FINANCE AND BUDGET COMMITTEE
November 19, 2008

SUBJECT: FY08 YEAR-END FINANCIAL PERFORMANCE

ACTION: RECEIVE AND FILE

RECOMMENDATION

Receive and file the FY08 Year-End Financial Performance Report.

ISSUE

This report discusses our FY08 Year-End Financial Performance.

DISCUSSION

Summary of Sales Tax Revenues

Proposition A, Proposition C, Transportation Development Act (TDA), and State Transit Assistance (STA) sales taxes represent \$1.7 billion, or just under 60% of our total budgeted revenues. Propositions A, C and the TDA funds are sales taxes that are distributed to us by the State Board of Equalization (SBE). STA revenues are sales taxes on gasoline and are distributed to the Southern California region through the state of California Prop 42 process.

After receiving the revised sales tax forecast from UCLA in January 2008, the Board approved a revision to the FY08 budget to re-forecast lower anticipated sales tax revenues. The re-forecast lowered the budget for Prop A, Prop C and TDA 4 by \$6.9 million, from \$1,740.9 million to \$1,734.0 million. The actual receipts were \$1,707.4 million, or \$26.6 million below the revised budget. Additionally, the FY08 receipts reflect a decrease of \$10.1 million when compared to the FY07 receipts, a 0.6% year-to-year decline.

STA revenues were \$35.1 million or 36% less than the re-forecasted budget, which had been based on State Controller's advice received in October 2007. The actual STA figures represented only payments received through the second quarter of FY08. An STA payment for the third and fourth quarter in the amount of \$32.4 million was received after the FY08 closing for accounting reporting. This amount will be recognized in the FY09 reporting.

Had those funds been received prior to FY08 closing, the STA deficit would have been \$2.7 million and not the \$35.1 million shown in the following table.

For the Twelve Months Ending June 30, 2008						
(Amounts in Millions)	FY08 Adopted Budget	FY08 Revised Budget	FY08 Actual	FY08 Budget Variance	FY07 Actual	Prior Year Change
1 <u>Sales Tax Revenues</u>						
2 Proposition A	\$694.2	\$692.8	\$683.4	(\$9.4)	\$686.2	(\$2.8)
3 Proposition C	694.3	692.9	683.5	(9.4)	686.3	(2.8)
4 TDA	352.4	348.3	340.5	(7.8)	345.0	(4.5)
5 Total Sales Tax Revenues	\$1,740.9	\$1,734.0	\$1,707.4	(\$26.6)	\$1,717.5	(\$10.1)
6						
7 State Transit Assistance (STA) Revenues	57.1	96.6	61.5	(35.1)	191.1	(129.6)
8						
9 Total Sales Tax and STA Revenues	\$1,798.0	\$1,830.6	\$1,768.9	(\$61.7)	\$1,908.6	(\$139.7)
*Reflects UCLA's January 2008 forecasted growth rate for FY08 (.96%) applied to FY07 actual sales tax revenues. STA reforecasted budget estimate represent the updated FY08 information provided by the State Controller's Office in October 2007.						

Summary of Enterprise Fund

Total fare revenues in FY08 were \$328.8 million which was \$7.3 million (2.3%) greater than the FY08 budget and \$42.6 million (6.7%) more than FY07. System-wide boardings were 474.2 million, which was 1.0% fewer than planned, and 21.7 million (4.3%) less than FY07. FY08 fare revenue per boarding was \$0.69, or 3.0% higher than budgeted. Advertising revenue also exceeded the budget by \$1.1 million due to two pilot advertising programs on rail car exteriors and stations.

Overall, operating expenses totaled \$1,132.0 million, \$34.7 million or 3.0%, below budget before debt and depreciation. The largest under-expenditure was \$19.0 million in the Insurance account. This was due to a downward revision of the reserve requirement as recommended by our actuaries.

The next largest under-expenditure was \$11.1 million for labor and fringe benefits. Various factors led to these under-expenditures such as operating fewer hours of service than planned, vacancies and better than expected fringe benefit rates for the second half of FY08.

Professional and Contract Services were \$12.1 million under budget due to lower than anticipated maintenance needs in Facilities Maintenance and ITS, and slower than planned implementation of the operating portion of the new TAP program while the capital program was completed and staff was hired. Also contributing to the under-expenditure was postponement of the new data warehouse being developed by Service Performance Analysis. Other services were under budget because the CEO continued to reinforce the need to reduce costs, whenever possible, in all departments.

Propulsion Power for rail service was \$2.1 million under budget due to better than expected electricity rates.

