civil service retirement deductions.

DATA WITHHELD FROM PUBLICATION

In accordance with Federal law, Title 13, Section 181, data that may disclose the operations of an individual employer are not published. However, the number of establishments in a kind of business and their distribution by employment-size class are not considered a disclosure, and these items may appear in instances where other items of information, such as employment and payrolls, are withheld.

Data are not shown separately for any industry that does not have at least 50 employees in the area-county, State, or United States, covered by the tabulations. The nonpublication of small data cells is primarily a printing limitation. The unpublished small data cell information is contained on computer tapes. (See page XI for details.) However, data for an unpublished industry are included in the total shown for the broader industry group of which it is a part. Also, data for some establishments that could not be classified by detailed kind of business are included in the tabulations in a broader kind-of-business group. For these reasons, the details shown in this report may differ from the sum of the published components.

COMPARABILITY WITH OTHER DATA

Data in County Business Patterns Since 1974

The County Business Patterns data since 1974 are comparable except, due to conceptual differences in the assignment of SIC codes, the data for SIC code 5063, Electrical Apparatus and Equipment; SIC code 1730, Electrical Work; administrative and auxiliary data for SIC code 3600, Electric and Electronic Equipment; and SIC code 4800, Communication, are not comparable to that published in prior years. There have been no significant changes in the FICA coverage of workers between 1974 and 1977. Refer to "Types of Employment Covered" for further information for years after 1977.

The County Business Patterns data represent tabulations of universe records, not a statistical sample.

Data in County Business Patterns Prior to 1974

Employment Data—The first-quarter statistics on employment prior to the 1974 edition of County Business Patterns are basically comparable for major SIC groups (two-digit). However, due to changes in the 1972 Industrial Classification Manual, data for some three- and four-digit SIC's may not be comparable. (See 1972 Standard Industrial Classification Manual, Appendix C, "Relation of 1972 to 1967 SIC Industries Showing Only Changes from 1967.") There have been no significant changes in the FICA coverage of workers from 1959 to 1973.

In addition, comparability of County Business Patterns prior to 1974 may be affected by the definition of a reporting unit as used then as opposed to the establishment definition used in the Current County Business Patterns series. These differences

are mostly confined to geographic area statistics in construction, oil and gas field services, off-shore drilling, and wholesale trade. Nonestablishment employment (employees of an establishment who do not work in the county in which the establishment is located) for multiestablishment employers are generally reported in the Census Bureau's Annual Organization Survey at the address of the location from which they are paid. The "reporting unit" concept used prior to 1974 attempted to place employees in the geographic areas in which the employees worked.

Payroll Data—The current County Business Patterns reports provide data on total first-quarter payroll and total annual payroll. County Business Patterns reports prior to 1974 provide data on FICA taxable first-quarter payroll. The annual FICA payroll data are not available. First-quarter FICA taxable payroll is estimated to be within 1 percent of total first-quarter payroll. However, the difference between FICA taxable and total payrolls varies by economic industry.

Reporting Unit Data—The current year County Business Patterns data are tabulated in terms of establishments. (See "Definitions of Basic Data Items.") County Business Patterns data prior to 1974 are tabulated in terms of reporting units. The reporting unit as used for manufacturing industries differs from that for nonmanufacturing industries. Each manufacturing location of a company is counted as a separate reporting unit. In manufacturing industries, reporting units are, therefore, conceptually the same as "establishments" in Census Bureau terminology. In nonmanufacturing industries, multilocation employers (i.e., separate legal entities) are counted once in each county for each industry in which they operate, regardless of establishments operated (e.g. a service business that operates seven branch offices in the same county was tabulated as one "reporting unit" prior to 1974, and seven establishments in the 1974-1979 publications). Therefore, for nonmanufacturing industries, the reporting unit counts are not comparable to the establishment counts.

The County Business Patterns data represent tabulations of universe records, not a statistical sample.

Employment and Payroll Data in the 1977 Economic Censuses

Comparability of employment and payroll data shown in this report and the reports of the Economic Censuses is affected by the following:

1. In general, the 1977 Economic Census represents reported data for individual establishments, whereas the County Business Patterns publications are based primarily on administrative record data. Every effort is made to resolve significant differences for the same firm, but statistical differences are known to exist.

Also, the 1977 Economic Census data represent revised industrial classification codes based on reported 1977 detail

products or services. The 1979 County Business Patterns publications include all known 1977 industrial classification revisions at the time of publication. Final 1977 Economic Census industrial classification codes have been incorporated in the 1978 County Business Patterns publications. In addition, the 1977 Economic Census program includes small firms with no paid employees (i.e., the owners are the employees). These firms are excluded from the County Business Patterns Program.

