TRANSPORTATION RESEARCH BOARD EXECUTIVE COMMITTEE

Officers

DARRELL V MANNING, *Chairman*
LAWRENCE D. DAHMS, *Vice Chairman*
THOMAS B. DEEN, *Executive Director*

Members

RAY A. BARNHART, JR., *Administrator, Federal Highway Administration, U.S. Department of Transportation (ex officio)*
ROBERT W. BLANCHETTE, *Administrator, Federal Railroad Administration, U.S. Department of Transportation (ex officio)*
FRANCIS B. FRANCOIS, *Executive Director, American Association of State Highway and Transportation Officials (ex officio)*
WILLIAM J. HARRIS, JR., *Vice President, Research and Test Department, Association of American Railroads (ex officio)*
J. LYNN-HELMS, *Administrator, Federal Aviation Administration, U.S. Department of Transportation (ex officio)*
THOMAS D. LARSON, *Secretary of Transportation, Pennsylvania Department of Transportation (ex officio, Past Chairman, 1981)*
ELLIOTT W. MONTROLL, *Chairman, Commission on Sociotechnical Systems, National Research Council (ex officio)*
RAYMOND A. PECK, JR., *Administrator, National Highway Traffic Safety Administration, U.S. Department of Transportation (ex officio)*
ARTHUR E. TEELE, JR., *Administrator, Urban Mass Transportation Administration, U.S. Department of Transportation (ex officio)*
JOHN F. WING, *Senior Vice President, Booz-Allen and Hamilton, Inc., Bethesda, Maryland (ex officio, MTRB)*
CHARLEY V. WOOTAN, *Director, Texas Transportation Institute, Texas A&M University (ex officio, Past Chairman, 1980)*

GEORGE J. BEAN, *Director of Aviation, Hillsborough County (Florida) Aviation Authority*
RICHARD P. BRAUN, *Commissioner, Minnesota Department of Transportation*
ARTHUR J. BRUEN, JR., *Vice President, Continental Illinois National Bank and Trust Company of Chicago*
JOSEPH M. CLAPP, *Senior Vice President and Member, Board of Directors, Roadway Express, Inc.*
ALAN G. DUSTIN, *President, Chief Executive, and Chief Operating Officer, Boston and Maine Corporation*
ROBERT E. FARRIS, *Commissioner, Tennessee Department of Transportation*
ADRIANA GIANTURCO, *Director, California Department of Transportation*
JACK R. GILSTRAP, *Executive Vice President, American Public Transit Association*
MARK G. GOODE, *Engineer-Director, Texas State Department of Highways and Public Transportation*
WILLIAM C. HENNESSY, *Commissioner of Transportation, New York State Department of Transportation*
LESTER A. HOEL, *Hamilton Professor and Chairman, Department of Civil Engineering, University of Virginia*
MARVIN L. MANHEIM, *Professor, Department of Civil Engineering, Massachusetts Institute of Technology*
DANIEL T. MURPHY, *County Executive, Oakland County, Michigan*
ROLAND A. OUELLETTE, *Director of Transportation Affairs for Industry-Government Relations, General Motors Corporation*
RICHARD S. PAGE, *General Manager, Washington (D.C.) Metropolitan Area Transit Authority*
GUERDON S. SINES, *Vice President, Information and Control Systems, Missouri Pacific Railroad*
JOHN E. STEINER, *Vice President, Corporate Product Development, The Boeing Company*
RICHARD A. WARD, *Director-Chief Engineer, Oklahoma Department of Transportation*

The Transportation Research Board is an agency of the National Research Council, which serves the National Academy of Sciences and the National Academy of Engineering. The Board's purpose is to stimulate research concerning the nature and performance of transportation systems, to disseminate information that the research produces, and to encourage the application of appropriate research findings. The Board's program is carried out by more than 250 committees, task forces, and panels composed of more than 3100 administrators, engineers, social scientists, attorneys, educators, and others concerned with transportation; they serve without compensation. The program is supported by state transportation and highway departments, the modal administrations of the U.S. Department of Transportation, the Association of American Railroads, and other organizations and individuals interested in the development of transportation.

The National Research Council was established by the National Academy of Sciences in 1916 to associate the broad community of science and technology with the academy's purposes of furthering

knowledge and of advising the federal government. The Council operates in accordance with general policies determined by the Academy under the authority of its Congressional charter, which establishes the Academy as a private, nonprofit, self-governing membership corporation. The Council has been the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in the conduct of their services to the government, the public, and the scientific and engineering communities. It is administered jointly by both Academies and the Institute of Medicine.

The National Academy of Sciences was established in 1863 by Act of Congress as a private, nonprofit, self-governing membership corporation for the furtherance of science and technology, required to advise the federal government upon request within its fields of competence. Under its corporate charter, the Academy established the National Research Council in 1916, the National Academy of Engineering in 1964, and the Institute of Medicine in 1970.

16. Abstract This Bibliography (in two volumes) contains 7064 abstracts and appropriate indexing for citations added to the Transportation Research Information Service (TRIS) data base between 1974 and 1980. These abstracts have been classified into 28 categories established for the Urban Mass Transportation Research Information Service (UMTRIS). Citations include technical reports, journal articles, handbooks, and other information sources from both U.S. and international sources. Along with classification, all the citations have been indexed with appropriate subject terms. <i>Volume 1: Abstracts</i> contains the citations arranged in the 28 categories. <i>Volume 2: Index</i> contains more than 3400 subject terms used for the indexing, along with appropriate cross references to citations in Volume 1.