The largest area with over-expenditures was workers' compensation which was \$3.4 million over budget due to an upward revision to the reserve requirements as recommended by our actuaries. Reserve requirements reflect the potential value of all open claims, including those for prior years. New workers' compensation claims in FY08 were fewer than anticipated (6% fewer in Bus, 19.7% greater in Rail, 3.1% fewer overall).

Maintenance parts were \$3.3 million over budget caused by inventory reductions due to obsolescence. Gateway Occupancy allocation was \$3.2 million over budget primarily due to the movement of Transit Operations personnel into the Gateway Headquarters building.

Fuel cost was \$1.2 million greater than budget because CNG usage exceeded budget (articulated bus fuel consumption was higher than anticipated). Therefore, the amount of CNG fuel that was not included in the hedging contract was more than planned and was purchased at higher than anticipated market prices in the second half of the year.

The combination of increased revenues and decreased costs resulted in a \$43.0 million operating surplus. In addition to the operating expenses discussed above, the Enterprise Fund also includes non-operating expenses. When adjusted for these non-operating expenses, the total Enterprise Fund surplus available for re-programming is \$32.0 million.

FY08 Enterprise Fund Actual vs. Budget

For the Twelve Months Ended June 30, 2008

	(Dollars in Millions)	FY08 Actual	FY08 Budget	Variance (Over/(Under))
	Operating Revenue			
1	Fares	\$328.8	\$321.5	\$7.3
2	Other	20.7	19.6	1.1
3	Total Operating Revenue	349.4	341.1	8.3
4				
5	Operating Expenses			
6	UTU Labor	245.6	255.1	(9.4)
7	ATU Labor	124.3	120.8	3.5
8	AFSCME Labor	44.5	45.2	(0.7)
9	Non-Contract Labor	59.3	59.8	(0.5)
10	TCU Labor	31.0	30.3	0.7
11	Teamster Labor	5.4	4.5	0.9
12	Fringe Benefits	199.4	204.9	(5.5)
15	Subtotal All Labor	709.5	720.6	(11.1)
16	Fuel	54.9	53.7	1.2
17	Propulsion Power	19.2	21.3	(2.1)
18	Parts	81.8	78.5	3.3
19	Security Services	65.2	66.7	(1.5)
20	Purchased Transportation	37.1	36.2	0.9
21	Contract Services	36.8	41.6	(4.8)
22	Professional Services	16.4	23.7	(7.3)
23	Workers' Comp	39.9	36.5	3.4
24	Insurance	41.1	60.1	(19.0)
25	Travel	0.3	0.3	0.0
26	Gateway Occupancy	12.4	9.2	3.2
27	All Others	17.4	18.3	(0.9)
28	Total Operating Expenses	\$1,132.0	\$1,166.7	(\$34.7)

	Operating Expenses by Operating Project			
2	San Fernando Valley Sector	\$130.5	\$127.5	\$3.0
3	San Gabriel Valley Sector	133.0	143.1	(10.1)
4	Gateway Cities Sector	125.5	135.2	(9.7)
5	South Bay Sector	150.6	149.1	1.5
6	Westside Central Sector	168.2	165.2	3.0
7	Orange Line	19.1	23.4	(4.3)
8	Bus Admin	54.5	52.7	1.8
9	Other Bus	110.9	127.9	(17.0)
10	Red Line	86.4	84.5	1.9
11	Blue Line	59.2	63.5	(4.3)
12	Green Line	38.5	37.4	1.1
13	Gold Line	38.1	39.1	(1.0)
14	Rail Admin	13.5	13.9	(0.4)
16	Regional	4.0	4.2	(0.2)
17	Total	\$1,132.0	\$1,166.7	(\$34.7)