2. The County Business Patterns count represents the number of employees for the pay period including March 12, 1979. (See "Definitions of Basic Data Items") For the 1977 Economic Censuses, employment data for retail trade, wholesale trade, selected service trade (in scope of the census), and public warehouses represent counts for the pay period including March 12 for the year 1977; manufacturing and mineral industries employment data represent an average of all production workers on the payroll during the pay periods including the 12th of March, May, August, and November, and all other employees on the payroll during the pay period including March 12; the construction industry data represent estimates of the average number of employees on the payroll for the pay periods including the 12th of March, May, August, and November.

3. The Census of Business classifies employees of leased departments located within retail establishments as employees of the main establishment. In County Business Patterns, these employees were classified in the industry of the leased department that was tabulated as a separate establishment with its own industry classification. For example, the employees of a leased shoe department located in a department store were classified in the census as employees of the department store, but in County Business Patterns as employees of a shoe store.

4. Liquor stores operated by State and local governments are included in the Census of Business, Retail Trade, but are excluded from County Business Patterns as government workers. Liquor warehouses operated by State and local governments are included in the Census of Business, Wholesale Trade, but are also excluded from County Business Patterns as government workers.

Employment and Payroll Data Under the State Unemployment Insurance Program

Employment and payroll data, similar in a number of respects to the statistics in County Business Patterns reports, are compiled for each of the unemployment insurance agencies of the 50 States, the District of Columbia, and for Puerto Rico and are published each quarter by the Bureau of Labor Statistics (and, prior to 1972, by the Employment and Training Administration of the Department of Labor). These State data and related county or other local-area data are derived from the quarterly reports submitted to the State employment security

agencies by employers subject to the State unemployment insurance laws and are compiled by each State under uniform definitions and minimum standards maintained by the Bureau of Labor Statistics. The SIC system is employed for industry classification purposes.

Major differences between the data in this publication and those in the unemployment insurance series are attributable to the following factors:

1. Differences in industrial classifications that arise because of differences between the concept of an establishment (one location) and of the reporting unit (one or more locations) that is to be classified.
2. Differences in coverage of small nonprofit organizations, churches, religious organizations, and private schools—both elementary and secondary.
3. Other factors, such as differences in reports submitted by employers to Federal and State agencies and differences in methods of processing and adjusting data.

Bureau of Labor Statistics Employment and Labor Force Estimates

Employment Estimates—In cooperation with the Bureau of Labor Statistics (BLS), agencies in each State and the District of Columbia, including 47 employment security agencies affiliated with the Employment and Training Administration, prepare current monthly employment estimates by industry, both statewide and for 230 selected areas. These estimates are based on employment data reported each month by a sample of employers in each industry, and are periodically adjusted to levels indicated by social-insurance statistics, primarily State unemployment insurance data.

The March 1979 estimates of these series for comparable industry groups, which are published both by BLS in *Employment and Earnings* and by the State agencies in their monthly news releases, may differ from the corresponding County Business Patterns figures for a number of reasons. There may be differences in level within national and State figures because BLS estimates are adjusted to levels described above, which may differ from those shown by data in this publication. There are also other differences, such as: (a) The two sets of data differ in overall scope (e.g., County Business Patterns data exclude interstate railroads and government), (b) the County Business Patterns establishment may differ from the BLS reporting unit, and (c) the industry classifications assigned to the same entity may also differ.

Labor Force Estimates—National estimates of the number of employed and unemployed persons in the labor force and data on their characteristics are currently published in the BLS monthly report, *Employment and Earnings*. This information is obtained for one calendar week each month from a sample of households throughout the country. Subnational data from the same survey are published only on an annual average basis. For 1979, separate estimates of civilian labor force, employ-

ment, and unemployment were published for all 50 States, the District of Columbia, the 30 largest SMSA's, and 10 central cities. Publication was made by means of a BLS report entitled "Geographic Profile of Employment and Unemployment, 1979" (BLS Report 481). The 1980 area report is now in preparation.

These labor force statistics, compiled from household interviews, differ in definition, concepts, and methods of measurement from data based on business payroll records. They serve different purposes and differ from the County Business Patterns data for a number of reasons. For the household survey, workers are counted according to their place of residence, whereas for County Business Patterns, they are counted according to their place of work. The statistics from the household survey count each employed person only once according to major activity during the survey period; persons "with a job but not at work" and in a nonpaying status are classified as employed. In the County Business Patterns data, an employee who worked for more than one employer during the mid-March pay period may be counted more than once. In addition, there are various reasons for differences in the two series of data because of the reporting systems used; differences in the time period to which the reports refer; sampling variations in the figures based on the sample survey; and differences in industrial classification resulting from the fact that the survey information is obtained from respondents in workers' households, whereas the County Business Patterns industrial classification is based upon information provided by the employer.

