**FINANCE AND BUDGET COMMITTEE  
NOVEMBER 15, 2006**

**SUBJECT: FY06 YEAR END FINANCIAL PERFORMANCE**

**ACTION: RECEIVE AND FILE**

**RECOMMENDATION**

Receive and file FY06 Year End Financial Performance Report.

**ISSUE**

This report discusses the financial performance of major programs for FY06.

**DISCUSSION**

**SUMMARY OF SALES TAX REVENUES**

Proposition A, Proposition C, Transportation Development Act (TDA), and State Transit Assistance (STA) sales taxes represent over 50% or \$1.6 billion of Metro's total budgeted revenues. Propositions A, C and the TDA funds are sales taxes that are distributed to Metro by the State Board of Equalization.

For the twelve months ended June 30, 2006, Propositions A & C, and TDA sales tax (excluding STA) revenues were \$1,676.7 million, \$ 123.2 million, or 7.9% over budget. All local return sales tax revenues were distributed to the cities as per the ordinance. All other sales tax funds earned in excess of the budget will be distributed as part of the FY08 budget process.

STA revenues are sales taxes on gasoline and are distributed to Metro through the state of California Prop 42 process. STA actual revenues totaled \$62.2 million, \$21.5 million, or 52.6% more than budget. They were ahead of budget due to Prop 42 revenues not anticipated at the time of budget adoption due to the State's budget condition.

For the Year Ended June 30

| (Dollars in Millions)                | 2006<br>Actual | 2006<br>Budget | 2006<br>Variance<br>Over/(Under) | 2005<br>Actual | 2004<br>Actual |
|--------------------------------------|----------------|----------------|----------------------------------|----------------|----------------|
| Sales Tax Revenue<br>(including STA) | \$1,739.0      | \$1,594.3      | \$144.7                          | \$1,587.5      | \$1,478.4      |

## **SUMMARY OF ENTERPRISE FUND**

Overall, the Enterprise Fund, bus and rail operating and capital expenses and revenues, ended the year on budget. Although the overall expenditures were under budget, the fund is balanced at year-end by not transferring un-needed gap filling subsidies to the fund. The unspent subsidies will be reprogrammed in the FY08 budget process. State TCRP capital grants were significantly over budget (\$132 million, or 194.1%) because they were not anticipated during budget preparation. Consequently, none of the \$168 million in budgeted proceeds from financing was needed.

Other differences between budget and actual include higher than planned fare revenues (\$17 million) and higher than planned fuel (\$7 million) and inventory/parts (\$16 million) expenses. Although over budget at year-end, fuel expenses recovered slightly in later months improving the trend seen in earlier quarters. Inventory/parts expenses exceeded the budget due to a large inventory adjustment at year-end to eliminate obsolete inventory items from buses no longer in service.

A summary of the performance of the Enterprise Fund is presented in the following tables. The largest variance in the bus operating projects is a \$10 million underexpenditure at the Westside/Central sector. This variance is due to underexpenditure of insurance budget. However, this underexpenditure is offset by overexpenditure of insurance budget in the other sectors.

**FY06 ENTERPRISE FUND ACTUAL vs BUDGET**

**For the Year Ended June 30, 2006**

**Operating Revenue**

|             | Actual | Budget | Over (under) |
|-------------|--------|--------|--------------|
| Fares       | 280    | 264    | 17           |
| Advertising | 17     | 16     | 1            |
| Total       | 297    | 280    | 18           |

**Operating Expenses by Account**

|                           |            |            |            |

| Peak Bus/Base Bus                         | 1.90           | 1.90           | (0.00)                       | 1.90           | 1.89           |

Mean Miles Between Mechanical Failures were revised in FY06.

### **Discussion**

Costs per revenue service hour were below the target by \$0.45 due to under-expenditures, particularly the delay in opening the Orange Line. (Beginning in FY07, the Orange Line will be discussed separately in this report.) The delivery of RSH is 0.6% above the target. The variances in cost per passenger mile and subsidy per passenger mile reflect lower than budgeted expenses, while carrying more passengers and collecting more fares than planned.