Excludes Non-Operating Expenses

Summary of Performance Measures for Bus and Orange Line

For the Twelve Months Ended June 30, 2008

Performance Measurement – Bus & Orange Line		FY08 Actual	FY08 Budget	Variance Over/ (Under)	FY07 Actual	FY06 Actual
1	Bus Cost/Revenue Service Hour	\$115.64	\$117.20	(\$1.56)	\$114.61	\$109.13
2	Orange Line Cost/Revenue Service Hour	\$211.19	\$242.42	(\$31.24)	\$207.22	NA
3	Bus Revenue Service Hours	7,539,125	7,674,405	(135,280)	7,589,413	7,659,321
4	Orange Line Revenue Service Hours	96,712	101,561	(4,849)	90,783	NA
5	Bus Cost/Passenger Mile	\$0.62	\$0.63	(\$0.01)	\$0.58	\$0.57
6	Orange Line Cost/Passenger Mile	\$0.47	\$0.53	(\$0.07)	\$0.48	NA
7	Bus Subsidy/Passenger Mile	\$0.42	\$0.42	(\$0.00)	\$0.40	\$0.39
8	Orange Line Subsidy/Passenger Mile	\$0.35	\$0.44	(\$0.08)	\$0.39	NA
9	Complaints per 100,000 Boardings	2.57	2.75	(0.18)	2.46	2.41
10	Traffic Accidents/100,000 Miles	3.47	3.50	(0.03)	3.74	3.45
11	New Workers Comp Claims per 200,000 Hours	11.70	12.13	(0.43)	10.30	12.39
12	Mean Miles Between Mechanical Failures	3,137	3,500	(363)	3,532	3,274
13	In-Service On-time Performance	64.1%	65.3%	-1.3%	63.8%	64.4%

Note: FY06 Bus includes Orange Line

Discussion

Bus operating costs (excluding Orange Line) were \$27.6 million (3.1%) under budget because wages, benefits, insurance, workers' compensation and services were all under budget. Revenue service hours (RSH) were 1.8% under budget because we operated less service than budgeted. Since the operating cost savings (3.1%) exceeded the under-run of RSH (1.8%), the cost per revenue service hour (RSH) was 1.3% below the target.

Orange Line operating costs were 17% under budget, while RSH were 4.8% under budget and passenger miles were 5.3% below budget. Since costs were under budget by a larger percentage than RSH and passenger miles, cost per RSH, cost per passenger mile and subsidy per passenger mile were lower than budgeted.

Complaints per 100,000 boardings were lower than the annual target, but higher than FY07. Complaints attributed to the fare increase peaked in July then declined thereafter.

Traffic accidents per 100,000 miles were below target, and better than FY07. Management continues to develop mitigation programs including defensive driving/accident awareness programs.

New workers' compensation claims per 200,000 hours for Metro Bus were lower than the FY08 target and FY06, but higher than the unusually low level in FY07. This multi-year improvement is due to ongoing efforts to focus on safety awareness and accident prevention.

Mean miles between mechanical failures requiring a bus exchange were worse than the target and FY07. Battery related issues have contributed to an increase in reported failures, along with continuing problems with the Series 50 engines.

In-service on-time performance in FY08 was 64.1% or 1.3% worse than the target, but slightly better than 63.8% in FY07. On-time performance continues to be negatively impacted by increased traffic congestion.

Summary of Performance Measures for Rail

For the Twelve Months Ended June 30, 2008

Performance Measurement – Rail		FY08 Actual	FY08 Budget	Variance Over/ (Under)	FY07 Actual	FY06 Actual
1	Heavy Rail Cost/Vehicle Service Hour	\$340.74	\$333.75	\$6.99	\$323.70	\$333.87
2	Light Rail Cost/Vehicle Service Hour	\$379.80	\$389.27	(\$9.47)	\$387.02	\$371.66
3	Heavy Rail Cost/Passenger Mile	\$0.42	\$0.45	(\$0.04)	\$0.44	\$0.44
4	Light Rail Cost/Passenger Mile	\$0.47	\$0.51	(\$0.04)	\$0.49	\$0.43
5	Heavy Rail Subsidy/Passenger Mile	\$0.27	\$0.30	(\$0.04)	\$3.32	\$0.32
6	Light Rail Subsidy/Passenger Mile	\$0.37	\$0.41	(\$0.04)	\$0.42	\$0.36
7	New Workers Comp Claims per 200,000 Hours	11.52	10.00	1.52	8.10	11.50
8	Light Rail Vehicle Accident Rate/100,000 Miles	0.79	0.40	0.39	0.63	0.43

Discussion

Costs per Vehicle Service Hour (VSH) for Heavy Rail were higher than budgeted because operating expenses were \$1.7 million (2.0%) over budget, while VSH were 0.1% below budget. ATU labor was \$1.5 million (12.4%) over budget in Heavy Rail primarily due to increased wayside maintenance efforts, including repairing Regulation 4 (fire and life safety requirements) related systems. The additional costs in Heavy Rail were offset by savings in Light Rail because personnel budgeted for Light Rail were reassigned to Heavy Rail to accomplish these tasks. Heavy Rail was also over budget for workers' compensation costs.

Cost per VSH for Light Rail were lower than budgeted because operating expenses were \$4.4 million (3.0%) below budget, while vehicle service hours were 0.6% below budget due primarily to vehicle accidents and equipment failures. Operating expenses for Light Rail were under budget due to wages, benefits, and favorable Blue Line liability settlements. Actual liability claims following accidents in FY07 were fewer and for a smaller dollar amount than anticipated.

