**URBAN HARBORS INSTITUTE**

**February 3, 1993**

**TO:**

**FROM: Martin C. Pilsch, Jr.  
Project Manager**

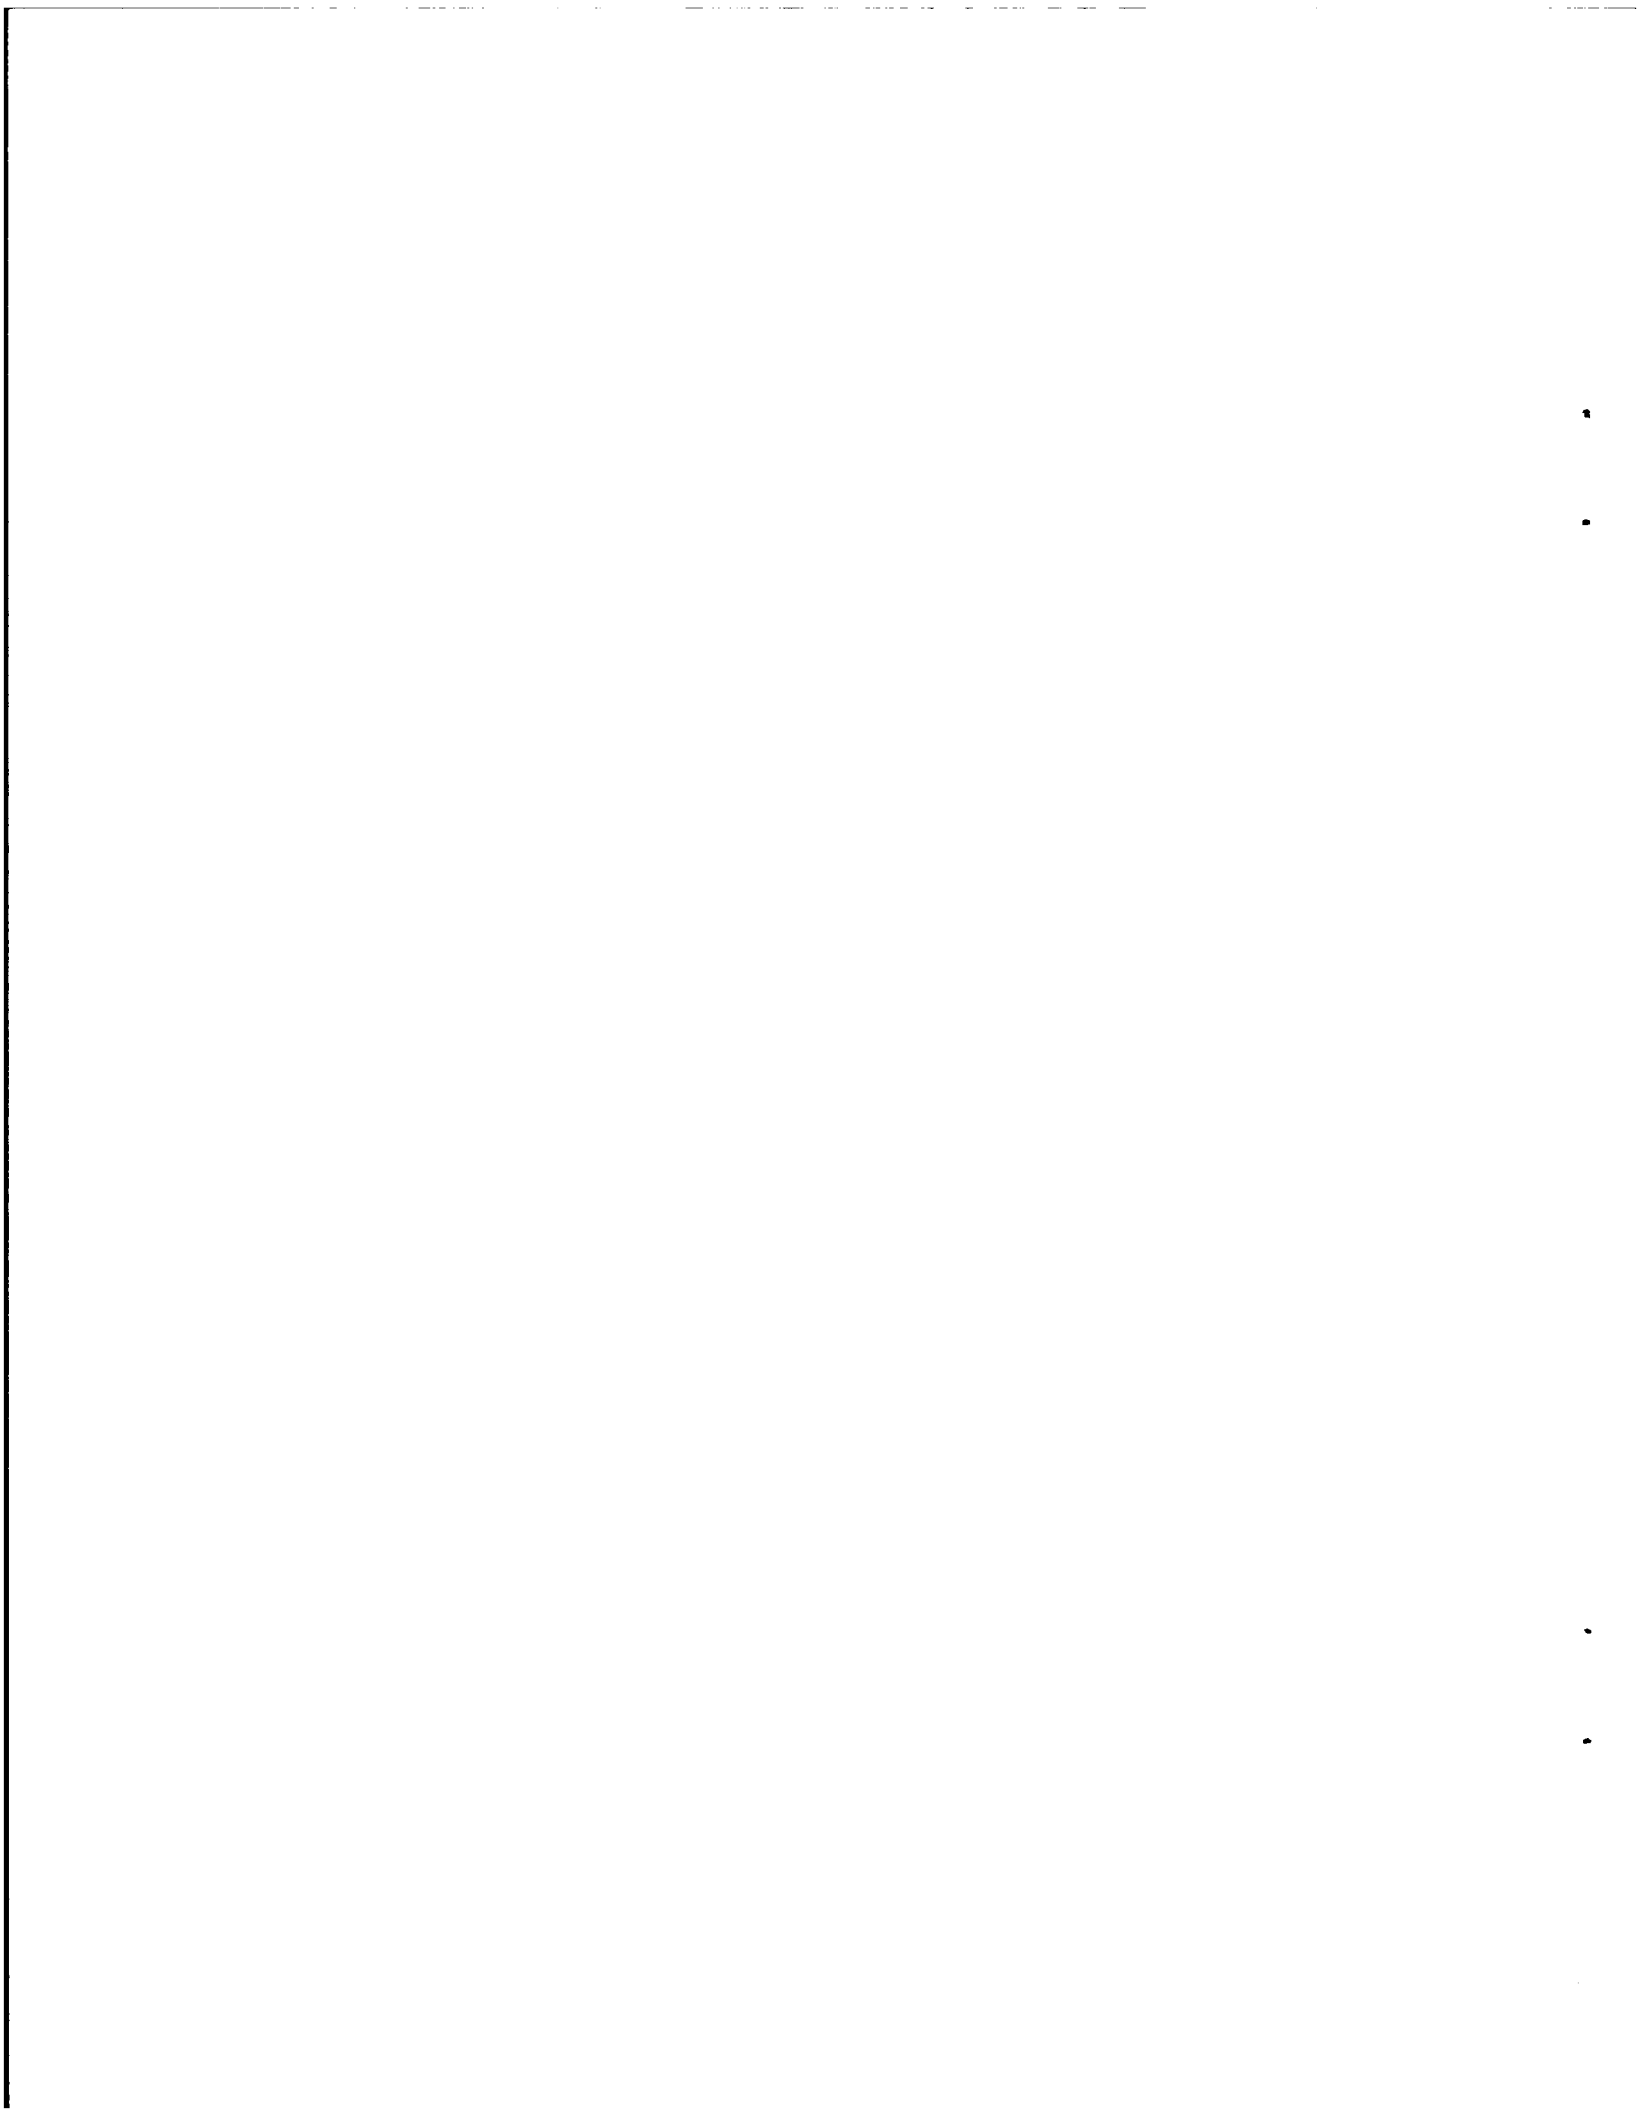

**SUBJECT: ADA Dimensional Survey**

As you know, the Urban Harbors Institute has been working with the Federal Transit Administration to assess the impact of the Americans With Disabilities Act of 1990 on the waterborne passenger vessel industry. This assessment was paramount to the beginning of the development and publication of a Federal Department of Transportation regulation for the application of ADA to vessels. Based upon the results of our written report, the FTA has expressed a need for detailed data and has suggested that the next step in our support effort is to develop dimensional information on the specific areas on vessels that will most likely be impacted by ADA rules and specifications.

If DOT regulations for vessels adopt dimensions that are currently utilized for land based transportation and buildings there is the likelihood that these dimensions will