Effective with implementation of the M3 system, Transit Operations has revised the method for measuring Mean Miles Between Mechanical Failures. This methodology more accurately measures the performance of each bus and aligns with the National Transit Database reporting indicator. Since it is a change in Metro's measurement system, no historical data is available. This target and actual reflect systemwide performance and is impacted by criteria such as heavy traffic, weather, maintenance performance, and vehicle age.

Traffic accidents per 100,000 miles were slightly above target, but better than last year due to enhanced safety training and retraining programs for operators with high frequency of traffic accidents.

New workers' compensation claims per 200,000 hours were lower than budget, and better than last year. The improvement is due to the ongoing safety program and safety meetings that focus on safety awareness and accident prevention. Sectors also developed rewards programs for safe operations, and programs to identify and eliminate fraudulent claims.

## SUMMARY OF PERFORMANCE MEASUREMENTS FOR RAIL

For the Year Ended June 30,

| Performance Measurement – Rail                 | 2006        |             |          | Variance<br>Over/<br>(Under) |             |             |

| Light Rail Vehicle Accident Rate/100,000 Miles | 0.43        | 0.37        | 0.06     |                              | 0.32        | 0.49        |

### Discussion

Overall, rail expenses were under budget by \$11 million. This is due to management actions to reduce costs. As a result of security-related service interruptions in the first quarter, and a vehicle accident disrupting the Blue Line, light and heavy rail vehicle service hours are 3% below budget. The cost per hour variance in Heavy Rail is due to a reallocation of resources from Light Rail caused by unexpected wayside maintenance requirements on Heavy Rail. Greater than budgeted boardings and fare revenue resulted in favorable variances per passenger mile.

New workers' compensation claims exceeded budget due to a vehicle cleaning chemical incident involving eight employees during the first quarter. Subsequent to this incident, new workers' compensation claims remained close to budget. Light rail accidents were slightly over the target. Transit Operations continues to focus on safety awareness programs to help reduce claims and accident rates.

## **SUMMARY OF CAPITAL PROGRAM**

The attached capital program status report for the twelve months ended June 30, 2006, shows the status of adopted life-of-project budgets and projected total costs to complete for each project. The projected costs to complete are provided by the project managers for each project and are updated quarterly. An additional page has been added to the report to identify those projects that were forecasted to be complete in FY05 but remained active in FY06.

The report identifies the projected life-of-project (LOP) budget status for each project. If the project exceeds the LOP budget but is under \$1 million, it is within the board-approved limit for transferring contingency to the project. If the LOP change causes the project to exceed \$1 million, the project manager is required to return to the board for approval.

### **Major Construction**

Major construction projects include construction of new fixed guideway corridors, new rail car purchases, and other major infrastructure improvements. For the period ended June 2006, all adopted major construction projects are forecasted to be completed within the board approved life-of-project budgets.

Tunneling started on the Eastside Light Rail project and has progressed at a steady pace. Metro has agreed to provide additional funding for the reconstruction of Ramona High School.

The Orange Line continues with close-out activity, safety enhancements and landscaping completion activities. The Orange Line pre-revenue operation project expenditures are being reviewed prior to final close-out. Settlement discussions continue with the contractor to resolve outstanding claims.

Detailed information on the major construction projects is available through the individual project reports.

### **Bus Acquisition and Advanced Transportation Management System**

There are currently two active bus procurements. The procurement for 100 45' buses have all been delivered and placed into service. The procurement for 178 articulated buses is on schedule with all 178 buses delivered to-date (including 22 buses delivered for the Orange Line). The project is forecasted to be completed under budget.