HOW TO USE THIS INDEX

This initial publication of the Urban Mass Transportation Research Information Service (UMTRIS) has been published in two volumes for the convenience of the user. Rather than including the Index with the Abstracts volume, the Index has been published separately as Volume 2 so that it can be placed beside the larger Volume 1 to simplify searching.

The two-digit prefixes in the document record numbers in this Index refer to the 28 categories into which *Volume 1: Abstracts* is divided. These categories are as follows:

- 11 Bus & Paratransit Vehicle Technology
- 12 Bus & Paratransit Operations Technology
- 13 Rail Vehicle Technology
- 14 Rail Operations Technology
- 15 Construction & Tunneling Technology
- 16 Maintenance & Rehabilitation Technology
- 17 New Systems & Automation Technology
- 21 Transit Operations Management
- 22 Transit Maintenance Management
- 23 Human Resources Management
- 24 Productivity & Efficiency
- 25 Fares & Pricing
- 26 Safety & Product Quality
- 27 Security
- 28 Marketing
- 29 Information Services
- 31 Conventional Transportation Services
- 32 Paratransit Systems & Services
- 33 Non-Urban & Low-Density Area Transportation
- 34 Transportation of Special User Groups
- 41 Socioeconomics of Passenger Services
- 42 Transit Planning, Policy & Programs
- 43 Transit Financing
- 44 Political Processes & Legal Affairs
- 45 Land Use
- 46 Center City Traffic Restraints
- 47 Urban Goods Movement
- 48 Energy & Environment

Methods for collecting and categorizing the 7065 abstracts in Volume 1 are explained in its Preface. In the course of the data processing of such material by the TRIS (Transportation Research Information Services) computer, various indexes can be prepared; only the Subject-Term Index with more than 3400 terms and 61 000 postings is included here.

The subject terms are arranged alphabetically. Each term is followed by one or more eight-digit document record numbers, the basis for identifying pertinent abstracts in Volume 1. The first two digits of an eight-digit number identify one of the 28 UMTRIS categories in which the specific abstract appears, and the final six digits are the TRIS accession number--an arbitrary identification assigned in the course of entering the citation into the data base. Within any one category the citations are listed in ascending accession-number order, although normally most of the numbers are not consecutive. In this Index, the record numbers under any subject term are first grouped in the 28 UMTRIS categories and, like the entries in Volume 1, are then listed in ascending accession-number order.

As an example of the use of this Index, suppose you are interested in references to the Advanced Concept Train, an UMTA-sponsored rapid-transit car development project of the early 1970s. Look for "Advanced Concept Train" in this Index (page 2) under which you will find 12 listings (see page iii). The first of these is "13 050056". Turn now to Category 13, Rail Vehicle Technology, in Volume 1, as indicated by the initial two digits (13). Although Category 13 starts on page 57, the first entry for the Advanced Concept Train appears (in the course of ascending accession numbers) on page 59. Note that the entry has the entire document record number in front of it (13 050056), not just the accession number. The first reference then is "Propulsion Drive for Advanced Concept Train". Additional references may be found by repeating this process.

Railway Gazette International Vol. 129 No. 4, 1973, pp 140-142. ACKNOWLEDGMENT: EI (EI 73 034258); ORDER FROM: IPC Transport Press.

13 048173 DESIGN REVOLUTION CUTS CAR CONSTRUCTION COSTS. Transit rolling stock throughout the world has been the

13 050049 DYNAMIC RESPONSE OF A RAPID TRANSIT VEHICLE TO RANDOM GUIDEWAY ROUGHNESS. Measured roadway roughness data and the transfer function for a five-degrees-of-freedom model of a rapid transit vehicle are used for determining vertical and lateral passenger motion of a rapid transit vehicle. Optimization studies are used for spring and damping parameters to minimize passenger discomfort for the input spectra associated with the sums and difference of the measured random individual wheel input profiles.

Hartz, BJ Platt, RM ; Washington University, Seattle 73-ICT-15, Sept. 1973; Presented at the Intersociety Conference on Transportation, September 23-27, 1973.; ACKNOWLEDGMENT: ASME Journal of Mechanical Engineering; ORDER FROM: ESL, Repr PC, Microfilm

13 050056 PROPULSION DRIVE FOR ADVANCED CONCEPT TRAIN. Discussed are the requirements imposed on an optimized propulsion system for this type of service. These requirements are then implemented by utilizing an advanced concept regenerative drive coupled to a d-c shunt or series motor. A generalized approach is evolved. It is shown that close analogy exists between a-c and d-c systems intended to fulfill the same requirements. The approaches differ mostly in the method of implementation, i.e., induction machine versus synchronous machine--PWM versus AVI power processor, etc. The paper thus projects the philosophy that advanced concepts and improved performance are not synonymous, as is often assumed, with the exercise of varying the method of implementation.

Berman, B Gelb, GH ; TRW Systems Group 73-ICT-8, Sept. 1973; Presented at the Intersociety Conference on Transportation, September 23-27, 1973.; ACKNOWLEDGMENT: ASME Journal of Mechanical Engineering; ORDER FROM: ESL, Repr PC, Microfilm

13 050060 KINETIC ENERGY STORAGE: A "NEW" PROPULSION ALTERNATIVE FOR MASS TRANSPORTATION. The increasing public awareness of the dual problems of air pollution and energy shortage has provided impetus for a search to find new vehicle propulsion alternatives which can alleviate the present dilemma. Recent studies have shown that the