In spite of the fare change in July 2007, FY08 rail boardings increased overall by 5.4%. The 10.4% ridership growth on the Gold Line was the largest percentage increase. The table below shows the ridership changes by line from FY07 to FY08.

Change in Rail Boardings FY07 to FY08 (in millions)				
Line	FY07	FY08	Change	% Change
Blue Line	24.2	24.6	0.3	1.3%
Red Line	40.9	43.6	2.7	6.6%
Gold Line	6.0	6.6	0.6	10.4%
Green Line	11.2	12.0	0.8	7.5%
All Lines	82.2	86.7	4.5	5.4%

Greater than budgeted boardings and fare revenue resulted in favorable variances in cost per passenger mile and subsidy per passenger mile for both Heavy Rail and Light Rail.

New workers' compensation claims in FY08 were higher than budgeted, and significantly higher than last year. The cost of these claims is reflected in the expense variances. Light Rail accidents on the Blue and Gold Lines also exceeded the FY08 target and were worse than the previous year. Rail Operations continues to focus on safety awareness programs to help reduce claims and accident rates.

Summary of Capital Program

The attached capital program status report for the fourth quarter of FY08 presents adopted life-of-project (LOP) budgets and projected total costs to complete for each project. The projected costs to complete are provided by the project managers for each project and are updated quarterly.

The capital program includes 152 projects with a combined LOP budget of \$2.8 billion identified in the detailed Capital Program Status Report attached.

A total of 67 projects were completed in FY08. Nine projects were completed at a cost of at least \$1.0 million lower than the authorized LOP, and are listed in the following table. Forty-six additional projects were completed under the authorized LOP at a combined savings of \$6.4 million. In total, these 67 projects were completed at a savings of \$66.7 million.

Project (Amounts in Thousands)		Forecasted Cost at Completion	Authorized LOP	Variance (Under)
1	800112 Orange Line	\$271,020.8	\$313,000.0	(\$41,979.2)
2	201004 100 QTY 45' NABI Compo Buses	44,498.0	48,230.0	(3,732.0)
3	204017 Division 21 Improvements	1,900.0	4,500.0	(2,600.0)
4	800117 Canoga Station Park and Ride Project	23,557.6	26,000.0	(2,442.4)
5	208002 Bus System Support Replacement Non-Revenue Vehicles	3,727.6	5,966.0	(2,238.4)
6	203015 170 CMS Engine Rebuild Program - FY08	8,823.0	11,000.0	(2,177.0)
7	201027 75 Quantity 40' Bus Option FY05	27,845.5	30,000.0	(2,154.5)
8	202237 Division 18 Solar Energy Project	3,400.0	5,000.0	(1,600.0)
9	204012 Rail Systemwide Safety Improvements	542.1	2,073.0	(1,530.9)
10	Total	\$385,314.5	\$445,769.0	(\$60,454.5)

Additionally, there are eight projects currently projecting cost overruns. Five projects with known anticipated LOP increases are listed in the following table:

Project (Amounts in Thousands)		Forecasted Cost at Completion	Authorized LOP	Variance Over
1	204042 Completion of Metro Blue Line Art Program	\$936.5	\$934.0	\$2.5
2	200044 ATV Bus Purchase (Hybrid Vehicles)	4,606.3	4,602.6	3.6
3	209004 Metro Red Line Storage Building	1,000.6	996.6	3.9
4	207040 FY08 Financial/HR System Upgrades	502.4	447.1	55.3
5	210095 Metro Bus Division Behavior Recognition Software (DHS)	709.0	327.0	382.0
6	Total	\$7,754.7	\$7,307.4	\$447.3

Three of the projects are less than \$1.0 million and are within the Board-approved guidelines authorizing the CEO to transfer contingency funds to the project. Two of the listed projects (ATV Bus Purchase, and Metro Red Line Storage Building) exceed \$1.0 million and will require Board approval of LOP budget increases. The three projects with potential increases

include the Lankershim Depot Restoration Project - 800118, MGL Eastside Extension Enhancements and Mitigation Project – 800288, and Bauchet Street Storage and Facilities Maintenance Structure – 202246. Staff will return to the Board to request LOP budget increases for these three projects following bid processes when the amount of anticipated increases are known.

Major Construction

Major construction projects include construction of new fixed guideway corridors, new rail car purchases, and other major infrastructure improvements.