The FY06 ATMS Radios for contracted service buses project is complete with purchase and installation of 100 radios. This project continues to reflect a \$2,689 overrun to the life-of-project budget. The project manager has reviewed the project charges and has identified \$2,810 that was incorrectly charged to the capital project. When these charges are reversed, the project will be closed out.

## **Bus Maintenance and Facilities**

The largest bus maintenance project is the annual bus mid-life program at \$12 million for FY06. The project manager reports that the project was completed on schedule and within budget with over 200 buses completed for mid-life overhauls.

Nine bus facilities projects were completed during the fiscal year under budget for a savings of \$1,592,197. The savings will be reprogrammed to bus facilities projects in the FY08 budget process. No projects are forecasted to be over the life-of-project budget. The Division 6 relocation project is delayed due to issues with the developer. Staff is continuing to investigate options for relocating the division.

## **Rail Capital Projects**

Two rail capital projects received life-of-project budget increases during the fourth quarter of FY06:

- PGL Midway Warehouse increased by \$143,000 from \$1,767,000 million to \$1,910,000 million
- MBL Grade Crossing Improvements increased \$6,478,000 from \$4,122,000 to \$10,600,000

The increases to the life-of-project budgets will be funded with future years rail facilities funding and with savings incurred from the current projects that are being completed under their approved life-of-project budgets.

The Between-Car Platform Barriers project was cancelled because the CPUC rejected the platform mounted design. Staff is pursuing other options to accomplish the same goal. The unspent funding of \$2,834,624 will be reprogrammed to other Rail Facilities projects during the FY08 budget process.

The MBL Four Quadrant Gate Program was cancelled because of changing cost requirements imposed by Union Pacific. Metro staff will continue to look at grade crossing improvements options.

## **Other Capital Projects**

The Cooling Tower Vacuum project was cancelled because the project manager determined that the existing equipment could be modified at less cost rather than purchase new equipment.

The Universal Fare System project received a life-of-project budget increase from \$93.6 million to \$97.6 million during the year. This increase will allow for the purchase of additional receiver vaults to handle the large volume of cash from the day pass and for farebox replacements on expansion buses and on contracted service buses.

The Regional Clearinghouse Project (TAP) was also approved for a life-of-project budget increase from \$16 million to \$20.4 million during the year. This increase was required

based on Best and Final offers received that exceeded the engineer's estimate for the TAP operator's one-time capital costs. Management is reporting on the progress of both the UFS Project and the Regional Clearinghouse Project (TAP) at the monthly Operations Committee meetings.

Six of the eight capital projects in the Warehouse category are reporting that the project is completed under the life-of-project budget. The total savings for the warehouse projects is forecasted to be \$46,805. These funds will be reprogrammed to other capital projects during the FY08 budget process.

## **SUMMARY OF GOVERNMENTAL FUNDS**

The Governmental funds budget includes Special Revenue and General Fund programs and projects.

The Governmental funds' revenues exceeded budget by \$125 million, or 7.3%. These additional fund balances were due to higher sales tax (\$145 million), investment earnings (\$17 million), and lease, rental and other (\$3 million). Intergovernmental grants were \$40 million less than budget due to lower than planned expenditures.

Expenditures were \$44 million, or 5%, less than budget. Rapid Bus Phase II deferred \$22 million of its budget to future years. Other notable underruns were: \$5 million in Commuter Rail, \$4 million in call-for-projects Bus Capital and Operations, \$6 million in PC 25% Discretionary MOUs, \$2 million to ASI, and \$5 million in various other subsidies.

Adding to these fund balances was the fact that gap filling transfers from the Governmental Funds were not needed in Transit Operations or the capital program as budgeted. Thus, fund balances increased by \$293 million. Most of these funds remain committed as previously appropriated or will be reprogrammed during the FY08 budget process.