clash with present U.S. Coast Guard standards. We therefore would like to request that you participate in a very short survey on the dimensions and amenities from one or two of your vessels (one form per vessel). You need not identify your company on the form.

Please take the time to complete the two page form attached and return it to us via fax or mail as soon as possible [FAX - (617) 287-5575]. Lack of this information could adversely affect your operational and financial position.

Thank you for your prompt attention to this request.

**SUBJECT:** ADA Dimensional Survey - Design Firms or Shipyards

As you know, the Urban Harbors Institute has been working with the Federal Transit Administration to assess the impact of the Americans With Disabilities Act of 1990 on the waterborne passenger vessel industry. This assessment was paramount to the beginning of the development and publication of a Federal Department of Transportation regulation for the application of ADA to vessels. Based upon the results of our written report, the FTA has expressed a need for detailed data and has suggested that the next step in our support effort is to develop dimensional information on the specific areas on vessels that will most likely be impacted by ADA rules and specifications.

If DOT regulations for vessels adopt dimensions that are currently utilized for land based transportation and buildings there is the likelihood that these dimensions will clash with present U.S. Coast Guard standards. We therefore would like to request your assistance by completing a very short survey on the dimensions and amenities taken from a fairly representative number of the ferry or excursion/dinner vessels (one form per vessel) you have either designed or built. You need not identify your company on the form.

Please take the time to complete the two page form attached and return it to us via fax or mail as soon as possible [FAX - (617) 287-5575]. Lack of this information could adversely affect your customers.

Thank you for your prompt attention to this request.