The Orange Line project (CP#800112) will be completed with expenditures \$42.0 million lower than the LOP budget. These funds are Proposition C 25% funds and will be reprogrammed to other appropriate uses.

The Canoga Station Park and Ride project (CP#800117) will be completed with a savings of approximately \$2.4 million under the approved LOP. This savings is the result of removal of land and development costs for an additional parking lot from the project scope due to conditions which precluded acquisition of the land.

The Lankershim Depot Restoration Project (CP#800118) may require a life-of-project budget increase. Bids for the construction contract were higher than anticipated. Staff is evaluating potential changes in the project design, as well as adding a Customer Service Center. If it is determined to go forward with the higher cost of the project, staff will seek Board approval for an increase in the LOP budget.

The Metro Gold Line Eastside Extension Enhancements and Mitigations Project (800288) to construct a 200-parking space structure at the intersection of Pomona and Atlantic Boulevards is also anticipating an increase to the LOP budget. Staff anticipates award of a contract in late October of this year. The Board previously authorized the CEO to solicit and award a design-build contract for the parking structure. At that time, it was stated that staff would seek approval for an increase in the LOP after receipt of bids and acceptance of the lowest price from a responsible bidder.

Detailed information on the major construction projects, such as the Eastside Extension of the Gold Line, is available through individual project reports.

Bus Acquisition

The major bus acquisition project during FY08 was the procurement of 94 CNG articulated buses, CP#201044. All buses have been received and put into revenue service.

Bus Maintenance and Facilities

A total of 20 bus maintenance and facilities projects valued at \$66.7 million were completed in FY08. Examples of accomplishments include:

	(thousands)
• Bus Division Improvements and Expansion Projects	\$ 27,077.6
• Underground Storage Tank Replacement Projects	3,180.4
• Bus Division Maintenance Equipment	4,498.4
• Division 9 Transportation Building Replacement and Associated Equipment	17,450.9
• Metro Support Services Center Shop Equipment	1,830.9
• Bus System Signage Improvements	401.7
• Division 18 Solar Energy Project	3,400.0
• Bus Engine Rebuild Program	8,823.0
Bus Maintenance and Improvement Total	\$ 66,663.0

The largest bus maintenance project during FY08 was the \$29.5 million annual bus mid-life program, CP#203005. This project completed rebuilding 167 buses during the fourth quarter of FY08. The original goal for the project was 250, but the delay in hiring mechanics required that the plan be reduced. The unspent funds were reprogrammed to the FY09 budget.

The 170 CMS Engine Rebuild Program, project #203015, completed 94 engine replacements and repairs and experienced a cost \$2,176,965 under the approved budget.

Division 9 Transportation Building and Facilities Improvements, project #202014, has completed construction. The building is environmentally-friendly in its design and earned a “gold” rating by Leadership in Energy and Environmental Design (LEED). Completion of outstanding issues and payment of invoices continued in the fourth quarter and will continue into FY09 Q1.

Division 18 Solar Energy Project (CP#202237) will be completed \$1.6 million below the approved LOP budget because of an energy rebate from Sempra Energy Utilities.

Staff is reporting that CP# 202246, Bauchet Street Storage and Facilities Maintenance Structure, will require additional funding for an LOP increase. Staff is unable to construct the project within the existing LOP of \$12.9 million largely due to higher than planned land acquisition costs, construction cost inflation and the resulting greater than expected bid submittals. The project is undergoing redesign with the expectation of reduced bid prices for the redesigned scope. The exact amount of the proposed LOP increase will be brought to the Board at the time of anticipated contract award.

All other bus projects are forecasted to be completed at, or under, the approved life-of-project budget.

Rail Capital Projects

A total of 19 rail projects were completed in FY08. They include the following:

	(thousands)
• Rail Division Improvements	\$ 3,157.4
• Rail Safety and Security Improvements	8,599.8
• Rail Facility Tools and Equipment	2,404.8
• Light Rail Operational Improvements	1,394.1
• Metro Red Line Subway Car Upgrades	2,429.1
• Rail Communication System Upgrades	9,796.9
Rail Total	\$ 27,782.0

CP#204012 Rail System-wide Safety Improvements were completed with a savings of approximately \$1,500,000 under the life-of-project budget. The unspent monies will be reprogrammed as part of the FY10 capital program.

CP#204017 Division 21 Improvements were completed with a savings of \$2,600,000 under the life-of-project budget. The project scope was reduced due to an archaeological find which necessitated a smaller scale storage track. The unspent monies will be reprogrammed as part of the FY10 capital program.