RELIABILITY OF DATA

County Business Patterns data have been tabulated from universe files and, therefore, are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to obtain information about all cases in the universe, definitional and classification difficulties, differences in the interpretation of questions, errors in recording or coding the data obtained, and other errors of collection, response, coverage, and estimation for missing data.

The accuracy of these tabulated data are determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

Estimating techniques have been used for data records which have failed computer edits, had incomplete reporting on data items, or were for employers who failed to report in sufficient time to be included in the tabulations. (See "Definitions of Basic Data Items" for a general explanation of the imputation methodologies.) The data user should keep in mind that because of changes in the methods of imputation and because the amount of imputation for a given summary cell is unknown, caution should be exercised in the interpretation of year-to-year changes. This is especially true for the data presented for the smaller counties or smaller State-industry groups.

Details in the tables may not add to totals because (1) some establishment records are not classified to the most detailed kind-of-business level and (2) summary records with fewer than 50 employees are not shown separately, but are shown at the next broader kind-of-business group. Detailed payroll figures may not add to totals because of independent rounding.

1979 Imputation Methodology

The 1979 imputation methodology was identical to the methodology used in 1978. Please refer to the 1978 U.S. Summary publication for a description of the methodologies used as well as estimates of the levels of imputation for the various data items.

Inquiries on the effect of imputed data on published data totals should be directed to:

Mr. Michael Farrell
Chief, Economic Surveys Division
Bureau of the Census
Washington, D.C. 20233

ABBREVIATIONS AND SYMBOLS

The following abbreviations and symbols are used in this publication:

- zero
- n.e.c. not elsewhere classified
- SIC Standard Industrial Classification
- D withheld to avoid disclosing figures for individual companies
- A-C, E-M entered in place of employment data, represents an employment-size class as shown at the bottom of the page

COUNTY BUSINESS PATTERNS DATA AVAILABLE ON COMPUTER TAPES

The published and unpublished County Business Patterns data are available on computer tapes. The tapes provide data on first-quarter employment, first-quarter payroll, annual payroll, total number of establishments, and number of establishments by employment-size class by State and by county to the four-digit SIC level. Whereas data in published County Business Patterns State and national publications are not provided for SIC's with fewer than 50 employees in a given county, there is no such restriction on the file including unpublished data. Of course specific employment and payroll figures are withheld if the data might disclose information about individual employers. Nonetheless, the number of establishments by employment-size class by four-digit SIC by county is available without exception. Tables providing data other than the basic county and State SIC summary data are not available on tape. Two types of files will be available: one containing all of the data, both published and unpublished, for all States and counties, and a file limited to the data in print for all States and

counties. The price per tape is currently \$80, documentation included. Prepayment is required.

Inquiries for data years 1965-1973 should be addressed to:
Chief, Economic Surveys Division
Bureau of the Census
Washington, D.C. 20233

Published and Unpublished data

| Number of Reels | File Number | Description |
|-----------------|-------------|---|
| 4 | 2 | County data by Census Geographic State code, FIPS county code, by SIC code. |
| 1 | 1B | State data by Census Geographic State code, by SIC code. |
| 1 | US-SMSA | U.S. Summary and SMSA data by Census Geographic State code, by SIC code. |

Published Data Only

| Number of Reels | File Number | Description |
|--------------------------------|-------------|---|
| 2 per year for 1974 and 1976 | 2 | County data by Census Geographic State code, FIPS county code, by SIC code |
| 3 for 1977 1975 not available. | 2 | County data by Census Geographic State code, FIPS county code, by SIC code. |

Inquiries for data years 1974-1978 should be addressed to:

COUNTY BUSINESS PATTERNS DATA AVAILABLE ON MICROFICHE

County Business Patterns data are also available on microfiche. This is primarily for past publications (which are out of print) but, is also available for current year data. Each microfiche is estimated to contained 98 pages on one fiche card. The fee is \$3.00 for each report title plus 25 cents for each additional microfiche card required to produce the report. For example, microfiche for a CBP State report of 290 published pages would cost \$3.50. They may be ordered from: Customer Services Section, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

| SIC code | Industry | Employment size class | | | | | | | | | | | | | | | | | | | |

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

| SIC code | Industry | Employment size class | | | | | | | | | | | | |

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabetic indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1B. United States—Establishments, Employees, and Payroll by Industry by Employment-Size Class: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

Table 1F. United States—Statewide Establishments by State: 1979

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

| State | Number of employees for week including March 12 | Payroll (\$1,000) | | Number of establishments, by employment-size class | | | | | | | | | |