## GOVERNMENTAL FUNDS' PERFORMANCE

### **Discussion**

The Call for Projects programs spent \$112 million, which is \$7 million, or 5.9%, less than budgeted, and nearly double the spending rate of the two previous years. The Freeway Program call projects spent \$11 million more than budget due to completion work on regional HOV lanes. Regional Surface Transportation Improvement call projects did not spend 22% of the budget because a number of sponsors did not move forward on their projects as quickly as anticipated. Commuter Rail did not spend its budget due to a Metrolink rolling stock procurement delay and the ongoing Blue Line Arterial Street Crossing negotiations. Non-Metro Bus Capital call projects underspent their budget by 57% because a number of sponsors did not move forward on their projects as quickly as anticipated.

*For the period ended June 30, 2006*

| Project Title   | CP/FIS Project No. | Inception-to-Date Expenditures | Cost to Complete Estimate | Total Forecasted Expenditures | Board Approved Life of Project | Increase/ (Decrease) | Comment  |
|---|--------------------|--------------------------------|---------------------------|-------------------------------|--------------------------------|----------------------|--|
|   |                    | Encumbrance                    | Balance of Project Costs  |                               |                                |                      |  |
| <b>Rail Facilities Improvements</b>                       |                    |                                |                           |                               |                                |                      |  |
| 10 Vermont/Santa Monica Sta. Underground Water Mitigation | 204016             | 340,138                        | 2,192                     | 940,670                       | 1,283,000                      | 1,283,000            | - Completed 95% of final report of water mitigation study in Q4 with additional comments being collected (three options studied). Final report will be completed in Q1 FY07. Labor under run is due to schedule delays caused by negotiations with consultant. Scope of work to be developed and finalized for bid package to be submitted to Procurement in Sept 2006.  |
| 11 Division 21 Improvements                               | 204017             | 1,627,139                      | 130,253                   | -                             | 1,757,392                      | 4,500,000            | (2,742,608) Project to be completed under approved LOP. Large under run on this project due to Zanja Madre preservation. Due to the unexpected preservation issue, the following tasks were eliminated: carwash upgrade, car cleaning platform canopies, elevated work platform and catwalk in the blow down building. Storage track 22 and preservation activities were completed in Q4. Labor expenses were higher than budgeted due to support and engineering required for the preservation. |
| 12 FY06 Rail Facility Maintenance Contingency Projects    | 204029             | 58,756                         | -                         | -                             | 58,756                         | 570,919              | (512,163) All contingency funds were not required in FY06. Funds will be reprogrammed to an eligible capital project.  |

| 14 Division 22 Improvements - Phase II        | 204037             | 505,897                        | 903,909                   | 3,485,194                     | 4,895,000                      | 4,895,000            | -  |
|   |                    |                                |                           |                               |                                |                      | Specification design for wheel truing machine (WTM) began in Q4. WTM pit and remaining crossover track went out for rebid. Labor is under budget given the project is behind schedule.   |
|   |                    |                                |                           |                               |                                |                      | Update Q1 FY07: • Metro has contract concerns on the winning bidder for the WTM but Procurement continues to proceed with finalizing the contract in anticipation of award. MASD requests to audit the vendor. Mini Board report is pending. • Mini Board report to award contract to single source provider of cross over track was finalized and will be presented to the Board in October. • Bid opening for IFB for WTM pit construction is expected end of September. |
| 15 MRL Tactile Pad and Strip Installation     | 204041             | 217,097                        | -                         | -                             | 217,097                        | 450,000              | (232,903)  |