CP#204059 Division 22 Spray Paint Booth was put on hold at the beginning of the quarter while staff reevaluated the original scope of work. It was determined that the initial plan to build a small paint booth would provide only limited capability to support the Metro Green Line (MGL) Rail Fleet Services (RFS) car body repair and painting functions. The reexamination resulted in a better solution to accommodate MGL RFS body repair and painting functions without environmental restrictions that would cause delays to the repair/painting operations. Staff worked on developing a revised scope of work to create a more efficient, safer, environmentally friendly repair/paint facility. The new scope will take unused yard space (in the northeast corner of the MGL yard) and put it to use by building a stand-alone paint/body repair facility that will allow Light Rail Vehicles to be driven in and will contain and/or filter any emissions or fumes to satisfy EPA concerns and eliminate limitations as to how much painting can be done on a daily basis. Since the revised scope of work is a different project than the original concept, the present project will be cancelled, the expenditures to-date reversed from capital to operating expenses and a new project requested when the revised scope of work is fully defined.

Other Capital Projects

The Universal Fare System project and the Regional Clearinghouse Project (TAP) are continuing in FY09. Project management is reporting on the progress of both projects at the monthly Operations Committee meetings.

CP#210095 Metro Bus Division Behavior Recognition Software project was delayed because the bid for the project exceeded the LOP. Staff requested approval from the Department of Homeland Security to transfer funds from CP 210096 to cover the cost overrun. A request for an LOP increase will be presented to the Board.

Several projects included in the Warehouse element are projected to be completed under budget. Overall, they experienced a \$218,835 reduction to the total project costs.

Summary of Governmental Funds

The Governmental Funds budget includes Special Revenue and General Fund programs and projects. The Special Revenue Fund includes all sales tax subsidies to other entities, including the Local Return Program to Cities, Formula Allocation Procedure to municipal bus operators, Access Services, Metrolink Operating and Capital, the Incentive Program, and the Call for Projects.

The subsidies portion of the budget experienced cash flow delays due to the timing of invoicing from the other entities. Local return subsidies are equal only to the sales tax revenues earned. Since the revenue earned was less than budget, the related subsidy expenses are also below budget.

The schedule and scope changes in the HOV lanes on I-5 caused schedule delays which contributed to the \$22.7 million variance for the Freeway projects. Metrolink was \$12 million under budget primarily due to delays in capital expenses for rolling stock and renovation and rehabilitation. Regional Surface Transportation Projects were under budget by \$15.7 million, primarily due to invoicing delays with the Alameda Corridor East (\$7 million). The other variances were the result of delays while they refine the project scope, including Mission Blvd SR-71 grade separation (\$4 million), Goods Movement project (\$2 million) and other surface improvement projects (\$2.7 million). Metro Rapid Improvement projects were under budget by \$6.2 million due to delays in contract negotiations between us and Culver City and Glendale related to signal prioritization, and between us and the County of Los Angeles related to station construction.

A summary of the activity in the subsidies-to-others through the fourth quarter follows:

For the Twelve Months Ending June 30, 2008

(Amounts in Millions)		FY08 Actual	FY08 Budget	Variance Over/(Under)
1	A & C Local Return	\$297.1	\$301.6	(\$4.6)
2	Prop A Bus FAP	66.7	74.5	(\$7.8)
3	Prop C Bus FAP	33.9	33.5	\$0.4
4	TDA Formula Subsidies	95.1	86.0	\$9.1

The year-end account summary for the Special Revenue Fund and the General Fund, excluding subsidies, is summarized below:

For the Twelve Months Ended June 30, 2008

(Amount in Millions)		FY08 Actual	FY08 Budget	Variance Over/(Under)
1	Labor	\$29.8	\$30.8	(\$1.0)
2	Fringe Benefits	10.2	10.1	0.1
3	Professional Services	38.1	59.9	(21.8)
4	SAFE, FSP and other Services contracts	33.1	47.0	(14.0)
5	Workers' Comp	0.5	0.5	0.0
6	Insurance	0.3	0.5	(0.2)
7	Travel	0.3	0.3	(0.1)
8	Other including Overhead	20.0	15.9	4.1
9	Total Expenditure	\$132.3	\$165.0	(\$32.7)

The Special Revenue Fund and the General Fund also includes budget for work done by us such as Ethics and County Counsel expenditures, Service Authority for Freeway Emergencies (SAFE), Freeway Service Patrol, planning and programming of funds, Internal Auditing and Inspector General expenditures, all lobbying activities and other non-allocable costs. The implementation schedule for MATIS (Motorist Aide and Travelers Information System) contributed to the \$14.0 million under run for Contract Services. Planning studies for I-710 EIR and BRT projects were the primary causes of the \$21.8 million under run in Professional Services.