Table 2. Counties Having Highest Employment: 1979

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

| County | Number of employees for week including March 12 | Payroll (\$1,000) | | | Number of establishments, by employment-size class | | | | | | | | |
|--------------------|---|-------------------|------------|---------|--|--------|----------|----------|----------|------------|------------|------------|--------------|
| | | First Quarter | Annual | Total | 1 to 4 | 5 to 9 | 10 to 19 | 20 to 49 | 50 to 99 | 100 to 249 | 250 to 499 | 500 to 999 | 1000 or more |

Table 2. Counties Having Highest Employment: 1979—Continued

(Excludes government employees, railroad employees, self-employed persons, etc.—see "General Explanation" for definitions and statement on reliability of data. Size class 1 to 4 includes establishments having payroll but no employees during mid-March pay period. "D" denotes figures withheld to avoid disclosure of operations of individual establishments, the other alphabets indicate employment-size class—see footnote.)

| County | Number of employees for week including March 12 | Payroll (\$1,000) | | | Number of establishments, by employment-size class | | | | | | | | |
|---------------------------|---|-------------------|-----------|--------|--|--------|----------|----------|----------|------------|------------|------------|--------------|
| | | First Quarter | Annual | Total | 1 to 4 | 5 to 9 | 10 to 19 | 20 to 49 | 50 to 99 | 100 to 249 | 250 to 499 | 500 to 999 | 1000 or more |

★U.S. GOVERNMENT PRINTING OFFICE: 1981-340-997/1801

COUNTY AND CITY DATA BOOK 1977

An indispensable reference tool presenting selected social and economic statistics for States, metropolitan areas, counties, and cities. Covers a wide variety of topics, including population, housing, employment, vital statistics, crime, retail and wholesale trade, poverty, education, health, social security, local government finances and employment, and many more.

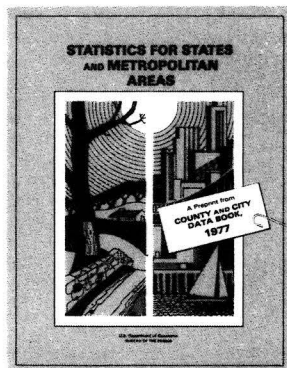

An updating of many of the statistics in **County and City Data Book, 1972**.

CONTENTS INCLUDE:

- 195 items of statistical data for the 50 States and 3,143 counties (or county equivalents)
- 161 items for each of 277 standard metropolitan statistical areas (SMSA's)
- 190 items for each of the 910 cities of 25,000 inhabitants or more
- descriptive text, explanatory notes, and source citations
- maps, charts, and appendices

Clothbound
1,011 pp.
at \$19.50

ALSO AVAILABLE: **Statistics for States and Metropolitan Areas**, a preprint of the tables for census regions and divisions, States, and standard metropolitan statistical areas from the **Data Book**. Includes explanatory notes. 110 pp., \$2.75

STILL AVAILABLE: **County and City Data Book, 1972**, clothbound, 1,076 pp., \$18.65

Description of Publications Issued in Previous Years

1974 through 1978

Data are included for Mid-March employment, first quarter and annual payrolls, and establishments, every SIC industry having a significant number of employees or establishments in a county, a State, and the United States. Refer to page V of General Explanation for a description of the types of employment covered.

1964 through 1973

Data are included for first quarter reporting units, employment and taxable payrolls; every SIC industry having a significant number of employees or reporting units in a county, standard metropolitan statistical area, and State, and for the United States.

1959 and 1962

Data are included for first quarter reporting units, employment and taxable payrolls; every SIC industry having a significant number of employees or reporting units in a county, a State, and the United States. Data is included for a combination of some counties for eight States.

1956

Data are included for first quarter reporting units, employment and taxable payrolls; SIC economic divisions, major groups, and selected three-digit SIC's for the United States, for each State, and for each county. Data is included for a combination of some counties for eight States.

1949 and 1950

Data are included for first quarter manufacturing establishments, employment and taxable payrolls; manufacturing major industry groups and selected three-digit SIC's for the United States, for each State, and for each large county. Manufacturing totals for small counties. Data is included for a combination of some counties for eight States.

1947, 1948, 1951, and 1953

Data are included for first quarter reporting units, employment and taxable payrolls; SIC economic divisions, major groups, and selected three-digit SIC's for the United States, for each State, and for each large county. Economic division totals for small counties. Data is included for a combination of some counties for eight States.

1946

Data are included for first quarter reporting units, employment and taxable payrolls; SIC economic divisions and major groups for the United States, for each State, and for each large county. Economic division totals for small counties. Data is included for a combination of some counties for eight States.

Availability

The most recent edition of County Business Patterns can be examined in field offices of the Department of Commerce, located in principal cities across the country. Earlier editions are available in depository libraries for Federal publications, which are also conveniently located in all areas of the country.

For information on the coverage of individual series, write to Chief, Economic Surveys Division, Bureau of the Census, Washington, D.C. 20233.