| 1 Light Rail SCADA System Upgrade     | 205002             | 9,192,799                      | 393,093                   | 750,287                       | 10,336,179                     | 10,563,000         | (226,821)  |
|                                       |                    |                                |                           |                               |                                |                    | Project to be completed with a potential LOP reduction of \$230K since the final negotiated price of the contract was lower than the Metro estimate. Final SCADA system was delivered in Q4 and reconfiguration is under way. Contract requisition is pending for \$41K.   |
| 2 Rail Security Improvements          | 205004             | 2,173,698                      | 1,836,078                 | 2,459,224                     | 6,469,000                      | 6,469,000          | -  |
|                                       |                    |                                |                           |                               |                                |                    | Carborne DVR equipment work is being completed (cameras, DVRs and WiFi antennas) on Green Line and Gold Line cars. DST, card readers and by-pass key components in stations are being installed in Red line segments 2 and 3. Vendor is behind in invoicing until certain portions of the work is completed. The project is recovering from previous delays. |
| 3 Rail Communications Systems Upgrade | 205005             | 820,461                        | 310,090                   | 1,201,449                     | 2,332,000                      | 2,332,000          | -  |
|                                       |                    |                                |                           |                               |                                |                    | Awaiting invoices for materials received. Q1 FY07 activities include: • New base station radio equipment requisition needs to be created since lowest bid price exceeded the requisition amount. • Contract awarded for antennas and mounting hardware. • MOU with DWP to be signed to build fiber optic cable to Mt. Washington communications site.        |

*For the period ended June 30, 2006*

| Project Title                         | CP/FIS Project No. | Inception-to-Date Expenditures | Cost to Complete Estimate | Total Forecasted Expenditures | Board Approved Life of Project | Increase/Decrease) | Comment   |
|---------------------------------------|--------------------|--------------------------------|---------------------------|-------------------------------|--------------------------------|--------------------|---|
| Wayside Systems                       |                    | Encumbrance                    | Balance of Project Costs  |                               |                                |                    |   |
| 4 MBL Grade Crossing Improvements     | 205006             | 3,455,496                      | 592,539                   | 6,551,965                     | 10,600,000                     | 10,600,000         | - Contract award was delayed. Installation of grade crossings moved into later Qs. Concrete panels and ties were delivered in Q4 and continue into Q1 FY07. Now preparing for installation of grade crossings in FY07. Rental front end loader received but looking at direct purchase. Street closure contractor procurement is underway. Installation schedule will be finalized when street closure contractor is hired. Estimated beginning of installation in October. |
| 5 Wayside Systems Tools and Equipment | 205007             | 319,158                        | 20,862                    | 17,980                        | 358,000                        | 358,000            | - The balance in this project will be used to purchase two manlifts to maintain parking lot lights. Initial bids submitted for these items were rejected for non-compliance. Procurement will be rebid. Expect to receive manlifts in February 2007. Project to be completed under LOP.   |
| 6 Crossing Gate Equipment Replacement | 205009             | 1,096,382                      | 9,341                     | 132,405                       | 1,238,128                      | 1,238,128          | - Project is in close out phase. Project should be completed under authorized LOP since the contractor's invoice was lower than anticipated.  |

| 7 Replace Guarded Rail Crossings | 205010             | 267,452                        | -           | 42,548                    | 310,000 | 310,000                       | -                              | -                   | This project was initially developed to replace two rail diamonds where a Union Pacific Railroad spur crosses our mainline tracks. Rail procured the replacement diamonds but in the meantime Union Pacific applied to abandon the spur. Upon abandonment of the spur, Rail will remove the existing diamonds and replace the same with spare ties and rails. Remaining balance of costs to be used for labor in this effort. PM indicates the work could be completed anytime as we are waiting for notification from Union Pacific. If the project goes over LOP due to labor, the over run will be funded from rail operations contingency. |

| 8 MBL Four-Quadrant Gate Program Expansion | 205012             | 1,127,620                      | 129,487   | 4,397,893                     | 5,655,000                      | 5,655,000               | -   |
| 9 Light Rail Train Tracking Improvements   | 205014             | 243,250                        | -   | 712,551                       | 955,801                        | 955,801                 | Train tracking system project had to be re-evaluated since only one bid was received (the bid was extremely high and utilized expensive technology). Consequently, labor is under run and the schedule is delayed due to the redesign work completed. New technology was researched and evaluated which resulted in a decision to issue a revised IFB and solicit more competitive bid responses. Redesign of the system is expected to be completed Q1 FY07. |