203009	FY06 Replace Regional Rebuild Center Shop Equipment	422,246	0	561,000	(138,754)	Project completed in May 2008.
203010	FY07 Replace Regional Rebuild Center Shop Equipment	393,882	(115)	574,000	(180,233)	Project completed in May 2008.
203011	FY08 Replace Central Maintenance Shop Equipment	325,433	614,188	1,014,896	0	Remaining equipment invoiced and paid, except for \$605,000 unexpended but encumbered funds which are designated for modifications to Building 5 to enable fueled CNG buses to be in the paint and trim shops (\$500K) and for a breathable air filtration system in CMS Paint Booths to meet OSHA requirements (\$105K). Both projects are to be completed and invoiced in FY09. Will seek Board approval to reprogram \$500,000 of the unused but encumbered funds from this project to a new project for the Building 5 CNG modifications.
203015	170 CMS Engine Rebuild Program - FY08	7,292,150	1,530,884	11,000,000	(2,176,965)	CMS could not complete the number of engine replacements anticipated for the following reasons: - The late arrival of the first prototype engine caused delays for the development and procurement or fabrication of the additional parts and components needed to complete installation. - Manpower- At the start of FY08, the Running Repair shops had 20 out of the 41 required mechanics. In April, we finally secured 41 positions but the learning curve for the mechanics, many of whom are new to the position at Metro, is still a significant impediment. Fiscal year to date production for the FY08 Engine Replacement project includes 54 L1-26 engine replacements and 40 engine repairs.

200225	Universal Fare Collection System	86,722,333	4,481,525	97,607,000	97,607,000	0	FY08 Q4: Staff worked with contractor Cubic to complete the punch list and close out the UFS Base Contract. FY09 Q1: Relocation of TAP test lab from RRC to the USG building. Staff to continue working with Cubic to close out punch list and close out UFS Base contract by Dec 2008.
200351	Regional Service Center and Clearinghouse	13,642,875	3,014,136	20,071,678	20,071,678	0	Accomplishments FY08 Q4: Launched TAP sales for Metro monthly and weekly passes at 15 downtown Third Party Vendors (TPV) in June. Initiated the process of expanding TAP sales to the Wilshire region TPV network for the August 2008 pass sales. Completed System Integration Testing for the regional central data computer system (RCDCS) which had been transferred from Cubic to the ACS facility in Orange County. Completed initial post delivery testing of the RCDCS. Metro staff completed training on RCDCS. Rolled out the TAPTOGO website to allow customers to purchase TAP passes, load TAP passes and register their TAP cards. Met with Norwalk, Montebello, and Foothill to discuss their transition to TAP during FY08 Q4. Deliverables for FY09 Q1: Begin Third Party Vendors pass sales in Wilshire region and prepare expansion of TAP sales in the San Fernando TPV network. Develop a plan to expand TAP sales for reduced fare passes. Meet with Norwalk, Montebello, and Foothill to move forward on installation of fareboxes and initiation into the TAP program. Complete testing for the RCDCS and migrate Metro, Santa Clarita, and Culver City data to RCDCS. Begin cutover planning for next two municipal operator installations.

Rail Facilities Improvements

CP/FIS Project No.	Project Title	Inception-to-Date Expenditures	Cost to Complete Estimate		Total Forecasted Expenditures	Board Approved Life of Project	Increase/Decrease	Comment
			Encumbrance	Balance of Project Costs				
204054	Division 20 Additional Vehicle Hoists	800,300	1,626,700	1,823,000	4,250,000	4,250,000	0	FY08 Q4: Contractor has corrected and resubmitted required paperwork. Construction Management negotiated a contract modification for excavating the pits. FY09 Q1: Contractor to initiate and complete pit excavation. Contractor will take pit measurements for preparation of hoist equipment installation.
204059	Division 22 Spray Paint Booth	116,114	70,000	138,362	324,476	324,476	0	FY08 Q4: Project was put on hold at the beginning of the quarter while staff reevaluated the original scope of work. It was determined that the initial plan to build a small paint booth would provide only limited capability to support the Metro Green Line (MGL) Rail Fleet Services (RFS) car body repair and painting functions. The reexamination resulted in a better solution to accommodate MGL RFS body repair and painting functions without environmental restrictions that would cause delays to the repair/painting operations. Staff worked on developing a revised scope of work to create a more efficient, safer, environmentally friendly repair/paint facility. FY09 Q1: Staff will continue developing a revised scope of work. The new scope will take unused yard space (in the northeast corner of the MGL yard) and put it to use by building a stand-alone paint/body repair facility that will allow Light Rail Vehicles to be driven in and will contain and/or filter any emissions or fumes to satisfy EPA concerns and eliminate limitations as to how much painting can be done on a daily basis. Since the revised scope of work will cost more than the original concept, the present project will be cancelled, the expenditures to date reversed from capital to operating expenses and a new project requested when the revised scope of work is fully defined.

This is the annual contingency project used to fund new security related projects. Projects under \$1 million are requested, authorized, and initiated under the Rail Engineering Service Request (RESR) process. Funds are transferred to the new projects from this contingency fund and this project's LOP is reduced accordingly. No expenditures (acquisition or labor) are performed under this project. FY08 Q4: Funded a new project, 205082, for \$400,000 to install security cameras in the subway cross-passages and reduced the contingency fund's LOP by a corresponding amount. Closeout letter issued 6/30/08. FY09 Q1: Project will be closed out underspent by \$600,000. The unused funds will be reprogrammed into the FY10 capital program.
204081	Division 20 HVAC - Phase II	3,184	41,533	267,283	312,000	0	FY08 Q4: Equipment procurement process was completed and a purchase order issued. FY09 Q1: Receive delivery of equipment and begin installation.
204082	UPS System & Backup Generator for Loc 61 - Bldg A	5,504	110,822	258,279	374,605	0	FY08 Q4: Design phase was completed. Procurement initiated readiness review for bid specification. FY09 Q1: Complete readiness review 40 meetings and submit required paperwork for equipment purchase.

		Inception-to-Date Expenditures	Encumbrance	Balance of Project Costs				
206005	P2000 Vehicle Signaling Package Upgrade	234,090	6,252	3,123,658	3,364,000	0	FY08 Q4: All activity on this project is tied to the P2550 car acceptance program. There were no additional P2550 cars accepted in Q4 so no work was performed on any P2000 cars. FY09 Q1: The plan calls for eight P2000 Gold Line cars to be modified and moved to the Green Line sometime in FY10 or later depending on acceptance of the P2550 cars and their subsequent performance on the Gold Line. The ATC (Automatic Train Control) package replacement will then be farmed out. The remaining sixteen P2000 cars on the Gold Line will eventually be put into operation on the Blue line. Their ATP will have to be reprogrammed by the OEM in order for these cars to run safely at the Blue Line.	
206029	FY08 RFS Tools & Equipment	262,812	76,293	0	339,104	431,463	(92,359) FY08 Q4: Battery scrubbers were received in April. Bridge crane (long lead item) remains to be delivered in September 2008. Delay was due to change in specification and added costs requiring requisition to be resubmitted. Completed accrual for remaining invoice. FY09 Q1: Verify payment of final invoice for bridge crane. Initiate project closeout documents. Project is expected to close approximately \$92K underspent. Unused funds will be reprogrammed into the FY10 Capital Program.

205012	MBL Four-Quadrant Gate Program Expansion	4,602,027	299,694	5,655,000	(500,000)	FY08 Q4: At the end of Q3, unanticipated delays caused by weather and emergency track welding caused the contractor to lose track allocation and access, making it impossible to complete the work as originally scheduled. Staff went back to the Board to obtain an increase in the Contract Modification Authority (CMA) to cover any changes and potential overhead. As a consequence, construction work was not completed until Q4 and testing originally scheduled for Q4 slipped into FY09 Q1.
				5,155,000		FY09 Q1: Contractor to complete testing the four quadrant gate system at the 5 intersections in Compton. Develop a punch list of corrective actions required by the contractor. Contractor to initiate work on the punch list and complete 80% of the tasks. Based on advice from the CPUC, staff to evaluate modifying the length of the Alondra Gates and finalize the design drawings for the modification. Initiate close out of the design contract with PB Farradyne.
						The delays discussed above have caused a change in the anticipated completion date from 9/30/2008 to 6/30/2009, but the project is expected to close underspent by approximately \$500K.
205014	Light Rail Train Tracking Improvements	300,534	634,223	955,801	0	FY08 Q4: Track overlay circuits - GEC systems work bench was approved. Task orders were finalized. Train tracking - completed installation and field testing at Transit Mall station. Submitted purchase requisition to procure remaining equipment. Metro metal shop started fabricating enclosures.
						FY09 Q1: Track overlay circuit - contractor to begin installation and field testing of all track overlay circuit. Train tracking - complete installation and field testing at 3 of 8 stations.
